

## **When God 761**

### Chapter 761 The Boorish Man

"That bastard is trying to wipe us out all at once!" Lao Qian exclaimed in horror, looking at the Light Sabers piercing through the ceiling like sunlight through holes.

A group of elderly researchers and Professor Xu exchanged glances and then all turned their eyes to Ximen Guan.

Ximen Guan said calmly, "Then let that ignorant barbarian witness the power of technology."

Upon hearing Ximen Guan's words, the old men eagerly started moving, slowly pushing out one machine after another from the laboratory.

"We'll help." Chu Jun, unsure what these frail old men intended, saw the ceiling about to collapse, and they couldn't afford the luxury of slow movements.

"Young people, just watch. Youth and strength don't represent everything," one old man said with a chuckle, stopping Chu Jun and the others from helping.

Click! Click!

As the old men pressed the buttons on those machines, the energy meters on their panels lit up instantly.

Wheels appeared under those machines, and the old men stood on the machine racks, driving them like forklifts.

One by one, the old men drove the machines over, quickly connecting them together, forming a ring inside the lab that surrounded everyone.

When all the machines were rapidly connected, Ximen Guan nodded to Professor Xu, who gave an order, and circles of flowing light appeared on the entire ring.

As the machines operated, parts of the ceiling were already pierced, and beams of sword light fell, striking the ground and creating holes.

More and more beams of sword light fell, and some were already striking towards their position.

Boom!

As the beams of sword light were about to fall, Chu Jun and the others were ready to act when they heard a loud bang. The sword light seemed to hit an invisible wall and exploded, the resulting light blast shot skyward, blasting the already tattered roof, but the area below remained unaffected.

Boom! Boom! Boom! Boom!

Sword light crashed down, only to be blocked by an invisible Light Shield, exploding continuously outside the shield, denser than fireworks.

Under the terrifying assault of sword light, the entire lab was almost reduced to ruins, yet the ring-shaped defensive circle made of instruments remained intact.

"Whoa... incredible... what is this thing..." Chu Jun exclaimed, giving a thumbs-up to the old men as he watched the crazily exploding sword light outside.

The defensive circle created by those machines could actually withstand continuous strikes of Light Energy of Spirit Forging Level, which was both surprising and delightful.

"Hehe, it's nothing, just a small gizmo. Originally designed to protect instruments and avoid damage to important equipment during Demon Spirit attacks, didn't expect we'd use it now," one old man said.

"With such a good thing, why didn't you bring it out earlier?" Chu Jun asked.

"Activating the defensive circle requires a lot of energy; it's a waste to activate it randomly," the old man said seriously.

As they spoke, the laboratory had been reduced to ruins, and the sword light attacks had stopped.

Looking at the defensive circle and the people inside, Li Changyin, who had landed on the ground, was slightly surprised: "As expected from the research institute, you actually created equipment to withstand Spirit Forging Level power. I underestimated you."

"Li Changyin, have you thought about the consequences of what you've done today if the Chairman finds out?" Professor Xu said, looking at Li Changyin.

"The Chairman?" Li Changyin said plainly, "Maybe after today, I'll be the Chairman of Changshengtian. So what if I find out?"

Everyone was shocked at his words, never expecting Li Changyin to rebel.

"You still have some ability; submit to me now, and I guarantee your lives will not be in danger. You can continue to lead the research institute in the future," Li Changyin said, looking at them.

"Bullshit, as if you are worthy!" one old man cursed directly.

"Dean Xu, your decision can determine life or death," Li Changyin ignored that old man and looked at Professor Xu.

"The research institute recognizes only one Chairman," Professor Xu said calmly.

"What a pity," Li Changyin sighed regretfully. With a thought, the Divine Light Sword Spirit shot at them like lightning.

Boom!

The Divine Light Sword Spirit seemed to be stopped by an invisible wall; the blade couldn't pierce through, hovering mid-air, the sword tip continuously bursting into fragments of light, like a drill shooting sparks while drilling iron.

"Is this thing okay?" Chu Jun asked worriedly, looking at the constantly exploding sparks.

"Rest assured, the energy of the defensive circle is sufficient to withstand strikes of Spirit Forging Level power. The accumulated Demon Cores will allow it to operate for an entire day, ensuring our safety until then," Qiu Tianyu said.

Lei Qingfeng also said, "This is the crystallization of the research institute's efforts; it won't be easily destroyed."

"To withstand my full power Spirit Forging strike, it's indeed impressive," Li Changyin said approvingly.

"Huh, as if we need your validation," one old man snorted coldly.

"What a pity." Li Changyin reached out and grabbed the Divine Light Sword Spirit as it flew back, holding its hilt.

"I'll ask you one last time, are you willing to submit to me?" Li Changyin asked Professor Xu again.

"You should just leave," Professor Xu said.

Chapter 762 Rude Man\_2

Li Changyin stopped talking upon hearing this, suddenly reversed his grip on the hilt of the Divine Light Sword Spirit, and forcefully plunged it into the ground.

The next second, the ground shook visibly, and the faces of all the researchers changed, sensing something dire was about to happen.

"Damn... Is there no protective measure under this defense circle?" Chu Jun jumped up, sword light penetrating from below nearly stabbing his foot.

"That's more troublesome... Besides, to fend off attacks from magic spirits... there's generally no need to guard the bottom..." Lei Qingfeng said awkwardly.

"We've become sitting ducks; then what's the point of this defense circle?" Chu Jun said frustratedly.

No one was in the mood to argue with him. More and more sword lights pierced up from underground, initially just a sword tip, then the emerging sword lights grew longer, forcing everyone to scramble in panic. Seeing no place left to hide, an elderly researcher, due to a lack of agility, was unable to avoid in time, and one leg was pierced directly.

"Get onto the equipment; the bottom has reinforced plates and is not easily penetrated." Professor Xu shouted, urging everyone to climb on top of the equipment.

Everyone scrambled onto the equipment, standing where possible, hanging on the sides if not.

Chu Jun, Sha Chu, and A Fei helped the elders up, hanging onto the sides themselves, watching as the sword lights emerging from the ground grew in number, nearly forming a needle board.

The sound of clanging under the equipment was incessant, apparently the sound of sword lights striking the underside of the protective plates.

Crack!

The protective plates under the equipment were pierced, causing several instruments to malfunction and emit piercing alarm sounds.

Amidst those alarms, everyone remained silent, knowing this time would likely end in disaster.

"Chief Ximen, working alongside you throughout my life leaves me without regrets. It's just a pity I couldn't help you complete that Demon Armor." Professor Xu smiled, extending his hand towards Ximen Guan.

"Indeed, it's a pity, but in these final moments, meeting you means heaven has not treated me badly." Ximen Guan smiled, extending his hand to shake Professor Xu's hand. Having experienced life and death trials before, though still weighing life and death heavily, he remained exceptionally composed when faced with inevitable death.

