

When God 811

Chapter 811 Glacial Crystal Worm (Part 3)

"Glacial Crystal Worms are the most common demon spirits in the Land of Nine Dragons Profound Ice; however, their levels are generally very low, at the bottom of the food chain. So usually, Glacial Crystal Worms live beneath the ice, rarely tunneling out, to avoid being hunted by other powerful demon spirits."

Li Qingyi said as she walked, "It's said that there are nine of the most powerful demon spirits in the Land of Nine Dragons Profound Ice, all at the Divine Position Level, extremely fierce in temperament. Ordinary demon spirits encounter them only to be eaten, yet perhaps the Glacial Crystal Worms are too weak, so those Divine Position Demon Spirits don't eat Glacial Crystal Worms. Hence, previous Trial Takers, coming here, would always try to acquire a Glacial Crystal Worm demon spirit to scout the way to avoid accidentally encountering those Divine Position Level demon spirits."

At this, Li Qingyi glanced at Li Xiu, "As for the secretions of those Glacial Crystal Worms, it's just a nicer way to say it; you can also understand it as excrement."

Upon hearing this, Li Xiu immediately felt a churn in his stomach, with a strong urge to retch.

"You better not puke. There's not much you can eat in the Land of Nine Dragons Profound Ice, so if you don't want to go hungry, you'll have to eat this," Qingyi said, seeing Li Xiu's gloomy expression, finally breaking into a smile, "Don't look like that, the Glacial Crystal Worms eat the microorganisms in the ice and snow, very clean in themselves. You can think of their secretions as something like honey. Once those secretions enter the stomach, they expand, eating a little can last you several days, you won't need to eat again soon."

"Alright." Li Xiu instinctively wiped his mouth, but there was nothing.

"Do we need to acquire a Glacial Crystal Worm demon spirit first?" Li Xiu asked.

"I've already prepared one when I came here, but few people make it out alive from the Land of Nine Dragons Profound Ice, so the Ice Crystal Rings taken out are scarce; I only managed to get this one. If you want, you can go hunt a Glacial Crystal Worm first." Li Qingyi raised her left hand, showing the ring on her finger that appeared like ice crystal.

"It's rare to come here once, and who knows if there will be another chance in the future, might as well get a Glacial Crystal Worm." Li Xiu felt uneasy with nothing in his hand and thought of getting one first.

Li Qingyi nodded, "Then let's find a place where Glacial Crystal Worms gather."

"Didn't you say Glacial Crystal Worms are extremely common? Do we really need to find a place where they gather?" Li Xiu asked, puzzled.

"They're indeed very common, perhaps quite a few below the ice under our feet. But once we start digging the ice layer, they'll immediately flee due to the vibrations. By the time we've dug through, they'll already be long gone. Just like when we were extracting those secretions earlier, there surely were Glacial Crystal Worms there before we started digging, but they had already escaped." Li Qingyi replied with a half-smile.

"Can we not mention that stuff anymore?" Li Xiu sighed.

"You were the one who asked; I was just explaining it to you." Li Qingyi chuckled.

Li Xiu said no more and followed Li Qingyi for a while until she stopped at a large glacial rift.

She laid on the ground to look inside and listened for a moment, then the Ice Crystal Ring on her finger transformed into a tiny demon spirit resembling an ice crystal worm, which crawled down the glacial rift.

Li Xiu curiously observed the Glacial Crystal Worm. It appeared like pure ice crystal, only twenty centimeters long, thinner than chopsticks, and while moving on the ice, it seemed like there were ice blades underneath, directly sliding into the rift, quite swiftly.

After a long time, the Glacial Crystal Worm emerged again, crawling onto Li Qingyi's finger, emitting a buzz similar to a fly, seemingly conveying some message to her.

"Alright, there aren't any of the terrifying demon spirits below; there are plenty of Glacial Crystal Worms. Let's go down." Li Qingyi said and crawled into the glacial rift.

Li Xiu followed her down. Below were thick layers of ice, resembling a cavern, but with bizarrely shaped glaciers instead of stalactites.

Since some ice caverns are quite narrow and unsuitable for mounts, Li Qingyi had no choice but to walk herself.

After traversing several glacial caverns, a black rock cave appeared below, which was emitting white steam, feeling very warm.

Li Qingyi summoned the Light Base Level Blizzard Maiden, heading into the rock cave.

Li Xiu hurriedly summoned the Jedi Knight, following Li Qingyi inside.

The temperature in the rock cave was quite high, not cold at all, like another world, with brown-colored Glacial Crystal Worm secretions occasionally visible on the rocks.

After not walking far, they were greeted by a sight where a large cavern opened up, with a hot spring spraying white steam.

Beside the hot spring, Glacial Crystal Worms, shimmering with ice crystal luster, were seen resting and drinking water in large numbers.

Li Xiu scrutinized them, shivering; not only beside the hot spring but even within it were Glacial Crystal Worms.

Because the bodies of Glacial Crystal Worms are transparent, they're almost invisible in water. At first, Li Xiu hadn't noticed them.

Upon closer inspection, the hot spring was densely packed with Glacial Crystal Worms, enough to make anyone with fear of crowding nauseous.

Li Qingyi clearly had no such trouble, and directly commanded Blizzard Maiden to attack the Glacial Crystal Worms in the hot spring.

Those Glacial Crystal Worms slid quickly on the ice, but on the rocks moved slowly like worms, unable to escape far.

The sword lights from Blizzard Maiden cut down Glacial Crystal Worms one by one.

The Glacial Crystal Worms in the hot spring immediately began writhing and twisting en masse, countless in number, racing to crawl onto the rocks, desperate to return to the outer glacial area.

Chapter 812 Nine Dragon Radiance

Unfortunately, these Glacial Crystal Worms crawl way too slowly on the rocks; jumping out of the water is akin to seeking death.

Blizzard Princess raised her hand, and snowflake-like sword beams descended, instantly slaying countless Glacial Crystal Worms.

The level of Glacial Crystal Worms is indeed too low; most are not notable. Their Demon Core hasn't even formed, not reaching any rank, not even the lowest E-level.

Moreover, most Glacial Crystal Worms have no quality; those without rank or grade turn into a puddle of cold water upon death, leaving nothing behind.

Occasionally, one or two Glacial Crystal Worms will have rank and grade, but even then, it's just E-level, which is quite rare.

But because there are simply too many Glacial Crystal Worms, even under the snowflake-like sword beams of the Blizzard Princess, there are some stragglers struggling towards the outside of the rocky cavern. Li Xiu ordered the Jedi Knights to step forward and finish off those particular stragglers as well.

"These Glacial Crystal Worms are so numerous, yet so low in rank. How come none have evolved into higher-level ones?" Li Xiu observed Blizzard Princess and Jedi Knights slaughtering Glacial Crystal Worms,

yet didn't see any Demon Spirit Ring appear; he planned to find a higher-level, better-quality one to increase the chance with his risk-free method.

