

When God 641

Chapter 641 Super Spirit Ruby

Li Xiu looked at the box; it was similar to the other boxes on the shelves, made of wood. He took it down, opened it, and found the Super Spirit Gemstone wrapped in gold foil inside.

When he unwrapped the gold foil, inside was a red gemstone the size of a fist, with red light flowing inside like a thick liquid.

"What kind of Super Spirit Gemstone is this?" Li Xiu asked Ba Ye beside him.

"This should be a Super Spirit Gemstone nurtured within the Ruby Mine," Ba Ye replied, looking at the gemstone.

"A Super Spirit Gemstone nurtured on Earth?" Li Xiu rewrapped the gemstone in gold foil, placed it back in the box, and then picked up the box: "Let's choose this one."

The president said it was best to choose a Super Spirit Gemstone from Earth, and Ba Ye hinted that this gemstone was also nurtured on Earth, so choosing this one should be fine.

Li Xiu walked out of the storeroom with the box, and no one checked or stopped him.

"Leaving just like that? No need to register?" Li Xiu asked Ba Ye after stepping outside.

"No need, this is the president's private warehouse, not the General Affairs Department's warehouse, no need for such trouble," Ba Ye laughed.

"Not afraid of people taking too much?" Li Xiu asked again.

Ba Ye glanced back at the small building, saw no one around, and then turned back to speak in a lowered voice: "You don't really think that Blind Woman is there just for cleaning, do you?"

Li Xiu also felt that Blind Woman wasn't an ordinary person, but he couldn't figure out what was special about her.

"Let's talk while we walk." As they left, Ba Ye spoke to Li Xiu on the way: "If you're asking me what capability Blind Woman has, I really don't know, but she looked the same when I joined Changsheng Tian in my youth; so many years have passed, yet she hasn't changed at all."

Li Xiu nodded and said nothing more. A person guarding the president's storeroom as an ordinary blind old lady would indeed be strange.

"Don't leave, I haven't finished speaking." Li Xiu was about to return when Ba Ye stopped him.

"You don't even know Blind Woman's background, what else is there to say?" Li Xiu looked at Ba Ye in confusion.

Ba Ye laughed: "I'm not talking about Blind Woman, I'm talking about that Super Spirit Gemstone."

"You've already mentioned the Super Spirit Gemstone nurtured by the Ruby Mine, what more is there to say?" Li Xiu was puzzled.

Ba Ye said: "There's a lot more to say, let's find a place to have a few drinks, I'll explain slowly."

"Let's go to my place." Li Xiu took Ba Ye back to courtyard number seven and asked Sha Chu to prepare some wine and dishes.

"What is this?" Ba Ye looked at the food and drink Sha Chu served and said with frustration.

"The Commander doesn't usually drink, so there's nothing stocked at home. This is some yellow wine I bought for cooking last time; I thought since it's still wine, it should be drinkable?" Sha Chu said as he placed two small dishes on the table: "There's only these at home, you go ahead and eat; I'll cook more dishes shortly."

"No need to cook, peanuts are enough." Seeing a plate with boiled peanuts, Ba Ye waved his hand, indicating Sha Chu not to bother.

Li Xiu opened a bottle, poured a cup of yellow wine for Ba Ye, and poured himself a cup; they toasted, and Li Xiu intended to drink it all in one go, but as soon as it entered his mouth, it tasted slightly of soy sauce, not very pleasant at all, so he only drank half a cup before setting it down.

Ba Ye drank his in one go, put down the cup, and said: "Yellow wine, this stuff, is actually quite good, but it involves a lot of nuance; it's fine for cooking, but to drink, it's a bit lacking."

"I'll have Sha Chu buy some good wine," Li Xiu said, wanting to call Sha Chu, but was stopped by Ba Ye.

"The wine isn't important, as long as you can drink it, the important thing is talking."

"Is there a problem with this Super Spirit Gemstone?" Li Xiu placed the box on the table and asked.

While peeling peanuts, Ba Ye said: "Super Spirit Gemstones are divided into two types: one dug out from magical creatures, and the other from gemstone mines. Theoretically, both are the same, both can let Symbiotic Contract become Super Spirit, that you should know."

"Then tell me about something I don't know," Li Xiu said as he put a peanut in his mouth, chewed twice, and spit it out as it turned out to be bad.

Ba Ye chuckled: "Eating peanuts, you need to peel off the red skin inside, otherwise you won't know if they're bad or not."

After a pause, Ba Ye continued: "Super Spirit Gemstones have good and bad qualities; the quality dug from magical creatures is related to the Super Spirit Limit of the monster itself. A creature with eighty percent Super Spirit, the gemstone dug out from it contains merely eighty percent energy. Thus, the higher the grade of the creature, the better the Super Spirit Gemstone it produces, and the quality can affect the Symbiotic Contract's Super Spirit Limit."

"For example, originally your Symbiotic Contract's potential isn't high, and it can only reach an eighty percent Super Spirit Limit. Once reaching this point, no matter how you use resources, you can't elevate further. If you merge with a Super Spirit Gemstone at ninety percent Super Spirit Limit, then the Symbiotic Contract's potential could be enhanced, originally only able to reach eighty, now maybe up to eighty-two, or even higher."

Chapter 642 Super Spirit Ruby_2

"I see, are the Super Spirit Gemstones mined from the gemstone mine the same?" Li Xiu asked.

"Pretty much, since they're all Super Spirit Gemstones, naturally there are good and bad ones. But as for those mined from the gem mine, it's not so easy to tell if they're good or bad."

Uncle Eight continued, "You see, the Super Spirit Gemstones on the Evil Spirit can be judged by observing the strength of the Evil Spirit itself. Once the Evil Spirit enters the Super Spirit State, you can pretty much tell."

"The Super Spirit Gemstones produced in the gem mine are different. There's no reference point, so if you want to distinguish whether the Super Spirit Gemstone is good or bad, you can only look at the size of the vein. Generally, the larger the vein, the better the Super Spirit Gemstones produced."

"Of course, it's not to say that a large vein is always good. Apart from size, the quality of the produced gemstones also affects the goodness of the Super Spirit Gemstones. As for the gemstone's variety, well, there's no need to say much—the Super Spirit Gemstones produced by the Five Great Gemstones are certainly not lacking."

"The Super Spirit Gemstone you chose is from the Ruby Vein, and it's from the top-tier Ruby Mine. I was right next to the City Lord when he acquired this Super Spirit Gemstone initially. Who would have thought that after so many years, this Super Spirit Gemstone is still kept?"

"It's been many years indeed, quite a rarity," Li Xiu said while fiddling with the Super Spirit Gemstone.

The City Lord is the Red Sand City Lord, and Red Sand City is the most famous place for producing rubies. Given the Super Spirit Ruby that he brought back, it's naturally not going to be of poor quality.