For those engaged in research, meeting someone whose thoughts are highly similar to one's own is rare; many top researchers journey alone in unknown fields. Especially for research workers like Ximen Guan and Professor Xu, meeting a like-minded individual truly is a blessing from heaven.

Boom!

The equipment was severely damaged, with some unable to operate normally, rendering the defense circle utterly ineffective.

Chu Jun, A Fei, Old Qian, Sha Chu, and others prepared to fight desperately, the researchers aware that their end was near, bidding farewell to old friends, sitting dumbfounded on the equipment, or swearing loudly for relief even if death was imminent.

"Farewell." Li Changyin said casually, the Divine Light Sword Spirit embedded in the ground soared skywards, transforming into countless sword lights, rushing like a torrent towards the group.

Rat-a-tat-tat!

Seeing the sword light torrent surge towards the unprotected group, suddenly there was a rain of light bullets from behind, colliding with the sword light torrent.

Though those light bullets collided with the sword light, unable to shatter it and breaking themselves instead, the sword lights inexplicably deviated in direction, shooting elsewhere, none landing within the original range.

The group turned in surprise, seeing Li Xiu holding a Gatling-like Symbiotic Contract, shooting frantically, a stream of bullets pouring out, continually colliding with the sword light torrent, causing it to veer off course, scattering everywhere but leaving their position untouched.

"Li Xiu!" Chu Jun exclaimed joyfully.

"Finally back." Sha Chu breathed a long sigh of relief.

Li Xiu pressed forward with the Forbidden Spear, stepping in front of everyone, and coldly said, "You guard the researchers retreating to Courtyard No. 7; leave this to me."

"Understood." Sha Chu and others hurriedly protected the researchers' withdrawal.

"Be careful." A Fei said quietly, then also went to shield the researchers for their retreat.

"Li Xiu, you're finally back." Li Changyin's eyes flashed coldly, not mentioning Li Xiu's direct connection to the President of the Longevity Association; just the matter of avenging his brother meant Li Changyin couldn't let him survive today.

"If you had mentioned it earlier, I might have hurriedly returned to die sooner." Li Xiu smiled and said.

"It's not too late now; dying late or early doesn't really matter." Li Changyin said, as the Divine Light Sword Spirit's radiance suddenly intensified, the sword light torrent became even fiercer, the Forbidden Spear's bullets pouring out unable to cover all the sword lights.

Li Xiu grabbed with his left hand, an identical Gatling appearing in his left hand, dual Gatlings fiercely fired at the sword light torrent, forcefully blocking all the sword lights.

The Forbidden Spear transformed from the Evil Spirit Token, possessing identical functions to the real Forbidden Spear, with undiminished power.

"Oh, you actually possess dual Symbiotic Contracts, that's indeed rare." Li Changyin ceased his sword light bombardment, looked at Li Xiu with a sigh, and said, "Li Xiu, truly you are talented; to play with Demon Armor to such a degree, there's only you in the world. Even in the Trial Taker path, you excel remarkably. If you hadn't killed my brother, I would indeed want to spare your life, allowing you to continue as Commander of the Technician group."

### Chapter 763 Reckless Man\_3

"There are no 'ifs' in this world," Li Xiu said calmly.

Li Changyin smiled faintly, "That's fine then. Since the world has me, it shouldn't need someone like you. You might as well die."

As he spoke, Li Changyin grasped the hilt of the Divine Light Sword Spirit, and an eerie radiance rose from him, with the sword light growing stronger and stronger.

"Your Symbiotic Contract is strong, and a dual Symbiotic Contract at that. Even just in the Super Spirit State, it can influence Spirit Casting Level sword light, truly exceptional," Li Changyin's eyes gradually turned sharp, he stared at Li Xiu and slowly said, "But Super Spirit is ultimately just Super Spirit."

As the words fell, the Divine Light Sword Spirit in Li Changyin's hand slashed down straight.

The power of this slash transformed the sword light into a light rainbow hundreds of meters long, falling atop Li Xiu in an instant.

If Li Xiu dodged, this strike might kill the majority of the retreating researchers, leaving the Technician Group in name only.

Li Xiu had no intention of dodging, the Forbidden Spear created by the Evil Spirit Token in his left hand vanished, red and blue Light Veins appeared within his body, a Golden Dinner Knife appeared in his right hand, the tip blossomed with golden light, and he raised it to meet the terrifying sword light.

**Boom!**

The sword light struck the Golden Dinner Knife, the powerful force forcibly pressed Li Xiu's body downward, causing him to kneel on one knee. With his knee as the center, the surrounding ground cracked like a spider web, the stone bricks of the ground shattered and rose, as Li Xiu's body continued to sink.

Li Changyin's gaze was cold and fierce, the hand gripping the hilt pressed continuously, forcing Li Xiu's body to keep sinking, while the Golden Dinner Knife in his hand also slowly sank, the sword light seemed about to touch Li Xiu's head.

"The power of Super Spirit is too weak. You're decent, but still far too lacking." Li Changyin said, exerting force again with the hand holding the sword.

With a thunderous boom, the ground beneath Li Xiu shattered completely, forming a giant crater over a hundred meters in diameter.

To Li Changyin's surprise, Li Xiu had not been slain, the Golden Dinner Knife in his hand still blocking the sword light.

Li Changyin frowned slightly, about to exert force again, when he saw Li Xiu actually withstand the sword light, slowly standing up, lifting the immense sword light with him as he rose.

Li Changyin's gaze narrowed slightly, evidently not expecting Li Xiu to be able to withstand this Spirit Casting Level sword light attack, appearing even more composed than before.

Li Changyin exerted force again, but this time, Li Xiu stood there unmoved, and the ground beneath his feet did not continue to break.

"Your power is strong, and your level higher than mine, but ultimately you're just a brute lacking technique." Li Xiu said, raising the Forbidden Spear in his right hand, to unleash a furious barrage of bullets at Li Changyin.

But those light bullets couldn't touch Li Changyin at all, the radiance emanating from him was like viscous liquid; the closer the bullets got to him, the slower they became, until they came to a complete stop three feet before him.

The densely packed light bullets were motionless in the air, appearing like a starry river, both bizarre and beautiful.

"Brute?" Li Changyin first time heard someone use this term to describe him, rather than anger, smiled and said, "Since you call me a brute, let me show you what true brute strength is."

Li Changyin punched, causing the densely packed, motionless light bullets to fly back even faster than when they were shot from the Forbidden Spear.

The light bullets flew back like scattered stars, engulfing Li Xiu and the nearby retreating researchers.

Li Xiu was resisting that immense sword light, the terrifying pressure rendering his body immobile, unable to dodge those light bullets.

The researchers were even less able to dodge those light bullets, Chu Jun and the others frantically burst out Light Energy, but couldn't block all the light bullets.

In an instant, the light bullets struck not only Li Xiu's body, but also the researchers, and even Chu Jun and the others were hit by several light bullets.

"Where is your technique now? How does it feel to be a brute?" Li Changyin said disdainfully, looking at Li Xiu.

