Chapter 1911: Disastrous Duo versus Baxia

—

“Mo Fan, you’ve always been the hero. It’s my turn to put on a show this time!” Zhao Manyan declared proudly.

With the Totem Beast Baxia’s help, he was going to change the situation in a city that was currently fighting disaster. There was nothing more satisfying than this, especially when he heard Xiamen had a lot of beautiful women. After he saved the city, many beauties were going to take the initiative to climb into his bed. He could change his partner every day, or perhaps enjoy the company of a few of them every day...

“Alright, Baxia, show those two idiots the strength of the Totem Beast!” Zhao Manyan was extremely excited.

As a matter of fact, he never imagined the defense of a huge number of Mages was inferior to the power he possessed. The sense of being superior to everything felt more pleasant than women!

Zhao Manyan pointed forward and unleashed the unruliness and passion he had long withheld as he gave Baxia a command!

“Charge!” Zhao Manyan shouted once again.

The enormous Baxia stood in the strait, a watery valley between island and shore.

He did not move, but the eyes hidden under his thick skin were staring at Qiu Chi and Qiu Zi. He completely treated Zhao Manyan’s excited cry as some insignificant breeze.

Zhao Manyan immediately felt awkward when the creature totally ignored his order.

“Old Zhao, stop acting like he’s going to listen to you,” Mo Fan helpfully added another blow.

“Damn it, this old tortoise, he never listens to me. Why does he keep looking down on me? I’m a Super Mage now!” Zhao Manyan blushed.

“Can Baxia handle them? Those two creatures aren’t easy to deal with!” Mo Fan said with a worried face.

“It’s going to be a little tricky, but I can ask the advisors to lend Baxia a hand,” Zhang Xiaohou said.

—

Baxia was concentrating intently. He was currently in his focused stance.

He could not afford to charge recklessly. Qiu Chi was one of the few creatures in the East China Sea that could match his strength. If he seriously followed Zhao Manyan's rather dumb order, he would lose in just a few rounds.

However, Qiu Chi was even more anxious!

They were so close to destroying the Jimei Bridge. Once the rest of the sea monsters arrived, the city would turn into their hunting ground and festival grounds.

Baxia's intervention had completely ruined their plan!

More humans were being evacuated from the city. Qiu Chi was losing its patience as the prey creatures of the hunting ground it had carefully planned were sneaking away!

Qiu Chi was the first to move. Its back was like a sea dragon with a jagged spine. It completely exposed its jagged bones as it uttered a furious roar. The jagged bones turned into countless terrifying swords.

Qiu Chi curled its body and dug its head into its chest, like a rhinoceros with horns on its back, pointing its weapons at the enemy!

Everyone thought Qiu Chi was going to gather its momentum while charging at its target, yet the enormous creature suddenly lunged forward at a terrifying pace.

The seawater and the island nearby were shattered into pieces by the sudden burst of speed. Qiu Chi had turned into a meteorite covered in sharp weapons. It swept through the strait and headed right at Baxia!

The shockwave from the collision between the two enormous creatures could easily sweep a few kilometers away. Qiu Chi rammed into Baxia with its sharp bones. However, the latter was utterly reckless. He simply withstood the blow with his flesh.

His enormous body was continuously forced backward by Qiu Chi. He was initially two kilometers away from the bridge, but he almost destroyed the bridge when he was knocked back by the force of the impact.

"Don't let them collide into the bridge!" Zhao Manyan yelled after he realized what the Disastrous Duo were up to.

Baxia's body began to emit a brown light. His weight increased rapidly under the special Totem glow. His body sank slightly into the water as he turned into an immovable boulder.

The remaining shockwave swept at the bridge. Many Mages were still protecting it with Magic Formations, or the force could easily have knocked the bridge down.

"Be careful of Qiu Zi!" Zhao Manyan reminded Baxia.

Qiu Zi was an extremely cunning creature. It immediately dove into the sea, its body was releasing a lot of steam as soon as Qiu Chi rammed into Baxia. It quickly followed behind Qiu Chi and snuck up to Baxia while the two enormous creatures were brawling!

Qiu Zi's head bore a pointed reptilian muzzle. Its head was not particularly huge, but when it opened its mouth, it could extend its bite a huge margin. The fangs exposed under its upper jaw were brimming with heat!

The scorching bite was effective against many creatures with thick skin. Qiu Chi was holding Baxia's neck and head firmly. The Disastrous Duo had a certain level of synergy. Qiu Chi was preventing Baxia from withdrawing his neck and head into his shell so Qiu Zi could bite his neck!

The brown light around Baxia intensified. It quickly Summoned a shield of brown energy above him. Qiu Zi ended up biting the shield, resulting in a thunderous clanking sound.

Fresh blood jetted out of Qiu Zi's fangs. It had set itself up by trying to defeat Baxia with its first attempt. It quickly dove back into the water.

Qiu Zi did not dare to compete with Baxia in terms of strength. If Baxia had a chance to get his hands on it, he could easily break its bones!

Qiu Chi had parasites both on its skin and inside its body. Countless demon leeches were crawling onto Baxia's skin while they were in a standoff.

The demon leeches had no chance of harming Baxia, yet they contained a strong acid in their bodies. If they climbed onto Baxia and detonated themselves, they would splatter the acid all over Baxia's skin. The acid would corrode his thick skin!

"Those leeches are Baxia's weakness!" Zhao Manyan blurted out when he saw the blisters forming on Baxia's skin.

"We can't just stand here and watch. Old Zhao, tell Baxia to focus on those two. We'll handle the parasites!" Mo Fan said.

Chapter 1912: It is Calling for Reinforcements!

"The demon leeches aren't the only parasites on Qiu Chi's body. There's also another species of demon grasshoppers with extremely high temperature," Zhang Xiaohou reminded them.

"Baxia and these two creatures are arch-enemies. As a matter of fact, the Disastrous Duo is part of the reason why it went to Japan. Qiu Chi's strength is in fact inferior to Baxia's because of his godly shell. It's unlikely for Qiu Chi and Qiu Zi will be able to harm him, but sometime in these last few dozen years, Qiu Chi obtained a strange power that makes the parasites in its body a lot stronger. These never-ending parasites keep corroding Baxia's skin and shell. During their last encounter, Baxia left the East China Sea with serious injuries. He has been disguising himself as an island close to the land for a long time..." Zhao Manyan said.

Baxia had always been searching for a suitable Totem Guardian. Most Totem Beasts had obtained their power from humans through the Totem Containers.

The East China Sea was Baxia's territory. He had been expelled to other oceans after Qiu Chi and Qiu Zi took over his territory. He no longer had a fixed place to stay. Most importantly, a Totem Beast would never allow itself to be a wanderer, valuing its pride.

Baxia needed more power, so he kept urging Zhao Manyan to grow stronger.

Only when Zhao Manyan grew stronger would he be able to lift the Totem Seal and Awaken Baxia's true strength!

This time, Baxia had returned to his territory and was daring enough to challenge the Disastrous Duo because Zhao Manyan had reached the Super Level and acquired the Totem Power from the remains of the Totem Beast at the bottom of the sea. It had helped to improve Baxia's strength!

"Baxia, we'll take care of the insects for you, but you should protect us too. We are on your back!" Zhao Manyan told Baxia.