"It's more than rare, it's exceedingly rare. This Super Spirit Gemstone is not only from a top-tier Ruby Mine, but it also caused some extraordinary anomalies when it was unearthed," Uncle Eight said mysteriously.

"Anomalies?" Li Xiu didn't quite understand what anomalies meant.

"Yes, anomalies." Uncle Eight took a sip of wine and recalled, "Ordinarily, the birth of a Super Spirit Gemstone attracts Evil Spirits to contend for it; no need to elaborate on that, you should know. However, when this Super Spirit Gemstone appeared, who knows how many Evil Spirits came to snatch it. The scene was immense, to say the least, and something strange happened then as well."

He shelled two peanuts and put them in his mouth before continuing, "All the Evil Spirits that entered the mine vein to fight for the Super Spirit Gemstone died, not one of them came out alive."

"Isn't that quite normal?" Li Xiu didn't see how this was an anomaly.

The last time he snatched a Super Spirit Gemstone, many Evil Spirits died as well.

"It is indeed normal for Evil Spirits to die fighting over a Super Spirit Gemstone, but have you ever seen their souls leaving their bodies to guard the Super Spirit Gemstone?" Uncle Eight said mysteriously.

"Their souls leaving their bodies? Can Evil Spirits even do that?" Li Xiu thought Uncle Eight was being extremely far-fetched.

"Yes, their souls leave their bodies. When their bodies died, a sphere of light detached from them. If that isn't a soul leaving the body, what else is it?" Uncle Eight drained his glass of wine: "I was with the City Lord all the way then, we saw many Evil Spirits lying dead in the mine tunnels, not knowing how they died, not a single wound on them, and quite some distance from where the Super Spirit Gemstone was located. The City Lord and I personally saw a spirit-like figure, like a soul coming out of those dead Evil Spirits and rushing towards the area where the Super Spirit Gemstone was..."

"Later, when we entered the Super Spirit Region, we saw various kinds of magical light images everywhere. Those things seemed out of their minds, desperately guarding the Super Spirit Gemstone. It

was only after the City Lord scattered those things that he managed to acquire this Super Spirit Gemstone."

"Could those light images be transformed from the Demonic Light within the Evil Spirits' bodies?" Li Xiu pondered.

"Transforming Demonic Light into spirit is something only at the Spirit Forging Level can accomplish, impossible for ordinary Evil Spirits," Uncle Eight shook his head.

"Indeed, it's peculiar for Evil Spirits to use their souls to guard the Super Spirit Gemstone after dying, I've never heard of such a thing," Li Xiu looked at the Super Spirit Gemstone in his hand but did not feel anything unusual about it; it looked no different from the other Super Spirit Gemstones he had acquired before.

"Anyhow, this Super Spirit Gemstone is no ordinary one. If you can use it, then use it yourself. If not, you can exchange it for a Super Spirit Gemstone that suits you," Uncle Eight said.

"Why wouldn't it suit me?" Li Xiu was somewhat puzzled.

"When you obtained the Symbiotic Contract, did you open the Trial Gate with a ruby? If it was opened with a ruby, then this Super Spirit Gemstone is just right. If not, it's better to exchange it. This Super Spirit Gemstone is extraordinary, and if you find the right person, you might even be able to exchange it for two other types of Super Spirit Gemstones."

"It should be usable!" Li Xiu wasn't too sure.

He has two Symbiotic Contracts; the Trial Gate for the Forbidden Spear was opened with a sapphire, while the Trial Gate for the Evil Spirit Token was opened with both ruby and sapphire.

Logic would dictate that it should be usable.

Li Xiu just wasn't sure whether using a Super Spirit Gemstone to enhance the Evil Spirit Token would enable the Forbidden Spear to also reach the Super Spirit State. If not, he would need to find another Super Spirit Gemstone.

"Alright, you've had your drink and said what you needed to say. Fourth Brother, attend to your own matters, I'm heading back now." Uncle Eight finished his last sip of wine, patted himself, and left.

Chapter 643 Super Spirit Ruby_3

After Lord Ba left, Li Xiu returned to his room, summoned the Evil Spirit Token, and placed the Super Spirit Gemstone on top of it.

Ting!

The Evil Spirit Token suddenly flipped over. Originally, the blue Light Vein side was next to the Super Spirit Gemstone, but now it became the red Light Vein Map side that was next to the gemstone.

The red Light Vein Map lit up, and the red spiritual light within the Super Spirit Gemstone seemed to be attracted by something, flowing towards the red Light Vein Map.

As the red spiritual light flowed into the Evil Spirit Token, the red Light Vein Map on it became brighter, more red lines were lit.

Soon, the entire red Light Vein Map was lit up, and the red glow from within the Super Spirit Gemstone continued to flow into the red Light Vein Map.

Li Xiu observed carefully and noticed that the red glow inside the red Light Vein Map was actually circulating, constantly cycling within, and with each cycle, the red lines on the red Light Vein Map became brighter.

After an unknown period of time, the red glow inside the Super Spirit Gemstone had been completely extracted, leaving the gemstone itself pale and colorless.

There was a cracking sound, and the gemstone, now like transparent glass, shattered into a pile of powder.

Li Xiu examined the Evil Spirit Token. The red Light Vein Map on it was still emitting light, but it did not advance further, nor did it seem to enter the Super Spirit State.

"Could it be... that it still requires a Super Spirit Sapphire to achieve a super spirit state..." Li Xiu picked up the Evil Spirit Token and noticed that the blue Light Vein Map wasn't lit at all, presumably needing it to be lit before it could reach a super spirit state.

Helpless, he had to put away the Evil Spirit Token for now.

"If I calculate it this way, I still need two Super Spirit Sapphires to fully empower both the Evil Spirit Token and the Forbidden Spear in a super spirit state..." Li Xiu felt troubled, wondering where he could procure two Super Spirit Sapphires now.

The problem was that he couldn't openly buy them, or others would become suspicious about why he needed so many Super Spirit Gemstones.

After pondering for a while, Li Xiu decided not to purchase the Super Spirit Gemstones just yet and planned to return to the City of Light first.

Since the President already knew Ximen Guan was in the City of Light, this matter needed to be discussed with Ximen Guan to plan a strategy.

Additionally, he needed to go back to help them light up; having the Light Planting Technique but no one to help them light up would be useless.

Even if the Commander wanted to leave Changshengtian, he needed a mission or Vice President Han's approval. He had to go through Han Minghui for the procedure.

Li Xiu first visited the Magic Armor Master Courtyard to arrange everything properly.

He devised a training plan for the Magic Armor Masters and then handed it to Qian Zhongshan, assigning him to oversee its implementation.

There was also the issue of the Magic Armor Masters' family members; whether they were current Magic Armor Masters or those who had passed away, their descendants and family members could apply to join the Technician Group.

Once they joined the Technician Group, they could reside within the Great Wall instead of staying in Wansheng Town, living in fear.

Of course, their living needs also had to be met by the Technician Group; Changshengtian couldn't solve their living problems.

