

Uzumaki: I can comprehend anything

Chapter 6 - Hidden Base

After the huge commotion, the whole Clan become alert creating a tense atmosphere around the Uzumaki Clan.

But in the end, with the help of Elder and Clan Leader, the whole situation finally cleared, but still, you can still sense the unusual atmosphere around.

"So the entire Uzumaki Kingdom has officially stepped into preparation for war. Only in this way we can defend the whole Uzumaki Clan from the enemies coming from us." Uzumaki Xin earnestly said.

"But the civilians in the country?"

Heard that Xin wanted to use the entire country as the place if war, a Clan Elder suddenly felt unbearable in their hearts, this would be too cruel to the civilians.

"Don't worry, Civilians, Children, Woman, and those who can't fight and wounded people is already arranged."

"I started preparing a place year ago for them to hide."

"Are you talking about the huge cave you dug behind the mountain?"

The Clan Patriarch asked, they all knew what Xin did, they wondered why he wasted such beautiful mountain just to dig an artificial cave on it, they thought he was just playing around.

"Lucci, explain."

Lucci walked in front while the others put a huge board in front, they then put a huge scroll showing a white sketch.

"Ten feet high, four hundred meters in diameter, that's the only entrance, below consist of five layers with different kinds of floors included."

"The first floor is a huge open field using Earth Style to make sure that the whole cave will not collapse."

"We prepared a set of rooms good for one family, with dining room, living room, bedroom, kitchen, and even the bathroom."

"We made exactly the number of the family in our clan with additional twenty vacant in case we need it."

"Below is the storage room, the place is cold so it's dangerous to enter there, that whole place has three years worth of food for everyone."

"Third is the training ground, we can't let others sit and wait to die so Young Master created a perfect training ground for everyone."

"The training ground is perfect, there's four types of climate you will face there, a complete set of training equipment, gravity room, and lastly is the House of Time that you will like."

"House of Time?" One Elder asked.

"A room with different time speed, inside is slower than outside, 1 day outside is equivalent to 3 days inside."

"Wait! What?!"

"Is that even possible?!"

Lucci looked at them with a prideful look and said. "It's possible, we are the products of Time House, each of us spends ten to fifteen years inside to train."

They understand now, so that is the reason why they are strong while they are still young.

"Is there any side effects?"

"Nothing, except it's boring inside and no one can stay there for so long just to train."

"Idiot! How can you not use which miraculous room! If the outside world hears this, they will surely try their best to conquer us!"

"But Elder, almost half of us is just a kid when we first use Time Room."

"..."

Well, that's right, there's no way these children stay on that boring place without doing something exciting.

They are all just a bunch of kids after all.

"Fourth Floor is a huge library, the whole place is huge full of books and scroll that Young Master created, there's also weapon, armor, Pill, and some powerful items that no one ever see."

"Lastly is the laboratory, the fifth floor is only use by Young Master only, it's a private floor, only Young Master and Kushina can enter and exit their."

"No one ever enter? Why?"

"It's dangerous, you can die if you enter illegally." Kushina said.