However, after watching for a while, he didn't see any that were slightly higher in rank or quality.

"Glacial Crystal Worms are the lowest grade of demons in the Land of Nine Dragons Profound Ice; many high-grade demons feed on them. They've survived till today entirely due to their potent reproductive ability; even if some were capable of evolving to high levels, they might have already been discovered and eaten by other demons." Li Qingyi paused and added, "My Glacial Crystal Worm ring is merely exploded from a C-level Radiant Quality Glacial Crystal Worm, which was already extraordinarily rare and found by a visiting elder nearby. That elder relied on the Glacial Crystal Worm demon as a scout and luckily discovered his own Longevity Lamp, managing to escape alive."

While the two were talking, the Glacial Crystal Worms crawling out of the hot spring had been slaughtered countless times. Apart from a few low-grade Demon Cores, not even a single Talent Gemstone was found, let alone a Demon Spirit Ring.

The Demon Core exploded by the Glacial Crystal Worms is as small as a sesame seed; even if it's called an E-level Demon Core, it contains pathetically little Light Energy. If you were to sell it, not even ten could be exchanged for one regular E-level Demon Core; nobody would want to trade.

Suddenly, white steam emerged from the hot spring; the originally warm water turned bone-chilling cold, transforming from a hot spring into a cold spring. Those Glacial Crystal Worms rushing towards the exit desperately burrowed back into the water.

The ones not crawling ashore stopped climbing outward and instead burrowed into the depths of the spring.

Li Xiu and Li Qingyi were surprised to find the spring water had begun to freeze, and soon the surface was completely frozen, with green light seemingly flickering beneath the ice.

"Your luck isn't bad; there might be higher-level Glacial Crystal Worms below. Judging by the power of the chilling flash, it probably has to be a B-level or higher quality Glacial Crystal Worm; the chance for exploding a Demon Spirit Ring should be higher." As Li Qingyi spoke, she ordered Blizzard Princess to charge towards the cold spring.

Blizzard Princess brandished her thin sword, a bright light saber directly splitting the ice sheet atop the cold spring in half, and under her successive strikes, the broken ice sheet was reduced to countless fragments.

Splash!

As Blizzard Princess was striking, the water surface suddenly erupted like a fountain; within the watery eruption, a giant figure the width of a barrel emerged, with the exposed part above the water being two to three meters, its underwater portion unknown.

By its appearance, it was clearly a Glacial Crystal Worm, but its size was magnified countless times, its entire body shining like a diamond, strangely beautiful.

Li Qingyi was also taken aback; she had never heard of a Glacial Crystal Worm this massive, didn't know its level, but just the terrifying Demonic Light emitted from its body confirmed its level was far from ordinary.

Blizzard Princess continuously swung her thin sword, snowflake-like sword beams striking the giant Glacial Crystal Worm.

The sound of cracking was endless; when those sword beams fell, they were illuminated by the chilling flash emitted from the Glacial Crystal Worm, actually freezing as they descended. Just as they were about to strike the Glacial Crystal Worm, the sword beams shattered into countless fragmented lights, falling to the ground, failing to inflict any damage on the giant Glacial Crystal Worm.

"Even the Light Base level Blizzard Princess's sword beams can't harm it? That creature must be at least Light Base level." Li Qingyi gasped in surprise; she had never heard of such a high-level Glacial Crystal Worm.

"It's not as simple as Light Base level, let's retreat!" Li Xiu said as he turned to run back, but it was already somewhat late.

The giant, eyeless Glacial Crystal Worm's body suddenly emitted icy light, spewing from its mouth parts like an ice cavern. The spewn icy light was like a volcanic eruption, instantly engulfing the entire rock cave.

Anything struck by the icy light, regardless of what it was, was covered by a thick layer of ice; the original rock cave transformed into an ice cavern in an instant.

Blizzard Princess frantically swung her sword beams, trying to resist the Glacial Crystal Worm's icy light, but as soon as those sword beams encountered the icy light, they were immediately frozen in midair.

Chapter 813 Nine Dragon Lamp (Part 2)

Li Qingyi's Unbreakable Cold Ice Shield had transformed into an Indestructible Ice Armor enveloping her entire body. She landed in front of Li Xiu, blocking the icy light that shone toward him.

The icy light struck Li Qingyi like a volcanic eruption but couldn't freeze the Indestructible Ice Armor. Instead, it made the armor shine even more brilliantly.

"You hide first; I'll cut it down," Li Qingyi said as she charged toward the Glacial Crystal Worm, pushing against the icy light.

Li Xiu hid outside the cave, watching the battle between Li Qingyi and the Glacial Crystal Worm.

Li Qingyi, clad in Indestructible Ice Armor, was like a humanoid mech. She forcefully advanced to the Glacial Crystal Worm's front, punching toward its raised abdomen.

The layers of glaciers frozen by the icy light were shattered by Li Qingyi, her brute strength unimaginable.

Bang!

Just as Li Qingyi's fist was about to land on the Glacial Crystal Worm's abdomen, a bolt of lightning suddenly descended from the sky, striking her and knocking her down.

Li Xiu saw the source of the lightning. It was a cyan Spirit Casting resembling a flood dragon. The Cyan Flood Dragon Spirit had flickers of lightning at its fingertips, with green electricity entwined around it.

"It really is at the Spirit Forging Level." Li Xiu had already noticed that the Glacial Crystal Worm was not just a simple Light Base. As he hesitated whether to rush in and assist Li Qingyi, he saw her getting up from the ground, seemingly unscathed, and once again leaping forward, raising her fist to strike the Glacial Crystal Worm.

Bang! Bang! Bang! Bang!

The Cyan Flood Dragon Spirit spiraled above the Glacial Crystal Worm's head, its fingers triggering streaks of lightning, furiously striking at Li Qingyi.

The Glacial Crystal Worm itself spewed terrifying icy light that continuously shone upon Li Qingyi. Watching Li Qingyi being repeatedly struck by lightning, Li Xiu began to worry.

No matter how strong Li Qingyi was, she was still just a Light Base. Fighting a Spirit Forging creature would undoubtedly put her at a disadvantage.

Moreover, this Glacial Crystal Worm wasn't an ordinary Spirit Forging level; it had an ice attribute itself, yet its Spirit Casting was of the electric attribute, quite bizarre.

Streaks of cyan lightning struck Li Qingyi, knocking her airborne stature back down. With the assault of lightning, her entire body trembled, seemingly paralyzed by the electricity.

The icy light sprayed onto her, quickly forming a thick glacier around her, turning her into a small ice mountain, trapping her inside.

Inside that small ice mountain, the cyan lightning continued to flicker.

Li Xiu pulled out his Golden Dinner Knife, ready to rush over and rescue Li Qingyi, but he noticed cracks appearing on the ice mountain.

