Chapter 2881: The Immortal Black Dragon

Nine red-brown King Skeletons blocked Mo Fan's way.

Mo Fan did not know what special connection they had with the previous King Skeleton. But he could sense the deep hostility they conveyed, as if they were enemies from a long time back.

Mo Fan sneered. 'Do these ugly and hard skeletons think they can block my way?'

Mo Fan held his sword and stabbed the ground. The ruins at the back moved, and Ash Wolves arose and instantly formed an army.

The Ash Wolves roared and rushed toward the nine King Skeletons. The Ash Wolves overpowered the King Skeletons. The wolves bit off their bones and tore off their limbs. The ground was littered with Undeads' torn bodies.

The Royal Skeleton Queen saw this. It was furious. It was not easy to trap the Azure Dragon, so it could not let it escape.

"Wake up," the Ocean Queen said to the skeletons on the ground.

The shallow sea of Pudong was full of rusty bones. However, some of these bones had fine black lines on them.

The Black Pattern Iron Bones seemed to have been on standby for a long time. After the Royal Skeleton Queen gave an order, they fit together like pieces of a puzzle of different shapes in the shallow sea.

The Black Pattern Iron Bones were in different positions. Some Black Pattern Iron Bones were very far away but flew like bullets and gathered around Mo Fan and the Azure Dragon.

The long tail was full of thorns. The huge wings were covered with huge fishbone barbs. The lizard-like body was also made of sharp and hard spines.

The black patterns connected and formed the patterns of the Undead. The evil power on it made this newly formed terrifying creature emit a deadly aura.

The black patterned creature roared, and countless rusty bones turned pitch black. They were dismantled from other Undeads and turned into black bone wasps that swarmed in the air.

"Netherbone Dragon?" Chief Zhu and Councilman Gu were shocked.

They tried to suppress the Ocean Queen to break off her connection with the Undeads and relieve some pressure on the Azure Dragon. But no matter how they attacked, the Ocean Queen was still a powerful emperor-level creature which remained unfazed.

The creature she awakened was the legendary underworld demon. It was the emperor of the underworld, who was far superior to the Demonic Ocean Skeleton!

The numerous Dragon Bone Wasps made the Netherbone Dragon even more terrifying. It was hard to imagine that such a legendary creature belonged to the Ocean Queen.

The Netherbone Dragon targeted Mo Fan. The Ocean Queen would not let the Azure Dragon return to the sky. She would try her best to suppress the Azure Dragon and prevent anyone from helping it.

She was not trying to kill the Azure Dragon but trying to protect The Eye of the Tide of the Cold Moon Demon Lord.

The Heaven-shaking Demonic Waves would arrive soon. At that time, more powerful Ocean Demons would arrive. No matter how powerful the Azure Dragon was, how would it be possible to withstand so many emperor-level demons in the entire Pacific Ocean?

...

Mo Fan stared at the vicious Netherbone Dragon and removed the earth equipment he was wearing.

The place was full of Undeads and seawater. The humid air and the breath of the Undead greatly weakened Mo Fan's Kingdom of Sand.

He could not rely on this power to defeat the tyrannical Netherbone Dragon. However, Mo Fan had another solution.

His overall strength had increased since he transformed into a devil in Dubai. The most important thing was that Mo Fan had not obtained the Black Dragon Soul at that time.

After the Netherbone Dragon appeared, Mo Fan could hear the call of his magic suit. The dragon's body had been destroyed, but the dragon's soul was immortal.

Mo Fan would not forget that a giant western dragon was inside his black magic suit. It was the Black Dragon Emperor, who was at the top of the food chain!

"The Devil's Call: Black Dragon Suit!"

The earth of the Kingdom of Sand slowly dissipated, and the Black Dragon Soul lingered around Mo Fan. The devil bloodline was ultimately powerful among all other abilities. The Black Dragon Suit Mo Fan summoned this time was completely different from the usual. A towering dragon shadow shrouded Mo Fan.

Unlike eastern dragons, the Black Dragon was impressive and huge. It had a thick, broad belly and chest, rather than a long, slender body like the others.

When Mo Fan summoned the Black Dragon Suit, he thought it would shroud him like the earth equipment and transform him into a Black Dragon Warrior. To Mo Fan's surprise, the Black Dragon Soul seemed to be still alive. It assembled onto Mo Fan's body and then flew to the sky, turning into a Black Dragon Emperor made of black metal scales.

His whole body was covered with mechs and steels. When he waved his wings, he could hear the mechanical sound of the metals. The Black Dragon Emperor, who had killed itself in the Dark Plane, seemed to have been reborn with this magic suit.

It flew in the sky magnificently. Its meeting with Netherbone Dragon felt like a fated confrontation.

The Netherbone Dragon saw the Black Dragon Emperor and roared. Two legendary western dragons fought with each other. Mo Fan was completely unaware of the situation in front of him.

He vaguely remembered Asha'ruiya once mentioning the Black Dragon Emperor's enemy from a thousand years ago. After killing it, the Black Dragon Emperor had been seriously injured and hid in the Cloud Cliff of the Tyrant Mountains.

'Could the Netherbone Dragon be the incarnation of the Black Dragon Emperor's enemy?' wondered Mo Fan

Even if they had died long ago, they would not stop fighting. The Netherbone made a comeback with black-patterned skeletons as its body. The Black Dragon Emperor continued this thousand-year battle with the magic suit as its body. The epic had always vividly described the encounter outside the modern city.

Mages of the Forbidden Curse Association were as shocked as Mo Fan.

The two dragons fought feverishly. Every attack could cause the sky to shatter. Other Undeads, including those Ruler-level Undeads, seemed insignificant and vulnerable in front of them. They dared not approach the two dragons at all.

Mo Fan looked at the immortal Black Dragon Emperor and suddenly understood why the dragons had supreme status. It was because they never lost their fighting spirit!

The eastern dragons were the same. When danger came, they would still wake up, even if they were broken, dilapidated, forgotten, or buried in the sand.

It could be buried in the sand, but it could still fly and cover the sky. It was an eternal guardian!

Chapter 2882: A Troublesome Shark

The obstacles ahead had turned into nine red-brown King Skeletons. As Mo Fan walked forward, the Divine Flaming Snakeking Soul Shadow behind him suddenly shot out. All the Undeads along its path were burnt to a crisp and "cleansed" by the flames that spread from the Flaming Snakeking.

A King Skeleton standing at the forefront reacted quickly. It tried to jump up to avoid the Flaming Snakeking's fire, but the widespread, roaring flames shot up and turned into a huge head of a snake that bit down on the King Skeleton.

The bite was powerful because Mo Fan saw the King Skeleton shattering with the impact. When its body plunged into the ravaging flames, it was severely injured.

The other King Skeletons quickly moved to the side, but the rampaging flames just split into eight other snake heads!

Now, there were a total of nine flaming snake heads! They charged straight toward each King Skeleton. The flames raged, and the heads of the snakes were so powerful that all the King Skeletons suffered different degrees of injuries and burns.

At that moment, Mo Fan stepped into the area ravaged by the flames. If someone had looked, they would have seen that a huge snake encircled the area Mo Fan traversed to attack all those who approached him.

Mo Fan moved quickly. In the blink of an eye, he reached the first King Skeleton who was dragged into the sea of fire.

Compared to the King Skeleton who attacked the Magic City, these King Skeletons were weaker, and they did not have any regenerative abilities. Even if they had any, Mo Fan could still easily defeat them in his current state.

He brought his right leg up and stomped down on the bone-covered, flame-ravaged ground. A bump shot up ahead of him, as if something terrifying was eagerly making its way up from underground.

Boom!

An earthen spike erupted diagonally into the air, piercing through the first King Skeleton and dragging it into the air. It hung in the air like a maroon-colored flag. Due to the force from the thrust, its body was impaled firmly on the spike, though its limbs swayed nonstop in the air.

When the other King Skeletons saw their comrade's carcass, they stepped back instinctively. However, at that moment, the Demonic Ocean Skeleton howled, as if telling them that the Undeads had no fear!