Previously, for those Magic Armor Masters who deserted their posts without permission, Li Xiu sent them back, as it concerned the safety of all Changshengtian, and any issue would offend not just the Li Family.

After settling the matters regarding the Magic Armor Masters, Li Xiu went to the Research Institute and handed over the Demon Armor Master to Professor Xu.

Even though Li Xiu used it very cautiously, it suffered some damage due to overloading.

Fortunately, Li Xiu didn't overload too excessively; primarily, he used the technique of Bottle Suction to defeat Li Changmian. The damage wasn't too severe, so it probably wouldn't be scrapped; repairs should suffice.

He also discussed the matter of mass-producing Multi-core Magic Armor with Professor Xu. Professor Xu indicated that there were no technical issues, but they were a bit short on manpower and resources, making it difficult to mass-produce in a short time.

Li Xiu went to Han Minghui's office to submit his application form to take Sha Chu out of Changshengtian.

"Commander Li, you just became the Commander, and your departmental affairs are busy. How do you have the time to go out?" Han Minghui looked at the application form and continued, "This is difficult to handle. No mission, no president's permission, and taking a member out, this is probably a bit hard."

"Vice President Han, why don't you ask the President first, and then decide whether to approve or not?" Li Xiu said casually.

"You mean to say, Commander Li, that your departure from Changshengtian is arranged by the President?" Han Minghui frowned.

"I don't know. You could ask yourself," Li Xiu replied.

"Your attitude makes it hard for me," Han Minghui stared at Li Xiu.

"If it's hard, you don't have to do it. If the President asks, I'll just say Vice President Han found it difficult, and to avoid troubling Vice President Han, I didn't go out. It's all out of my own goodwill, nothing to do with Vice President Han," Li Xiu smiled.

Han Minghui looked at Li Xiu, frowning silently. She couldn't tell if Li Xiu was telling the truth or if he was using the President's name to bluff her.

If it had been someone else, she would never believe them without a direct message from the President.

But Li Xiu had just killed Li Changmian, and the President had protected him. It's hard to believe there was no connection between them.

Now rumours outside say Li Xiu is the President's illegitimate child, a notion that even Han Minghui found somewhat plausible.

"Commander Li, please wait here for a moment." Han Minghui dared not make a decision and decided to send someone to seek the President's guidance.

Shortly after, the person she sent out returned and whispered a few words to her. When Han Minghui came back, her face was full of smiles.

"Commander Li, we've completed all the procedures for you. I'll have someone escort you out." Han Minghui's attitude became very cordial.

The message from the President's side was only one sentence: Li Xiu could enter and exit Changshengtian at will.

"Could he really be the President's illegitimate child?" Han Minghui had never received such an order before. Even for Commanders with important matters at hand, the President would never allow them to move so freely, as coming and going from Changshengtian was not an easy task.

Chapter 644 Return to the City of Light

When leaving Changsheng Tian, he still lay inside the coffin on the beach before being transported out.

This feeling was very strange. With Li Xiu's sense of judgment, not to mention lying in a coffin, even with a few more layers of boxes, he should still be able to discern direction and position.

After just over an hour, Li Xiu felt the coffin stop, and then the coffin lid was pushed open by someone.

Once out of the coffin, he found they were already at a deserted forest outside the City of Light.

Sha Chu also came out of another coffin, and once they were out, eight individuals wearing Bronze Masks took the two coffins away.

Li Xiu closed his eyes and recalled the trip before heading back the same way. When he felt he was at the location where Changsheng Tian should be, he found it was merely a forest, with no beach or ocean in sight.

"There's no point in searching, no one can find where Changsheng Tian is located." Sha Chu said beside him.

"If we don't find the way in and out of Changsheng Tian, it will eventually be a problem." Li Xiu looked around, but there was no apparent path leading to Changsheng Tian, just remote wilderness with nothing nearby.

Unable to find the way, Li Xiu had to bring Sha Chu back to the City of Light.

Upon entering the City of Light, Li Xiu felt the city was vastly different from before. In such a short time, there were many newly constructed buildings within the city, people bustling on the streets, making it seem very prosperous.

"Chu Jun and A Fei did a good job." Li Xiu was greatly satisfied seeing the City of Light doing much better than before he left.

"City Lord!" Ye Yuzhen saw Li Xiu and happily greeted him.

"Looks like you're doing well." Li Xiu said, patting Ye Yuzhen on the shoulder, noticing his luxurious attire.

"City Lord, I haven't embezzled anything. These are things I exchanged for after killing demon spirits in the Land of Trial myself." Ye Yuzhen quickly explained.

"No need to be so tense, I'm happy that you're all doing well." Li Xiu replied.

Back at the City Lord's Mansion, Chu Jun, A Fei, Ye Xiyuan, and Ximen Guan came over one by one. Seeing it was about time for a meal, Li Xiu had A Fei arrange food, and everyone sat down to eat and chat.

"Old Guan, if I asked you to return to Changsheng Tian now, would you dare?" Li Xiu asked as Ximen Guan had nearly finished eating.

"Why would I go there?" Ximen Guan scoffed.

"Your Blood Seal Stone is still in Changsheng Tian, and the fact that you escaped is already known by their president." Li Xiu said.

"It was exposed that quickly?" Even though Ximen Guan was prepared for this, he couldn't help but sigh heavily. "You don't need to worry; if Changsheng Tian wants my life, let them have it."

"Old Guan, don't be hasty, it's not that bad. Death is not inevitable. If I asked you to go back to Changsheng Tian to research Demon Armor, would you be willing?" Li Xiu asked.

"What's there to research? Changsheng Tian doesn't care about Demon Armor at all." Ximen Guan scoffed.

"This time it's different. The president of Changsheng Tian intends to fully develop Demon Armor. If you go, you'll definitely be able to make a significant mark." Li Xiu persuaded.

"I know what the people of Changsheng Tian are like. They say they want to develop Demon Armor, but in fact, they despise it completely, and it's all just for show. I'd rather enjoy life and live one extra day, rather than be manipulated within Changsheng Tian." Ximen Guan clearly made up his mind that he'd rather not go back to Changsheng Tian.

"I'm now the Commander of the Technician Group. The Magic Armor Master Brigade and the Magic Armor Research Institute are under my control; who would give you a hard time?" Li Xiu laughed.

Ximen Guan was taken aback and sniffed skeptically, "You're a Commander? No way, you only just entered Changsheng Tian, how could you possibly become Commander? If you're going to fabricate a story, at least make it sound believable. Technician Group, it sounds obviously fake. Changsheng Tian has groups of Longevity, Immortality, Detachment, Quest, Demon Spirits, Divine Pets; there's no Technician Group."

"What's wrong with the name? I think it's quite nice, and I named it myself." Li Xiu said calmly.

"Are you serious?" Ximen Guan knew what it meant to have the right to name his own group, so he was even more skeptical.