Mo Fan, Zhang Xiaohou, and Zhao Manyan landed on Baxia's back. It actually felt like an island to them considering the amount of space they had. It was an extremely spacious dueling ground!

Baxia made some noise, most likely to acknowledge Zhao Manyan's words.

"He will protect us if Qiu Chi and Qiu Zi attack us," Zhao Manyan said.

"Brother Fan, look, what is Qiu Zi doing?" Zhang Xiaohou pointed at the strait.

Mo Fan looked where Zhang Xiaohou was pointing and saw Qiu Zi staying in the water. However, it had straightened its head while emitting strange sound waves into the clouds.

Mo Fan could not hear the sound waves, yet his brain kept buzzing in pain.

"It's Calling!" the Sound Mage who was commanding the battle blurted out.

The best thing was that the pain in Mo Fan's head disappeared after he heard the Sound Mage's voice.

"What is it Summoning?" Mo Fan asked after he felt a lot better.

"Sea monsters, it's Summoning every sea monster in this region!" the Sound Mage said.

Mo Fan glanced at the device on his wrist. There was not much time left until the eight hours mark.

Mo Fan had a clear view when standing on Baxia's back. He noticed countless waves rising around him. There were sea monsters riding the waves toward them, regardless of the direction he was looking in!

"They are trying to destroy the bridge with everything they have!" the advisor in a silver outfit said.

"These scum, are they really treating us as their food? This is unacceptable, we won't let them leave in one piece since they dared to invade our land!" the Super Mage in the blue outfit snarled.

"You guys, aren't you going to tell us what exactly is that enormous brown beast first!?" the female advisor said.

Mo Fan looked at the advisors. The female advisor was most likely the leader of the Donghai Magic Association. He recalled seeing her on Gulangyu before.

“It’s a Totem Beast. Councilman Shao Zheng sent the few of us to search for the Totem Beasts that had been lost to resolve the crisis along the shoreline. His name is Baxia...” Mo Fan explained, but Qiu Chi suddenly pounced at them in the middle of his sentence. Its enormous claw almost knocked Mo Fan, Zhang Xiaohou, and Zhao Manyan off.

Luckily, the three of them had reached the Super Level. They were no longer mere ants against these enormous creatures. They were not in danger as long as the attacks were not targeting them directly.

“Enough questions, we know it’s here to help us! The brown beast is obviously struggling to take on both sea monsters by himself. We’ll take care of Disastrous Beast Number Two. That thing which keeps releasing hot lava and steam is obviously not friendly to us!” the advisor in the silver outfit announced.

“Advisors, I can hear thousands of sea monsters coming toward us,” the old Sound Mage said sternly.

The three advisors looked into the distance and saw a terrifying horde approaching!

“Can you three fend off Disastrous Beast Number One for the time being? If so, the three of us will handle Disastrous Beast Number Two. The rest will protect the civilians on the bridge from the army of sea monsters!” the advisor in the silver outfit said.

“Got it!” Zhao Manyan answered.

“You have my thanks!” The Super Mage in the silver outfit glanced at Zhao Manyan, as if he was trying to remember his face.

He was clearly not ordinary if he was able to order a Great Ruler Beast around!

—

“Baxia isn’t afraid to fight that thing if it’s alone,” Zhao Manyan said.

“We still have to take care of the demon leeches. These things are seriously disgusting. They are extremely aggressive too,” Mo Fan said.

“There are so many of them. They are climbing up!” Zhang Xiaohou looked around him and saw the demon leeches climbing onto Baxia.

In Baxia’s eyes, the demon leeches were more like corrosive fleas. It was troublesome for him to keep an eye on so many tiny parasites at once due to his size. If he just ignored them, they would dig into his pores and his skin, resulting in a lot of damage. However, he would waste a lot of energy just to get rid of them, and their acid would still splatter all across his body when they died!

“We are currently the Darknin Brothers. We are here to cleanse the parasites!” Zhao Manyan once again felt like he had entered the limelight. He was overwhelmed by excitement.

Chapter 1913: Pest Exterminators

The insects just kept coming. An army of demon leeches had already crawled onto Baxia's body after some contact with Qiu Chi. They immediately headed toward the unprotected spots, as if they already knew where Baxia's weak points were.

"Brother Fan, the Parasitic Steaming Locusts are circling above us!" Zhang Xiaohou pointed out.

More parasites had appeared from Qiu Chi's body as Baxia kept knocking it away from the bridge. The parasites consisted of the demon leeches and the Parasitic Steam Grasshoppers. The parasitic grasshoppers were like flies circling a huge corpse, as they flew in groups around Qiu Chi.

They were different from the demon leeches that were continuously falling onto Baxia's body. These parasitic grasshoppers would let the demon leeches scout the area ahead first. Whenever the demon leeches located a weak point, the parasitic grasshoppers would dive at the spot together, like they had picked up the scent of some rotting flesh!

As a matter of fact, these parasitic grasshoppers were the digestive system in Qiu Chi's stomach. Humans normally relied on the gastric juices in their stomach to digest the food they ate, but Qiu Chi did not have gastric acid in its stomach. It relied on the heat of these Parasitic Steam Grasshoppers to melt the food. Qiu Chi would obtain the nutrients and energy it needed, and the rest was split among the burning locusts!

Therefore, these Parasitic Steam Grasshoppers were just as horrifying as the demon leeches. As parasitic creatures, their biggest strength was their ability to disintegrate everything, be it flesh, skin, bones, or other strange objects!

"I'll deal with those in the sky. Can you two handle the demon leeches?" Mo Fan asked Zhang Xiaohou and Zhao Manyan.

"How are you going to fight those in the sky when you can't fly?" Zhao Manyan had to ask.

"Don't worry, I'll take them all out regardless of their numbers!" Mo Fan declared.

As soon as Mo Fan finished his sentence, Baxia once again secured the upper hand in another exchange of brute force. It used the elbow of its front limbs and shattered the sharp bones on Qiu Chi's back. The creature let out a painful cry as its black bones were broken to pieces. It was very likely that the bones connected to them inside its body had fractured too!

Qiu Chi was knocked further back. They were now over three kilometers away from the bridge. They no longer posed an immediate threat to the people being evacuated across the bridge.

Qiu Chi let out a furious roar. The Parasitic Steam Grasshoppers that were still looking for an opportunity to strike ran out of patience. They began diving at Baxia, carrying out a kamikaze attack with the special heat their bodies contained. They were using the same move as the demon leeches!

These Parasitic Steam Grasshoppers were the gastric juices in Qiu Chi's body. If it was only one or two of them, they could not have left a single wound on Baxia's body. However, when thousands of them were attacking the same spot, they could easily burn through Baxia's skin!

Baxia's body was mostly protected by his shell. He would normally block eighty percent of the damage when fighting a creature like Qiu Chi, but the Parasitic Steam Grasshoppers were like fleas to him. His shell was not so effective against them!

"Nice, I like it when they bundle up!" Mo Fan saw the Parasitic Steam Grasshoppers' plan to carry out a suicide attack.

The flames of the Ardent Sunset erupted on his palms. He waited for the right moment!