Li Xiu, however, laughed, "A brute is just a brute; doing something so ridiculous and still smug about it."

Li Changyin was slightly stunned, taking a closer look, he discovered that the light bullets hitting Li Xiu and many researchers hadn't harmed them at all; rather, those light bullets acted like a healing elixir, rapidly healing the researchers' wounds.

Li Changyin suddenly realized that the light bullets fired from the Forbidden Spear were not meant for killing, but possessed healing abilities; he had been played by Li Xiu.

"Very well, truly well played." Li Changyin's face turned extremely ugly, never before had he been humiliated and toyed with by a low-level Trial Taker like this.

Li Changyin reached to retract the sword light aimed at Li Xiu, but found that it seemed glued to Li Xiu's Golden Dinner Knife, unable to be withdrawn. Instead, the power within the sword light surged toward Li Xiu like a flood bursting its banks.

"Brute... it comes at a price..." Li Xiu's Golden Dinner Knife in his hand shone ever brighter with a golden edge.

This was Li Xiu using Super Bottle Suction to absorb Light Energy from the sword light, in turn triggering the Golden Dinner Knife's power far beyond what Li Xiu's body could activate.

Li Xiu swung the Golden Dinner Knife fiercely, the faint golden blade light sliced out like silk, forcibly splitting the giant sword light in half.

The silk-like golden blade light cut through effortlessly, reaching Li Changyin in an instant.

Li Changyin's expression changed slightly, he turned the Divine Light Sword Spirit horizontally, blocking the golden blade light.

Boom!

The explosion of light surged into the sky, like a volcanic eruption that refused to cease.

When the explosion finally subsided, Li Changyin's Divine Light Sword Spirit had only half remaining, his clothes blown to tatters by the explosion, and a shallow wound appeared on his arm, caused by the Golden Dinner Knife's blade light.

"Very well, truly well played. For a Super Spirit to hurt me, you can rightfully take pride in it." Li Changyin's expression turned as calm as water, reaching out to tear away his tattered clothes, revealing tattoo-like patterns all over his body.

The pattern was of a Seven-Headed Demon Dragon, coiled around Li Changyin's body, almost completely covering him.

At this moment, the eyes of all seven heads in the Seven-Headed Demon Dragon pattern shone with an eerie light, their bodies writhed and twisted on Li Changyin, each demonic eye fixed on Li Xiu.

"I haven't used the Symbiotic Contract in a long time." Li Changyin said, extending his palm to grasp the tail of the Seven-Headed Demon Dragon inked on his body, pulling the tattoo-like pattern off.

...

#### Chapter 764 Truth Force

After the pattern of the Seven-Headed Demon Dragon was torn down by Li Changyin, it transformed into a Seven-Bladed Spear, held firmly in Li Changyin's hand.

The disconnected Divine Light Sword Spirit unexpectedly flew back on its own, merging into the Seven-Bladed Spear, causing a flash of blade light to emanate from it.

Li Changyin seemed to become one with the Seven-Bladed Spear, his body and the spear moving in perfect harmony. With each breath, the light flames on his body and the spear rose and fell like tidal waves.

Li Changyin glanced toward the Longevity Tower, where the explosion of red and green lights grew increasingly terrifying, each collision seemingly causing the entire Spiral Mountain to tremble.

"It's about time. You should be on your way to join my brother." Li Changyin withdrew his gaze, merging with the spear into a streak of brilliance, appearing instantly before Li Xiu, the spearhead aiming straight at Li Xiu's chest.

This thrust seemed to transcend time and space, leaving Li Xiu no time to dodge. He could only block the spear blade once more with the Golden Dinner Knife.

Clang!

At the moment the Golden Dinner Knife blocked the spear blade, the other six blades of the Seven-Bladed Spear suddenly extended like sinister creatures, piercing through Li Xiu's body.

Six sword-like spear blades penetrated through Li Xiu's back. With a ferocious look, Li Changyin pushed the Seven-Bladed Spear, driving Li Xiu through hundreds of meters to crash and nail him against a broken wall.

"The Seven Extremes Demon Dragon Spear, one spear, seven kills. Unless you have eight lives, even a deity can't escape death." Li Changyin spoke indifferently as he looked at Li Xiu pinned against the wall.

Li Xiu remained silent, staring into Li Changyin's eyes. He raised a hand, gripping the connection between the spear blade and the staff.

"Go and join my brother." As Li Changyin spoke, he attempted to retrieve the Seven Extremes Demon Dragon Spear. However, it didn't budge.

Li Changyin's expression changed slightly. He exerted his strength to pull again, but not only did the spear remain stuck, he felt the light energy within it surging madly into Li Xiu's body.

Meanwhile, Li Xiu's body began to burn with a transparent light flame. Under the incandescence, his entire body became crystal clear, like a statue made of crystal.

"Light Base..." Li Changyin was dumbfounded to discover that Li Xiu was actually advancing to the Light Base.

"I should thank you for donating the light energy; otherwise, I wouldn't know when I'd be able to push this Light Technique to the Light Base." Li Xiu's eyes were profound as he firmly gripped the Seven Extremes Demon Dragon Spear, frantically absorbing its light energy.

In the final month spent in the Land of the Sword Soul, with the absorption of a vast amount of Demon Core Energy, the Light Seed had grown from a small shoot into a towering tree with flourishing branches and leaves.

The vines filled all the Light Veins, and a single vein's power could rival the Evil Spirit Token's Red and Blue Light Vein Map.

But that was not Li Xiu's pursuit. He aimed not only to condense all Light Veins but also to transform his entire body into a Light Base.

Others need a shattered contract foundation; Li Xiu required no shattered contract or contract fusion to strengthen his body. He wanted to establish his foundation purely with the Light Seed, turning his body into a Light Base.

However, this required an enormous amount of energy, typically necessitating the absorption of a massive amount of Demon Core Light Energy.

Now the Seven Extremes Demon Dragon Spear pierced into him, impaled on the light veins formed by the Light Seed, was being voraciously consumed by Li Xiu's Super Bottle Suction for light energy.

Under this immense light energy baptism, the Light Seed continuously grew and extended, densely covering his limbs and veins, as if all his blood vessels had turned into light veins.

Through Li Xiu's now transparent body, countless light veins could be seen, so numerous as to be unimaginable, akin to capillaries permeating his entire body, impossible to distinguish how many there truly were.

Li Changyin's expression was extremely grim. He wanted to pull out the Seven Extremes Demon Dragon Spear, but instead of withdrawing it, his own light energy was flowing toward Li Xiu.

In shock, Li Changyin abandoned the spear and retreated, helplessly watching the Seven Extremes Demon Dragon Spear shatter at a visible rate.

Crack! Crack!

Boom!

The energy-drained Seven Extremes Demon Dragon Spear shattered directly, turning into numerous fragments that, upon flying into the air, dissolved into dust and drifted away with the wind, without even having a chance to fall to the ground.