"If you don't believe me, ask Sha Chu." Li Xiu pointed at Sha Chu.

Ximen Guan looked at Sha Chu, who nodded and said, "Li Xiu is indeed the Commander of Changsheng Tian, the newly appointed Commander of the Technician Group, in charge of the Magic Armor Master Brigade and the Magic Armor Research Institute. There shouldn't be anyone in Changsheng Tian who doesn't know him now."

"You've really made it to Commander; if I follow you, it might be okay, at least I won't have to suffer." Ximen Guan finally relaxed.

Li Xiu pondered, "Going to Changsheng Tian might not be a bad thing. If you join my Technician Group, I can legitimately retrieve your Blood Seal Stone for you. Moreover, the equipment, instruments, and resources of Changsheng Tian are far superior to those in the City of Light. Using their resources to conduct our research there is better than having nothing here, right?"

"Alright, I'll go along with your plan. It's not like I haven't been there before." After considering for a moment, Ximen Guan slapped his thigh, deciding to follow Li Xiu back to Changsheng Tian.

"A Fei, you should also come with me to Changsheng Tian later." Li Xiu turned and said to A Fei.

Chapter 645 Return to the City of Light_2

"What about me?" Chu Jun pointed to his nose and asked.

"What do you mean you? You're from the Chu Family. If you go to Long Life Heaven, your family won't let it slide with me." Li Xiu said.

"I don't care. If you're all going, I'm going too." Chu Jun said seriously.

"I'm okay with that, but you have to ask your family first. As long as they allow it, I'll give you a membership card. You can go to Long Life Heaven right away." Li Xiu said.

"Alright, I'll talk to my family later." Chu Jun knew that this matter needed family approval; otherwise, the Chu Family might not let Li Xiu off.

"By the way, the Light Planting Technique has spread everywhere now. But you can only look at it, no one can actually practice it. You need to be Light Base level to plant light. That's too high a requirement.

Other than Long Life Heaven, how many Light Base levels are there in the world? So, a lot of people look at it, but hardly anyone practices it." Chu Jun started talking about the Light Planting Technique again.

"It's useless now, but it'll become useful over time. Don't worry about it." Li Xiu said.

"Yeah, that's why I must enter Long Life Heaven with you, find a Light Base to help me plant light and light my lamp. That way, I can level up a lot faster and have a Light Vein in advance. My strength will increase greatly, and future adventures in the Land of Trial will be much safer." Chu Jun looked at Li Xiu and asked, "Since you came up with the Light Planting Technique, you should know quite a few Light Base Trial Takers, right? Once we're in Long Life Heaven, help me find a Light Base to light my lamp."

"Why go to Long Life Heaven to light your lamp when you can do it here?" Li Xiu said.

"Here? Did you bring a Light Base Trial Taker back? Was it the guy who delivered the message last time? He seemed pretty skilled, though a bit cold and not talkative. I guessed he might be an expert..." Chu Jun rattled off like a machine gun.

"He didn't come, and he's not Light Base yet; he's still a Super Spirit, could enter Light Base anytime." Li Xiu said.

"So who did you bring? Why not invite them over for a meal?"

"I didn't bring anyone."

"Then how are you going to help me light my lamp?" Chu Jun asked, confused.

"Can't I help you light your lamp?" Li Xiu laughed.

"Did you advance to Light Base?" Chu Jun's eyes widened in disbelief.

"No." Li Xiu shook his head.

"Then what are you talking about lighting a lamp? You're not even Light Base, what lamp can you light?" Chu Jun pouted.

"Who said you have to be Light Base to light a lamp?" asked Li Xiu.

"You did. It's written in black and white on the Light Planting Technique you released." Chu Jun pouted.

"Who came up with the Light Planting Technique?" Li Xiu asked again.

"You."

"So, do you think those papers are more authoritative than me?"

Chu Jun's eyes widened immediately: "So, you don't need to be Light Base level to light a lamp, you've been holding back!"

"Don't worry too much. If you just want to light a lamp, there's no need to go to Long Life Heaven; I can help you light it." Li Xiu smiled and said, "Actually, I came back this time to help you guys light your lamps; lighting them early is good for future Super Spirit and Foundation Establishment."

"If a lower level can light a lamp, then it's easier. You can tell us how to light the lamp, and we can help each other out faster." Chu Jun always thought Li Xiu's level was lower than his.

"There's a method, but you can't use it." Li Xiu said.

"Why can you use it, but I can't? What level are you?" Chu Jun asked, unconvinced.

"I'm S-level." Li Xiu said with a press of his lips.

"S-level... You're S-level now..." Chu Jun stared blankly at Li Xiu.

"Yeah, S-level. Is there a problem?"

"No problem." Chu Jun became even more determined to go to Long Life Heaven.

Previously, Li Xiu's level was lower than his, and now he's just A-level whereas Li Xiu is S-level. Clearly, advancing in Long Life Heaven is much faster; the resources in the City of Light are just too scarce.

After the meal, Li Xiu called Chu Jun, A-Fei, and Ye Yuzhen over, first giving them a book called "The Unspoken Technique of Strange Powers and Gods", asking them to memorize it before explaining.

Once they understood thoroughly, Li Xiu started helping them light their lamps.

"That's it? It's too simple!" Chu Jun, who finished lighting his lamp first, looked at Li Xiu, puzzled, thinking it was too simple.

Li Xiu just merged a bit of light into his body, and the lamp lighting was done.

"Oh, I forgot, it's not finished yet." Li Xiu thought for a moment.

"I knew it! It couldn't be that simple. What next?" Chu Jun quickly asked.

"Position your feet on the 'Heaven and Earth' spot, and place your hands on the 'Zhen Dui' spot." Li Xiu said.

Chu Jun hurriedly followed Li Xiu's instructions, spreading his legs apart and hands pressing to the ground, like a tortoise on all fours.

"And then?" Chu Jun asked after getting into position.

"Reverse your hands to 'Xun Gen'." Li Xiu said.

Chu Jun placed his hands on the ground and then bent backward, placing his hands on the 'Xun Gen' positions.

"Then what?"

"Zhen Dui... Yi Gen... Zhen Dui... Yi Gen..."

Chu Jun followed the positions Li Xiu chanted, sometimes bending backward, sometimes lying forward; soon, his waist ached terribly.

"What's the use of this?" Chu Jun couldn't help but ask.

"No use." Li Xiu shook his head.

"No use?! Why make me do this for so long?" Chu Jun was so angry he almost jumped up.

"Didn't you say it was too simple? I made it a bit more complex for you."

"Scram!"

Chapter 646 Return to the City of Light_3

Li Xiu helped A Fei and Ye Yuzhen ignite their light seeds; A Fei didn't feel anything special, but Ye Yuzhen was extremely excited.

"It's really fortunate to have followed the right person. If it weren't for Li Xiu, how could we, brother and sister, have such an opportunity." Ye Yuzhen vowed silently to himself, determined to help Li Xiu protect the City of Light.

