

Uzumaki 87

Chapter 87 - Finding Building Resources

As day pass by, the construction of Uzumaki Clan is getting faster and faster, because of Xin's and Elders presence around the construction site no one is lazy.

There's a huge problem come out after couple of days, the building resources is getting lesser and lesser.

Because of the fast working of everyone, the building resources can't replenish as fast as they consume so in Xin's calculation the resources will empty within two days.

And not only that, because of the amount of refugees never decrease, the amount of housing need to increase, so the building materials is getting consume fast.

So Xin come up with a plan, he use his whole day to create a Jutsu to solve the building materials problem.

....

Near construction site.

"What are you going to show us Xin?"

"A solution to the materials problem."

Xin without a deal slap the ground.

"Earth Release: Earth Search!"

Xin close his eyes and try to sense the ground, couple of minutes later he found his target.

"Come, to the Clif on the west side."

They all disappear and appeared minutes later to the west side.

The west side is cover with long high Clif, from above you can see the deep blue ocean showing how deep the ocean on that part.

Everyone is confused, so Patriarch asked." What are we going to do here?"

"We will excavate Granite under the ocean."

"Granite? What's that?"

"Granite is an igneous rock composed of mostly two minerals, quartz and feldspar."

"It is an intrusive rocks, meaning that it crystallized from magma that coolded far below the earth surface."

"So what is the use of Granite?"

Xin smile." Many, not only Granite is harder than bricks, Granite is also beautiful and shiny when you polished it, maybe not precious as Jade and other precious rock but the usefulness of Granite is huge."

"And also, Granite is so hard that even C Rank Jutsu can damage it, even Knife, Sword and other sharp tools can not scratch the surface of it."

"This!? How can that be possible! I never heard such rock!"

"Let me pull one for you first.'

Xin clap his hand and slap the ground.

"Earth Release: Earth Cutting Jutsu!"

"Earth Release: Ultralight-Weight Earth Technique!"

Xin send his chakra deep underground, from below there's a huge quarry below the sea, he just cut 1 ton of block and use the Ultralight-Weight Earth Technique to drastically decrease the weight of the Granite.

From below the sea, you can see object coming out of the surface, it's a block of rock coming out of the water.

It's a huge cube rock with rich red color and intricate patterns, because of the sea water, the block of rock is shining under the sun.

"Beautiful!"

"Amazing! How can rock so beautiful!"

Xin pull the block of rock and put it down on the forest behind them, with the weight of it, the trees around crush into pulp.