On Li Xiu's body, the light veins were no longer visible; his entire form had transformed into light veins—he was the veins, the veins were him.

The six holes made by the Seven Extremes Demon Dragon Spear were now entirely gone, filled with light energy-fueled flesh, tightly compressed, the wounds self-healing.

Li Xiu's entire body emitted an endless brilliance, the intense light energy rebounding against the Forbidden Spear and Evil Spirit Token.

While others used contracts to nourish their bodies, Li Xiu did the opposite. He intended to nourish the contracts with his body, elevating both the Evil Spirit Token and Forbidden Spear to the Light Base simultaneously.

Pfft!

The Seven Extremes Demon Dragon Spear, along with the Spirit Casting, was devoured and destroyed, leaving Li Changyin severely impacted, his blood surging uncontrollably, causing him to spit a mouthful of fresh blood.

"What is that power?" Li Changyin, somewhat in disbelief, stared at Li Xiu.

The Super Spirit ascended to the Light Base, devouring his Spirit Casting and Symbiotic Contract alive. Such a thing had never happened in the history of the Longevity Heaven.

Using a Super Spirit to overwhelm a Spirit Casting, not even a madman would dare to think so.

What's more, Li Changyin's Spirit Casting wasn't ordinary but a third-stage Spirit Casting, a top-tier existence among Spirit Castings.

And now it was devoured by a Super Spirit achieving Light Base advancement; even the experienced Li Changyin could not fathom it.

## Chapter 765 Truth Force\_2

In theory, if the third form of spirit forging is converted into equivalent light energy and injected into the body of a Trial Taker at Light Base, the Trial Taker's body might explode directly.

An actual Super Spirit swallowed all the energy of the third form spirit forging and drained the energy of the Symbiotic Contract along with it. Not only did it remain unharmed, but it also ascended to Light Base. This action is simply not human-like.

No, even among demon spirits, there may not be anyone who can play like this.

The brightness on Li Xiu's body flickered, and the Light Base-level body had already reached its peak. There was no need to condense more Light Veins because he is the Light Vein.

Excess light energy poured into the Forbidden Spear and Evil Spirit Token, prompting the Forbidden Spear and Evil Spirit Token to begin ascending to Light Base.

Unlike normal symbiotic contracts ascending to Light Base, this is Li Xiu's light energy nourishing them, making their already abundant light energy even more terrifying.

Light Veins formed directly within the Forbidden Spear and Evil Spirit Token, causing the blood patterns on the Forbidden Spear to all light up, and the Red and Blue Light Vein Map within the Evil Spirit Token to also illuminate fully.

And this is not the end, but merely the beginning.

The Red and Blue Light Vein Map in the Evil Spirit Token sprouted new branches from those light veins, branching out continuously—branch after branch, expanding densely, turning the original humanoid Red and Blue Light Vein Map into red and blue humanoid light shadows.

The blood patterns on the Forbidden Spear bloomed like flowers, gradually dyeing the Forbidden Spear with blood-red color.

When the entire Forbidden Spear turned blood-red, the blood-red color gradually gave way to a blue glow. Once the blue glow filled the spear, it then dimmed and returned to blood-red, which slowly faded away and finally reverted to a bone-white color.

Li Xiu's thoughts sank, and the Forbidden Spear transformed directly into a Gatling form in his hand, aiming the gun barrel at Li Changyin.

"As brothers, everything should be neatly aligned. Go accompany your brother." Li Xiu said, as the Forbidden Spear had already begun spewing fire.

Galaxies of light bullets poured out, blasting toward the blood-spewing Li Changyin.

Li Changyin reached out to summon a series of demon spirits before him, parasitic pacts flying out one after another to protect him.

Bang! Bang! Bang!

Demon spirits roared, parasitic pacts hummed with resonance, Demonic Light intertwined in slaughter, yet they still could not stop the torrent of light bullets.

Bang! Bang! Bang! Bang!

The light bullets pierced through Demonic Light and struck the demon spirits and parasitic pacts, merely shaking them apart but unable to harm or kill them.

Light bullets landed on Li Changyin, causing him to retreat continuously until he crashed against the wall, yet without injuring him in the slightest.

"So your Symbiotic Contract has no ability to harm," Li Changyin panted heavily, staring at the Forbidden Spear in Li Xiu's hand and said.

"Is it so?" Li Xiu grabbed the Forbidden Spear with a reverse grip, once again activating the rapid-fire mode toward Li Changyin.

Li Changyin's face slightly changed. If Li Xiu's Symbiotic Contract truly had no lethal power, he wouldn't need to waste light energy, so he believed that this time the bullets must be different, quickly ordering demon spirits and parasitic pacts to charge forward.

Each demon spirit and parasitic pact exploded with their strongest Demonic Light, striking toward the pouring light bullets.

But Li Changyin was horrified to find that the attacks of the demon spirits and parasitic pacts had all changed flavor, not only failing to block the light bullets but instead striking each other.

The bodies of demon spirits were severed, parasitic pacts shattered, and even Li Changyin himself was hit by a light flame sprayed by a demon spirit, which directly blew him away, spewing more intense blood from his mouth.

Watching his carefully collected and nurtured demon spirits and parasitic pacts slaughter each other, most of them destroyed, the anger in Li Changyin's heart had reached its peak.

"Li Xiu, I want you to die a horrible death." Li Changyin suddenly tore off a pendant from around his neck.

The pendant was a small bottle. He stared with malice at Li Xiu, and without hesitation opened the small bottle, where blue light like smoke and mist immediately rose from the bottle mouth.

Li Changyin unhesitatingly drank all the blue light from within the small bottle, which instantly spread through his body, causing all the veins in his body to bulge with eerie blue color.

Within moments, Li Changyin's entire body was filled with blue light, even his eyes and hair turned blue.

"This power... divine position level..." Li Xiu frowned and looked at Li Changyin, the light energy fluctuation on him was already strong enough to remind Li Xiu of the Ancient Corpse.

Li Changyin, dazzling with sinister blue light, his long hair wildly dancing, gazed at Li Xiu like a Demon God: "Originally intended for the old one, never thought you'd push me to this extent."

Li Changyin's voice was odd, clearly only one voice, yet it felt as if it had echoes.

But in such a place, it shouldn't be possible to produce echoes.

"Who are you?" Li Xiu scrutinized Li Changyin and asked.

"No need to doubt, I am Li Changyin." Li Changyin calmly said, "This is the Truth Liquid made by the Demon Kingdom, granting divine position level powers. Even within the Demon Kingdom, it is a top secret item, owned only by a few royal members of the Demon Kingdom."

"A bottle of Truth Liquid can give someone divine position level powers; it seems unrealistic," Li Xiu replied.

"That depends on how you understand divine position level powers." Li Changyin glanced towards the Longevity Tower, noticing the explosions there still continuing, although not as terrifying as before, indicating the battle was nearing its end.