The next second, the ice mountain shattered, and Li Qingyi burst out, hurling herself into the air, delivering a punch to the Glacial Crystal Worm's abdomen. She forcefully sent its massive body flying, and the thirty-meter-long creature smashed against the ice wall behind, which crumbled, revealing the original black rock wall.

"So fierce!" Li Xiu was dumbstruck. Li Qingyi was like a humanoid golden shield, indestructible no matter how hard she was hit; such a domineering fighting style was hard to imagine for a woman.

Li Xiu knew that although Li Qingyi might not be able to defeat a Spirit Forging level Glacial Crystal Worm, it was also hard for the Worm to injure her, so he wasn't in a hurry to help.

The Cyan Flood Dragon Spirit constantly released lightning at Li Qingyi, but its effect wasn't too significant. It could not breach the Indestructible Ice Armor, and even the paralyzing effect wasn't quite effective.

The icy light from the Glacial Crystal Worm also wasn't very effective against the Indestructible Ice Armor, merely pushing Li Qingyi back without injuring the armor.

Li Qingyi was like a small tank charging relentlessly, clearly of a lower Light Energy level than the Glacial Crystal Worm, yet she was indestructible, repeatedly charging forward and using brute force. The Worm indeed had no good way to deal with her.

For most Trial Takers, the forces of lightning and ice would be fatal, but Li Qingyi seemed unfazed by these special attributes of Light Energy.

"Truly relentless and unruly. The Glacial Crystal Worm must be quite frustrated, being a grand Spirit Forging level, yet unable to kill a Light Base," Li Xiu admired in awe.

However, Li Qingyi was not without weaknesses. Her Indestructible Ice Armor's defensive power was indeed astounding, but her attack power was not strong. It wasn't weak, just at a normal standard for a Light Base, considered strong among Light Bases, yet compared to her defensive power, it seemed much weaker.

The Spirit Forging level Glacial Crystal Worm couldn't kill Li Qingyi, and Li Qingyi had a hard time killing the Worm as well. The two tangled continuously, shattering glaciers within the cave, causing the rock cave to tremble occasionally.

"If they keep fighting like this, they might collapse the outer glacier layers." Seeing the stalemate, Li Xiu decided to step in and assist.

Li Qingyi's attack power wasn't enough, which was why she couldn't kill the Glacial Crystal Worm. In this regard, he was very proficient.

Li Xiu summoned the Forbidden Spear, directly transforming it into a Super Spirit Gatling state, ready to unleash a barrage at the Glacial Crystal Worm. Suddenly, as if recalling something, he didn't immediately shoot but pulled out the Nine Dragon Profound Ice Tube he had just obtained.

"I wonder if this Nine Dragon Lamp is a defensive skill. Let's give it a try," Li Xiu mused, wielding the Nine Dragon Profound Ice Tube, and then injected his Light Energy into it, simultaneously activating its Nine Dragon Lamp skill.

Chapter 814 Nine Dragon Lantern_3

In Li Xiu's imagination, the mythical Nine Dragon Fireproof Shield is a powerful defensive tool. Once activated, nine divine dragons would swirl protectively around the user, impervious to gods and demons, untouched by immortals and buddhas. It truly stands at the pinnacle of defensive artifacts.

Although the Nine Dragon Lamp isn't the Nine Dragon Fireproof Shield, at least the names are somewhat related. Even if it doesn't possess the same imposing might, it should still have some effect.

However, when he activated the Nine Dragon Lamp, the scene of divine dragons flying out from the Nine Dragon Profound Ice Tube, as imagined, didn't occur. There wasn't even a single dragon, not to mention a true dragon or even a dragon's shadow.

With the input of Light Energy, the large end of the Nine Dragon Profound Ice Tube lit up, casting a beam of light onto the ground.

"What the... isn't this just a flashlight?" Li Xiu looked at the circular light halo that the Nine Dragon Profound Ice Tube cast on the ground, which indeed resembled a flashlight, and a flashlight powered by Light Energy at that.

Inject Light Energy, it lights up; stop the Light Energy, and it immediately dims.

The areas illuminated by it showed no change, and it certainly couldn't damage anything like a Laser Spear; it couldn't even tear a piece of paper. It simply looked like an ordinary flashlight.

"This is crazy, giving me a glorified flashlight... Are they afraid I can't see well at night?" Li Xiu shone the Nine Dragon Profound Ice Tube around. You know, it was actually quite bright; no wonder a flashlight powered by Demonic Light looked so impressive.

While randomly shining with the Nine Dragon Profound Ice Tube, Li Xiu inadvertently shone it onto a huge Glacial Crystal Worm.

Li Xiu suddenly noticed something unusual, causing him to closely examine the Glacial Crystal Worm.

The light from the Nine Dragon Profound Ice Tube on the giant Glacial Crystal Worm did not cause it any harm.

But under the illumination of the Nine Dragon Lamp, the Glacial Crystal Worm's body, originally like flawless crystal, revealed red lines resembling blood vessels.

Wherever the Nine Dragon Profound Ice Tube's light touched, one could see those glowing red lines. Areas outside its beam remained dark.

"What's going on?" Li Xiu was a bit surprised and shone the Nine Dragon Profound Ice Tube on some smaller Glacial Crystal Worms scurrying away.

Under this light, Li Xiu discovered similar glowing red lines within the bodies of the smaller Glacial Crystal Worms as well.

However, the red lines within their bodies were short, and most of the red glow was faint, some barely visible even upon closer inspection.

Occasionally, a few small Glacial Crystal Worms showed particularly bright red lines inside, but judging by their level and quality, they didn't seem significantly stronger than other small Glacial Crystal Worms.

"Strange, what are those red lines?" Li Xiu shone the Nine Dragon Profound Ice Tube on his own hand.

The light from the Nine Dragon Lamp couldn't penetrate his skin and flesh, nor reveal any red lines within.

Li Xiu shone the light on other parts of his body, but the result was the same; the Nine Dragon Lamp's light simply couldn't pierce through.

"Is this thing only effective against the Glacial Crystal Worms? Then why not just call it the Glacial Crystal Tube?" Li Xiu continued to experiment, shining the Nine Dragon Profound Ice Tube over the massive Glacial Crystal Worm.

While it battled with Li Qingyi, he managed to illuminate its entire body, piece by piece, from head to tail.

The massive Glacial Crystal Worm was covered in glowing red lines resembling blood vessels, everywhere from head to tail.

When the Nine Dragon Lamp shone some distance behind its head, Li Xiu noticed a particularly bright cluster of red glow within its abdomen.

That red glow had formed into a patch, unlike the linear red glow in other areas.

Li Qingyi, in the midst of combat, also noticed what Li Xiu saw. Suddenly, she leapt up, her fist glowing with brilliant Light Energy, and struck the patch of red glow Li Xiu had just illuminated.

Thump!