"Old Zhao, I won't hurt Baxia if I set his back on fire, right?" Mo Fan asked after he suddenly thought of something.

"Your flames are no different from a heater pack on his skin. Just go ahead, he's more worried about those corrosive parasites! Elemental Magic won't hurt him so easily," Zhao Manyan said disdainfully.

"Great, I can use everything I have then!" Mo Fan grinned.

Fighting on Baxia's back was better than fighting on the sea, since his Fire Element was only weakened slightly here.

"Little Flame Belle, is the furnace ready?" Mo Fan asked.

"Ling!~" Little Flame Belle responded joyfully.

Little Flame Belle had learned how to refine her flames to make them purer and stronger after the battle against the Viscera Hunters.

If she could refine the Calamity Fire, she could do the same thing to the Ardent Sunset too! Mo Fan had already told Little Flame Belle to prepare herself when he saw the Parasitic Steam Grasshoppers roaming around.

Little Flame Belle liked refining her flames, but she enjoyed seeing the destruction her flames could bring even more!

"Alright, let's wait for them to come a little closer!" Mo Fan continued waiting for the right moment to strike.

The Parasitic Steam Grasshoppers' wings were almost transparent, and their bodies were constantly emitting steam under high temperature. They looked like clusters of meteorites as they dove together. The thick steam also acted as a protective layer around them!

"Lava Pond!"

Mo Fan lifted his hands. The refined Ardent Sunset erupted like a furnace in the shape of a hexagon. Inside it were thick flames that extended out like the tongue of an enormous burning frog. It reached into the sky and swept the brainless parasitic grasshoppers toward itself!

The Ardent Sunset had the ability to spread rapidly in tight clusters. Even the faintest spark could grow into a huge fire. The devouring flames continued to stack on top of one another, and the parasitic locusts in the sky were like dry grains. The flames burned them to ashes as they spread further and further among the locusts' ranks.

The light of the flames flickered continuously across Baxia's back. The creature purposely turned his head around and looked at Mo Fan.

"I understand! I hate mosquitos the most when it's summer too!" Mo Fan smiled when he saw Baxia looking at him.

Mo Fan had almost set a whole street on fire once while he was eliminating mosquitos, but these Parasitic Steam Grasshoppers were over a hundred times deadlier than mosquitos. Mo Fan could imagine how terrible Baxia felt when he had fought Qiu Chi in the past!

The Ardent Sunset was godly against insects. The Parasitic Steam Locusts were extremely vulnerable when the flames of the Ardent Sunset continued to spread through them. Even though they were constantly releasing heat, the steam they released to attack their enemies and the temperature of the flames were two different things. They were extremely afraid of the flames that were spreading rapidly through their swarms.

A blue Soul Remnant floated toward the Loach Pendant around Mo Fan's neck every time a Parasitic Steam Locust died, and as a result, the Soul Remnants began pouring down from the sky like stars. Mo Fan was quite surprised when he noticed how great the quality of the Soul Remnants were. He only needed a few of them to refine them into a Soul Essence!

Chapter 1914: Underwater Chase

Qiu Chi realized its secret weapons against Baxia had all died miserably in the flames. It immediately looked around and saw a few humans on Baxia's back who were busy massacring its parasites!

Qiu Chi was enraged. Its strength was inferior to Baxia, even though its size was around the same. However, Baxia's defenses were clearly stronger. Its bones had already fractured after the two collided with one another a few times. Meanwhile, Baxia was perfectly unharmed. It would clearly struggle to break down Baxia's defenses without the help of its parasites!

On the other hand, more humans were keeping Qiu Zi busy, forcing Qiu Chi to fight Baxia alone. They were clearly at a disadvantage!

Qiu Chi yelled and suddenly dashed to one side. It swung its deadly bone whips into the air before they lashed down like bolts of lightning!

The duration of Mo Fan's Seal of the Nine Laws had already run out, so Qiu Chi was able to use both of its bone whips again. It was swinging the bone whips at the back of Baxia's head from both sides. It looked like it was going to choke Baxia instead of whipping him.

Mo Fan looked up with a confused expression.

Did Qiu Chi already give up on using its brain? Baxia's overall shape was a tortoise, so his neck was extremely short. He just needed to shrug a little to protect his head with his shell. Wasn't Qiu Chi pretty stupid to be aiming for his neck?

One of the bone whips suddenly changed path while he was lost in his thoughts. It suddenly turned and lashed at Mo Fan!

"Damn it!" Mo Fan cursed.

He knew something was off. Qiu Chi was actually targeting him! His flames had obviously infuriated the sea monster!

The bone whip was extremely quick, and was coming in at a very tough angle too. Mo Fan looked up and felt like a white skeleton dragon was swinging its tail down to slice the mountains and seas in half!

Mo Fan definitely had a hard time enduring the creature's full strength, especially when the bone whip was engulfed in blood-red steam. It was even stronger than before, as if the creature had entered its enraged state!

As the bone whip was coming down, Mo Fan noticed Baxia's back bulging and forming a round shield around him!

The bone whip landed on the shield, leaving an obvious mark on it. Mo Fan could only feel his head buzzing...

"Brother Fan!" Zhang Xiaohou's face went pale when he saw the bone whip attack Mo Fan out of nowhere.

"I'm fine, Baxia is keeping an eye on me!" Mo Fan climbed out from under the shield and looked to the side. He immediately saw a terrifying scar on Baxia's shell. The bone whip's strength was absolutely shocking!

However, Baxia was not to be messed with either! He did not give Qiu Chi the chance to withdraw its bone whip, grabbing the bone whip that had attacked Mo Fan with his claw. The enormous Totem Beast stood up in the strait and tossed Qiu Chi like a shot put. The creature slammed into the unused land in Xiamen that was still in the planning phase!

Qiu Chi's true appearance was finally revealed after it was thrown out of the strait. Even though its limbs were like pillars, its skin sagged like a Chinese shar-pei. Its sides, stomach, and the flesh on its limbs were all sagging in multiple layers, all the moist and sticky layers full of demon leeches.

"No wonder it can hide another monster under it," Zhang Xiaohou commented after seeing Qiu Chi's true appearance.

Baxia's skin was tight and firm, and his muscles were brimming with strength. Meanwhile, Qiu Chi looked odd and strange in comparison. Its back was like a bony mountain, and its rotten flesh and skin were crawling with parasites. Its flesh sagged like an obese old woman!

"It shouldn't have looked like that before. Perhaps it has spent too much time around these parasites," Zhao Manyan murmured.

“It’s disgusting and terrifying. Luckily, it didn’t get into the city. Otherwise, the plague and disease it would cause after it is killed would result in many deaths too!” Mo Fan spat.

Baxia forcibly snapped Qiu Chi’s bone whip in half. More Parasitic Steam Locusts poured out of Qiu Chi’s body as the creature lost its temper. The demon leeches started crawling down its body like they were fleeing for their lives!

ROOOOOOOAAAAAARRRRRR!

Baxia spat out his killing breath when he saw the parasites crawling across the land and the water!

His breath had a pale destructive light. It killed every one of the demon leeches and Parasitic Steam Locusts that were exposed to it. Even Qiu Chi was constantly forced back by it!

Qiu Chi might be furious, but there was nothing it could do to stop Baxia. It began to move itself, trying to return to the support of the water.