Mo Fan continued onward as the Divine Flaming Snakeking swept through the battlefield. All the Undeads and the Ocean Demons within the radius of three kilometers were slaughtered by the Soul Shadow.

The remaining eight King Skeletons might have fought fearlessly, but once Mo Fan walked out of the battlefield, all of them hung in the air like maroon-colored flags from eight other spikes that had erupted out of the ground.

All nine skeletons were impaled in a neat row, and they swung in the air.

Just when Mo Fan was approaching the Azure Dragon, he felt a strong wind blowing behind him. The wind was so strong that it swept up all the debris from the ground and charged at him like a meteor from space that was about to crash on the surface of the Earth. He could sense the destructive presence from it before it reached him.

Mo Fan turned and saw a huge seabed mine. He also saw rows upon rows of spike-shaped teeth on the mine. He knew just from the jaw alone that it had an absolutely terrifying bite. That type of jaw was present only in ancient carnivores. If he ended up in its mouth, he would be torn to pieces in an instant!

It was the Lord of the Shark Men!

It was incredibly troublesome. It possessed a powerful body made up of a seabed mine, allowing it to face without fear against the Azure Dragon. It could cause a rampage on the battlefield. It had an extremely destructive power. But that was not all, it could even easily withstand Forbidden Curses and Super-level combination spells.

This creature was arrogant, brutal, and so incredibly reckless that it had tried to bite through the Azure Dragon's tail.

At this very moment, the Lord of the Shark Men went up against Mo Fan like a destructive, terrifying meteor. Since it showed up near the trams at the Zhang River, the remaining cables stuck themselves on the lord's dorsal fins, causing all its ores, fossils, and ancient gemstones to light up.

Mo Fan made use of dimensional hopping to avoid the brutal crash, but the Divine Flaming Snakeking Soul Shadow retreated into him. Meanwhile, the Lord of the Shark Men slowly floated above the sunken part of the ground, resembling a barren island. Its eyes shone with a horrifying spark as it stared at the tiny Mo Fan. Its gaze was disdainful and full of contempt.

Mo Fan looked at it. The Black Dragon Emperor, in his armor, was still fighting against the Netherbone Dragon, and their fight would not end for a long while.

The Azure Dragon's tail was about eight kilometers away from Mo Fan, but since it was drowned out by the Undeads, it could not help him.

Mo Fan felt a little troubled by the Lord of the Shark Men.

It was not that he was afraid of its might. It was just that the Lord of the Shark Men was the toughest and unreasonable of all the Emperors. If even the Azure Dragon's divine power could not put a scratch on it, then Mo Fan would just be wasting his time fighting against it.

He didn't want to waste his energy or his time, so he had to think of an effective way to hit back. He had to find its weakness.

"Roar!"

It would not be easy for the Lord of the Shark Men to kill Mo Fan, either. Mo Fan had mastered the Shadow Element, the Space Element, the Chaos Element, and the Earth Element. These abilities were also maxed out when he was in his demon form. The Lord of the Shark Men would be hard pressed to capture Mo Fan.

Mo Fan tried flying into the air, and just as he expected, the Lord of the Shark Men swam in the air. Despite its huge body, it could still swim around on the earth and the air as though it was seawater.

The fog was thick. The Lord of the Shark Men's mine body remained as astonishing as ever. Suddenly, Mo Fan overturned the order of space so that gravity was reversed.

But the Lord of the Shark Men was smart. The moment it sensed that the order of gravity had changed, it immediately used its sharp dorsal fins to crash against space, causing it to shudder, and thereby throwing the changed order into a huge mess.

The winds of order blew backwards, and the space around them started regaining its original position.

When Mo Fan saw the Lord of the Shark Men ignoring the rules of space, order, and gravity to charge at him, he was forced to perform dimensional hopping once more.

But the Lord of the Shark Men was aggressive. It charged into the dimensional tunnel through the crack Mo Fan left behind. The storm of the alternate dimension raged against it, but only caused it to shed one layer of skin.

Mo Fan had no desire to fight against this reckless and dangerous shark in the alternate dimension, so he picked an exit at random and returned to the normal dimension.

Mo Fan let out a slew of curse words. He had finally got up to a space only eight kilometers away from the Azure Dragon, but due to the Lord of the Shark Men chasing him, he returned to the place where the nine King Skeletons swayed in the air, away from the Azure Dragon.

This was a flaw in picking an exit at random. Dimensional hopping was the improved version of instant teleportation. It allowed him to move long distances, but the moment he picked the wrong dimensional tunnel or picked an exit spontaneously, it would just bring him to a place further away from his intended location.

Mo Fan really wanted to skin the Lord of the Shark Men and pluck out all of its tendons!

Chapter 2883: Dragon Shadow Spear

There were plenty of Ocean Demons, and even more Undeads.

During the short moment Mo Fan fought against the Lord of the Shark Men, the path he had cleared was covered again by the Shark Men and more Undeads.

Their numbers had increased, even more than the ones he had encountered before.

There were Giant Shark Beasts, Chief Sharks, Shark Heroes, Seabed Bone Undeads, Shark Skeletons, Corpsefeasting Fish Kings, and many more.

Meanwhile, the Lord of the Shark Men had returned to Pudong. Its face was turned toward Mo Fan, and it grinned, baring its sharp teeth of diamonds. A grin full of mockery.

Unfortunately, there was not much free ground left. Otherwise, if Mo Fan could equip himself on the earth, he could fight head on against the Lord of the Shark Men.

“Growl!”

Hundreds of Seabed Bone Undeads surged forward from behind Mo Fan. They held a bone staff in their hands. These creatures were known as necromancers of the sea, and Mo Fan saw them shaking their bone staffs at him.

The empty sockets of the skulls on the staffs shone in a wicked, strange, red light. They were casting an evil curse!

Mo Fan hated curses the most. Before the Seabed Bone Undeads could cast their curses, he threw a punch behind him.

When his fist struck air, countless high-voltage lightning bolts shot out and split into even more lightning bolts that shot through the Seabed Bone Undeads’ bodies.

The creatures fell apart, and the bone staffs landed on the ground.

“Growl!”

Thousands of Shark Heroes equipped in ice-blue Frost Armor marched toward him from his right. Some of them rode on Ice Sharks, some held sharp bone forks, and some had underwater heavy axes.

They seemed to have gone through something like the training of a human army, because they moved as one when they marched forward. They even attacked as one.

However, Mo Fan was prepared. The mud under their feet turned into a churning, black swamp. Countless black tentacles erupted, and they strangled their necks.

Only a handful out of the thousands of Shark Heroes made it out of the execution grounds that was the swamp. The Chief Sharks, who watched from the air, intended to use these Shark Heroes to exhaust Mo Fan's strength and ambush him during the chaos, but these Shark Heroes were no different from cannon fodders to him. They couldn't even reach him!

Mo Fan glanced at the Chief Sharks, and his body vanished from the spot like a drop of ink falling into water.

The next moment, Mo Fan appeared on the dorsal fin of a Chief Shark. This was a Chief Shark made of zircon. It was as tough as a zircon. If Mo Fan had not gone through his demonification, he would have had a hard time fighting against this Chief Shark, because it was a ruler among all ruler-level creatures.

Mo Fan held on tight to the Chief Shark's dorsal fin with one hand and brought his other hand up high before unfurling his fingers a little. A sharp, black dragon spear appeared and shone with a black, metallic glow. A thick aura of death surrounded it.

Whoosh!

The dragon spear pierced through the Chief Shark's heart. While in his demon form, Mo Fan was like a hunter in the dark. The long and thin Dragon Shadow Spear pierced through the Chief Shark's back and came out through its stomach. The dark, corrosive powers of the spear spread through the Chief Shark's body at lightning speed!

The Chief Shark squirmed and struggled in an attempt to throw Mo Fan off, but Mo Fan held onto the Dragon Shadow Spear tightly and poured his power into it. The Chief Shark suddenly plunged and crashed on the ground.