The Glacial Crystal Worm, relatively unharmed for most of the battle, was suddenly pierced through by Li Qingyi's fist.

Li Qingyi's armor-covered arm was nearly completely embedded into the worm, with liquid streaming down her arm.

The Glacial Crystal Worm thrashed about in agony, forcefully flinging Li Qingyi away.

Li Qingyi's body slammed hard into the rock wall, creating visible cracks upon impact.

The Glacial Crystal Worm, rather than continuing the battle with Li Qingyi, turned to dive into the spring.

Li Qingyi immediately kicked off the wall, hurtling toward the Glacial Crystal Worm like a cannonball.

The Cyan Flood Dragon Spirit unleashed bolts of lightning in an attempt to stop Li Qingyi, but its Thunder Power seemed severely weakened. The bolts struck Li Qingyi without knocking her back.

Li Qingyi leapt onto the Glacial Crystal Worm, which then plunged into the water with a splash, pulling both of them underwater.

The Cyan Flood Dragon Spirit followed, and for a moment, the water was filled with chaotic flashes of lightning and frost, sending cascades of waves to the surface.

Li Xiu couldn't see the situation below and dared not enter the water rashly. He didn't have the Indestructible Ice Armor, and any accidental injury underwater would be troublesome.

He swiveled the Gatling gun of the Forbidden Spear and fired bursts at the water surface, caring little if he hit Li Qingyi.

After all, given the strength of the Indestructible Ice Armor, bullets wouldn't penetrate her, and anyway, Li Xiu was using non-lethal rounds that couldn't kill.

After a while, uncertain if he had hit the Glacial Crystal Worm submerged below, the various Demonic Lights beneath the water suddenly vanished, the once turbulent water gradually calming.

Suddenly, Li Qingyi emerged from the water, landing deftly on the ground and tossing an ice-crystal-like ring toward Li Xiu.

Li Xiu caught the ring and found that it was indeed a Demon Spirit Ring, unmistakably the Glacial Crystal Worm's ring.

Chapter 815 Cyan Light Flame

"This is for me?" Li Xiu caught the ring, looking at Li Qingyi with some surprise.

"Without you finding the weak spot of the Glacial Crystal Worm, I wouldn't have been able to kill it. You keep the Demon Spirit Ring, and I'll take the Demon Core." Li Qingyi flicked the water off her hair and said.

"Then I won't stand on ceremony." Li Xiu accepted the Demon Spirit Ring without hesitation, and dropped a drop of blood to incubate it.

Glacial Crystal Worm: Evolving Demon Spirit.

Level: Spirit Casting.

Quality: Brilliant.

Super Spirit Limit: 96%.

Light Vein: Twenty-three strands.

Spirit Casting: First Form.

Talent Skills: Frozen Beam, Ice Breath, Extreme Freeze Healing.

The level isn't bad, and while the attributes and talents aren't top-notch, reaching the Spirit Forging Level isn't too shabby.

"What was the light you used just now to reveal the weak spot of the Glacial Crystal Worm?" Li Qingyi examined Li Xiu and asked.

If it hadn't been for Li Xiu revealing the weak spot of the Glacial Crystal Worm, it would indeed have been a bit troublesome for her to kill it.

"Just this, a Parasitic Contract I got from the trial." Li Xiu handed the Nine Dragon Profound Ice Tube to Li Qingyi and explained its functions.

"Even an E-level Parasitic Contract can reveal the weak spot of a Spirit Forging Level Glacial Crystal Worm, it's quite remarkable." Li Qingyi couldn't quite figure out what kind of skill the Nine Dragon Lamp was and returned the Nine Dragon Profound Ice Tube to Li Xiu after studying it for a while.

Li Xiu put away the Nine Dragon Profound Ice Tube, and the two left the Glacial Rift, returning to the gorge and continued their journey along it.

Li Qingyi had calmed down considerably and allowed Li Xiu to also sit on the white bear's back. The white bear kept running in the gorge. By Li Xiu's estimation, the white bear had run over a thousand miles, yet they still hadn't left this Glacier Canyon. It's unclear how long it really is.

"We're almost at the fire seed point. From now on, follow my orders and don't disturb the demon spirits at the fire seed point." Li Qingyi dismounted from the white bear, looked at the distant gorge exit and said.

"Alright." After Li Xiu got off the white bear, Li Qingyi put the white bear away. After surveying the surroundings for a moment, she cautiously moved forward a bit, then lay down in the nearby snow, and began to slowly crawl forward in the snow that barely reached past her calves.

Li Xiu followed closely behind Li Qingyi, crawling forward slowly. It wasn't long before they finally saw the exit of the Glacier Canyon ahead.

However, right in the middle of that exit stood a relatively low ice mountain, perhaps a few hundred meters tall, with a thick coat of snow on the peak, resembling a giant ice cream cone.

What surprised Li Xiu was that at the top of the ice mountain, something was emitting a faint blue glow, like a halo or a rainbow, looking extremely beautiful.

"Is the fire seed at the top of that ice mountain?" Li Xiu lowered his voice and asked softly.

In front of him, Li Qingyi turned her head, gesturing Li Xiu to keep quiet, so he closed his mouth.

When Li Qingyi waited for Li Xiu to crawl up to her side, she leaned her lips close to his ear and whispered, "Just ahead is where the demon spirits gather. We must first see if there's a Divine Position Demon Spirit around without disturbing them. Follow my path exactly, don't deviate or make any sound."

Li Xiu didn't speak, only making an OK gesture.

Li Qingyi cautiously crawled forward, moving even slower now, and she wasn't crawling straight but occasionally turning and zigzagging.

Li Xiu followed behind her for a while, quietly observing his surroundings, and soon understood why Li Qingyi was being so careful.

In this snowy terrain, at intervals, there were slightly raised areas scattered irregularly.

Li Qingyi was weaving her path to avoid these slightly raised areas.

Initially, Li Xiu only suspected these snow-covered elevations could hide demon spirits, and when he spotted a rather messy snow elevation, he confirmed his suspicions were correct.

Li Qingyi suddenly stopped, lying motionless in the snow, and Li Xiu also stayed still.

Amidst that disorderly snow elevation, something was moving, gradually emerging from the snow.

Once its body fully emerged from the snow, Li Xiu could finally see what it was.

It was a turtle the size of a millstone, entirely looking like a block of ice. When it retracted its head and limbs, it looked just like a millstone-sized ice block.

Even without the snow cover, it would be hard to recognize it as a big ice turtle without careful observation, simply mistaking it for a lump of snow-covered ice.

The Ice Turtle crawled slowly across the snow, its body appearing heavy, yet it left no trace on the snow that reached past one's calf as it crawled.

Having traveled a certain distance, the Ice Turtle seemed to have found a comfortable spot, suddenly appearing heavier as its entire body sank into the snow, leaving only the slightly raised turtle shell uncovered.