The strait was not very deep. It had lands and islands nearby, so Qiu Chi did not have much space to move around. It finally backed away from the strait and returned to the deeper water!

Baxia was from the ocean too, and did not mind fighting in deeper waters. He immediately chased after Qiu Chi as it retreated to the ocean. His steps even created strong waves surging ahead as he pursued Qiu Chi directly!

The waves swept past Qiu Chi and left a few cuts on its wrinkled skin. Its dark green blood immediately spread across the water!

“It’s going to dive underwater!” Zhao Manyan shouted.

“Maybe it’s trying to reclaim the upper hand under the water. I won’t be able to follow you guys into the water!” Mo Fan noticed Baxia was submerging too. He decisively jumped back to a stretch of land that was not under water yet. It still had the huge hole that Qiu Chi had smashed into it previously.

“I’ll stick with Baxia. You two should be careful on your way back,” Zhao Manyan said.

Zhao Manyan was worried there might be other parasites helping Qiu Chi after they went underwater. He decided to stick around to help Baxia.

“It’s fine. The rest of the sea monsters can’t really harm us as long as these two creatures are kept at bay!” Mo Fan agreed.

Chapter 1915: The Real Battle

Mo Fan jumped to a hill nearby, and Zhang Xiaohou landed beside him. Zhang Xiaohou would also struggle to use his magic freely in deep waters.

Zhang Xiaohou glanced at the sea and said sharply, “Brother Fan, the army of sea monsters is here.”

The sea monsters Called for by Qiu Zi had shown up. The rain was still pouring down, and almost sixty percent of the species of sea monsters were able to move around in Xiamen with the current depth of the water. These sea monsters consisted mainly of Viscera Hunters, Scarlet Soaring Demons, and Huge-Pincered Sea Monsters. Mo Fan had not fought the other species yet, nor did he know what strange abilities they possessed.

However, the time limit of eight hours would soon reach its end. The deadly Armor Antenna Sea Monsters were most likely on their way, too. Those sea monsters would soon enter the city through the areas that were the most deeply submerged and begin their feast.

The Viscera Hunters and Scarlet Soaring Demons were obviously taking orders from Qiu Zi, and were heading toward the strait where the battle was taking place. Their target was none other than the bridge that was still standing!

—

Thousands of sea monsters invaded the strait. The Mages standing by at the bridge felt their scalps turning numb and chills running down their spines!

They had seen huge armies of demon creatures in the past, but the armies of demon creatures on land mostly consisted of Servant-class creatures. Warrior-level creatures already stood out among the armies, let alone the Commander-level creatures.

However, this army of sea monsters completely toppled their understanding. The average level of the creatures was the Warrior-level. The Huge-Pincered Sea Monsters were actually the weakest among their ranks, but those sea monsters with pincers like the scoop of an excavator could easily destroy the buildings in the city. Once those creatures invaded the city, it would be difficult for the city to recover from the damage. Xiamen would soon vanish amid the tropical storm and become a territory of the sea monsters!

Humans were mainly active along the coastlines. The space they were active in would shrink rapidly after losing a city, especially when other sea monsters were stirring up a lot of trouble as the sea level rose. Even fewer places remained safe from the sea monsters. Xiamen was an important island city between the East China Sea and the South China Sea, and connected it to the Feiniaoh Headquarters City along the east coastline and other cities like Shenzhen and Hongkong along the southern coastline. If the sea monsters took over the city, the place would soon join the vast ocean, making it a breakthrough point for the sea monsters to invade the land and expand their territory.

The evacuation was only a temporary solution, and did not necessarily mean they had given up on the city. No one would abandon their home just because of a disaster. Once the tropical storm and the rain stopped, everything would return to normal!

Therefore, they had to prevent the city from being destroyed, especially the streets, buildings, and the defensive barrier!

The sea monsters were extremely cunning. They had sent the strong Viscera Hunters and Scarlet Soaring Demons to fight the Mages and assigned the Huge-Pincered Sea Monsters to raze the buildings to the ground. Clearing a path for the Armor Antenna Sea Monsters!

A woman in a captain's uniform appeared above the hill, riding a Hurricane Hawk. "Major General Zhang, the sea monsters are advancing. The general has asked us to regroup at Gaoqi Airport to stop the invasion!"

"What about the others?" Zhang Xiaohou asked.

"They are already on their way," the woman replied.

Zhang Xiaohou looked around the strait and frowned.

"The bridge should be safe with Baxia protecting it. The sea monsters are launching a full assault on the city. We must defend the important entry points. We can't guarantee the city's survival, but we must hold on and evacuate the people before the eight hours mark!" Mo Fan stated.

The bridge was more or less safe. The three advisors were keeping Qiu Zi at bay in the strait, and did not allow the creature to go any closer. The bridge was heavily protected by a huge barrier established by over a hundred Advanced Ice Mages over a long period. As a result, the bridge was no longer as vulnerable. Even if Qiu Zi were to sneak up to the bridge again, it would take some time for the creature to destroy the barrier!

The Mages finally had a chance to catch their breaths after the barrier was established. The civilians were now able to cross the bridge safely. If the incident at Haicang Bridge was repeated again, resulting in huge casualties, the Mages and civilians were going to lose their composure.

"These sea monsters think they can destroy our home and treat our close ones as their food... if they seriously think we are a weak species waiting to be slaughtered, we'll show them with our magic that they too can't withstand a single blow from us!" the Sound Mage's voice echoed in everyone's mind. As the commander of the battle at Jimei Bridge, he was telling the others who were fighting the sea monsters alongside him not to back away or be afraid!

"Mages are born to fend off the demon creatures. We will stop these filthy creatures from invading our land and harming our people, even if we have to consume all our energy and sacrifice ourselves!"

The civilians were being evacuated continuously. The barrier on the Jimei Bridge was fully constructed now. The Mages, regardless of their levels, were trying their best to defend it. They could finally give their best shot!

The Shoreline Alliance, Donghai Magic Association, renowned clans, Hunter Union, military, high schools, and unassociated Mages... Almost every major city would have people from those organizations. Smaller organizations might hide among the civilians and flee to safety with them, but the members of the aforementioned organizations could never back away during a calamity like this. The Sound Mage was increasing their morale while arranging organizations other than the military to help fight alongside the soldiers.

There were many organizations, and normally the military would only take orders from the government of the country.

As for the other organizations, like the renowned clans, schools, alliances, and associations, they were all under the Magic Association. The Donghai Magic Association was the highest Magic Association in

Xiamen. Mo Fan was unsure about the Sound Mage's identity, but after hearing his speech, he realized that the old man was most likely the president of the Donghai Magic Association!

Chapter 1916: Baxia's Strength

The Magic Associations had different levels of influence. The highest Magic Association in the country was the Dongfang Oriental Magic Association. It was a national-level Magic Association, and above it was only the Asia Magic Association, based in Dubai.

The Donghai Magic Association was rather special. It was a subsidiary of the Asia Magic Association, not the Dongfang Oriental Magic Association. Strictly speaking, its level was on par with the Dongfang Oriental Magic Association, which explained why it had three advisors who were strong enough to fight Qiu Zi and Qiu Chi.