Although he also had some desire to go to Eternal Heaven, that place didn't accommodate Magic Armor Masters well, and since Ye Xiyuan couldn't go together, he naturally didn't want to go either.

"Go and bring Xiyuan over. I'll light her lamp too." Li Xiu said to Ye Yuzhen.

Lighting the light seeds for three people in a row, Li Xiu felt he still had ample strength.

"Xiyuan is a Magic Armor Master, does she also need her lamp lit?" Ye Yuzhen was slightly taken aback.

"Who says Magic Armor Masters don't need lamps? Being physically better aids in controlling the Demon Armor. It's also an extra means of self-preservation, which might be useful someday." Li Xiu said earnestly.

"Thank you, City Lord!" Ye Yuzhen was overjoyed and quickly went to call Ye Xiyuan over.

Li Xiu originally hadn't planned to light Ye Xiyuan's lamp but didn't expect his light energy to be so abundant, lighting three people without feeling too tired.

So he decided to have Ye Yuzhen teach Ye Xiyuan the "Zi Bu Yu's Secret Art of Mystical Powers" first, and then he would light the lamp.

He planned to take people to Eternal Heaven, and from then on, the City of Light could only be sustained by the Ye brother and sister duo.

Although there probably wouldn't be any major issues, should anything arise, there ought to be someone able to step up and manage it.

Ye Xiyuan's Spiritual Sense was extremely strong, and her memory was remarkable, almost photographic. She quickly memorized the "Zi Bu Yu's Secret Art of Mystical Powers."

Li Xiu smoothly ignited her light seed, but since she hadn't cultivated before, and her Primordial Embryo Quality was poor, with no light energy within, Li Xiu consumed quite a bit of light energy and felt somewhat fatigued.

"Let's stop here for today. Both of you need to practice my method. Xiyuan, if you have time, you can also go to the Trial Ground for training; it won't harm you." Li Xiu said.

Ye Xiyuan nodded solemnly, and although she didn't say anything, she truly took Li Xiu's words to heart.

Li Xiu felt somewhat tired. Lighting lamps for A Fei, Ye Yuzhen, and Chu Jun wasn't as tough as lighting the lamp for Ye Yiyuan alone.

Returning to his room, he found A Fei sitting in a chair by the table, like a ghostly specter, giving Li Xiu a fright.

"What are you doing here? Still sitting in the dark?" Li Xiu turned on the lamp and asked A Fei.

"I saw the God." After a moment of silence, A Fei said with a strange expression, looking at Li Xiu.

"How was it? Can you confirm whether he's the God you're looking for?" Li Xiu asked with concern, as he too wanted to know the answer to this matter.

"No, he's not the God I'm looking for." A Fei shook her head but kept her eyes fixed on Li Xiu.

Li Xiu discerned that something was wrong with A Fei and continued to ask, "Where did you see him?"

"Space City," A Fei replied.

"You went to Space City?" Li Xiu frowned.

"I just wanted to see if the God of Space City was the one I was looking for; I never intended to actually do anything. I know what can and cannot be done; I simply wanted to confirm."

A Fei continued looking at Li Xiu as she spoke, "But as soon as I arrived in Space City, Guan Jinghao's people found me and said Guan Jinghao wanted to see me."

"And then?" Li Xiu asked calmly.

"Then I met Guan Jinghao, who took me to see that God, and I can confirm he is not the one I'm looking for," A Fei sighed.

"What happened next?" Li Xiu continued to ask.

"Then Guan Jinghao told me..." A Fei didn't finish her sentence, staring into Li Xiu's eyes before continuing, "He told me you are the true God, that you used to control the Red Flower Wolf, is this true?"

"Yes, I used to control the Red Flower Wolf for three years." Li Xiu nodded.

He knew A Fei would eventually find out, and he had meant to tell her personally, but he hadn't been prepared for Guan Jinghao to reveal it early.

"Is it you?" A Fei's question was vague, but Li Xiu understood what she was asking.

"No." Li Xiu replied.

"That's good." A Fei nodded, "Guan Jinghao asked me to be his spy by your side, and I agreed."

"Understood. Be careful from now on and don't go to Space City anymore. Guan Jinghao is not simple; his background has issues." Li Xiu sighed.

"Alright, I'm heading back." A Fei left Li Xiu's room and silently returned to her own room.

But instead of resting, she packed her things, placed a prepared letter on the table, and quietly left the City Lord's Mansion.

Outside the City of Light, A Fei cast a long glance at it before finally averting her gaze and turning into the forest.

In the depths of the woods, A Fei walked a long distance before stopping, putting her belongings down, and starting to dig with a shovel.

In no time, A Fei dug out a large rectangular pit, two meters long, fifty centimeters wide, and over one meter deep.

Putting down the shovel, A Fei opened the box she carried, took out the bedding, spread it on the pit floor, then jumped inside with a quilt, laid on the bedding, covered herself with the quilt, and summoned the Black Death Demon.

Under A Fei's command, the Black Death Demon vigorously pushed the previously dug soil back into the pit, gradually covering A Fei's body.

A Fei closed her eyes, slowly getting buried by the soil.

"Isn't it somewhat too wasteful to just die like this?" A voice suddenly sounded outside the pit.

A Magic Armor Master appeared, squatting beside the pit, tugging at the quilt almost buried in dirt, revealing A Fei's face.

"You can stop me once, but you can't stop me from seeking death." A Fei said coldly.

"You wish to die, and I can't stop you, but what about your family's revenge? Without you, who will avenge them?" The Magic Armor Master asked.

"They're all dead. Even if revenge is taken, they won't come back to life." A Fei said.

"Just because your enemy is Li Xiu, you won't avenge your parents?" The Magic Armor Master questioned.

"Li Xiu is not my enemy," A Fei countered coldly.

"How do you know?" The Magic Armor Master frowned.

"Because he said so." A Fei replied.

The Magic Armor Master laughed, "You believe a man's words? Haven't you heard that saying, 'A man's mouth is a deceiving ghost'? You believe him when he says he's not?"

"He says he's not, so he's not." A Fei retorted, her voice cold.

"You're too naive, young girl. Don't assume a man's words are trustworthy. Even if he's truly not, sacrificing your life for his isn't worth it." The Magic Armor Master advised earnestly, "In this world, there's nothing more important than your own life. You need to safeguard your life first. Regarding men, with your abilities, you'll have no shortage of outstanding men in the future as long as you're alive. Why sacrifice yourself for a man who might be your parent's killer?"

Chapter 647 The New Type of Demon Armor in Space City

The Magic Armor Master saw that A Fei remained unmoved and continued, "Don't forget about the thing inside your body. If you don't do as I say, that thing will crawl around, drilling holes in your flesh, blood, and bones. You've tasted that pain before; you should know what it's like... Do you want to try it again?"

"You can't threaten me," A Fei said calmly.