Its body had already eroded completely before it hit the ground. Its zircon skin fell apart due to rot.

The Dragon Shadow Spear continued releasing its corrosive power, and pus grew on the huge Chief Shark's body before it was reduced to bones.

When Mo Fan withdrew the Dragon Shadow Spear, only black, brittle bones remained of the Chief Shark. It did not even have the chance to turn into an Undead.

"Interesting. Looks like this thing is made specifically to deal with these tough creatures." Mo Fan's gaze landed on the Lord of the Shark Men.

Due to having its body made of ores and gemstones, this creature did not even fear facing the Azure Dragon. However, there was nothing in the world which was completely invincible. Even the Titans in Greek mythology were killed by some weapon or another.

Darkness was perfect to take down these ugly and tough creatures!

The Lord of the Shark Men had seen what happened to its subordinate, and it narrowed its small eyes.

Mo Fan suddenly charged forward with speed, and his body practically blurred into a black line. He swung the Dragon Shadow Spear, producing thousands of afterimages for the spear. These afterimages sliced through the air like a black meteor shower and swept past the body of the Lord of the Shark Men!

Just as he had expected, the corrosive power of Darkness was the best method to deal with these creatures. He could see those afterimages leaving behind multiple holes on the creature's body. These holes were filled with the corrosive power of darkness, and they started gnawing into the Lord of the Shark Men's tough skin like living worms.

The creature howled. It was in great pain because of the corrosive power.

Its howls summoned its Shark Men army to surround Mo Fan. The air was filled with Giant Shark Beasts, and the ground with Shark Heroes and other subspecies of Shark Men. They were so densely crowded together that they formed a magnificent, terrifying sea of silver-gray.

Mo Fan sneered. He tossed the Dragon Shadow Spear into the cloud of blackness. He saw the cloud exploding into a black vortex. Innumerable number of Dragon Shadow Spears plunged down from within the vortex and stabbed into the ground at the speed of meteors to pierce through the Shark Men army!

Screams of agony rang in the air. The Shark Men army was like the most pitiful of ants before the Dragon Shadow Spear. They died in droves, but the Dragon Shadow Spear continued its attack. Its area of effect was so large that not even the Lord of the Shark Men was safe.

"Chaos: Seal!"

Mo Fan decided to deal an even more brutal blow. Once he was done with casting the Dragon Shadow Spear rain, he cast a Chaos Element spell that spread to a wide area. It copied the Dark Element spell from the Dragon Shadow Spear, and Mo Fan used it to attack the Shark Men's army again!

If any of them survived, he cast another spell.

Even if they managed to survive, they would be crippled, and stuck with the corrosive power of death.

The Lord of the Shark Men could only watch as its army was slaughtered by Mo Fan's Dark Element magic. Lava gushed out of its body like a volcano.

The Lord of the Shark Men was a powerful creature. It carried an underwater living volcano in its body. However, if it were to fight Mo Fan with Fire Element magic, it would be marching to its own death!

Mo Fan's Demon Fire burned, and the light he emanated was even stronger than the light from the Lord of the Shark Men's volcano. In fact, even the lava that gushed out of the Lord of the Shark Men's volcano turned into a source for Mo Fan's Demon Fire!

Chapter 2884: Cocklebur Clams

Fwooooooooooom...

Half of Mo Fan's body was on fire, while the other half was a cold shadow, making him look sinister.

He ran to the Lord of the Shark Men.

Suddenly, the shadow and fire merged and formed the Black Demon Fire. The Demon Fire instantly crushed all the deep-sea lava on the Lord of the Shark Men's body and engulfed it!

A black fire was unheard of.

The Lord of the Shark Men twisted and struggled to extinguish the Black Demon Fire. However, the Demon Fire spread faster than normal fire. It burned along the parts of the Lord of the Shark Men's body which had rotted and used the gas generated from those parts as its fuel and kept burning. The fire became fierce as the necrotic gasses increased.

Around them were the Undeads and the corpses of those that Mo Fan killed with the Dragon Shadow Spear, so the necrotic gas in the area reached its saturation point.

When the black fire burned in such a place, the effect was even more terrifying. The fire burned everything it touched until everything was reduced to ashes.

It was unclear whether the power of the Black Demon Fire was of the Fire Element or the Shadow Element. However, both could turn an object into ashes in an instant. It was even more terrifying when the two merged. The Lord of the Shark Men's body and the volcano in it had been reduced to ashes by the raging fire.

The Black Demon Fire engulfed the giant body, which even the divine power of the Azure Dragon could not shatter. The arrogant and cruel Lord of the Shark Men screamed and fled to the ocean desperately.

The Black Demon Fire followed it. It would not disappear in a short period. Even if the Lord of the Shark Men got into the deep icy sea, the Black Demon Fire would not extinguish, as it was a special fire that not only could burn at high temperatures, it also contained the scorching ability of the Shadow Element.

...

Mo Fan smiled as he watched the Lord of the Shark Men flee.

Fusion Magic worked best when Mo Fan was in demon form. Otherwise, it would be hard to deal with the Lord of the Shark Men.

Without the Lord of the Shark Men, no one else could stop Mo Fan from moving forward.

The Black Demon Fire did not disappear. The Divine Flaming Snakeking at Mo Fan's back had become a black divine flame. It was like a snake demon who looked down on all manner of living beings as it ruled the ninth circle of hell.

The Dark Divine Flaming Snakeking began to kill everything on the battlefield. Mo Fan did not need to do anything, as the Dark Divine Flaming Snakeking took care of the demons.

Mo Fan reached the tail of the Azure Dragon and found that its hind claws were trapped in thousands of chondral cords.

The Ocean Undeads crawled on the chondral cords like ergates in a nest of maroon ants. They used their bodies to strengthen the chondral cords. As more Undeads crawled up, the chondral cords became thicker and tougher.

It was no wonder that the Azure Dragon could not escape from it. Since the number of Undeads kept increasing, the Azure Dragon was forced to stay on the ground.

Mo Fan glanced at the Azure Dragon's tail.

The giant tail of the Azure Dragon stretched from the overpass entrance to the airport expressway. Although the chondral cords did not bind the tail tightly, thousands of clams stuck to it like cocklebur. It was terrifying to see!

The Cocklebur Clams had thin thorns all over their bodies. The Azure Dragon's scales were big, but it had a soft granite-like skin between the scales, allowing it to twist its body in any way it wanted.

The thorns of the Cocklebur Clams were extremely thin, and they pierced through the soft skin between the scales.

The Azure Dragon had countless sections of the Ancient Great Wall as its body parts. The parts that were broken, cracked, and dilapidated had not been repaired, especially because the ancient wall relics were not well preserved. The soft skin and the broken parts had become the target of those evil Cocklebur Clams, making the entire tail of the Azure Dragon almost completely stiff.

Thousands of Undeads crowded the Azure Dragon's tail, hind claws, and other parts of its body. If Mo Fan did not remove these parasitic creatures in time, the Azure Dragon would be in danger.

The Azure Dragon roared as it sensed Mo Fan approach. It was trying to tell Mo Fan to take care of the Cocklebur Clams on its tail first.

The Azure Dragon relied heavily on its tail to exert strength. If it became stiff, it would affect its whole body.

"Leave it to me." Mo Fan jumped onto the Azure Dragon's tail.

Rows of thorny fins were stuck at the end of the tail. There were hundreds of Cocklebur Clams on the fins, which were the size of a small guard tower.

The Cocklebur Clams not only stung but also made it difficult for the Azure Dragon to lift its tail due to the sheer collective weight of the clams.

Mo Fan looked at them. Pulling them out by force would injure the Azure Dragon's soft skin, so he could not use violent magic recklessly.

It was a pity that Mo Fan had not mastered Light Element Magic. The Sacred Chants of the Light Element magic could exorcize these skeletons. Mo Fan's Fire Element and Shadow Element were not lethal to these creatures.