Mo Fan was not too familiar with these big shots, but judging from the situation at Jimei Bridge, the Sound Mage was indeed an experienced commander. The tasks the man had assigned to him and Zhang Xiaohou had been crucial in the battle.

It was not the commander's fault for not discovering Qiu Zi's existence earlier on. After all, the order to gather at Jimei Bridge was sent out not very long ago, yet two Great Ruler-level creatures had already shown up. It was already a miracle that the bridge was still standing!

"Brother Fan, I must go to the airport. The military has assigned us a mission. It sounds pretty urgent," Zhang Xiaohou told him.

"Go ahead, Old Zhao and I will defend the bridge," Mo Fan said warmly.

"Alright, let's hope Brother Zhao can slay Qiu Chi. That way, the army of sea monsters is definitely going to lose their morale," Zhang Xiaohou said with great anticipation.

Qiu Chi was most likely the commander of the army of sea monsters. Once it died, the sea monsters would definitely lack cohesion, making it easier for them to drive the sea monsters away.

"Slaying it is impossible, but beating the crap out of it until it flees into the ocean like a beaten dog shouldn't be a problem!" Mo Fan agreed.

Creatures of their level surely had insane vitality and ways to escape from a fight, not to mention their outstanding strength. The Black Totem Snake had failed to kill the Silver Skyruler, even though the bird's level was significantly lower, let alone Baxia, whose strength was merely about on par with Qiu Chi.

Unfortunately, the Black Totem Snake had been resting and recovering since the battle at the Parthenon Temple. Otherwise, if he could Summon the Black Totem Snake here to join hands with his brother, they would be able to smash Qiu Zi and Qiu Chi!

"Brother Fan, what level are those creatures?" Zhang Xiaohou could not help but ask.

A single storm had brought two Great Ruler-level sea monsters here, but everyone knew it was only the beginning of the crisis along the shoreline. More battles were going to take place from here on. The country had allocated most of its firepower to defend the coastline by building the breakwalls and headquarters cities.

What would the real battle look like?

Were there many more creatures like Qiu Chi and Qiu Zi in the ocean?

Or perhaps... there were creatures that were even stronger than them?

"Among the Ruler-level creatures, the strongest I've stumbled into are the two Gods of Death of the Ancient Greeks: Hayla and the Sphinx. Both of them are land creatures. If they were in the water, they might end up in a draw against these two, but if these sea monsters were on land, Hayla and the Sphinx were stronger without a doubt. Even the Black Totem Snake could take on these two sea monsters at the same time on land," Mo Fan declared.

Qiu Chi and Qiu Zi were not Supreme Rulers. They were at most Great Rulers.

The sea monsters tripled in strength compared to land creatures when they were in the ocean, which was why they seemed oddly strong when fighting in the strait.

"What about Baxia?" Zhang Xiaohou was slightly confused.

"Baxia is injured... Old Zhao told me before that if Baxia is really the Black Totem Snake's brother, his strength should be much crazier than what we've just seen. At least Qiu Zi and Qiu Chi wouldn't have a chance against him without relying on a dirty trick like the parasites," Mo Fan said.

"I see..." Zhang Xiaohou nodded.

"Major General Zhang, time is running out!" The captain's face had darkened. She had no clue what the two were discussing.

"Oh, time to go! Take care, Brother Fan!" Zhang Xiaohou jumped onto the Hurricane Hawk's back.

Mo Fan watched Zhang Xiaohou and the slender captain lift off into the sky. He shook his head, smiling, "Damn that monkey; the country has already assigned such a beautiful cold subordinate under him. Should he consider joining some organization, too..."

Mo Fan looked into the distance after Zhang Xiaohou left. He saw how cunning Qiu Chi was. It pretended like it was fleeing deeper into the ocean to have a proper showdown with Baxia, yet it had gathered the sea monsters to surround Baxia instead!

Qiu Chi did not stand a chance against Baxia in a duel, so it had decided to abuse their numbers.

However, Baxia was not intimidated in the slightest. He mercilessly crushed every sea monster that attacked him. The disgusting parasites might be a threat to him, but that did not mean he would treat the Viscera Hunters and the Scarlet Soaring Demons seriously! If he was cocky enough, he could just take a nap and let the Viscera Hunters and Scarlet Soaring Demons attack him. He would surrender right away if these creatures could even leave a wound on him!

Baxia was not afraid of the Viscera Hunters and Scarlet Soaring Demons. He swung his claws furiously, shattering the Viscera Hunters into pieces and smashing the Scarlet Soaring Demons. The sea monsters completely lost their courage after Baxia swung his claws around briefly.

After the Ocean Father had passed away, Baxia was basically the only Ruler left in the East China Sea. These Viscera Hunters that came from some unknown ocean only knew how to bully the weak and fear the strong. They quickly retreated and avoided contact with Baxia.

The Scarlet Soaring Demons were even worse. Their species had always stayed in the East China Sea, and they knew about Baxia in the first place. When the true ruler of this sea unleashed his wrath, they had no choice but to submit themselves to him!

Baxia stared down at the Scarlet Soaring Demons. His eyes were showing no mercy.

If it was any other species which was forced to submit themselves to Qiu Zi and Qiu Chi just to stay alive, Baxia would consider sparing their lives. However, the Scarlet Soaring Demons were not necessarily any better than the outsiders like the Viscera Hunters. They deserved to die!

Baxia exhaled a destructive breath across the surface of the sea!

The Scarlet Soaring Demons did not dare to move. The breath swept past them and erased them from the surface of the Earth. Even their souls had perished!

Qiu Chi was extremely mad after seeing that. The army of sea monsters had almost filled up the area, yet not many of the species dared to step forward to fight Baxia. They were all trembling in fear like cowards!

Chapter 1917: Setting up the Magic Cannon

“Young man, are you hurt?” the Sound Mage’s voice suddenly echoed in Mo Fan’s ears.

Mo Fan looked toward the bridge and saw the Sound Mage was actually quite far away from him. The man had obviously transmitted his voice into his ears.

“I’m fine, do you need me to do anything?” Mo Fan asked.

“The sea monsters are entering the strait from the east. There are more of them behind the waves we are looking at from here. Gaoqi Airport and Jimei University are located at the entrance of the strait. The school still has land available. I notice that you are an artillery Mage, so may I ask you to head to Jimei University and bombard the sea monsters who are entering the strait with your spells? It will reduce their numbers before they reach the strait,” the Sound Mage said.

Jimei University was directly opposite Mo Fan’s position, very close to the strait. The terrain was not that high, so most of the school was submerged in seawater. However, the hills and the buildings were perfect for Mo Fan to fight on!

“Alright, I’ll go there at once,” Mo Fan agreed.

“Since you are a Super Mage, I’ll place you in charge of the battle there. Many students and teachers of the school are waiting,” the Sound Mage said.

“Leave it to me!”

—

Even though Jimei University was opposite the strait, which was around four kilometers away, Mo Fan was a non-swimmer and unable to fly, and did not dare cross the strait to the other side. Most importantly, the strait was now a battlefield for the fight between the three Super Level advisors and Qiu Zi. He had no clue whether Qiu Zi was going to vent its frustrations on him if he crossed the strait.