"Young girl, you're just too naive. Do you think dying is the end of it all?" The Magic Armor Master said with a smile, "It's not that simple. Even if you die, the thing inside you remains. As long as Li Xiu comes to clean up for you and touches your body, I can still achieve my intended purpose."

"Foolish child, whether you live or die makes no difference to me. I just don't want you to be deceived by a man, sacrificing yourself and getting nothing in return, only to be laughed at by men as foolish." The Magic Armor Master stroked A Fei's cheek with a finger.

"If you can use my corpse to kill him, that's your skill. If you have the ability, go ahead and kill him." A Fei said, pulling a knife from her waist and thrusting it toward her chest.

Pa!

The Magic Armor Master knocked the knife from A Fei's hand, grabbed her by the neck, and lifted her up.

"Why are you so stubborn, woman? Not even avenging your parents for a man — is it worth it?" The Magic Armor Master shouted angrily, holding A Fei's body with one hand.

"It's not about worth; I know the pain of having my loved ones murdered, so I won't let others experience the same pain." A Fei gasped hard as she spoke.

"So foolish. If you're so ignorant, there's no reason to keep living. Your corpse can accomplish the task just the same." The Magic Armor Master stared at A Fei, and Demonic Light shone from their body, as if something inside A Fei was activated. Beneath her skin, something seemed to move, with glowing objects appearing under her abdomen and crawling toward her heart.

A Fei's face turned pale from pain, cold sweat pouring out but not uttering a sound.

"I'll give you one last chance. Do you wish to die or live? If you want to die, the thing inside will invade your heart and crush it." The Magic Armor Master said coldly, staring at A Fei.

"If you want to kill, then kill. Why waste so many words?" A Fei said with difficulty.

"Very well." The Magic Armor Master flashed with Demonic Light, and the glowing thing beneath A Fei's skin was about to penetrate her heart.

Suddenly, the Magic Armor Master sensed something and dodged to the side, seeing a streak of red light glide past her cheek.

Crack!

The red light pierced A Fei's body, directly stabbing through the thing about to invade her heart.

"Li Xiu..." The Magic Armor Master turned around, looking at the person walking out from the forest, and said with a heavy expression.

"Rakshasa." Li Xiu looked at the blue Magic Armor; although the person inside couldn't be seen, he recognized the identity of this Magic Armor Master.

"So you really are the Red Flower Man," Rakshasa said, staring at Li Xiu.

"What difference does it make, whether I am or not? Either way, Guan Jinghao still wants to kill me," Li Xiu said lightly.

"You've done what you shouldn't have, so you must pay the price." Rakshasa snorted coldly, "Holding a Magic Spirit Tournament and creating some Light Planting Technique, clearly being a Magic Armor Master, yet wanting to end the path of Magic Armor Masters. Who should die if not you?"

"Only with opponents can there be progress. Without any opponents, how far can a Magic Armor Master go?" Li Xiu said nonchalantly.

"No use telling me that," Rakshasa said, grabbing A Fei's neck and squeezing hard. "You must have heard; this woman would rather die than help me kill you. Her life is in my hands; it's up to you if you want to save her."

"Are you sure her life is in your hands?" Li Xiu smiled slightly.

Rakshasa immediately sensed something wrong. The red sword embedded in A Fei's body flew up on its own, transforming into red lightning, slashing toward Rakshasa's wrist.

Rakshasa released A Fei's neck and withdrew her hand quickly, while the other hand opened, filled with blue light dots, resembling blue eyes, and shot waves of blue Demonic Light at A Fei.

Clang! Clang! Clang!

At the very moment, the Fire Lotus Sword flashed quickly, transforming into a lotus blossom sword light, protecting A Fei's body, blocking wave after wave of blue Demonic Light from Rakshasa.

"Symbiotic Contract... how long have you been a Trial Taker... and you already possess such an advanced Symbiotic Contract?" Rakshasa looked at the Fire Lotus Sword with some surprise.

Li Xiu somehow ended up beside A Fei, holding the injured A Fei. He glanced at the wound on her chest, where the skin was pierced by the Fire Lotus Sword. Inside, there was a beetle-like thing, its body pierced and burned by the Fire Lotus Sword. Cracks revealed blue Light Patterns flickering. It looked like a Magic Armor component, yet it could operate independently of the Magic Armor, something even Li Xiu had never seen in Magic Armor technology.

Li Xiu reached in and removed the beetle-like thing from A Fei's chest, tossing it to the ground and crushing it underfoot.

Then he summoned the Forbidden Spear and shot once into A Fei's wound.

Rakshasa watched bewildered, not understanding why Li Xiu would shoot A Fei.

Chapter 648 The New Type of Demon Armor in Space City_2

The next second, Rakshasa understood why Li Xiu did that. After the bullet entered Ah Fei's wound, the wound healed quickly.

"The Trial Taker's things are indeed a bit miraculous," Rakshasa admired as he stared at the gun in Li Xiu's hand and the Fire Lotus Sword floating in the air.

"Leave one hand and crawl away. Your life is temporarily yours. Go back and tell Guan Jinghao if he dares to touch my people again, I don't care what his background is, Space City will no longer need to exist," Li Xiu said coolly.

Rakshasa giggled charmingly, "Li Xiu, do you really think you're God? You're God while you're in Space City, but now that you've left Space City, you're nothing. Your glory was given to you by Space City, but you really take yourself seriously."

"If I have to do it myself, it won't be as simple as leaving behind one hand," Li Xiu said coldly.

Rakshasa didn't take Li Xiu's words to heart and giggled, "If it were before, I might have been a bit afraid of you. Honestly, your talent as a Magic Armor Master is indeed enviable, even the four of us feel inferior. But unfortunately, you left Space City, chose not to be the noble Magic Armor Master, and insisted on becoming a lackey for Everlasting Heaven; you deserve to die."

While Rakshasa spoke, she activated the Demon Armor on her body. Blue light patterns rose on the Demon Armor, and it turned out there was a pair of scimitars behind her Demon Armor.

Rakshasa took down the scimitars and held them in her hands. The twin blades instantly filled with Light Energy, resembling two blue Light Blades.

"Don't say you don't have Demon Armor now; even if you did, you couldn't win against me. This is the latest Demon Armor, far outperforming the Honghuanranger you used back then. Even a Super Spirit would struggle to defeat my new Demon Armor," Rakshasa said, pointing the scimitars at Li Xiu, "Today, let me bury you, once the strongest Magic Armor Master."

As she spoke, the Demonic Light on Rakshasa exploded, rushing towards Li Xiu like a blue phantom. The twin scimitars in her hands also slashed down like a storm.

Li Xiu didn't move at all while holding Ah Fei. The Fire Lotus Sword flashed quickly outside him, the sword lights like a protective fire lotus, forcibly blocking all of Rakshasa's attacks.

