

Uzumaki: I can comprehend anything

Chapter 8 - S Rank Jutsu

"Is everyone here?" Xin look at them and asked, while the Clan Leader and Elder watch in distance.

"Yes!"

"Good, I will first going to separate you all base on your Chakra Nature."

"Forward those who have Lightning and Wind Element!"

Twenty five of them step in.

"You guys will be the main force of our Clan, the attack team."

When they heard this, everyone can't help but to feel nervous, after all, not everyone train to become a Ninja.

"Don't worry, I will not send you in front line, what you need to do is to follow me and no one will die from you." Seeing their reaction, Xin promise them.

"Lucci!"

"Yes!"

Lucci walk and pass scroll to them while he start to introduce what kind of Jutsu they holding.

"That is a perfect Magnet Release, name Railgun."

"Railgun or Super Electromagnetic Cannon is a simple but almost perfect Jutsu that Young Master created."

"This Jutsu is pretty simple, you just need to hold a iron object and inject your Lightning Element into it, then using Wind Element that you compress you will inject it forward creating a super fast, and dangerous light beam that can kill anyone within ten kilometers."

"Wow!"

They are all amazed, how can such powerful Jutsu can be simple as having Lightning and Wind Element is enough.

"It seems you guys are not a fool, Lucci explain to them they need to prepare."

"If you want to train this, you are not only need the two basic elements but also a strong arms and body to hold the projectiles."

"If not, it will explode and kill you in spot, and before I forget, Magnet Release: Railgun is classified as S Rank or Semi Forbidden Rank because of the danger for the user."

"But don't worry, we come up with pretty good solution for this."

Xin then look at them and said." Step down you guys, Earth and Lightning Element step in."

This time only two people step in, they are also both girls and same time a twins.

"Only them?" Xin asked.

Each of them look to each other then look back at Xin.

"Well they are girls but, anyway, Lucci tell them what they needed to do."

Lucci look at the twin and pass a scroll.

"Iron Bending Release: Art of Iron Forging."

The twin look blankly at the school and look back at Xin.

"Well, no other who knows those two elements so please bare with it, just as the name said, it's a Jutsu that involves molding metal, it's like a blacksmith job but using Jutsu."

Lucci then pass a scroll.

"What inside is the blueprint of a full body armor made from the iron that you can create using the Iron Bending Release, as for the training of the technique, you are lucky enough to have a teacher for this one."

Kushina walk and patted their shoulder.

"I'm the best Iron Bending Release here, I will teach you what you need to know, and by the way, the hardest Metal I created using that Release is Adamantine Bat."

"Not even Chakra Blade and even Seven Ninja Sword from Hidden Must Village can't cut it."

"Really?'

Kushina proudly nodded.