### Chapter 766 Truth Force\_3

"The so-called Divine Position Level means having mastered the Truth Force, able to ascend to the divine altar, and possess a divine position." Li Changyin looked at Li Xiu and said, "Truth Liquid can grant humans the Truth Force. Although they haven't ascended to the divine altar to possess a divine position, they still have Divine Position Level power. Once the power reaches that realm, whether or not there is a divine position becomes insignificant."

"What is the Truth Force?" Li Xiu had limited understanding of Divine Position Level and hoped to learn more about it.

"Truth is singular, divine power is singular. Before the force of truth, all other powers are but illusions." Li Changyin spoke, slowly raising his palm, and gently pushed towards Li Xiu.

The brilliance on his palm was as radiant as the midday sun, shining on Li Xiu, instantly making him feel as if countless chains bound his body, unable to move.

"This bottle of Truth Liquid is called Heaven's Binding. It allows me to possess the singular Truth Force Heaven's Binding, capable of binding even the heavens. What more, a mere Trial Taker." As Li Changyin spoke, the blue glow surged from his body, and the Divine Light Sword Spirit, which had been absorbed by Li Xiu, once again coalesced in his hand.

Spirit Casting is indestructible; as long as the body is intact, it can be recast once sufficient power is gathered.

The recast Spirit Casting radiated blue light throughout, and the Divine Light Sword Spirit, armed with Truth Force, became even more terrifying.

"I have no time to waste on you anymore, go." Li Changyin wielded the Divine Light Sword Spirit, infused with Truth Force, slashing towards Li Xiu, as the blue sword light fell like a startling rainbow.

Li Xiu watched helplessly as the sword light fell towards his head, yet his body remained immobile; the power of Heaven's Binding, an overwhelming suppression, was difficult to escape even with the Ultimate Light.

As the blue rainbow-like sword light was about to strike Li Xiu's head, a sudden purple light burst forth from his chest, blocking the blue sword light.

Bang!

The clash of purple and blue generated shockwaves that swept away everything around them, the explosion of light rising like an atomic bomb, shooting straight up into the sky.

"Longevity Treasure Chopsticks!" Li Xiu felt his body regain mobility, overjoyed, he looked towards the brilliance of purple light, realizing it was the Longevity Treasure Chopsticks he obtained from Li Ming'Er.

"Divine Position Level contract!" Li Changyin stared at the Longevity Treasure Chopsticks suspended before Li Xiu with mixed emotions.

Li Xiu reached out to grasp the Longevity Treasure Chopsticks, the light energy waves emanating from it were no less impressive than Li Changyin with his Truth Force.

Li Xiu inwardly lamented, "Although both items are Divine Position Level, why is the Food Knife so useless?"

It wasn't the Food Knife's inadequacy, but his sister Han Ling'Er had sealed both the Food Knife and Evil Luo King's power to prevent any possible rebellion, only Li Xiu's light energy could unseal the Food Knife.

The stronger Li Xiu's light energy, the more the seals on the Food Knife and Evil Luo King could be lifted, so currently the Food Knife can't autonomously unleash its true power.

In contrast, the Longevity Treasure Chopsticks had no such limitation, capable of using its embedded light energy at will, unlike the bound Food Knife.

Of course, this required the Longevity Treasure Chopsticks' voluntary action; otherwise, Li Xiu's power would be insufficient to forcibly activate them.

Li Changyin stared at the Longevity Treasure Chopsticks, suddenly slashing his own wrist, allowing the blue-glow blood to flow like a fountain to the Divine Light Sword Spirit in his hand.

The constant flow of blue blood gradually condensed into a blue Seven Extremes Demon Dragon Spear, merging with the Divine Light Sword Spirit.

Generally, when a Trial Taker ascends the Light Base, they shatter the contract and merge it with themselves, becoming one with the contract.

Although unable to advance like the Light Planting Technique to condense a Light Vein prematurely, it's as if granting the Symbiotic Contract an Undying Body.

As long as the body remains intact, the Symbiotic Contract can regenerate.

Originally, even if a Symbiotic Contract could regenerate, it required massive energy to nourish rebirth, needing not just energy but also time. Yet under the vast energy support of the Truth Liquid, Li Changyin directly recast the Symbiotic Contract using his blood, completing it within moments.

Li Changyin held the Seven Extremes Demon Dragon Spear, pointed at Li Xiu, and asked, "Who exactly are you?"

Previously, Li Changyin didn't believe the Longevity Association President would have other illegitimate children, but Li Xiu didn't have a Divine Position Level contract. Apart from the Longevity Association President, Li Changyin couldn't think of any other human capable of obtaining such a contract, casting doubts if Li Xiu could indeed be the President's illegitimate child.

Just a mere City Lord of the City of Light, only a Trial Taker for less than a year, achieving such feats is impossible without the President's support behind the scenes at all costs.

"Li Xiu, Li as in the character for 'wood,' Xiu as in the character for 'cultivating oneself.'" Li Xiu said slowly, holding the Longevity Treasure Chopsticks.

"Indeed, no matter who you are, you must die today." Li Changyin raised the Seven Extremes Demon Dragon Spear, slowly aimed at Li Xiu, and said with a cold expression, "Even if you are that old man's illegitimate son, I intend to kill him, much less you."

With that, Li Changyin's Seven Extremes Demon Dragon Spear suddenly thrust out, transforming into seven demon dragons as it seemed to appear directly on Li Xiu, the seven blue-glow demon dragons binding Li Xiu.

This was the one-shot seven-kill enhanced by the Truth Force Heaven's Binding, a force no human or speed could evade, as the seven dragons formed by the Seven Extremes Demon Dragon Spear directly bound Li Xiu's body, the dragon scale formed by the spear blade tearing, aiming to shred Li Xiu.

At the moment of the Seven Extremes Demon Dragon Spear's contraction and tearing, the Longevity Treasure Chopsticks shone brightly again, transforming from Li Xiu's grip into purple phantom shadows, crisscrossing around Li Xiu like purple lightning.

In just a moment, the heads of the seven demon dragons were pierced by the purple light, followed by the sound of a crack.

The Seven Extremes Demon Dragon Spear returned to its original form, its seven gun blades shattered, the broken spear falling powerlessly to the ground.

Chapter 767 The Speed of Light Strikes

Li Changyin was shocked and alarmed; the Divine Position Contract easily shattered the Seven Extremes Demon Dragon Spear fused with Truth Force, making him realize that Li Xiu's Divine Position Contract was not just any ordinary Divine Position Contract.

The treasure of Longevity Island, how can it be a mere ordinary divine artifact? Even if it's only half, it can't be compared to ordinary Divine Position Level power.

The Longevity Treasure Chopsticks flickered like lightning, shooting towards Li Changyin.

Li Changyin's face changed dramatically, and the blue light on his body crazily surged into his hands, making the Heaven-Binding Divine Light on his hands grow stronger, shining upon the Longevity Treasure Chopsticks, slowing its speed significantly, but unable to completely bind it.