Rakshasa's scimitars slashed wildly, and the Demonic Light on the blades grew stronger, yet it couldn't break through the protective sword lights of the Fire Lotus Sword.

"No...impossible...you've only been a Trial Taker for such a short time...and you already possess the Super Spirit Coexistence Contract..." Rakshasa looked at Li Xiu and the Fire Lotus Sword incredulously.

After all, she had worked with Li Xiu for three years. Li Xiu definitely wasn't a Trial Taker before; how long has it been, and he's already a Super Spirit Tester? She couldn't believe it.

Even within Everlasting Heaven, probably no one could evolve from nothing to a Super Spirit Tester as quickly as Li Xiu.

"Space City indeed researched Demon Armor with performance comparable to Super Spirit, and even someone like you, an S-level Magic Armor Master, could easily drive it. That's impressive. Leave this Demon Armor, and you can crawl away," Li Xiu said lightly.

Rakshasa gritted her teeth and leaped directly, blue light patterns surged, carrying her body intending to rush into the sky.

Yet the Fire Lotus Sword independently rose, its sword light flashing, transforming into a giant sword light lotus descending from the sky, forcing Rakshasa back to the ground.

Li Xiu walked over holding Ah Fei, reached out and grasped the Fire Lotus Sword's hilt, stabbing towards Rakshasa.

Rakshasa wielded the twin blades to fight back, attempting to battle Li Xiu to the death.

Crack!

Li Xiu held Ah Fei with one hand and swung the sword with the other. Each strike made Rakshasa feel unable to block, and impossible to evade.

Each strike pierced the gaps in the Demon Armor; after several strikes, only a crash was heard, and Rakshasa's Demon Armor directly disintegrated, parts falling off her, scattered all over the ground.

Except for the pair of scimitars in Rakshasa's hands, the Demon Armor on her body completely fell off, revealing a tightly wrapped, well-shaped body and long, wavy hair.

"Ah!" Rakshasa let out a miserable cry, both wrists severed, and the hands holding the scimitars fell along together.

"Pass my words to Guan Jinghao," Li Xiu casually inserted the Fire Lotus Sword back into his waist, speaking indifferently.

"I'll definitely deliver your message," Rakshasa gritted her teeth, every word seeming to squeeze out from between her teeth, and then she dashed into the forest without looking back.

Having lost the Demon Armor and her hands severed, Rakshasa's condition was worse than an ordinary person, trudging with great difficulty.

"How did you know I was here?" Ah Fei asked Li Xiu with a complex look.

"With Guan Jinghao's personality, since he made you a spy, how could he not have means to control you," Li Xiu sighed, "Besides, I know you well. If it was simply to be a spy, you wouldn't specifically tell me, because in your view, that was nothing important. You know I trust you, no need for explanations. Since you explained it to me, something must be up, so I've been secretly following you."

"Looks like knowing each other too well isn't always a good thing, no privacy at all. In front of you, I feel like I'm not wearing clothes; sometimes that feeling is quite bad," Ah Fei said.

"If you feel unfairly treated, I'll strip off and let you see me from head to toe," Li Xiu joked.

Chapter 649 The New Type of Demon Armor in Space City_3

"Alright, then take it off," A Fei said seriously.

"Cough, no need to take things so literally!" Li Xiu felt a bit awkward, his mouth was tough but he was a little cowardly at heart.

"A man's words cannot be trusted," A Fei mused.

Li Xiu couldn't help but laugh bitterly, "Forget it, I'll take you to Old Guan first for a check-up to see if there are any other issues. Space City seems to have developed something unexpected; we can't be careless."

...

Rakshasa staggered through the forest, unable to retrieve her severed hands. She hadn't brought any medicine, only roughly bandaging the wounds, which were still oozing blood, making her look increasingly pale.

"Rakshasa, why are you in such a sorry state? Didn't I tell you not to go head-to-head with Li Xiu? That guy is not to be messed with. If he's truly the Red Flower Wolf, even with a new type of magic armor, you might not be his match," Asura jumped down from a big tree, standing in front of Rakshasa.

"He is indeed the Red Flower Wolf, but he didn't use the demon armor," Rakshasa said, suppressing the intense pain from her wounds, her lips trembling.

"Didn't use the demon armor? Then who injured you like this? Could he have some masters from the Longevity Heaven protecting him?" Asura frowned.

"There were no masters from Longevity Heaven; it was him who cut off my hands," Rakshasa recounted the incident.

"Li Xiu has transcended to Super Spirit? In such a short time?" Asura said with interest, "No wonder he is a top-notch genius, unbeatable even without using the magic armor."

"Do you still have time for this; shouldn't you be healing my wounds?" Rakshasa said angrily.

"No rush, losing both hands won't kill you," Asura picked up Rakshasa, glanced towards the City of Light, and said, "Now that we know Li Xiu is the Red Flower Wolf, our mission is completed. We can head back."

"Wasn't our mission to kill Li Xiu?" Rakshasa frowned upon hearing this.

"If he were just Li Xiu, then our mission would be to kill him. But he's not just Li Xiu; he's also the Red Flower Wolf, so our mission is less complicated." Asura laughed, "The City Lord knows we can't kill the Red Flower Wolf, just confirming his identity is enough."

"Why is the City Lord so sure we can't kill the Red Flower Wolf? If he hadn't reached Super Spirit Level, how hard could it be to kill him?" Rakshasa was still somewhat unconvinced.

"There's no such thing as 'ifs' in this world," Asura said, taking off towards the city. Rakshasa's wounds needed prompt treatment, or she'd risk not making it back to Space City alive.

Li Xiu brought A Fei to Ximen Guan's laboratory and handed over the dismantled magic armor and the items extracted from A Fei's body to Ximen Guan.

Ximen Guan used instruments to inspect those items first, and then performed a thorough examination on A Fei.

The X-ray images showed that there was nothing else inside A Fei's body.

"Those guys in Space City are quite capable for having developed remotely controllable magic armor components. The pair of scimitars and that beetle are similar in concept to your Light-Speed Spear, though the beetle is equipped with an intelligent control system. How this intelligent control system works still needs further research," Ximen Guan said.

"The materials for this magic armor, they're not of a Super Spirit Level, are they?" Li Xiu asked.

"No, it's a composite material, likely made by combining certain demon spirit materials with some raw materials from Earth. Analyzing the specific components will take time. Such composite materials are particularly troublesome; knowing the components alone is not sufficient. One must also study the manufacturing process and solve equipment problems, which is even more cumbersome than sourcing raw materials," Ximen Guan said as he examined the Rakshasa Demon Armor components. "The core energy system of this magic armor is also intriguing; it uses a cluster of S-Class Demon Cores to form an energy furnace instead of a Super Spirit Level Demon Core."

"How does that differ from a Multi-core Magic Armor?" Li Xiu asked.

"It's very different. Multi-core Magic Armor gathers energies from different sources that require the wearer to balance and integrate manually, resulting in significant losses. Poor coordination can lead to energy conflicts, which is why normal Magic Armor Masters find it difficult to control Multi-core Magic Armors.