"I can only use Lightning Element. The Azure Dragon also has lightning power. So why didn't it use divine lightning to kill them?" Mo Fan looked at the Azure Dragon.

The Azure Dragon's whiskers were its source of lightning power. He understood why it did not use the divine lightning when he saw that one of its whiskers had fallen off.

The Cold Moon Demon Lord must have been responsible for that. When Mo Fan had rushed to the Azure Dragon, he had seen the Cold Moon Demon Lord cast a demonic spell. After that, he had not seen the Azure Dragon summon lightning bolts.

'Whisker?' Mo Fan looked around and saw the fallen whisker of the Azure Dragon in a town four kilometers away. A large group of Corpse-eating Bone Fishes was trying to devour the Azure Dragon's whisker.

The remaining lightning power of the Azure Dragon was on that whisker.

It would be difficult to wipe out tens and thousands of Cocklebur Clams on the Azure Dragon's tail with just devil's lightning. If Mo Fan could absorb a part of the Azure Dragon's divine lightning, he would be able to wipe out these intractable Undeads quickly.

"Azure Dragon, I'll get your whisker back, so hold on."

The Azure Dragon and Mo Fan could understand each other, so it knew about Mo Fan's plan. Its other whisker began to accumulate lightning while waiting for Mo Fan to get the other whisker back.

...

The Corpse-eating Bone Fishes were a group of low-level Undeads. They were similar to the microbes found in nature and could break down any corpse.

These Corpse-eating Bone Fish would devour and decompose a body at a high speed.

The dragon's whisker was precious. If this group of Corpse-eating Bone Fish ate the Azure Dragon's whisker, they would most probably evolve into Bone Fish King. However, the fine thunder velvet on the whisker had powerful lightning and magnetic force. The Corpse-eating Bone Fishes that approached the whisker were electrocuted and reduced to ashes.

Chapter 2885: Soul Shadow—Divine Fire Phoenix

When Mo Fan walked toward the whisker, the lightning bolts on the thunder velvet subsided. Some Corpse-eating Bone Fishes with strong resistance had started to eat it.

"Mind: Disintegration!"

The silver eyes flickered. Mo Fan froze the Corpse-eating Bone Fishes and disassembled the bones of these greedy creatures one after another. Soon, they were only a pile of broken white blocks.

Mo Fan was about to take the whisker away when he felt a chill on his back. His demon bloodline that had always been eager suddenly became calm.

The dark vein surged. Mo Fan turned around and saw a creature with a cold body and two whiskers.

It was the Cold Moon Demon Lord!

Mo Fan had not expected the Cold Moon Demon Lord to appear beside the Azure Dragon's whisker. Its Eye of the Tide and Eye of the Ocean stared at Mo Fan coldly, as if they could see through him.

Mo Fan took a deep breath. This was the first time Mo Fan felt such terror in his demon form.

The dark vein changed the hot demon's offensive blood to a defensive state. The demon in his body seemed to be telling him that he could only survive this terrifying creature's stare if he were to remain calm.

He wondered who was stronger between the Dark King and the Cold Moon Demon Lord.

Mo Fan tried to breathe calmly. The Cold Moon Demon Lord only stared at him for a few seconds, but it felt like decades. Its stare felt like mental torture that would make him collapse at any time!

It was similar to the time when Apas accidentally saw the evil ruler's figure. The fear still lingered at the bottom of his heart. Now that he faced it again, the fear grew and spread all over his body and soul.

Mo Fan tried not to look at the Eye of the Tide and Eye of the Ocean, but he could not avoid the eyes of the Cold Moon Demon Lord. Its eyes that were always shut were now open for some reason.

Its eyes suddenly widened and turned into a still lake. A thin layer of ice sealed the cold lake with countless corpses at the bottom.

They all died in different ways. Zhan Kong, Qin Yu'Er, Zhao Manyan, Mu Bai, Mu Ningxue, Zhang Xiaohou, Ye Xinxia...

Mo Fan was familiar with all of them.

On the cleanest and shallowest part of the lake, Mo Fan saw a face exactly like his. The person was dead, but he must have cried desperately like a child at the last moment of his life.

It was the Divine Wood Well.

The corpses inside were of all the people he knew well, including those he had fought in many battles. They were all in the well.

Mo Fan felt goosebumps erupt on his skin.

The Cold Moon Demon Lord searched for everything he cared about, feared, and was afraid to face.

Mo Fan still could not figure out what was actually inside the Divine Wood Well. However, it must be a god-like existence close to the Dark King. 'Could it be that the Cold Moon Demon Lord had also reached an unattainable realm?'

'It was impossible!' he told himself. 'It would never reach such a level. Otherwise, why would it try so hard to gather all the empires in the Pacific Ocean?'

It was the Ocean Evil Mind. It could spy on people's minds like the Godly Horde Prophet. It replicated Mo Fan's memories and turned them into scenes that would break him.

He knew the Cold Moon Demon Lord was behind it, but why couldn't he wake up?

He was trapped in a nightmare. Even though he was short of breath and struggled, he still could not wake up.

Mo Fan felt as if he was pulled into an endless underwater abyss. The cold and heavy water surrounded him. He was thousands of miles away from the light, but he did not know if he could reach the bottom of the lake.

...

It was doomsday. The Ocean Demons and Undeads in the Pudong ocean area ruled this apocalyptic era.

Mo Fan's fire had gone out on the messy battlefield where he had been in demon form just a while ago. The demon pattern slowly faded and revealed his face. However, evil energy still surrounded him and extracted his soul like a ghost.

The Cold Moon Demon Lord stood less than five meters away from him. Its "skirt" spread out, and the tips of its whiskers flickered with a strange light. The Eye of the Tide and Eye of the Ocean opened and connected to the whiskers.

The Heaven-shaking Demonic Waves that rolled to the skyline fell at a place far from Pudong with a weaker aura than before.

The members of the Forbidden Curse Association noticed it in the sky and looked at it.

"It uses the Eye of the Tide and Eye of the Ocean on Mo Fan. It wants to kill Mo Fan!" Councilman Gu exclaimed in horror.

The Heaven-shaking Demonic Waves were collapsing. Even though the Cold Moon Demon Lord could juggle two spells at the same time, the chanting of the Heaven-shaking Demonic Waves was affected because it was casting another powerful demonic spell.

"We need to think of a way to save him!" The members of the Forbidden Curse Association flew toward the small town.

The Ocean Queen noticed everything. It sent out Undead sound waves and summoned tens and thousands of broken Undeads smashed by the Azure Dragon. It set them up as the Broken Bone Formation to block the Mages of the Forbidden Curse Association.

The people of the Forbidden Curse Association could not land on the ground because of the Broken Bone Formation.

For a long time, the Cold Moon Demon Lord did not attack any Forbidden Mage because of the ongoing chanting of the Heaven-shaking Demonic Waves, but it intended to strike a fatal blow on Mo Fan. The Cold Moon Demon Lord had understood that Mo Fan and the Azure Dragon could prove to be a threat against its plan.

...

The Seal of Azure Dragon on the forehead, which looked like the third eye, suddenly glowed. Many totem patterns appeared in the small Seal of the Azure Dragon.

Mo Fan's forehead was hot. The Sacred Light shot at the Cold Moon Demon Lord's closed eyes.

The Cold Moon Demon Lord screamed. It was no longer calm and indifferent. It tried to catch Mo Fan.

Mo Fan finally woke up. He sensed a blue eye on his glowing forehead, and scorching Sacred Fire burned in his own eyes.

"Thanks to you, I got to recall my fear from back then and now I understand that I should cherish my life." Blue Sacred Fire burned in Mo Fan's chest.

It had killed him with the Eye of the Tide and Eye of the Ocean. But that didn't matter. There was a fiery heart in his body. With that fire, his body healed, and he was reborn.

His soul had merged with the demon. The Demon Fire that burned even more vigorously in the desperate situation of death refused to extinguish.

The Cold Moon Demon Lord tried to use his past and his fears to kill him. However, it had shaped him into a new being instead.