With snowflakes fluttering down, its turtle shell gradually turned white, soon disappearing altogether, leaving merely a faint rise.

Li Qingyi waited for a while longer, realizing the Ice Turtle was completely still, then carefully crawled forward.

Chapter 816 Cyan Light Flame (2)

Li Xiu followed her and saw numerous protrusions in the Snow Valley close to the Ice Mountain. There must be at least a thousand Ice Turtles in the Snow Valley.

However, it was difficult to discern the level of these Ice Turtles as their Light Energy and fluctuations were extremely concealed, making it hard to distinguish their level from the intensity of the Light Energy waves and glow.

Li Qingyi did not intend to disturb them. It seemed like the Ice Turtles' level was not low, otherwise, she wouldn't need to be so cautious.

The distance, albeit short—just one or two thousand meters—took them three to four hours to pass through, arriving at the base of the Ice Mountain.

The section of the mountain at the bottom was not covered in snow, meaning the two were about to lose their cover.

Moreover, the mountain below was as straight as a knife edge, nearly at a ninety-degree angle, making it challenging to climb up.

Li Qingyi leaned close to Li Xiu's ear and whispered, "When we climb the mountain later, make sure not to jump or fly on the mountain wall. Just stick to the ice wall while climbing, and do not damage the ice wall. Though the ice wall seems empty, if it is damaged, it will alert the magical creatures here. If you're confident you can climb, come with me. If not, you can stay here and wait for me. I'll go up to see if there's a Longevity Lamp. If there isn't, I'll come back down quickly."

"I'll go up with you," Li Xiu replied, leaning close to her ear after she finished speaking.

"Alright, then remember what I just said. Don't make any noise, or we'll be in trouble," Li Qingyi reiterated sternly.

Li Xiu nodded slightly without saying more.

Seeing that Li Xiu was prepared, Li Qingyi began climbing the ice wall.

The ice wall was extremely smooth, with almost no foothold on the ninety-degree ice wall, yet Li Qingyi maneuvered with empty hands, like a gecko, and climbed up the ice wall.

After climbing for a while, Li Qingyi looked back and saw Li Xiu still perched there without moving. She gestured him to follow.

Seeing the gesture, Li Xiu stood up, approached the ice wall, and like Li Qingyi, climbed up like a gecko.

Li Qingyi was slightly startled at the sight. The Gecko Wall-Climbing Skill was not a Trial Taker Talent Skill, but a body technique invented by humans. She had practiced for a long time to master its essence.

Unexpectedly, Li Xiu had also learned the Gecko Wall-Climbing Skill, and judging by his proficiency, he wasn't inferior to her.

Li Xiu, in fact, hadn't learned the Gecko Wall-Climbing Skill; he was merely climbing the wall following Li Qingyi's approach.

The two moved along the ice wall, one behind the other. Li Xiu did not notice any magical creatures within the ice wall, but dared not be careless and proceeded cautiously as Li Qingyi instructed, taking care not to make any noise.

They climbed over the Ice Mountain, arriving at the slope covered in snow, where Li Qingyi visibly relaxed.

Lying in the snow, she quietly spoke to Li Xiu, who had caught up, "The snow layer here on the mountain top is about four to five hundred meters away. Once we reach the top, we'll be able to see if there is a Longevity Lamp near the fire seed point."

"What exactly is that fire seed point?" Li Xiu asked.

"You'll find out once we get up there. Follow the old rule: stick with me and don't make any noise," Li Qingyi said, continuing to climb.

Li Xiu followed her upward, soon discovering that there were also many Ice Turtles within the snow here. But the Ice Turtles on this side were much smaller than those in Snow Valley and harder to spot with hardly any noticeable protrusions.

Hence, Li Qingyi chose each path very carefully, moving forward only after confirming several times that no Ice Turtle was hiding in the snow.

Even so, a mishap occurred.

Li Qingyi had already confirmed multiple times but failed to notice an Ice Turtle hidden in the snow.

Li Xiu saw Li Qingyi suddenly stop moving in front and knew something was wrong. He didn't dare speak, cautiously shifting to look past her.

Li Qingyi also turned around at this moment, her hands pressed into the snow. One arm was almost entirely sunk into the snow, while the other was barely submerged up to the wrist, suggesting something beneath her hand.

Li Xiu instantly understood what happened: beneath Li Qingyi's hand lay an Ice Turtle.

The Ice Turtle, however, hadn't been awakened, but if Li Qingyi released her hand now, the snow beside might collapse, no one knew whether the Ice Turtle would wake up. Hence, Li Qingyi dared not lift her hand directly.

Li Xiu found this quite thrilling, like standing on a landmine.

He crawled cautiously beside Li Qingyi, who dared not speak, only gesturing to him.

Li Xiu understood her meaning; she wanted him not to worry about her and to go ahead and check whether their Longevity Lamp was up there.

Li Xiu nodded, bypassing Li Qingyi and the Ice Turtle beneath her hand, and climbed up from another side.

Li Xiu climbed very slowly, realizing that even Li Qingyi, who could fight Spirit Forging Level creatures, was so cautious. These Ice Turtles were no simple matter; it was wise not to act recklessly.

"Later, I'll ask Chu Jun if I can also get an Inspiration Skill. If I had his Inspiration Skill, it wouldn't be so troublesome here," Li Xiu thought as he climbed.

Chapter 817 Cyan Light Flame (3)

Fortunately, Li Xiu's observational skills are quite ordinary, even without the Inspiration Skill, he can judge many things on his own.

The ups and downs of the snow and its trajectory, as well as the impact of wind direction and temperature on the snow, Li Xiu continuously compares the surrounding environment, deducing that there should be Ice Turtles beneath the snow.

Luckily, the number of Ice Turtles here isn't too high, with gaps between them, so as long as he avoids them, there shouldn't be any major issues.

Li Xiu smoothly reached the mountain peak and looked back, discovering that Li Qingyi remained in the same position, motionless.

Upon seeing Li Xiu looking her way, Li Qingyi nodded towards him.

Li Xiu understood her intention and climbed directly to the mountain peak.

After half of his body leaned over, Li Xiu saw a fairly flat platform on the mountain peak, not very large, about tens of square meters. In the middle of that platform, a cyan light spurted out from an ice cave, swaying like a flame at the entrance of the ice cavity.

Li Xiu could only feel the cyan light flame was extremely cold; just getting close to the mountain peak made him feel the temperature drop significantly. He couldn't imagine how low it might be next to the cyan light flame.

Except for the cyan light flame, there was nothing else on the platform, let alone the Longevity Lamp.

Li Xiu turned and stuck his head out from the platform, shaking his head toward Li Qingyi below.

Li Qingyi pondered for a moment, signaling Li Xiu to leave the mountain.

Li Xiu knew she wanted to wait until he had left the mountain so she could try raising her hand.

Li Xiu felt that doing so had no significance. If he were to alarm the Ice Turtles and put Li Qingyi in danger, he wouldn't stand idly by.