"But the energy furnace developed by Space City processes the multiple energies from demon cores first, turning it into a singular and pure light energy, which is much easier to control than a multi-core solution," Ximen Guan pondered. "The challenge with this technology isn't about the number of demon cores but about the design of the energy furnace that processes and channels energy. Whoever invented this is really quite capable."

Li Xiu had never heard Old Guan praise other magic armor designers before, indicating that whoever created this device was indeed extraordinary.

"Can it be replicated?" Li Xiu asked.

This device is more effective than Multi-core Magic Armor. If this technology could be brought back to Longevity Heaven, it could quickly lead to the formation of Super Spirit level troops among the Magic Armor Masters, significantly boosting both their combat capability and status.

"We'll have to research to see if it's replicable; fortunately, the energy furnace on the magic armor you brought back is intact. Once I examine it, if there's no special material constraints, it should be relatively easy to replicate."

Ximen Guan scoffed and continued, "With your standard, you don't really need such a device. You can simply use Super Spirit Level materials to make magic armor."

"I might not need it, but other Magic Armor Masters need this technology. I now lead the Magic Armor Masters division; they have all placed their lives in my hands, it's only right to find a way for them to survive. In Longevity Heaven, Magic Armor Masters have it really tough. I don't understand why they choose to join Longevity Heaven when they could easily become revered outside. Why prefer being subservient inside?" Li Xiu said.

"Do you think they don't wish to remain outside as revered figures? Longevity Heaven probably doesn't grant them the chance. Training an S-Class Trial Taker requires a lot of time and resources, but training an S-Class Magic Armor Master only needs a talented Magic Armor Master and an S-Class Magic Armor, which is much more convenient," Old Guan sneered. "Longevity Heaven wouldn't let such cheap and useful cannon fodder go."

"That's true," Li Xiu sighed.

"Enough of that; I've created a new set of magic armor for you, one that should meet your satisfaction and won't be as fragile," Old Guan said, pulling Li Xiu into the laboratory.

Chapter 650 Lightspeed 3

Arriving at Ximen Guan's laboratory, sure enough, there was a set of Demon Armor still fixed on the dummy on the platform.

"Is this my new Demon Armor?" Li Xiu looked at the Demon Armor on the dummy with a very peculiar expression.

"Yeah, this is your new Demon Armor, looks pretty trendy, right?" Ximen Guan said with a smile.

"Are you sure this thing that looks like a bikini is really Demon Armor?" Li Xiu still couldn't believe it, how could this be Demon Armor?

"That's right, this is the latest Demon Armor I made for you." Ximen Guan said earnestly.

Li Xiu carefully examined the Demon Armor on the dummy. Below was an armor piece that looked like a triangle brief, and above was a bustier-style armor. The only other thing was the Light-Speed Spear.

Just looking at the style, it looked just like the gear of a bikini girl playing javelin, could this thing really have anything to do with Demon Armor?

"You call this Demon Armor? Tell me how this thing defends? Only defends three points?" Li Xiu said, feeling frustrated.

"Ahem, well, I have no choice, you see, with that vase you brought in, I found a way to decompose it. After breaking down the vase's materials, the usable material was just enough to make this. There really wasn't any more material." The old officer coughed lightly.

"Can't you add a bit more Demon Spirit Wood material?" Li Xiu felt this wasn't as simple as the old officer made it out to be.

"Composite materials have ratios, you know. Too high or too low won't work, the material properties have specific ratio requirements. This is the optimal ratio now; changing the ratio would mess up the material properties. Before, whenever you used those Demon Armors, they'd always burn out during Demonic Light transmission, right? I guarantee this set won't burn out, even if you blow up the energy core, this thing won't burn." The old officer said proudly.

"How did you manage to decompose the vase?" Li Xiu knew how hard that vase was, it shouldn't have been that easy to break down.

"That involves a lot of chemistry and physics, explaining it to you wouldn't make much sense. Why don't you quickly test this Demon Armor to see its actual performance? I made the core detachable. While it takes up a bit more space, it's convenient for replacing the core after it burns out. If you damage the Demon Armor core during a fight, just find one and replace it yourself, no need to waste time repairing... Do you like this idea?" The old officer spoke more and more proudly.

"I really like this idea, but the appearance..." Li Xiu was still a little hesitant, as a grown man wearing something like this, it was like wearing underwear on the outside plus a bustier like Superman. Key point: there's not even a helmet. If only there were a helmet to cover his face, at least others wouldn't see his appearance.

"Stop worrying about this and that, just try it out first, okay? I designed this specifically for you, guaranteed to be awesome." The old officer urged.

Li Xiu had no choice but to step forward and prepare to activate the Demon Armor.

As Li Xiu got closer, he realized that although it looked like a bikini from the front, it was actually connected in the back by a spine-like support, joining the two pieces together. This spine-like support was likely where the core system of the Demon Armor was housed.

Rather than calling it a Demon Armor, it was more fitting to say it resembled an exoskeleton.

Li Xiu pressed his hand on the Demon Armor to activate it. The Demon Armor then detached from the dummy, shrank and folded, transforming into the size of a pencil case.

"Its volume is smaller, but the protected areas are too few!" Li Xiu remarked while holding the Demon Armor.

"It's not little at all, just try it." The old officer kept urging.

Li Xiu had no choice but to activate it again and put the Demon Armor on himself.

Once the Demon Armor was activated, it directly attached to his body. The three-point armor and spine support made the entire set of Demon Armor appear like a gleaming white porcelain, somewhat resembled ivory with a patina.

Li Xiu felt awkward wearing this Demon Armor, but once he fully activated it, a white gleam, like porcelain, extended from the Demon Armor and transformed into Light Energy Armor, wrapping his entire body.

From this perspective, it didn't look as strange and even had a cool vibe.

The body was wrapped in radiant white Light Armor, exuding brilliance all over, with a somewhat Radiant Demon Spirit feel to it.

"Using Light Energy Armor, this idea is not bad." Now Li Xiu was in awe of the old officer's innovation.

Although Space City and Changsheng Heaven's Demon Armor technology and equipment were more advanced, in terms of creativity, the old officer was still way ahead of them.

Abandoning physical armor and replacing most areas with Light Energy Armor was something only the old officer could pull off.

"With this kind of Demon Armor, the energy consumption must be huge, is the energy core okay?" Li Xiu asked.

"Actually, the design of my core energy is quite similar to the space city's furnace energy source. It's just that they use a special technology, whereas I utilized the vase material's special properties. The core energy is detachable. Currently, the core energy used is from Light-Speed No.2. If you feel the energy is insufficient, you can add a backup energy source. Three backup energy slots have been provided for you, meaning this Demon Armor has a total of four energy slots, supporting up to four cores output..." The old officer explained all the capabilities of this Demon Armor in detail.
