

Virus 22

God Virus Volume 2 - 22 Search

After that The ugly kept searching for the place his master was looking for while his master spend his time with Bella.

Virus passed most of his time by eating different kinds of tasty food and wine, as he had become quite fond of different delicious taste as it was a new experience to him.

A MONTH LATER

Just like that a month passed and they had still not found the place they were looking for as the planet seemed too big, they had found different kinds of caves under the ocean similar to the description but none was what Virus was looking for.

Virus was thinking at the moment 'It's taking a lot more than I thought.'

'Ella must have missed me.' he thought and then continued 'maybe I should go back and let the island ugly look for it and let me know when he finds it.'

As he was having thoughts of going back he rejected it inside his mind.

It was at this moment when the island ugly suddenly called Virus. "Master I seem to have found another place that might be the place you're looking for as there so seems to be scroll inside according to the scan."

Hearing this Virus' eyes shone as he stood up excitedly, he was truly excited at the thought of finding it.

"Bring me to close to it and give me the suit device I'll go there alone, you and Ella stay here" Virus ordered.

"Yes master." they both replied at the same time.

Then the ugly brought Virus the underwater suit device with which he would be able to breath underwater and move at almost whatever speed he wanted.

Putting on the suit device which was a wristwatch he went to the back of the spaceship wanting to go out, which was now in the bottom of the ocean.

Before going out Bella said a little worriedly "Master... please becareful."

"Don't worry lil beauty, I will." Virus replied as he pressed a device on the wristwatch like suit device as a suit started appearing on him automatically being put on.

Smiling Bella asked "why are you still calling me little beauty?"

"Because I like calling you both Bella and lil beauty, they both suit you well, I'll come back soon." As Virus said this under the spaceship opened and Virus dived into the water but strangely no water came inside as under the spaceship closed again.

As Virus was dived inside the water he didn't need to swim as he could move like he was flying on the sky, moving towards the direction of the cave, a minute later he finally arrived to the cave as he went to under a mountain like huge rock and from under it he entered to a place where there was no water as it was filled with air.

Going inside Virus pressed a button again as the suit disappeared, as he searched the place for a little he found the ancient scroll he was looking for, but right now it wasn't that ancient, sighing in relief inside he thought 'So it's already here, fortunately I'm in luck.'

Seeing the Scroll he started thinking of his past world, remembering some things.

By using the Cultivation Techniques of the Cultivation Multiverse, people of Virus' past world couldn't cultivate at first as they realized the force and energy used to cultivate didn't exist in their universe, an energy or force which the cultivators of the invaded multiverse used to cultivate, they called it Qi.

Mankind was almost disappointed they couldn't cultivate when someone discovered/ perceived another kind of energy/force in our own universe of science and technology after much experiments and comparison.

This was a kind of force/energy which was almost the same as Qi but clearly different as it had a little more purity and some other differences but it was essentially the same like how the word fire was said and pronounced differently but they essentially meant the same.

As the person who found this energy/force after seeing Qi and thinking some kinds of energy needs to exist in our universe too and after much deliberation, experiments, comparison, making some adjustments to the Qi gathering treasures of the cultivation world and changing it in some ways by using other technological devices, she excitedly finally found an energy/force and called it "God Force" as she thought this energy was what was going to enable them achieve their long lost dream of 'Godhood'.

After that the adjustments' of the Cultivation Techniques begun as they converted all the Cultivation Techniques according to the "God Force", so they would be able to cultivate by using those Cultivation Techniques but with "God Force" as fuel.

But far before this, when all the Cultivation Techniques and information of the other Multiverse of Cultivation was collected and brought back, before most of them wasn't read and researched by others, when they had at first just uploaded everything together to the [Main AI]'s database, What no one realized and figured, Not even the [Main AI], was that the [Virus] had accessed all the data regarding those Cultivation Techniques and other information 0.9 seconds faster than the [Main AI], and at that short period of time it had found only one thing, and that thing's description greatly shocked [Virus] and excited it to no ends, without a moment of hesitation after seeing every information related to it he deleted everything that was related to it completely.

After seeing the information of where exactly the ancient scroll was found [Virus] figured it was found in an ancient ruined empty lifeless planet which seemed to be ruined for innumerable number of years, inside a cave under the ocean.

After that [Virus] immediately sent the person who found the ancient scroll by all his companions at the time to their death by his own means and silenced them even though they hadn't read it after finding the scroll as they had just tossed it like a garbage to the pile of Cultivation Techniques, [Virus] also destroyed the ancient scroll in which the information was written.