Thus, Li Xiu returned the way he came, crouching next to Li Qingyi, nodding to her to indicate she could attempt to move her hand.

Li Qingyi seemed somewhat moved, her expression a bit complex as she glanced at Li Xiu, before lowering her head to look at her hand trapped in the snow.

She stared at her hand, slowly pulling it out from the accumulated snow, moving extremely carefully, bit by bit, to avoid shaking the snow off her hand.

Li Xiu kept his eyes on Li Qingyi's hand, prepared to assist if anything happened.

Until Li Qingyi completely pulled her hand out of the snow without incident.

Li Qingyi sighed slightly, while Li Xiu looked at the snow pit, seeing the crystal-clear turtle shell at the bottom, which Li Qingyi had touched belonged to an Ice Turtle.

Finally out of danger, Li Xiu originally thought she would head downhill, but instead, Li Qingyi gestured to him and climbed up the path Li Xiu had taken to the peak.

Li Xiu thought for a moment and understood why Li Qingyi wanted to ascend the peak.

Since the Longevity Lamp wasn't there, the only reason Li Qingyi went to the peak was the cyan light flame, which could aid her Spirit Casting.

Li Xiu followed her to the peak, indeed seeing Li Qingyi cautiously summon the Unbreakable Cold Ice Shield, placing it over the cyan light flame.

The cyan light flame, upon touching the Unbreakable Cold Ice Shield, seeped into it like water into a sponge, gradually condensing into a cyan glow within the shield.

"I wonder if I can absorb the energy from that cyan light flame?" Seeing the Unbreakable Cold Ice Shield easily convert the light energy, Li Xiu couldn't help but ponder trying it after Li Qingyi was done.

Li Qingyi kept her eyes on the Unbreakable Cold Ice Shield. As the cyan light flame poured in, the cyan glow within grew brighter, gradually transforming into a mysterious symbol.

The symbol shouldn't be Demon Text; at least Li Xiu didn't recognize it, nor was it any known text to him. It gave an inexplicable aura, making the Unbreakable Cold Ice Shield feel immovable as a mountain.

Once the symbol formed, Li Qingyi prudently retracted the Unbreakable Cold Ice Shield, reintegrating it within herself.

Li Qingyi signaled Li Xiu to descend the mountain together, but he hesitated, pointing to himself then the still burning cyan light flame.

Li Qingyi refrained from speaking, slowing her steps towards Li Xiu, writing on his hand.

"This light energy is of the Ice Cold Attribute and contains a special attribute. Can your Symbiotic Contract harmonize with this light energy?"

"Yes." Li Xiu penned two characters in reply while holding Li Qingyi's hand.

For Li Xiu, any attribute of light energy made little difference, as he had Super Bottle Suction, capable of transforming any light energy attribute to his advantage.

Li Qingyi skeptically eyed Li Xiu, who reassuringly held her hand to write: "Really."

Sensing Li Xiu was earnest, Li Qingyi scribbled back: "As long as you're confident. If the light energy attributes conflict with your Symbiotic Contract, it could be harmful instead of beneficial."

"Understood." Li Xiu wrote and headed towards the cyan light flame.

To him, it felt like picking up money; he was already there, how could he not pick up money lying on the ground?

Li Xiu summoned the Forbidden Spear, immersing its barrel into the cyan light flame while holding the grip.

Upon contact with the barrel, the cyan frost spread across it, seemingly freezing the weapon.

Li Xiu realized the attributes of the Forbidden Spear and cyan light flame did not harmonize for direct absorption.

"Soft won't work, let's try hard." Li Xiu activated Super Bottle Suction, channeling the flame's light energy continuously through the Forbidden Spear and into himself, then through his Light Seed transformation, converting it into usable light energy.

Li Xiu felt waves of light energy flooding his body, accumulating more and more, exciting him: "This is like picking up money! Let's absorb more; the Spirit Casting ascension is now!"

In the midst of excitement, Li Xiu suddenly heard a crisp snapping sound.

Chapter 818: Methods of Survival

Beside the Cyan Light Flame, an elongated crack appeared on the glacier. Though it looked thin, it stretched from one side of the platform to the other.

It was a bit like the crisp sound of glass shattering, resonating clearly across the entire ice mountain, echoed by the Snow Valley beyond.

Splash!

Almost at the same time, Li Xiu saw the ice turtles raising their heads out of the snow on the mountaintop, stretching their necks long, all looking towards the summit.

"Oh no!" Li Xiu thought to himself, glancing at Li Qingyi and noticing she didn't look better.

The two of them stood there motionlessly, hoping the ice turtles wouldn't really rush out if they couldn't hear anything.

Crack!

Though they made no sound, another line cracked open beneath their feet, echoing once more through the valley.

In the next moment, Li Xiu and Li Qingyi saw ice light soaring from the snow, as ice turtles charged out, bodies radiating ice light, their four claws running rapidly like mini turtle kings, flying towards the mountaintop, leaping into the air.

"Run! Head down the mountain, don't fly," Li Qingyi instantly donned the Indestructible Ice Armor and dashed down the mountain.

Li Xiu's speed was no less impressive, immediately chasing after her, drawing out the Fire Lotus Sword at the same time.

The ice turtles spotted them mid-air, their eyes emitting ice light like vicious ghosts, shooting ice rays all over.

Li Qingyi didn't dodge, taking the ice light from the turtles' eyes head-on with her Indestructible Ice Armor. The rays fell on it, unable to penetrate, and the explosive energy instead propelled Li Qingyi faster down the mountain.

The lotus-like Fire Lotus Sword shielded Li Xiu, emitting layers of sword light like lotus petals, forcibly stopping the ice rays shot by the ice turtles.

"Damn... those ice turtles are light-based..." Li Xiu estimated their level, sensing the terrifying light energy transmitted from the Fire Lotus Sword.

The Fire Lotus Sword continuously released sword light, forcibly blocking the ice light from the turtles' eyes as Li Xiu quickly rushed downhill.

Seeing Li Xiu and Li Qingyi escape, the ice turtles spun fiercely, transforming into giant light discs chasing them through the air.

As the light discs just about hit them mid-air, the Fire Lotus Sword erupted with petal-like sword light layers, colliding with the turtles turned discs.

The sword light of the Fire Lotus Sword was sliced layer by layer by the discs, numerous light discs from the ice turtles spun from all directions, slashing at Li Xiu.

Li Xiu was shocked; despite both being light-based, the sword light of the Fire Lotus Sword couldn't harm those ice turtles. It was unclear if their defense was too strong or if it was due to their rapid spinning.

Regardless, the sword light of the Fire Lotus Sword had little effect on them, at least couldn't seriously injure them for now.

As the spinning discs flew towards him, surrounding Li Xiu, Li Qingyi suddenly turned back. She punched a disc formed by an ice turtle, sending it flying, rushing to Li Xiu's side, and dragged him down the mountain.