Mo Fan simply ran to Jimei Bridge and wove through the crowd with his Fleeing Shadow.

The bridge was fully crowded with civilians. Luckily, the situation was still under control with the protection provided by the barrier. The people were slowly being evacuated.

Mo Fan noticed there were many Earth Mages on the bridge as he was crossing it. They were using Earth Wave to speed the civilians up. The tactic was quite effective. It would take ages for them to evacuate the city if they were merely walking at their own paces!

Mo Fan reached the other side of the bridge and saw a Water Mage riding the waves. “That should be it... mm? Someone is riding the waves. He seems to be heading in the same direction too.” The waves were heading in the direction of his destination. The Water Mage simply stood on the waves while they were rolling toward Jimei University.

“Hey, kind sir, give me a ride please, I’m on my way to Jimei University too!” Mo Fan quickly yelled when he saw the man brush past him.

“What are you doing? I have urgent matters to attend to,” the Mage on the waves snarled.

The place was in such great chaos. How could he possibly have the time to give someone a ride? Besides, he was the director of the Water School in Jimei University, not a f**king cab who would stop whenever someone waved at him!

The man ignored Mo Fan and continued on his way.

Mo Fan’s head hurt when he saw the fierce waves in front of him.

He had the option to cross the waves with Blink, but it would be a waste of his energy if he had to rely on Blink to travel such a long distance. The battle had been going on for quite some time. It was not like he had unlimited energy.

“Are you a student too? Hurry up and get on my Summoned Beast!” A Maga with a long ponytail showed up beside Mo Fan. She had come to a stop after hearing Mo Fan’s yell.

“Oh, thank you so much, fellow schoolmate!” Mo Fan jumped onto the back of the young woman’s Summoned Beast.

Mo Fan was quite surprised when he observed the Summoned Beast clearly. The Maga's Contracted Beast was a Sea Gong Fighter! Mo Fan was not an expert about the Summoning Element, but the official documents of the Summoning Element had records on a lot of rare Contracted Beasts. Among them, the Sea Gong Fighter was a powerful Contracted Beast that was extremely friendly and loyal to humans. Mo Fan had seen their young being sold at crazy prices during more than one auction.

He had failed to get on the waves previously, yet a Summoner with an impressive Contracted Beast had shown up instead!

"Fellow schoolmate? I'm not a student, I'm a teacher," the Summoner giggled.

"Oh, I'm not a student either!"

Mo Fan followed the Summoner to Jimei University. According to the Sound Mage, he was supposed to set himself up like a defensive cannon on this side of the strait, and bombard the army of sea monsters that were invading the strait.

If so, Mo Fan had to find a suitable location. It had to be close to the strait so the sea monsters were within range of his spells. Second, it had to be on the high ground so the place was not submerged underwater, preventing the sea monsters from flanking him. Last, the place should have tall buildings around it. Wouldn't it make more sense to set up a cannon at the tallest spot?

"Fellow teacher, may I ask is there any place that fits these criteria?" Mo Fan shared his thoughts with the Summoner.

"The president of the Donghai Magic Association has already sent someone to command us. You just need to come with me to the gathering point and follow his orders," the Summoner said.

"...Ugh, I'm the commander!" Mo Fan told her.

The Summoner did not treat Mo Fan's words seriously, as she had placed her attention on the students on a kiosk. They rode the Sea Gong Fighter to the kiosk.

"Students, get on my beast now," the Summoner ordered.

"Miss Biling, we've been waiting for you... a whole bunch of Scarlet Soaring Demons are heading toward the strait from the lake behind the library. They will be able to invade the island through Gaoqi Airport once they cross the strait. We are at the rear of the path the sea monsters are taking. We might be able to take them out," a representative among the students said with glittering eyes.

The student was very eager to show off his strength. He was somehow very excited about the fight!

"Alright, we'll head to the library. The director of the Water School, Deng Yongchuan, is already ahead of us. I saw him heading to the library. We aren't sure when the commander is going to arrive. Let's prepare ourselves in advance first," the Summoner named Biling said sternly.

Chapter 1918: Commander Mo Fan

Mo Fan was going to say something, but he knew these people were not going to believe he was the commander even if he tried to convince them.

He followed them to the library. It was a sturdy building that happened to be on a little hill. The seawater had yet to reach its first floor. He could see the whole entrance to the strait through the windows of the library.

From afar, he could see a sea monster every few meters swimming in the gray water, not to mention those that were under the surface.

The sea monsters were heading toward the relatively narrow entrance of the strait from all directions. The density of the sea monsters was quite high at the entrance of the strait, similar to the entrance of a subway during peak times...

The sea monsters would travel for another kilometer after entering the strait before turning to the south to invade the island through the Gaoqi Airport, which was located on the shore opposite Mo Fan. It was just as the student had mentioned before. Jimei University happened to be behind the sea monsters' entry point. They could inflict a huge number of casualties to the ranks of the sea monsters if they were to attack them from here!

"Are these people all we have?" the director of the Water School said with a frown.

"More students are heading our way, but we don't really have much fighting power," Biling admitted.

"If we attack the sea monsters from here, our spells have to cover a distance of a kilometer and a half across the water. Most of our spells won't have enough range unless the sea monsters are heading right toward us," a Wind Element teacher spoke up.

"Yeah, even us teachers won't be able to attack the sea monsters from here, let alone the students."

More students arrived at the library as the teachers were figuring out a plan.

Mo Fan roughly estimated about fifty people for each primary Element. There were around a hundred people split up among the rest of the Elements, too. There were around four hundred people, but most of them were Intermediate Mages.

If these Intermediate Mages were grouped into formations to attack with the same spell, they could deal a destructive blow to the enemy. They should be able to thin out the army of sea monsters just as they entered the strait.

But they still had the same problem: their range was limited!

The distance was around one and a half kilometers. A Fiery Fist was a spell with rather outstanding range, yet it could only travel up to two hundred meters away. Its damage would drop as it traveled further.

The Thunderbolt's range was limited too, as the Mages would have to be at a range where they could control where to accumulate their magic to cast the Lightning Spell.

The Wind Mages' spells had a greater range, but even if they were to stack their Wind Spells up into a huge Wind Disc, it would be impressive if it could cover a distance of merely a kilometer!

Considering the altitude and terrain of the library, if the spells were treated as projectiles, it might help to increase their range, but it still was not enough to solve the problem.

"We can compress the space. If there are Space Mages here, they can compress the path that our spells are traveling in so our attacks could reach the sea monsters," Biling suggested.

"Miss Biling, why have I never heard of the Space Element being used in such a way before?" the director of the Water School, Deng Yongchuan, spoke up promptly.

Mo Fan too was dumbfounded when he heard the words.

Compressing the space to increase the range of spells, splendid idea...

Either way, Mo Fan could not do it. He knew how to compress the space, but there were many other factors involved still.

"Does someone know how to do that?" Mo Fan asked.

"Leave it to me!" an aged Mage came up to them.

The old Mage had a white beard, and was dressed in plain clothes. Several Mages in similar outfits stood behind him. Mo Fan could sense a familiar aura from them. They were all Space Mages!

Mo Fan's eyes glittered when he saw them.

"Young man, you must be the commander whom the president has sent here," the old Mage stopped in front of Mo Fan.