"Your tricks are not any better than Medusa's." Mo Fan avoided the Cold Moon Demon Lord's attack.

The Sacred Fire on Mo Fan's body burned even more brightly.

In place of the Divine Flaming Snakeking Soul Shadow, the Divine Fire Phoenix was spreading its wings on top of the Sacred Fire!

The appearance of the Mysterious Feather Sacred Totem Beast seemed to be outlined in Mo Fan's Demon Fire Soul Shadow!

Chapter 2886: The Azure Dragon Breaks Free

A blue claw appeared and targeted the Cold Moon Demon Lord.

The Mysterious Feather Sacred Totem Beast Soul Shadow at Mo Fan's back was not complete. It was not enough to find related Totems. However, the afterimage that appeared had an incomparably magnificent aura. The Divine Fire Phoenix had the most powerful flames!

The Cold Moon Demon Lord's body turned into icy seawater and escaped through the gap between the Azure Dragon's claws. However, Mo Fan did not intend to let it go that easily. He raised his hands into a prayer pose. The Mysterious Feather Sacred Totem Beast Soul Shadow at his back slowly opened the Empyrean Fire Wings and suddenly attacked the Cold Moon Demon Lord.

A few of the Cold Moon Demon Lord's whiskers burned. Its Eye of the Ocean opened and created an island made of seawater. The island pressed on the Empyrean Fire Wings and stopped the powerful fire from burning its body.

As the Azure Dragon and Mo Fan besieged it, the Cold Moon Demon Lord fled.

Mo Fan could feel the viciousness of the evil ruler of the ocean from its eyes. It wished it could turn the misleading memories that Mo Fan had seen into reality to truly break him.

Mo Fan sneered. After rescuing the Azure Dragon, the first thing he wanted to do was to kill the Ocean Evil Mind!

The Cold Moon Demon Lord retreated, and the Royal Skeleton Queen immediately flew over to guard it.

The Cold Moon Demon Lord turned and glanced at the collapsing tides. To kill Mo Fan, who was in the demon form, it concentrated the divine power of the Eye of the Tide on him.

It wanted to stop all the chanting and kill Mo Fan first. However, his willpower was far more tenacious than what it had expected.

Not only did it fail to kill Mo Fan by inducing a mental breakdown, but it had also delayed the arrival of the tide.

It could not afford to be distracted anymore. If it was distracted again, it would delay the arrival of the Heaven-shaking Demonic Waves on this continent.

Right now, he could only let Mo Fan take the Azure Dragon's fallen whisker away with him.

...

Mo Fan could feel the enormous divine lightning energy in the whisker. Even though it had not returned to the Azure Dragon, the lightning power it released could kill all the Cocklebur Clams.

Mo Fan absorbed the lightning power from the Azure Dragon's whisker. Then, he merged it with the Space Element and created silver-blue lightning chains.

Lightning chains had a powerful crushing effect. After they touched a Cocklebur Clam, they would quickly turn to the next target and form a chain made of lightning connecting every clam.

The silver-blue lightning chains pierced through tens and thousands of Cocklebur Clams and turned them into powder.

The clams on the soft skin of the Azure Dragon were finally gone, and its tail slowly returned to normal.

Bang!

The Azure Dragon raised its tail and smashed the Undead army. The blue cracks in space branched out like a spider pattern and sucked in the Undeads through them.

After a few smashes, the cracks in space increased in number. Countless Undeads fell into an endless abyss.

Mo Fan was in the middle of the Undead army. He was looking for the chondral chords that trapped the Azure Dragon.

Soon, he found one with Brown Bone Undeads crawling on it. They used their bodies to strengthen the chondral chords. Thousands of Undersea Withered Bone Giant Generals were at one end of the chondral chord. They acted underworld burlaks and tied a part of the Azure Dragon's body to the ground.

"Go to hell!" Mo Fan raised his hand. The shocking Fire Phoenix Wings slanted like a blade.

The Fire Phoenix Wings injured and killed thousands of Withered Bone Giant Generals. Before the Withered Bone Giant Generals could escape, Mo Fan jumped to the sky and stepped on a burning Fire Boat.

The Fire Boat fell from the cloudy sky and smashed the Withered Bone Giant Generals. Once the Fire Boat touched the ground, it exploded, and the detonation engulfed all the Withered Bone Giant Generals. The vibration even caused the Undead dunes to collapse!

Roar!

Without the pulling of the Withered Bone Giant Generals, the hind claws of the Azure Dragon could finally move. It raised them and broke free from the chondral chords.

The powerful hind claws caught the head of the Demonic Ocean Skeleton and crushed it. Fortunately, skeletons could not grow their heads back.

Its body sent out a chondral chord again which wrapped around the waist of the Azure Dragon.

The tail of the Azure Dragon could move freely, so it didn't give a chance to the Demonic Ocean Skeleton to trap it anymore.

The Azure Dragon wagged its tail and sent the Demonic Ocean Skeleton, with a mountain-like body, flying more than ten kilometers away. Many strong emperor skeletons fell along the way.

Roar!

The Azure Dragon vented its anger on the despicable Undeads. Every time it wagged its tail, many Undeads were crushed to death.

Its hind claws caught the dune-like Undead army. No creature below emperor-level could escape from its claws.

With its neck finally free, the Azure Dragon raised its head and breathed out on the vast Undead army.

The dragon's breath was real annihilation. The Undeads did not leave anything behind and vanished altogether.

The Undeads were dying. From the moment the Ocean Undeads came ashore, the army of Ocean Demon had expanded rapidly. However, with the outbreak of the Dragon Deterrence of the Azure Dragon, the red Undead army seemed to have vanished completely.

The Azure Dragon did not need to fly. Even on land, it could use its ancient force to wipe out vulnerable Undeads without using a single divine spell as long as it had its limbs and claws intact.

It attacked all the way back from the Pudong Airport. The Undeads lost tragically. The Azure Dragon had killed countless Undeads by then. The Royal Skeleton Queen could not stay still, and it tried to stop the Azure Dragon.

"Azure Dragon, the Demonic Ocean Skeleton is still around. Let's kill it first." Mo Fan stood on the horn of the Azure Dragon once again.

The demon joined forces with the Azure Dragon. The weak Undeads could not withstand it.

Those who wanted to trap the Azure Dragon using the human wave attack would be killed by Mo Fan's lightning hands.

Without the restriction of the despicable Undeads, the Azure Dragon could kill the skeleton army brutally.

A Divine Beast like the Azure Dragon could crush thousands of Undeads even if it just rolled on them.

Chapter 2887: Divine Throne of the Undead

The Ocean Queen chased after the Azure Dragon, but the Azure Dragon ignored it.

It was not easy to kill the Ocean Queen. However, the Demonic Ocean Skeleton must first pay the price for its previous actions.

The Azure Dragon wagged its tail and plowed through the Undeads. Its body gradually flew off the ground.

It did not fly very high. Its ventral scale flew over the heads of the Withered Bone Undeads. Many Ocean Undeads retracted their heads, but it was useless. The claw of the Azure Dragon had blue lightning bolts.

"Wag your tail at the Ocean Queen!" Mo Fan looked back and saw that the Ocean Queen was approaching the tail of the Azure Dragon.

Mo Fan did not know what evil demonic spell the Royal Skeleton Queen was about to cast. He saw the space around it become dark red like an esophagus of an ancient monster. It was trying to devour the tail of the Azure Dragon.

The tail of the Azure Dragon had become more flexible. It swung its tail to the sky and summoned a bolt of golden divine lightning.

Boom!

The golden divine lightning sent the Ocean Queen flying, and the terrifying esophagus of a monster disappeared.

The target of Mo Fan and the Azure Dragon was not the Ocean Queen.

The Demonic Ocean Skeleton had not fully regained its consciousness after the attack of the Azure Dragon.

Its Emperor Bones were badly crushed. Mo Fan soon realized the place where the chondral chords appeared had become empty holes, and black blood oozed out.

"Trap it!" Mo Fan hurriedly said to the Azure Dragon when he saw the Demonic Ocean Skeleton trying to escape.