But they hadn't gone far before being trapped by the airborne light discs.

Li Qingyi could resist the discs' attacks, but her light energy had little lethal effect on the turtles' light discs.

Li Xiu's mind stirred, and a Demon Spirit Ring flew off his finger, transforming into a blood-red armored monster in mid-air, with bloody eyes scanning the flying spinning ice turtles.

As a spinning ice turtle collided towards them, radiating ice light, the demon spirit suddenly grabbed at it, condensing blood light into a Blood Spirit Forging Hammer, smashing into the spinning turtle.

Boom!

The spinning ice turtle shattered into pieces from the hammer, its entire body exploding like a shattered glass statue.

Blood Linglong, as expected of a third-form spirit casting, killed these light-based ice turtles like a tiger in a herd of sheep.

The ice turtles had extremely strong defense; even if their level was slightly higher, breaking their defense was challenging.

But the hammer in Blood Linglong's hand was like hitting glass, smashing the charging ice turtles effortlessly to pieces.

Li Xiu collected Demon Cores beside him until his hands were sore, gathering dozens of varying quality Light Base Demon Cores in moments.

"Don't get caught up in battle, let's go," Li Qingyi urged seeing Li Xiu's demon spirit was so powerful, taking down the high-defense light turtles with ease but still insisted Li Xiu hurry.

Li Xiu knew Li Qingyi must have foreseen some danger, there was no time to ask more, and he hurriedly followed her down the mountain.

Blood Linglong swung the hammer, protecting Li Xiu, smashing any approaching ice turtles to bits.

The two reached the ice wall and leapt down, sliding along it.

As they slid, the sound of cracking ice echoed in their ears.

Li Xiu realized the real issue might not be the light-based ice turtles, but the cause behind the cracking ice.

They quickly reached the foot of the mountain, only to find there awaited more ice turtles.

Chapter 819 Methods of Survival (Part 2)

In the Snow Valley, ice turtles the size of millstones crawled out from the snow, their numbers were terrifying, each with ice light trembling wildly, like bodies of ice crystal diamonds.

"We must leave here quickly." Li Qingyi gritted her teeth and said.

"Then charge out." Li Xiu gave the order, Blood Linglong wielded the hammer and rushed forward, smashing the ice turtle in front of him instantly.

Li Xiu and Li Qingyi followed Blood Linglong, charging ahead. Blood Linglong's hammer was simply unstoppable, smashing gods, demolishing demons; regardless of the ice turtles' levels, no matter how strong their defense was, even with skill empowerment, none could withstand Blood Linglong's hammer, being smashed to pieces.

Li Xiu didn't have time to pick up the Demon Core because there were simply too many ice turtles around; he and Li Qingyi struggled to handle the ice turtles rushing in from both sides.

Li Qingyi had the protection of Indestructible Ice Armor, which was fortunate. Li Xiu had to rely on his body technique to dodge, wielding a food knife in one hand and the Fire Lotus Sword in the other, relying on brute force to repel the ice turtles.

Just after charging out a short distance, a bizarre ice turtle appeared in front of Blood Linglong. This ice turtle was as large as a room, its whole body dazzlingly brilliant as if made of light and shadows. It was actually a Radiant Demon Spirit.

Even more terrifying, above its body floated a shield formed by condensed Light Energy, it was clearly a Spirit Forging Level ice turtle.

Although it was a Spirit Forging Level ice turtle known for its defense, also possessing a defensive type Spirit Casting Shield, Li Xiu wasn't sure whether Blood Linglong could break its defense.

But even if it couldn't be broken for a while, it didn't matter, as long as Blood Linglong could hold the Spirit Forging Level ice turtle for a short time, Li Xiu and Li Qingyi only needed to charge past.

Blood Linglong's eyes beneath the mask glowed with evil red light, the Spirit Forging Hammer in hand shone with blood light, crashing towards the Spirit Forging giant turtle without hesitation.

The Spirit Forging giant turtle screeched, placing its ice crystal-like Spirit Casting Shield above its body.

Clang!

The Spirit Casting Shield was underneath the hammer, a staggering thunderous sound exploded, ice light shattered, the shield was pierced directly by the blood light hammer, the hammer continued intensely, smashing the turtle shell, causing cracks to spider across.

Bang bang!

In a flash, Blood Linglong struck twice more, causing a Spirit Forging Level ice turtle to perish, its body pierced with a massive hole.

"Wow, Blood Linglong is so fierce!" Li Xiu exclaimed with shock and joy.

Though he anticipated Blood Linglong might be extremely fierce, he hadn't expected it to be this fierce. Despite the ice turtle being adept in defense, it only took three hammers to defeat it, as if they weren't opponents of the same level.

Li Qingyi also hadn't expected Li Xiu's Demon Spirit to be this fierce, effortlessly slaughtering ice turtles of the same level, and was likewise shocked and delighted.

The two followed the unstoppable Blood Linglong rushing forward, but unexpected changes struck again not far from their position.

A thunderous crash echoed from behind, the ice mountain split in two, collapsing from the middle.

No, it shouldn't be said as collapsing, but rather something was emerging from inside the ice mountain, breaking the ice from within and crawling out.

Li Xiu glanced back and was instantly stunned by the sight.

Amid the collapsing ice wall, a colossal ice turtle was crawling out from the descending ice mountain.

Its size was almost the same as the mountain base, carrying a crystal-clear Ice Stele on its back. Upon closer look, although its body resembled a turtle, its head didn't; it had horns and whiskers, and was covered in icy scales over its face and neck.

On the ice stele, nearly as tall as the surrounding ice mountain, was a mysterious symbol shining brilliantly, precisely the symbol formed earlier when the Indestructible Ice Shield absorbed the Cyan Light Flame.

The giant turtle carried the stele forward, each step causing the glaciers around to crack, huge ice blocks falling from the ice walls on both sides of the canyon like rain, plunging into the Snow Valley.

The ice light on the giant turtle shone like a rainbow piercing the sky, unimaginably terrifying.

"Divine Position Level Demon Spirit!" Li Xiu cursed inwardly, urging Blood Linglong to speed up and continue charging forward.

Now he understood what Li Qingyi truly feared; with the Indestructible Ice Armor's defensive power, unless a Divine Position Level Demon Spirit appeared, it would be incredibly difficult to kill her.

Yet, no matter how strong the Indestructible Ice Armor was, it couldn't withstand the power of a Divine Position Level, the level difference was just too great.

Li Xiu gripped the Food Knife with one hand, and in the other stealthily pulled out the Longevity Treasure Chopsticks. Facing a Divine Position Level Demon Spirit, the only thing protecting his life might just be these Longevity Treasure Chopsticks.

If escape proved impossible, he'd have to pin his hopes on the Longevity Treasure Chopsticks.