Seeing the Longevity Treasure Chopsticks still coming against the light, Li Changyin gritted his teeth and grabbed the chopsticks with his hands, gathering all his Heaven-Binding Divine Light to try to bind the chopsticks completely.

Li Changyin grasped the Longevity Treasure Chopsticks tightly, his body driven by powerful force, retreating constantly, and his legs carved two deep furrows into the ground.

Bang!

Li Changyin's body slammed into a building, breaking through it, yet still continued retreating, smashing through one building after another.

Li Changyin's hands holding the Longevity Treasure Chopsticks trembled violently, and the Heaven-Binding Divine Light on his hands gradually faded, almost unable to withstand the terrible force.

Poof!

The Longevity Treasure Chopsticks broke free from Li Changyin's hands, pierced through his chest, flew out from behind, and automatically returned to Li Xiu's side before losing its luster and falling.

Li Xiu reached out, caught the Longevity Treasure Chopsticks, and placed it back into his chest pocket.

Li Changyin looked down at the bleeding hole in his chest, his face ashen.

He reached out to cover the bleeding hole in front of his chest, but the bleeding from the hole on his back intensified.

"I never thought that the plan I painstakingly managed for so many years would be ruined by your hands." Li Changyin looked at Li Xiu, his face twisted fiercely, lips trembling, "Tell me, are you really that old guy's illegitimate son?"

"No, I have no relation to the President." Li Xiu replied.

Upon hearing Li Xiu's answer, Li Changyin showed a sign of relief and bitterly smiled, "Then it must be heaven destroying me, my defeat isn't due to a lack of strategy, but because heaven doesn't want that old guy dead, allowing you to appear as an unexpected incident."

Saying this, Li Changyin reached into his pocket, took out an item, and grasped it tightly in his hand, his expression extremely peculiar.

Li Xiu couldn't see what Li Changyin was holding, only glimpsing through the fingers that it seemed to be a piece of jade.

"Since heaven wants to destroy me, let this Longevity Sky perish with me." Li Changyin seemed to have made a certain resolution; holding the jade, he was about to exert force but suddenly saw a flash of jade light severing his hand, which fell and was swept aside by the light.

A figure emerged from behind a building, reaching out to grab the jade light.

The jade light revealed itself as a jade-carved folding fan, its owner being Vice President Han Minghui.

Han Minghui grasped the jade fan, rested upon it was Li Changyin's severed hand. She reached out to take the jade from the hand, then with a wave, sent the severed hand back beside Li Changyin.

"Patriarch Li, play is fine, but flipping the table isn't pleasant." Han Minghui said with a playful smile.

Li Changyin was already extremely weak; the radiance on him nearly invisible, as he stared intently at Han Minghui saying, "Han Minghui, do you think safeguarding Longevity Sky will let that old guy spare your Han Family? Don't foolishly dream; I know that old guy too well, those who betray him will never end well. Only by destroying Longevity Sky will you and the Han Family have a way to survive."

Han Minghui chuckled upon hearing this, "You're right; those who betray the President indeed won't end well, but I'm no traitor, so naturally, no need to worry about those."

Li Changyin felt a chill in his heart upon hearing her words, bitterly asking, "Li Kuan, Bai Wuxia, and the Seventh Elder, what about them?"

"Didn't you just say it? Those who betray the President won't have a good ending." Han Minghui replied indifferently.

"Haha... excellent... truly wonderful..." Li Changyin suddenly burst into laughter, tears streaming, "After managing for so many years, to still lose claiming the final move; who knew you would be the old guy's piece placed by my side? My defeat isn't unjust."

"Indeed, your defeat isn't unjust." Han Minghui sighed, "When you believed you could trust a woman, you had already lost."

"What do you mean?" Li Changyin sensed the deeper implication in Han Minghui's words, gasping, asking.

Han Minghui did not answer; instead, a woman emerged from behind Han Minghui, revealing herself as the Lady of Red Sand City's City Lord.

Seeing the Lady of Red Sand City, Li Changyin immediately understood the development, spewing a mouthful of blood, gazing fiercely at her, then simply severing his life's force, unable to close his eyes even in death.

Li Xiu looked towards the sky, only to see the green pillar of light in the sky slowly contracting, indicating the Jade Gate's closure.

"Commander Mo and the old Commander are closing the Jade Gate. I ask Commander Li to lead the technician group members to support various parts of Longevity City, quickly exterminating the invading demon spirits to minimize losses." Han Minghui directed Li Xiu.

"Okay." Li Xiu glanced deeply at Han Minghui, nodding in agreement. Just as he was about to turn away, he noticed the green pillar shrinking into a thin line, suddenly once more bursting into bright light, the green pillar quickly expanding, growing larger than before.

Chapter 768 Speed of Light Arrival\_2

Han Minghui and Li Xiu immediately realized that something might have gone wrong at the Jade Gate. They simultaneously flew up and arrived at the edge of the cliff, looking towards the direction of the Jade Gate.

They saw that the Jade Gate was half open, with a giant jade hand gripping the door, slowly pulling it open.

As the Jade Gate was being continuously opened, a terrifying figure gradually emerged from within.

They couldn't clearly see what the figure looked like, only that it seemed to be a humanoid creature, radiating green light so intense that it was hard to look at directly.

"Commander Li, please come with me to provide support." Han Minghui's expression changed drastically, and she flew up directly, rushing towards the Jade Gate.

But as she turned, Li Xiu didn't follow; he turned around and ran instead.

"That bastard!" Han Minghui was furious, but there was no time to chase Li Xiu. She quickly turned and dashed towards the vicinity of the Jade Gate.

Mo Wuya, the Old Undying, Bodoss, and Sun Wuxi were all in front of the Jade Gate.

The Old Undying had his upper body bare, with Demon Flame rising from him. The Spirit Casting on him roared like a demon, and his body was covered with scars.

Mo Wuya's situation was not much better. The Cyan Dragon Shield and Vermilion Bird Shield of the Four Symbols Shield had already disappeared, presumably shattered.

Both the White Tiger Shield and Black Tortoise Shield were cracked and seemed unable to hold for much longer.

Bodoss's black veil was long gone, revealing an incredibly beautiful face with a mix of anger and joy. Her black clothes were torn in many places, faintly exposing a deep white cleavage at the chest. The flute in her hand had only a segment left.

Sun Wuxi was covered in injuries, and his mount, a large fat pig, lay collapsed beside him. Its entire skeleton seemed to have been shattered, like a heap of rotten flesh.

The Light Energy on the four of them was bursting furiously, trying to repel the terrifying demonic spirit rushing out of the Jade Gate.

However, their Light Energy only slowed the opening of the Trial Gate, completely unable to repel the terrifying demonic spirit.

"What happened? Why is the Jade Demon King rushing out of the Jade Gate?" Han Minghui arrived in front of the four, her jade fan bursting with Light Energy, striking the Jade Gate, trying to help them close it.

Her arrival only made the Jade Gate pause for a moment before the terrifying green figure continued to pull it open bit by bit.