The claw of the Azure Dragon touched the ground, and the mountain-like body flew up.

The Demonic Ocean Skeleton ran on the corpses of the Whitered Bone Undeads. The Azure Dragon slithered in the air like a snake and caught up with the Demonic Ocean Skeleton.

It bit the Demonic Ocean Skeleton, but the Demonic Ocean Skeleton was strong. It tried to break free from the Azure Dragon's bite by force, but the Azure Dragon did not give it a chance to escape. The Azure Dragon raised and shook its head, throwing the Demonic Ocean Skeleton to the ground.

The Azure Dragon's claw pressed the Demonic Ocean Skeleton to the ground. The ground cracked, and the surface sank a few meters down.

The Demonic Ocean Skeleton struggled. It tried to break the claw of the Azure Dragon to escape. However, the Azure Dragon pinned the Demonic Ocean Skeleton with increased force and bit its upper body.

Its claw pressed it to the ground, but its head swung up. This wild bite instantly tore the Demonic Ocean Skeleton into two. Blood sprayed out. The scene was gruesome and shocking.

The emperor-level Demonic Ocean Skeleton was completely ripped apart. To prevent its Emperor Bones from reassembling, the Azure Dragon deliberately sprayed blue dragon's breath on the Emperor Bones.

The dragon's breath turned the bones of the Demonic Ocean Skeleton into ashes and wiped out the black blood. The Azure Dragon was still angry. It caught a few emperor-level skeletons that kicked it when it was down and bit them to death.

The Royal Skeleton Queen flew to the sky, and the regathered Undead army followed below. The army was as big as a thousand-meter-high mountain, so they looked particularly frightening on the flat ground.

Its amber eyes were full of anger and viciousness. It was because the Azure Dragon had ignored and embarrassed it in front of the Undead army.

Buzz!

A harsh vibration rang in the air. Countless Dragonwasps formed a terrifying forest in the sky and surrounded the Ocean Queen and the Netherbone Dragon.

The Netherbone Dragon had an evil aura. Its back was made up of the corpses of many emperor-level creatures. It looked frightening.

The Ocean Queen stood on top of the head of the Netherbone Dragon. More and more Black Bone Wasps gathered at its back. The aura of the Undeads almost engulfed the entire world.

It stared at the Azure Dragon and Mo Fan resentfully. The Undead army smashed by the Azure Dragon gathered again and climbed onto the other Undeads. Those wriggling figures made the red Undead mountain appear even bigger.

The red Undead mountain was like a Divine Throne of the Undead. It dragged the Ocean Queen, who rode the Netherbone Dragon.

The Cold Moon Demon Lord hovered on top of the Ocean Queen like a moon. Cold lights shone on the messy world with the chanting of the devastating tide.

On the other side, the Azure Dragon moved. Its blue mountain-like body was comparable to the Undead mountain. Its magnificent tail was on the muddy ground, but its horns almost touched the clouds!

Mo Fan stood between the Azure Dragon's horns. The Mysterious Feather Sacred Totem Beast Soul Shadow was on its back and spread out in the fiery glow.

The Black Dragon Emperor was suspended beside the Azure Dragon. The Black Dragon Emperor was a giant creature, but it appeared only as big as the Azure Dragon's head.

The combination of the western dragon with the metallurgical forging made it seem as though the Black Dragon Emperor had been reborn.

The Azure Dragon was fearless and took the lead in killing the Cold Moon Demon Lord in the sky.

The Ocean Queen immediately rode the Netherbone Dragon and blocked the Azure Dragon. A long skeleton hand came out of the tall red Undead mountain below it to grab the Azure Dragon's neck!

The metallic Black Dragon Emperor suddenly took a deep breath. Its belly swelled and it spat out a terrifying black fire at the red Undead mountain. The long skeleton hand was forced to retract and block the giant fire of the Black Dragon Emperor.

The Netherbone Dragon took advantage of it and launched a surprise attack. It wanted to use its sharp thorn to pierce the eye of the Azure Dragon. Mo Fan flew up and punched out a lifelike Divine Fire Eagle at the Netherbone Dragon.

Buzz!

Numerous Black Bone Wasps flew toward the Divine Fire Eagle. They relied on a strange evil energy to extinguish Mo Fan's fire.

The demon bloodline could push a certain power to its peak in a short period.

Mo Fan had control of the Chongming Divine Fire, and Little Flame Belle had the inheritance of the Mysterious Feather Sacred Totem Beast. The intensification of the demon bloodline awakened another soul of the Sacred Totem Beast and formed an incomplete Soul Shadow at Mo Fan's back.

Mo Fan knew that it was not a complete Sacred Totem Beast. He needed more related Totems to trigger its real appearance.

However, Mo Fan yearned for this power. He believed that the complete Mysterious Feather Sacred Totem Beast could easily burn these Bone Wasps to crisp.

...

The Black-Patterned Bone Wasps were strange. Not only could they eat Mo Fan's fire, but also could devour the fire that the metallic Black Dragon Emperor spat out.

Mo Fan carefully observed the Netherbone Dragon. The strongest ability of the Netherbone Dragon was obviously the Black Bone Wasps attached to it!

Chapter 2888: Dragon Wind Hat

The red Undead mountain squirmed again. Many Skeleton Mountains appeared on the Divine Throne of the Undeads composed of hundreds and thousands of the Undeads.

These mountains were comparable to giant bone spears. They pierced outward from the Undead mountain from different directions. Some even pierced through the clouds.

The Mountain Bone Spears moved toward the Azure Dragon. Many necromancers cast a strange demonic spell at the Azure Dragon, and something like the fangs of red poisonous snakes pierced into its skin.

The number of red poisonous fangs increased. They bit off the Sacred Totem Beast Dragon Scale from the Azure Dragon's body. The Mountain Bone Spears stabbed at the place where the scaled had peeled off. A few Mountain Bone Spears had pierced into the skin of the Azure Dragon.

The Azure Dragon moved around the Divine Throne of the Undead. Its claw hit the Divine Throne and left a big hole. However, many skeletons climbed up from the ground and filled up the hole immediately.

The sharp laughter of the Ocean Queen echoed in the sky. It mocked the Azure Dragon's attempts.

The Divine Throne of the Undead was still getting higher, and the number of the hideous Mountain Bone Spears kept increasing. They were like a fully armed Undead pillbox and could shoot out poisonous arrows with corrosive ability from all directions.

The Azure Dragon could not use its power. If its tail smashed at the Divine Throne of the Undead, the Mountain Bone Spears might pierce through it, too.

The Divine Throne of the Undead was meant to deal with a giant creature like the Azure Dragon. It kept expanding, as if it wanted to nail the Azure Dragon to the Divine Throne.

...

The Azure Dragon kept a distance and moved quickly from a low altitude. It circled the Divine Throne of the Undead while keeping a five kilometers distance around it.

Its head and tail formed a big blue arc around the Divine Throne of the Undead. After making a full circle, the Azure Dragon flew upward.

It flew in circles with great speed. Its action created a giant air current, which swept within five kilometers of the Divine Throne of the Undead.

Then the Azure Dragon flew upward again. It was so fast that its figure was a blur. Even when the Azure Dragon left the area, the afterimage remained.

The Azure Dragon continued to fly up in circles at high speed.

The Azure Dragon's figure seemed to have elongated. An increasingly majestic blue air current formed a Tiandi Hat with the center of the Azure Dragon's ascent as its wind axis.

The Dragon Wind Hat wrapped the whole Divine Throne of the Undead. The hideous Mountain Bone Spears broke as the Dragon Wind Hat spun violently. The skeletons climbing on the Divine Throne of the Undead got swept into the sky like dust. The sky became cloudy, and skeletons were everywhere.

The army of skeletons on the ground also received a destructive blow. The Azure Dragon spun in the sky, and the Dragon Wind Hat below became even more terrifying. It felt as if the Dragon Wind Hat would cover the whole Pudong.