Suddenly, as Li Xiu was chasing Blood Linglong, he noticed the light around him becoming unusually eerie, a cyan ice light enveloping the entire Snow Valley.

Everything was coated with a cyan hue, the movement of the ice turtles becoming somewhat comical, akin to slow-motion scenes in movies.

Soon, Li Xiu realized it wasn't just the ice turtles; even Blood Linglong's movements became extremely slow, as if the playback speed of the movie had been drastically reduced.

Not only Blood Linglong, Li Xiu's movements also slowed; under the cyan light, their actions were growing increasingly sluggish.

Strangely, Li Qingyi remained unaffected, the Light Talisman formed by absorbing the Cyan Light Flame on her Indestructible Ice Armor flickering constantly.

Though her body was illuminated by the Divine Position Level giant turtle's ice light, her speed held steady, not slowing like Li Xiu and Blood Linglong.

Chapter 820 Means of Survival (Part 3)

Li Qingyi rushed out for several hundred meters, only to find something wrong on Li Xiu's side. She immediately rushed back and carried the slow-motion Li Xiu on her shoulder to run.

Boom!

The giant turtle spat out an ice light, and the ice light fell in front of Li Qingyi, forming an ice mountain, blocking the way out.

Li Qingyi silently lamented her misfortune, knowing that provoking a Divine Position level demon spirit was troublesome, even for her.

"Put me down." Seeing the giant turtle carrying the ice stele approaching, Li Xiu suddenly said.

"What's the use of putting you down? Now is not the time to talk about this. Looks like we'll have to fight for our lives." Li Qingyi said.

"Even if we fight for our lives, you have to put me down! How can you fight while carrying me?" Li Xiu said.

"It's not me who needs to fight for our lives, but it." With that, Li Qingyi pulled something from her hair.

It was a multicolored butterfly that looked like a crystal hairpin.

Li Xiu hadn't noticed before, but now he saw Li Qingyi fling the hairpin, which turned into a vibrant butterfly.

On the butterfly's back, the pattern resembled the eyes of a ghostly demon.

As the butterfly flew into the sky, the eye patterns on its back released a multicolored divine light, piercing through the cold blue ice light emanating from the ice stele and illuminating the giant turtle, causing it to stop in its tracks.

A butterfly and a turtle faced off in the canyon, neither moving an inch.

"Is that a Divine Position level Parasitic Contract?" Li Xiu asked enviously.

"It's a life-saving item my father gave me. For some reason, the Parasitic Contract can only be used once, and then it will return to my father, so we must escape before it leaves." With that, Li Qingyi carried Li Xiu and ran.

"Stop running, put me down," Li Xiu quickly shouted.

Unfortunately, his speech had also slowed significantly, and by the time he finished speaking, Li Qingyi had already leapt to the top of the canyon, planning to bypass the ice mountain to escape.

"What are you doing?" Li Qingyi asked, puzzled, without putting down Li Xiu.

"My demon spirit is still there... I need to retrieve it..." Li Xiu said.

"At this time, you're still thinking about the demon spirit? That demon spirit might be strong, but it's not worth risking your life for. Let's save ourselves first." Li Qingyi said as she continued running without stopping.

"Why run? Maybe your Divine Position Contract can kill that giant turtle." Li Xiu added.

Perhaps because they were further from the battlefield, the blue light's effect weakened, and Li Xiu could speak faster.

"I told you, the Parasitic Contract is a life-saving item my father gave me. It's impossible to kill a Divine Position level demon spirit, only to save your life temporarily." Li Qingyi said.

Seeing that Li Qingyi wouldn't listen, Li Xiu had no choice but to utilize Ultimate Light. As the light energy flared, the blue light on him was burned away by transparent flames, returning him to normal, and he struggled free from Li Qingyi's shoulder.

"You go first, I'll go back and take a look." With that, Li Xiu ran back.

Ultimate Light could suppress the blue light, but only for a limited time due to its scarcity within Li Xiu's body, so he hesitated to use it unless necessary.

Moreover, with the Longevity Treasure Chopsticks in hand, he wasn't planning to fight the giant turtle; he just wanted to retrieve Blood Linglong, which should be manageable.

"You're really risking money over life." Seeing Li Xiu run back, Li Qingyi gritted her teeth and followed him.

Li Xiu's movements were previously restricted, and he hadn't managed to retrieve Blood Linglong. Being too far away would make retrieving the demon spirit troublesome, especially since Blood Linglong was trapped by the blue light and couldn't be recalled from a distance.

Li Xiu charged into the blue light-filled canyon, enveloped in Ultimate Light, approached Blood Linglong, collected it back, and then turned to run outside.

Li Qingyi was somewhat startled to see Li Xiu moving freely within the blue light.

She could do so because she had absorbed the Fire Seed Strange Light, so her Indestructible Ice Armor possessed the Fire Seed Strange Light's properties.

Li Xiu didn't have such attributes, yet he could resist the giant turtle's blue light, which was understandably surprising.

As he retreated from the canyon, Li Xiu frequently glanced back at the confronting giant turtle and butterfly.

He realized the butterfly's ability was likely similar to Old Qian's Life Illusion Realm technique, a skill combining Spiritual Sense and Light Energy.

No wonder Li Qingyi said the butterfly could only save lives, not kill a Divine Position demon spirit.

The butterfly's Parasitic Contract skill probably worked like Old Qian's Life Illusion technique, trapping the giant turtle in an illusion without harming it.

Once the butterfly's power was exhausted, the skill's effect would weaken, and the giant turtle would break free from the illusion.

"This is interesting. The chairman actually has such a Parasitic Contract combining Spiritual Sense and Light Energy... This could be worth learning from..." Li Xiu thought to himself: "Li Qingyi said this butterfly can only be used once. If I miss this opportunity, I don't know when I'll see it use such a skill again, it would be a pity to miss it."

Li Xiu wasn't a reckless person, but as he quickly formulated a plan, he suddenly turned and ran back, returning to the canyon to charge toward the confronting butterfly and giant turtle.

"Li Xiu, what on earth are you doing?" Li Qingyi, who initially heaved a sigh of relief seeing Li Xiu about to come out, was taken aback when Li Xiu feigned a move and sprinted back in.

For a moment, she couldn't fathom what Li Xiu was doing, going back and forth like this. Was he courting death?

Li Xiu at this point couldn't worry about what Li Qingyi thought, he just wanted to experience the butterfly's skill up close.

Previously, Old Qian could only achieve the fusion of Spiritual Sense and Light Energy via the Illusion Sword, but this butterfly contract could inherently achieve this fusion, and Li Xiu wanted to see how it was done.

If he could figure this out, Li Xiu could directly merge Spiritual Sense and Light Energy to unleash it, giving him a chance to use Life Illusion against a Divine Position demon spirit in the future.

If he didn't take this opportunity to understand the method of merging Spiritual Sense and Light Energy, when would he have another chance?