"I don't know... The Jade Gate was almost closed... Something happened... The Jade Demon King suddenly appeared... And began pulling open the gate that was about to close..." said the Old Undying.

"It doesn't make sense... I have the token of the Master of Jade; it isn't damaged. Why was the Jade Demon King provoked?" Han Minghui frowned.

"Now it's pointless to say anything... Go get the President... Only he can stop the Jade Demon King from rushing out of the Trial Gate..." the Old Undying clenched his teeth and shouted.

"The President must have already seen the situation here. If he hasn't come, he's likely genuinely unable to get away," Han Minghui replied.

"If he doesn't come soon, this big guy is really going to come out..." Sun Wuxi gritted his teeth, continually bursting Light Energy, but remaining powerless to stop the gate from opening, watching as half the Jade Demon King's body had already extended from the gate.

"We must hold on until the President gets here, or the entire Longevity Heaven might be doomed," Mo Wuya gritted his teeth and said.

"How the hell are we going to hold on..." Even though the Old Undying cursed loudly, the Light Energy on him continued to burst. Due to the excessive bursting of Light Energy, his seven orifices began to seep blood.

In front of the Longevity Tower, A Fei was enveloped in intertwining red and green light, like two serpents coiling around him, constantly moving.

The President's Light Energy was increasingly weakening, and the crystalline luster on his skin was dimming.

Their fists continuously collided in the air, triggering shock waves one after another, demolishing nearby buildings into ruins, and the ground undulating with the shock waves like rings of mud-stone waves.

Bang!

Another direct clash of fists occurred, A Fei's form was as stable as Mount Tai, but the President's body staggered back.

"Die for me!" A Fei's form chased after like a shadow, arriving instantly before the President, his fists striking like a violent meteor shower upon the President.

Each punch carried a dragon roar, alternating strikes of red and green Divine Light upon the President's body, causing him to convulse continuously, until the final punch of red and green Divine Light, like twin dragons surging out of the sea, directly blasted the President's body to fly backward, crashing into the Longevity Tower, shattering it into pieces, completely collapsing it.

A Fei stared at the ruins of the Longevity Tower, about to crush them, when the President crawled out from the debris, dragging his injured body, pressing both hands on the ground, gasping heavily, his wounds oozing blood, drip by drip onto the ground.

A Fei walked over, grabbed the President's head, lifting him up, glaring at the President's face, enraged, "When you harmed my mother, did you ever think you'd come to this day?"

"No," the President grinned.

Bang!

A Fei delivered a punch directly to the President's face, distorting his face and causing it to cave inward.

"This punch is for my mother... This one is for me... This last one is for the pain of imprisonment..." A Fei's fists continuously struck the President's face, distorting and deforming it with each impact, causing blood to spray wildly.

Chapter 769 Lightspeed Strikes\_3

With the final punch, A Fei's entire fist sank into the face of the Longevity Association President, with red and green Divine Light spraying out from the back of his head like butterfly wings, seemingly dyeing the world behind him in red and green hues.

Looking at the president's face, which was sunken like a chrysanthemum, A Fei slowly loosened his hand, letting the president's limp body fall to the ground.

Watching the body twitching on the ground, A Fei's expression was complicated, and he muttered to himself, "If you could do it all over again, would you regret doing those things?"

"No... I wouldn't..." The president, twitching on the ground, was surprisingly not dead yet.

A Fei was enraged, stomping fiercely towards the president on the ground, but his foot was stopped by twisted fingers grabbing him.

"What!" A Fei's face showed shock, feeling an overwhelming force gripping his foot, causing his body to tilt, turning head-down-feet-up.

The president stood up, holding A Fei's foot with one hand, his face, sunken like a chrysanthemum, eerily staring at A Fei.

"You still have a long way to make me regret," the president said, his arm suddenly swinging like a windmill.

Bam!

A Fei's body was slammed onto the ground by the president, like a hammer, shattering the ground into pieces, then swung to the other side, slamming again on the ground.

Bam! Bam! Bam! Bam!

The president crazily swung and smashed, causing the entire Spiral Mountain to tremble incessantly, like an earthquake.

Boom!

With the final blow, all of the armor on A Fei shattered, leaving his body twisted beyond recognition, falling to the ground like sludge.

The president didn't even look at A Fei, who was like sludge on the ground, but looked at the Light Pillar in the sky, squinting his eyes, muttering, "Troublesome, how was that thing disturbed."

On the ground, A Fei's twisted body astonishingly climbed up again, with streams of red and green light surging within his body. The shattered armor fragments flew up automatically, converging onto his body, restoring him to normal in an instant, and the armor looking as good as new, with the red and green Divine Light becoming even more terrifying.

"Although I loathe the filthy power inherited from you, I must admit, your power has given me an Undying Body, allowing the Jade Celestial Armor to grow stronger with each battle. You cannot kill me, and I will only become stronger, until you are the one who dies." A Fei glared like a ghost at the president, raising his fist again, punching towards the president who was looking up at the green Light Pillar, twisting his head around 180 degrees, while viciously saying, "I'm talking to you, didn't you hear?"

As he spoke, A Fei punched at the president again.

The president's face twisted back, his figure suddenly bursting with unparalleled speed, passing A Fei like a phantom.

Standing with his back to A Fei, looking at the Light Pillar in the sky, the president said indifferently, "I have no time to play with you, play by yourself."

Saying that, the president walked towards the direction of the Light Pillar.

A Fei maintained his punching posture, but somehow couldn't throw the punch, his whole body seemed unable to move, all his muscles twitching, yet not able to budge an inch.

On his body, several red light dots appeared, penetrating directly into his body like blood-colored nails, nailed onto his Light Vein.

A Fei's face was extremely ugly, desperately wanting to move his body, but not only his body, even his Divine Light wouldn't obey, seemingly clogged within his body.

"Damn... if you have the guts, kill me..." A Fei roared angrily, but there was no response from anyone.

Li Xiu jogged back to Courtyard Seven.

"Old Guan, has my Light Speed No. 3 been repaired yet?" Li Xiu rushed directly to ask Old Guan.

"It's fixed." Old Guan took out the Light Speed No. 3 from his backpack and handed it to Li Xiu.

Li Xiu took the Light Speed No. 3, turned and left without a word.

"Brother Xiu, do you need my help?" Li Ming'Er called out to Li Xiu.

"No need, help me guard Courtyard Seven." Li Xiu said as he went out the door.

Li Xiu knew Li Ming'Er was strong, especially after witnessing the power of the Longevity Treasure Chopsticks, Li Xiu knew that if Li Ming'Er used the full Longevity Treasure Chopsticks, even a Divine Position Level entity wouldn't be her match.

However, Li Xiu ran back not to ask her to kill that Jade Demon King, but with another plan in mind.

"Rest assured, Brother Xiu, with me here, no one can hurt them." Li Ming'Er said earnestly.