The terrifying Undead mountain was crumbling. The ruler-level Undeads at the top collapsed first. Then, the Undeads in the middle shattered. Finally, it was the turn of the Undeads at the bottom. The bottom was composed of tens and thousands of Withered Bone Undeads. They still could not survive.

After a while, the shattered bone fell on the ocean not far away and on the other side of the Huangpu River.

The Dragon Wind Hat created by the Azure Dragon did not stop. Some small and weak Undeads were swept up to the sky and shattered after clashing with the powerful blue air current.

The red skeleton flew in the air like a sandstorm. Some fell like hail, and some, like snowflakes.

The laughter of the Ocean Queen stopped. As its Throne fell, it could no longer fight with the Azure Dragon.

The Azure Dragon was still in the clouds. As it slowly landed, an even more terrifying divine power hit the land.

The Royal Skeleton Queen stood among the Undead army.

Suddenly, the ground trembled. The place where the Azure Dragon gazed seemed to crack. A crack rapidly appeared below the Ocean Queen and the Undead army.

The gap between the crack and the surface reached sixty meters. Except for the Ocean Queen, all the other Undeads were red sand in the Dragon Cracks.

The Royal Skeleton Queen trembled. It could not accept the defeat and roared at the Azure Dragon in the sky. The eyes of the Azure Dragon flickered, and it stared at the ground.

After sinking for about sixty meters, the Dragon Cracks sank a few dozen meters more!

A sponge would become hard after being compressed, let alone a ground full of mud, sand, stones, and rock.

The Royal Skeleton Queen could not stand still anymore. It kneeled on the ground. Its kneecap almost shattered. The strange white gauze on its head also disappeared.

An evil red light appeared on its body, and its amber eyes gleamed. No matter how it struggled, it could not break free from the Dragon Crack of the Azure Dragon.

The Dragon Crack was still sinking. The divine power was too dominating.

The skull, as well as other parts of the Royal Skeleton Queen, began to crack.

...

Roar!

The Netherbone Dragon roared madly. It wanted to save its owner by sending the Black-Patterned Bone Wasp toward the Azure Dragon.

Mo Fan would not let it disturb the divine power of the Azure Dragon. He was on the back of the metallic Black Dragon Emperor.

The Black Dragon Emperor spread its wings and flew. It knocked the Netherbone Dragon down with its body.

Mo Fan jumped off the Black Dragon Emperor before it knocked the Netherbone Dragon down. He quickly changed the Soul Shadow on his back, and the incomplete Empyrean Divine Fire immediately disappeared. A dark shadow quickly emerged like a giant ghost. It was like a black cloak attached to Mo Fan.

Mo Fan threw the Black Sky Cloak to cover the Black-Patterned Bone Wasps that flew toward the Azure Dragon. These Black-Patterned Bone Wasps were the cause of the plague. They could quickly infect creatures and weaken their power.

If the Black-Patterned Bone Wasps appeared in the city, they could harm the residents of the city. They were also the Netherbone Dragon's strongest ability.

The divine power of the Azure Dragon was about to crush the Ocean Queen. Mo Fan must not let the Black-Patterned Bone Wasps affect the Azure Dragon's divine power!

Chapter 2889: Poisonous Netherbone Dragon

The Cold Moon Demon Lord had stayed in the background, observing everything.

However, it could not stay calm anymore. Once the Azure Dragon defeated the Ocean Queen, it would lose its strongest protection. After all, the members of the Forbidden Curse Association had restrained other Emperor-level Ocean Demons, so they could not stop the Azure Dragon.

It opened its eyes.

However, they were not the Eye of the Tide and the Eye of the Ocean but the eyes on its face.

The ghost whiskers under it opened slowly like octopus tentacles, and a strange electric light shone on these whiskers.

The strange light got intense and almost made its body transparent. The strange light flowed in its body like glowing blood and finally flowed to its brain.

Its brain and eyes radiated a dazzling brilliance like the sun and the moon. The brilliance did not illuminate the entire world. Like a track light, it only illuminated the Netherbone Dragon and the Bone Wasps.

The body of the Netherbone Dragon seemed to be absorbing the Evil Mind Light. Its broken bones recovered quickly, its wings expanded, and its skeleton body had suddenly become stronger. Its body had grown terrifyingly sharp horns. Those horns and thorns could kill anything.

The group of Bone Wasps also began to transform with the illumination from the Evil Mind Light. In a few seconds, they turned from a group of Black-Patterned Bone Wasps to a group of Black-Patterned Iron-Blooded Dragonwasps.

There were many Bone Wasps, and they had strong phagocytosis, infecting ability, and cooperation skills. Now that each Bone Wasp had the bloodline of the real underworld dragon, they had stronger wings, stings, bones, and toxicity.

A Black-Patterned Iron-Blooded Dragonwasp could harm a small town easily, let alone a group of Black-Patterned Iron-Blooded Dragonwasps.

Mo Fan's Black Sky Cloak could not cover these evolutionary Dragonwasps. They flew toward the Azure Dragon rapidly. They would sacrifice their lives to pierce and sting the Azure Dragon.

After all, the Black Dragon Emperor in magic armor was not the real Black Dragon Emperor. With the evolution of the Netherbone Dragon, the Black Dragon Emperor in magic armor was severely hurt. It could no longer withstand the terrifying attack of this evil underworld dragon.

Mo Fan anxiously looked at the Black Dragon Emperor in magic armor and the group of Black-Patterned Iron-Blooded Dragonwasps flying toward the Azure Dragon.

"Black Dragon Emperor, come back. You have tried your best." Mo Fan used the Soul Seal to recall the soul of the Black Dragon Emperor.

The Black Dragon Emperor could no longer fight against the Netherbone Dragon, so there was no need to let it lose its soul in defeat.

The metal was removed and turned into pieces of black armor. It flew to Mo Fan and turned into a Black Dragon Suit on Mo Fan's body.

Although the soul of the Black Dragon had gone, Mo Fan could feel that this magic outfit still contained a large amount of power of the Black Dragon. It gave Mo Fan a glimmer of hope because it felt like the Black Dragon Emperor had still got his back!

Mo Fan had an extraordinary physique because of the Demon Element. Now that he had a suit made of the Black Dragon's armor, he believed he would not lose when dealing with the Netherbone Dragon.

The Black Dragon Wings spread, and a black fire burned all over it. As Mo Fan flew, the wings with black fire made him look like a black missile soaring into the sky.

The fire accompanied Mo Fan. The Black Dragon Wings and the outline of the Fire Phoenix Wings dyed the sky red.

Mo Fan rushed to the group of Dragonwasps and slaughtered them with the demon's power. The fusion magic increased the destructive ability of several elemental magic, such as silver lightning, black fire, and red sandstorm.

Even though the Dragonwasps had evolved, they still could not withstand Mo Fan's attack. One after another Iron-Blooded Dragon wasps died in the air. The dense black clouds they formed kept getting smaller.

Roar!

The roar of the Netherbone Dragon echoed from a few hundred meters away. The Netherbone Dragon, which had also evolved, was even more frightening than before. Its target was Mo Fan, and it was now flying toward him.

As soon as the Netherbone Dragon arrived, the Black-Patterned Iron-Blooded Dragonwasps that Mo Fan had injured seemed to regenerate and become more aggressive. The group of Dragonwasps put their lives at risk and stabbed Mo Fan.

Mo Fan was wearing dragon armor, so he could withstand some attacks. However, such rapid attacks could threaten his life.

Roar!

The Netherbone Dragon was cunning. It attacked Mo Fan, knowing that the Azure Dragon would come to his rescue.

However, the moment Azure Dragon came out of the clouds, the Netherbone Dragon flew past Mo Fan and rushed toward the Azure Dragon's neck.

There was still a wound on the Azure Dragon's neck, which the Cold Moon Demon Lord had inflicted. The Netherbone Dragon was a powerful and unparalleled poisonous dragon bee. It pulled out the poisonous sting at its bottom and fiercely stabbed the Azure Dragon.

Roar!