"That's me," Mo Fan nodded.

"I was utterly impressed by your courage when you were fighting the two beasts. I'm the director of the Space School of Jimei University, Lin Du. These are my students; they are the Space Mages of this school," Lin Du said calmly.

"Oh, it's an honor to meet you all!" Mo Fan had no idea who the person was. He was simply being courteous.

Deng Yongchuan, Biling, the Wind Mage, and the students who had gathered at the library all looked at Mo Fan in astonishment.

Why would the president assign someone who looked just like a student to be the commander?

"You're the commander?" Deng Yongchuan harrumphed coldly.

"That's me!" Mo Fan confirmed.

"I seriously don't believe you are capable of leading us judging from your age. We should be relieved that you aren't holding us back," Deng Yongchuan sniffed.

“The Donghai President might be under a lot of pressure trying to command the battle to assign someone like him as the commander. Director Lin Du, you should be in charge instead,” the representative among the students said.

Lin Du frowned. He did not expect these people to be so against the idea of making Mo Fan the commander. He was about to rebuke them when he felt a strong Aura bursting out of the young man’s body. It felt like the library was being targeted by a great thunderstorm. No one dared to breathe when they felt the wild Lightning Magic lingering in the sky.

Lin Du immediately looked at Mo Fan and saw him engulfed in wild lightning. Everyone dropped their jaws when they saw the wild energy around him!

Mo Fan had lost his temper. “I have no time to waste on you arrogant people! If you think I am not worthy to be the commander, I shall deal with the sea monsters myself while the rest of you continue to waste your time deciding who’s the commander!”

He was seriously left speechless by these arrogant pricks! Lin Du had already told them he was the commander, yet they were still doubting him, forcing him to control the situation with his Domain. Wouldn’t it be better if he used the Domain against the sea monsters instead?

“Young man, please don’t be mad. They just didn’t expect you to be a Super Lightning Mage at such a young age... Fellow directors and teachers, this young man’s courage and strength are outstanding. He was the one who Sealed off the Number One Disastrous Beast’s bone whip with his Super Lightning Spell!” Lin Du announced.

Lin Du was a Super Mage too. He was at the scene when it all happened. He had witnessed how Mo Fan Sealed off Qiu Chi’s bone whip in person!

Chapter 1919: The Wild Lightning that Kills Instantly, Part One The directors of the schools did not dare speak any further. Even the proud director of the Water School, Deng Yongchuan, only dared to glare at Mo Fan without voicing his disagreement. Only the face of the representative of the students who was so excited for the battle stayed blank. *Super Level?* The young man was only around his age.

How was he a Super Mage already? *Did he eat some magical pills to boost his cultivation?* On second thought, some clans would use some ancient and extreme methods to forcibly raise one or two Super Mages, but those people were just like nerds, and had zero practical skills. “Mr. Lin Du, is the Space Compression Bridge you just mentioned going to work?” Mo Fan asked Lin Du. “It shouldn’t be a problem. It’s a technique I invented, yet it rarely comes in handy.

My students here have been practicing it with me. We should be able to tackle our lack of range if the few of us establish a Space Compression Bridge,” Lin Du said. “Let’s not waste any time, then. The Scarlet Soaring Demons have already reached the opposite shore.

Mr. Lin Du, I’ll leave it to you. The Lightning Element is deadlier against sea monsters.

All Lightning Mages will form a team, while Wind Mages and Ice Mages slow down the Scarlet Soaring Demons and limit the space they can move in before the Lightning Mages cast their spells,” Mo Fan said. Mo Fan had been through many battles. He would have seen pigs run even if he had never eaten pork.

He had no trouble giving instructions in a battle. The university did not have many Lightning Mages, only thirteen of them in total. Mo Fan roughly inspected their cultivation and was quite disappointed when he noticed their cultivation was below average.

It was perfectly normal, since the odds of Awakening the Lightning Element was extremely low. The chance of Awakening the Lightning Element as the first Element was a thousand to one. Even if someone were to use an Awakening Stone to Awaken the Lightning Element as their secondary Element, the odds were still low.

This number of Lightning Mages was already considered high if they were not currently in a university. The thirteen Lightning Mages were only at the Intermediate Level, apart from a teacher in the Advanced Level. Mo Fan assigned the teacher to be in charge of the group.

The rest of the Elements were Wind, Earth, Ice, Light, and Fire. The chance of Awakening the Fire Element as a secondary Element was not too low, thus the Fire Element was much more common among Intermediate Mages. Many people were willing to spend money on an Awakening Stone to Awaken the Fire Element.

The rest of the students formed five teams based on their Elements and went into positions on the higher ground. After grouping the students based on their Elements, Lin Du quickly and efficiently constructed the Space Compression Bridge. Normally, the Space Compression Bridge was invisible, but the heavy rain pouring down from the sky outlined an obvious archway between Jimei University and the strait.

Mo Fan summoned a Fire Burst by flipping his hand and tossed it at the bridge. The Fire Burst faded slightly amid the rain. It quickly crossed the tunnel of the Space Element and reached the center of the strait before falling into the water like a projectile. "Splendid, that is great!" Mo Fan exclaimed.

It was Mo Fan's first time seeing the technique. He had to ask the old Space Mage to teach him the trick once he had the time. It might come in handy on certain occasions! "Commander, how about us?" Miss Biling asked with a confused look.

Mo Fan had only assigned tasks for the Elemental Mages. He was not intending to assign roles to the rest of the Mages, including Miss Biling and the students. They were puzzled as they had no clue what they were supposed to do. "The rest of you will defend the library and the hill," Mo Fan said. "Why do we even need to defend this place?"

"We are currently on the land. The sea monsters will all be rushing into the city," the student representative complained. "Just do as I say, what's with all the nonsense?" Mo Fan snarled impatiently. "What...what do you mean by that!?" the student representative blushed in anger. "Yang Zhe, just listen to the commander. We'll be on standby here," Biling pulled the student representative back. — Mo Fan stood at the highest point on the library.

He was able to observe the entire strait from his position. Countless Scarlet Soaring Demons were heading toward Gaoqi Airport. These amphibians were indeed perfect vanguards for the army of sea monsters.

Their crimson skin made them look like wriggling pieces of meat crawling through the strait as they were approaching Gaoqi Airport. Jimei University's library was on the other side of the strait, opposite the

shore that the sea monsters were invading. “Wind Mages, Ice Mages, restrict their movement!” Mo Fan gave the order when he noticed the time had come as the density of the Scarlet Soaring Demons peaked. “Leave it to us!” “Make sure you direct your spells through the Space Compression Bridge!” Mo Fan reminded them. Wind Spells appeared above the strait in abundance.

The Wind Discs collided with one another and combined into a wild Wind Domain, drawing the seawater into the air. On the other side, the Ice Spells poured down like hail. They quickly froze the water after landing on the sea.

Since the spells were focusing on an area, a thick layer of ice quickly formed on the surface! The Scarlet Soaring Demons knew how to draw on their advantages and avoid their disadvantages. They purposely avoided the spells and proceeded to the middle where the spells were not landing.

It was exactly what Mo Fan had planned. He was trying to herd the Scarlet Soaring Demons tighter together. Mo Fan was not hoping that the Wind Spells and Ice Spells would kill a lot of the Scarlet Soaring Demons.