"Then I'll leave it to you." Li Xiu said as he went out the door, directly activating the Light Speed No. 3, wearing it.

Like a bikini, the Light Speed No. 3 was put on Li Xiu, immediately radiating light, the extended Light Armor enveloping his entire body.

Like a light shadow, Li Xiu shot straight into the sky, flying towards the direction of the Jade Gate.

With the previous experiences of killing the demon spirits rushing out from the Trial Gate, Li Xiu discovered that before these demon spirits completely emerged from the Trial Gate, their bodies were still restricted by the Trial Gate, unable to significantly impact the outside world.

But at this time, humans could attack the demon spirits, which means, the demon spirits stuck in the middle of the Trial Gate were like meat on a chopping board, ready to be slaughtered.

For Li Xiu, this was a once-in-a-lifetime opportunity, a Divine Position Level demon spirit at his mercy, he could gain so much from it.

Li Xiu flew at full speed, passing through the air.

Standing on the edge of a cliff, just planning to head towards the Jade Gate, the Longevity Association President saw a flash of white light fly by in the sky, squinting his eyes slightly.

"What is that kid trying to do?" The president stopped his steps, standing at the cliff edge, watching Li Xiu flying rapidly towards the Jade Gate with interest.

The immortal few were struggling to hold on, but the door was opening wider and wider, with most of the Jade Demon King's body already out, yet there was still no sign of the Longevity Association President coming, their hearts were filled with despair.

Suddenly, a flash of white light streaked across the sky, the few were initially pleased, then found that it wasn't the Longevity Association President who came, but Li Xiu wearing the Demon Armor, all were slightly stunned.

#### Chapter 770 Closing the Door

Li Xiu paid them no mind and directly piloted the Light-Speed Spear No. 3 towards the Jade Demon King, which had half of its body emerging from the Trial Gate.

The others were dumbfounded, wondering why Li Xiu was rushing over.

The Jade Demon King is a Divine Position Level demon spirit. Below Divine Position Level, almost no force can harm it, so the others only thought of using the power of the Trial Gate to seal it back in and had no intention of attacking the Jade Demon King's body.

Was Li Xiu rushing over intending to repel the Jade Demon King alone? Such behavior seemed rather unwise.

Li Xiu could destroy a Spirit Forging Level demon spirit in one hit, but that didn't mean he could strike a Divine Position Level demon spirit.

The disparity between demon spirits increases as you go up in levels; the difference between Divine Position and Spirit Forging is like night and day. The Light of Truth is beyond what beings below Divine Position Level can contend with.

No matter how strong the light energy of the Demon Armor is, it's still within the realm of ordinary light energy. How could it compete with the Light of Truth?

While the others were puzzled, Li Xiu had already flown close to the Jade Demon King, with the Light-Speed Spear No. 3 around him and the Light-Speed Spear in his hand beginning to radiate intense light energy.

This time, the light energy of the Light-Speed Spear No. 3 and the Light-Speed Spear was more terrifying than when it previously annihilated a Spirit Forging Level demon spirit.

The Light-Speed Spear No. 3 and the Light-Speed Spear hadn't been significantly upgraded and were roughly the same as before; the reason for the enhanced light energy was that Li Xiu embedded multiple Spirit Casting Demon Cores he had obtained, making the energy system far stronger.

Li Xiu hovered before the gigantic head of the Jade Demon King, his figure compared to the Jade Demon King was about the size of a mosquito.

The Jade Demon King completely ignored Li Xiu. In fact, since it hadn't fully emerged from the Trial Gate, its power's influence outside the gate was limited, and it wasn't willing to waste energy on Li Xiu, preferring to use more strength to rush out of the Trial Gate.

The glow on the Light-Speed Spear No. 3 and the Light-Speed Spear grew brighter, with terrifying light energy flooding into the Light-Speed Spear, filling it entirely and causing it to emit waves of terrifying light energy.

Perhaps due to the components of the repaired Light-Speed Spear No. 3 and Light-Speed Spear being modified and upgraded, they didn't suffer damage under such intense, continuous light energy, and the gun frame didn't emit smoke.

"This should work." Originally somewhat cautious, Li Xiu was now unrestrained. His spiritual sense was continuously enhanced, causing the multi-core energy system of the Light-Speed Spear No. 3 to be frantically extracted for light energy, which flowed endlessly into the Light-Speed Spear.

The light energy condensed in the Light-Speed Spear was equivalent to the total of four or five Spirit Forging Level energies. Although it still had a gap with Divine Position Level, it was already alarming enough.

"What a terrifying light energy wave... Such light energy waves, even a third form demon spirit probably can't reach. That the Demon Armor could unleash this level of light energy is truly frightening," one of them remarked in shock, looking at the Light-Speed Spear in the sky radiant like the sun.

"If such Demon Armor can be popularized, why fear not being able to suppress demon spirits in the future?" Mo Wuya stated.

"I think it's not that easy. Such Demon Armor surely requires a large amount of special materials and advanced demon cores and can't be mass-produced. Even if it could, do you think besides Commander Li, there would be many Magic Armor Masters who could activate such a Demon Armor?" Sun Wuxi commented.

Bodoss, with a cold expression, also spoke, "That Demon Armor is powerful, but wanting to harm a Divine Position Demon Spirit is still impossible."

The president of the Longevity Association, standing by the edge of the cliff, was also watching, perplexed about what Li Xiu intended to do.

As the only Divine Position Level human and having once fought against the Jade Demon King, he naturally understood the terror of the Jade Demon King better than the others.

The light energy of the Demon Armor on Li Xiu was indeed beyond the ordinary scope of Spirit Forging Level, but there was still a gap with the Divine Position Level.

Like someone like Li Changyin, thinking they understood the power of Divine Position Level and believing that the Truth Liquid could rival it, such thoughts seemed too naive to the president of the Longevity Association.

The power of the Divine Position Level is not simply limited to the Light of Truth.

The power of the Spirit Forging Level aiming to harm the Divine Position Level is almost impossible.

"A young person who hasn't suffered setbacks, after all, it's not a good thing to learn nothing from challenges. Let him suffer a bit," the president of the Longevity Association stood on the cliff watching, with no intention of taking action immediately.

At this moment, the Light-Speed Spear in Li Xiu's hand had already gathered an immense amount of light energy, nearly draining the energy of several Spirit Casting Demon Cores at once.

Despite the robust materials of the Light-Speed Spear, it was already struggling to hold up, the barrel searingly hot.

Without hesitation, Li Xiu thrust the Light-Speed Spear towards the Jade Demon King.

The position Li Xiu chose was not the Jade Demon King's eye but the top of its head because a fine crack existed on the Jade Demon King's head. Although it was so tiny that it was nearly invisible to the naked eye, Li Xiu still discovered it.

Seeing Li Xiu thrust his spear towards the top of the Jade Demon King's head, the president of the Longevity Association nodded secretly. The crack on the top of the Jade Demon King's head was the injury left when he journeyed to the Jade Demon City before.