The Azure Dragon roared. The poisonous sting pierced into its wound. The dark red poison spread along the Azure Dragon's neck.

The divine power of the Dragon Crack subsided. The Ocean Queen, which the crack had almost tortured to pieces, was finally free. It trembled like an old eighty-year-old woman but still managed to escape from the Dragon Crack.

The Azure Dragon was angry. It slightly lowered its head and used its horns to smash the Poisonous Netherbone Dragon.

The Poisonous Netherbone Dragon fell straight to the ground. Its bones broke apart, but it was still alive. After a while, it got up again and let out a strange cry.

Its cry seemed to be calling to something. Previously, the Ocean Queen had called the skeletons with black patterns, many of which were dismantled from the powerful ruler-level Undeads. This time, the Netherbone Dragon seemed to be calling those shattered skeletons to strengthen its body.

Mo Fan thought there were still some unawakened Black-Patterned Skeletons. However, the Poisonous Netherbone Dragon ordered those Black-Patterned Iron-Blooded Dragonwasps to attack the ruler-level Undeads!

The Bone of Origin of the ruler-level Undeads would develop the black patterns after the Dragonwasps stung them.

The Dragonwasps attacked many Undeads. As more ruler-level Undeads were infected with black-patterned bones, these black-patterned bones flew toward the Netherbone Dragon so that it could transform again!

What kind of demonic spell did the Cold Moon Demon Lord cast to make a summoned Emperor-level creature even more terrifying than the Ocean Queen?

Chapter 2890: The Plague Ruler

The Black-Patterned Dragonwasp was unstoppable. Many Ruler-level Ocean Undead were scattered among the Undead army, especially those that were newly born on China's continental shelf.

The other Ruler-level Ocean Undead were more experienced and possessed a certain level of intelligence. They were aware that the Netherbone Dragon would devour them if they were infected by the Black-Patterned Dragonwasp.

However, the Undead from China's continental shelf lacked intelligence. They were like newborn Undeads with only the instincts to hunt and gather.

The Black-Patterned Dragonwasp pierced into the skulls of the Undead from China's continental shelf with its sting. An evil black mark appeared behind the Ruler-level Undead's skulls.

The black mark spread throughout the Undead's body rapidly like a disease. The Undead changed from red to black. The strong smell of sickness came from within its bones. It was horrifying.

The Black-Patterned Dragonwasp not only targeted the Undead, but also the powerful Ocean Demons. When it stung the living Ocean Demons, their flesh and organs turned purulent, as though they were covered in mud and water. Their flesh and organs fell off their bodies and they turned into evil black bones!

The Netherbone Dragon flew past them from above. The black bones flew toward the Netherbone Dragon like irons to magnet and repaired its shattered parts. They also added venomous horns and spikes to it.

For a moment, the sky was filled with the Netherbone Dragon's necrotic gas. The evil aura covered the Pudong area for a short moment before spreading rampantly through the city like a swarm of insects.

An Undead Rat appeared from a pile of carcasses. It was made up of black and hideous bones. Even though it was small in stature, the necrotic gas spilling out of it was terrifying.

More Undead Rats gushed out from the piles of corpses. Their greedy eyes sparkled like emeralds in a dark pool. There were too many of them.

Flap flap flap flap!

Undead Flies hovered in the sky. They came from the Ocean Demons that were rotting. The Undead Flies flew toward the dense epidemic clouds to make them bigger.

Undead Rats, Undead Flies, and the Black-Patterned Dragonwasp...

The Netherbone Dragon had become the embodiment of all the plagues in this world. It had summoned two other great armies. It became even more powerful. It could even stay independent of the Ocean Queen and become the new ruler of the Plague Empire!

The Azure Dragon's sacred totem light failed to dispel the terrifying epidemic clouds. On the other side of Huangpu River, Light Element mages constructed Walls of Light. They were aware of how much devastation the creatures within the epidemic clouds could bring to humans.

"What the hell is the Cold Moon Demon Lord doing?!" Mo Fan glanced at it before looking at the transformed Netherbone Dragon.

It had not been easy for the Azure Dragon to wound the Ocean Queen. They thought they had successfully stopped the Cold Moon Demon Lord from chanting, but little did they know that the Netherbone Dragon underwent transformation twice in a row!

"Mo Fan!" Councilman Gu and the Forbidden Mages were nearby.

"We'll join forces against the Netherbone Dragon," said Chief Zhu.

"Retreat and go to the river to stop the Undead Rats and Undead Flies. No matter what, you must stop them from flooding into the city," said Mo Fan.

"I'm afraid that the Azure Dragon and you will have difficulty holding back these creatures. Besides, the Azure Dragon is severely wounded," said Councilman Gu with concern.

The Azure Dragon's neck was stung by the Netherbone Dragon's poisonous tail. The long sting was just under its neck. It was unlikely that the Azure Dragon could stir up a powerful hurricane like before.

The poison would spread throughout its body and affect the Azure Dragon's ability.

"We've cut the connection between the Ocean Queen and its Undead from China's continental shelf. The Lingyin Monk has cast his spell. The Undead from China's continental shelf will collapse soon. By then, they will pose little threat to us. We'll stand guard over the river to give citizens sufficient time to evacuate. After that, we will leave so that we won't end up perishing in this place," said Councilman Gu.

The Azure Dragon had severely wounded the Ocean Queen which was very crucial for their survival. This allowed the members from the Forbidden Curse Association to complete their decimation plan to reduce the Undeads' threat over time.

Still, their reaction had been a little slow. If they had reacted to it before the Netherbone Dragon's transformation, there would have been fewer terrifying enemies, including the Plague Ruler that threatened the citizens' lives.

The plague creatures were different from usual demons. Regardless of how the demons roamed about the land or attacked the people, as long as they were killed, they could not regenerate.

But the plague creatures were contagious. They lived in the city sewers and on daily items that most migrants frequently used. They produced garbage. A tiny Undead Rat or Undead Fly could infect a large group of people. Furthermore, if they failed to control the epidemic, it would result in more infected creatures and cause more deaths.

Even if they did not die from the plague or the war, the people would eventually fall sick and suffer in pain. It was a torture to those who were already going through a difficult time.

The Undeads were scary. But the plague was terrifying.

And Undead Plague was the world's most terrifying thing. It could wipe out any horde in a single blow!

"The waves are coming!" Mo Fan pointed at the high skyline waves.

The entire Pudong was covered by a rainstorm. The rainstorm did not come from the sky, it came horizontally from the ocean.

'Was it a horizontal sweeping rainstorm?' he wondered.

When they looked up, they saw that the horizon and the skyline had been engulfed by the massive waves. The Heaven-shaking Demonic Waves were even more monstrous than it appeared to be. It looked as if the other side of the world had drowned. It was dark and depressing.

They turned to the other side and saw that it engulfed souls. The people were unable to fight back and sank into their deepest fears. They lost their mobility and their ability to think. They were paralyzed on the ground and waited for the inevitable doomsday.

Once the Heaven-shaking Demonic Waves reached them, more than half the people were trapped. They couldn't migrate. Moreover, the Ocean Demon army was in their way. The Magic City and its citizens would sink to the bottom of the ocean.

All battles and efforts would be meaningless if they couldn't crush the Eye of the Tide.

"We've no way out," Councilman Gu let out a sigh.

"We don't have any other choice," said Mo Fan.

Chief Zhu nodded. He did not plan to retreat. If he failed to destroy the Eye of the Tide, his previous effort and perseverance would be meaningless. He decided to fight the Cold Moon Demon Lord to death.

He was a Light Element Forbidden Mage and could inflict damage to the epidemic most effectively.

Just then, he noticed an enormous segment of the Ancient Wall on the north through his peripheral vision. It looked like an ancient war fortress flying toward him.

Chief Zhu was stunned. He asked Mo Fan, "A-Are they sending help?"

Mo Fan turned to see a familiar segment of the green walls. They were flying toward the Azure Dragon. The seal on its forehead was like an eye glowing in divinity and giving out heat!