The strait was rather spacious. Despite the overwhelming numbers of the sea monsters, there was still space between them, allowing them to dodge the spells. Therefore, Mo Fan had planned to limit their available space with the Wind and Ice Spells. “Lightning Element, Thunderbolt Cluster!” Mo Fan signaled the Lightning Mages when he saw the Scarlet Soaring Demons were all clustered in the same area.

Mo Fan emitted a blinding light after giving the order. The Lightning Magic accumulating under Mo Fan’s control easily exceeded the presence of all of the Lightning Magic the thirteen students and the teacher were gathering. The power of Mo Fan’s spell was actually stronger than the whole team combined! “Such an imperious Soul-grade Lightning!” “Soul-grade Lightning?”

That’s not it!” Biling’s eyes flickered with astonishment and confusion when she saw Mo Fan’s Lightning Tyrant.

Chapter 1920: The Wild Lightning that Kills Instantly, Part Two

The highest damage amplification of a Soul-grade Lightning Seed was sixfold. The power of the Soul-grade Lightning when Mo Fan was showing his Aura of a Super Mage was within expectations, but the Soul-grade Lightning he was using was double the strength of the Aura. It was wilder, stronger, and more destructive!

Even the whole Lightning School of the university might struggle to match Mo Fan’s lightning, let alone a group consisting of merely thirteen students and a teacher of the Lightning School.

Dense lightning strikes descended from the sky above the strait. They landed on the surface of the sea and blasted the Scarlet Soaring Demons into pieces while creating huge geysers of water.

The Lightning Magic could spread through the water. As the lightning struck continuously, the Scarlet Soaring Demons hidden under the water were also in danger. The high voltage surged between the

Scarlet Soaring Demons like a school of fish being electrocuted. Those whose bodies were still intact eventually floated to the surface like dead fish, their abdomens facing up.

“The Fall of the Heavens!”

Mo Fan cast a Super Spell.

He did not use the Seal of the Nine Laws, since that was more suitable for trapping and killing a single target. It would only kill a limited number of Scarlet Soaring Demons under the current circumstances. As such, Mo Fan modified the Star Palace and combined the Lightning Magic provided by the Star Palace into a single lightning bolt!

The lightning bolt passed through the Space Compression Bridge and reached the sky above the strait. An extremely thick lightning bolt flashed across the gray sky before falling into the middle of the strait with a piercing light. Its flash blinded everyone temporarily!

Everyone’s vision turned white from the flaring of the spell. As their vision recovered, they saw a terrifying lightning bolt exploding among the Scarlet Soaring Demons. It spread wildly across the surface and plunged into the water. Its light illuminated the silhouettes of the creatures swimming in the water. To everyone’s astonishment, it actually showed the bones of the Scarlet Soaring Demons!

The lightning passed through the sea monsters’ skins and struck their bones. The Scarlet Soaring Demons were not just blasted into pieces by the lightning bolt, even their bones were blown into powder!

More dead bodies of the Scarlet Soaring Demons floated up to the surface. If the group of Lightning Mages was electrocuting a pond of fish, Mo Fan was simply blowing up the whole pond!

The random flickers of lightning lasted for some time. The students and teachers on the library had yet to recover from their astonishment.

The group of Lightning Mages began to doubt their lives when they saw the combined strength of their Lightning Spells was not even a tenth of the commander’s strength!

“All the sea monsters in that area are dead!” Deng Yongchuan rubbed his eyes. They were hurting a little from the blinding flashes, yet he could not resist the urge to stare at the area with wide eyes.

He killed them instantly!

They had no idea how many Scarlet Soaring Demons were planning to invade the city through the Gaoqi Airport, but they were quite sure that not a single one of the Scarlet Soaring Demons that had been forced into that area by the Wind and Ice Spells had survived.

“Aren’t the Scarlet Soaring Demons at the Warrior-level!?” The students dropped their jaws.

Warrior-level sea monsters...

The students who could kill a single Scarlet Soaring Demon on their own were already quite brilliant, yet the commander had blasted hundreds of them to death with a single Super Spell. In other words, the spell would kill all of them if he was targeting them instead!

“It seems like the president has made a brilliant choice sending you here!” Lin Du was truly impressed by the destruction that Mo Fan had caused.

It was rare for even a Super Mage to be able to cause such massive destruction. Even Lin Du had no idea how the young man did it.

“I managed to preserve the energy of my Lightning Element before. I’ll need to catch my breath. The rest of you can keep attacking with your spells. Try to leave an area for the Scarlet Soaring Demons to gather together. My Lightning will be able to eliminate them all if they are clustered together!” Mo Fan declared confidently.

The Scarlet Soaring Demons were not as strong as the Viscera Hunters, so Mo Fan’s Lightning with twelvefold damage amplification had no trouble killing them instantly, not to mention the overwhelming power provided by a Star Palace. He could greatly thin out the army of sea monsters that were invading Gaoqi Airport with another Super Spell!

—

Unsurprisingly, no one in the library dared to question Mo Fan again after witnessing his strength, and the rest of the teams diligently followed his orders. Their spells might not be strong enough to kill the Scarlet Soaring Demons, but if they simply focused on certain places, they could still force the Scarlet Soaring Demons to stay within a certain area.

The spells kept pouring down randomly, but there was a huge circle which was free from the bombardment of spells. The Scarlet Soaring Demons were clueless about the conspiracy and naively moved into the area. Little did they know, a huge lightning atomic bomb was waiting for them!

“Sky Lightning Demon Claws!”

This time, Mo Fan cast the Sky Lightning Claw, but unlike the Advanced Level version, the Sky Lightning Claws appeared in clusters. They were tearing at the sea monsters like lightning demons!

Blood and flesh scattered across the place again. The Scarlet Soaring Demons had no chance of enduring the damage from the Lightning Tyrant. The middle of the strait turned shockingly red and gory!

—

The command post at Gaoqi Airport...

Gaoqi Airport was located on a spacious stretch of land close to the shore and the sea. There were some hills close to the strait, so most Scarlet Soaring Demons were approaching the airport from the strait.

Zhang Xiaohou was currently in the command post. He was only a squadron leader instead of the commander here.

The commander was a general from the Southern Army. The man had a stern face at first, but soon looked puzzled when he saw the bright magic flashes from the opposite shore through the rain.

“Report, a pack of Scarlet Soaring Demons are invading the airport from the side of the hills!”

“Report, the second pack of Scarlet Soaring Demons from the strait is being massacred by a Super Mage from Jimei University! Almost a thousand of them were killed! The Scarlet Soaring Demons have slowed down their advance!” a Mage near the strait announced.

Zhang Xiaohou had also noticed the Sky Lightning Claws over the strait. His face was brimming with excitement.

“It must be Brother Fan, as expected of the Lightning Tyrant! It has killed almost a thousand sea monsters before they could reach the shore. It has significantly lifted the pressure from our shoulders!” Zhang Xiaohou commented.

The military could rely on certain formations and tactics to fill the gap in strength between them and demon creatures. However, a thousand Warrior-level Scarlet Soaring Demons were comparable to a troop of a thousand well-trained soldiers!
