

Uzumaki 88

Chapter 88 - Granite

Clang!

Clang!

One of the Elder use kunia to poke the Granite, and just like what Xin said, the Granite is hard, so hard that he can feel the tingling sensation on his hand when he add strength to his attack.

"Is this Granite?" Fourth Elder touch the solid granite rock with his hand and wipe it showing the shining luster of the rock.

"Amazing, are you sure this is not precious stone?"

"Yes, and Thai is a High Quality Granite, Imperial Red Granite, at same time the color of it is match the color of Uzumaki Clan."

"Yes! Yes! A rich color red that symbolize the Uzumaki."

"This is good, we can make many things using this."

"I think we can create status of our ancestors using this."

"You are right Old Five, now you said that, I feel that Granite is so precious to use it to create refugees housing."

"Hey Xin can we just keep it?"

All of them feel same way, they feel that Granite is so much valuable to use for the Refugees Housing.

"If you like it, you can keep it, this Granite is perfect use for wala, floor and even the table and chairs."

"But what about the housing resources?"

"Don't worry."

Xin clap his hand in the group again.

"Earth Release: Earth Cutting Jutsu!"

"Earth Release: Ultralight-Weight Earth Technique!"

Away from the previous position where Xin pull the first block of granite, another block of granite is being pull.

"Another Granite Block?"

The block of granite is mixed colors of gray and black with intricate veining pattern into it, not like the rich color of red just now, but the color shows how durable and strong the materials.

"This is good, same quality and the color is also good. Hey Xin can I have couple of this as pillar of my house?"

"Second Elder, your to much, you already start to cut the red one and you still want to have cut in this second one."

"I just like the color of that one."

Xin smile at them seeing they fighting for the building materials of the refugee camp, well in his previous world, Granite is symbol of luxury, only those who are multimillionaire can afford Granite as tile and wall.

While they are busy, Xin use his Jutsu to cut the block of granite into small pieces just enough to carry easily.

But because of some Elder who want a bigger piece, Xin cut some human size and give it to them.

When they start to transport it, the Elderly notice something.

"Hissss! How can this thing so heavy!"

"A size tall as me is already three tons?"

"No! How can this rock abnormally heavy?"

Xin cast Ultralight-Weight Earth Technique to rock to amek it lighter.

"Granite is not only durable and strong, it is also super heavy, because of the density of the rock is ten times than normal rock."

"..."
