

Wizard 101

Chapter 101: Frozen Moment! (2)

The Frost Giant snapped its fingers.

Frozen Moment!

With Levi as the center, within a radius of ten meters, the temperature suddenly dropped in the blink of an eye!

The cold wind howled, and the lake froze!

Sharktooth Knight's wet clothes, armor, hair, and body froze in the lake!

He was frozen like an ice sculpture.

However, his powerful physique and black gas prevented him from dying immediately.

Black gas rose from his armor.

His battle consciousness as a grand knight allowed him to use the black gas surrounding his entire body to resist the destructive cold power.

Although his body was still stiff and severely frostbitten, he did not die immediately!

The black gas was heating his blood, and the white gas was steaming!

It was as if the ice was about to melt!

This was what Levi had guessed.

A grand knight was a powerhouse who stood at the peak of the knights, second only to legendary knights.

The black gas was an extraordinary power.

He did not hesitate to take advantage of the grand knight's frozen state.

In his hand was Frostmourne, dipped in Man-Faced Spider Tears.

Black Snake Seed, Giant Rhinoceros Seed, Siren Seed, and the Man-Faced Spider Life Seeds had given Levi strength and courage!

Golden Cross Slash!

Intermediate Ripple!

The perfect cross-shaped sword light was like the scythe of the Grim Reaper!

Under the grand knight's shocked gaze, Levi arrived before him.

Kaka.

Levi had used all his strength to execute the Intermediate Ripple Slash!

It directly broke the iron helmet of the grand knight and pierced through it. Then, Frostmourne seemed to have stabbed into a thick fog, blocking Li Wei's attack.

Levi did not panic. Instead, he released much of Man-Faced Spider Breath directly at the grand knight's face. The grand knight would surely breathe in the poison.

Then, taking advantage of the final freezing time, Levi attacked with the Seal of Flames!

Torrents of flames were blasted in front of his face!

Even though the black gas of a grand knight was thick, Sharktooth was not specialized in defense.

Without the iron helmet blocking Levi's strength, this sword would have been enough to pierce through the Sharktooth Knight's black gas and cut off his head!

The scarlet flame stream instantly burned the Sharktooth Knight. His black gas dissipated under the roasting of the flame stream. The high temperature burned his face beyond recognition, and his flesh was charred.

However, it was obvious that the other party was not completely dead yet!

Just as Levi was about to cast another Seal of Flame, he was attacked by Spider

Sensing, causing his hair to stand on end.

At the same time, his Intermediate Vibrosensing also perceived the force fluctuation.

Seeing this, Levi quickly retreated.

A huge hand filled with black gas was like a demonic claw from hell, grabbing towards Levi's chest like a black tiger snatching his heart.

Levi had no time to cast Seal of Protection.

Although Levi's reaction was fast, the claw still managed to grab his chest.

The leather armor was torn apart. His Dragon Armor was covered in cracks but not completely cracked.

The force passed through Dragon Armor and struck the Frost Giant Armor.

Levi's chest trembled, and his body flew backward.

Although he had blocked the attack, the inhuman power still made his chest feel stuffy.

He flew far away and fell to the ground. He immediately stood up and was fine.

The Frost Giant Armor could block the grand knight's attacks, making Levi feel much more at ease.

That terrifying figure stood up. His face was completely unrecognizable, and his eyes could no longer be seen. His life was almost at its end under the rapidly decreasing temperature. Now, it was just his last struggle.

He staggered towards Levi, who easily dodged him. He was too close earlier to dodge.

"I know that you are working for the Duke of Montenegro!"

Levi flashed behind the grand knight and stabbed his back with Frostmourne. The Golden Cross Slash shattered his opponent's armor.

The grand knight, who had almost lost his five senses, relied on his battle instinct, brandished his broadsword, and charged toward Levi.

Levi had already prepared his second Seal of Flame.

The blazing flames engulfed the grand knight's body.

The iron armor was scalding hot. In the cold lake water and ice shards, ice and fire clashed, and white smoke rose ten meters into the air!

The grand knight attacked frantically, unable to touch Levi at all.

His consciousness was in a state of clarity and chaos, on the verge of collapse.

He was wholly surrounded by ice and fire!

After Levi's fifth Seal of Flame, the grand knight's armor was scorched black, and the flesh beneath the armor was covered in burn marks. It was a terrifying sight.

Even though the black gas was invincible, he could not see Levi and was severely frozen. His movements were slow and not a match for Levi.

The grand knight stood alone in the cold lake, and Levi's Man-Faced Spider Breath and Man-Faced Spider Tears were thoroughly effective.

Ice, fire, poison, and all kinds of sword wounds.

The invincible Sharktooth Knight looked in Levi's direction with its charred and twisted face. He slowly collapsed after releasing a final unwilling roar from his burning throat.

Levi waited long and kept attacking from a distance with his bow and arrows.

When he could no longer feel the other party's breathing through Intermediate Vibrosensing, he quickly used Frostmourn to crush his heart so that he would never be able to come back to life.

As the image of the Megalodon Shark in his heart disappeared, the grand knight died completely.

Levi panted heavily, and his back was covered in sweat. He had killed a grand knight this time, but it was not dangerous.

Everything was as he had expected. The Frost Giant's Sigh was powerful, but the grand knight reacted too fast. If it weren't for the lake, the Frost Giant's Sigh would not have been as effective now.

According to the Gullwig witches, the Frost Giant's Sigh was more of a control spell than a Killing spell. Lowering the surrounding temperature would freeze the enemy's bodily fluids, freezing their bodies and restricting their movements.

This spell was only cast on the mithril armor, and its power was not comparable to that of an official wizard.

However, for Levi, this power was enough for the game.

With so many trump cards, he had achieved a feat that no one had ever done before or since.

He killed a grand knight with the body of a knight!

This battle had allowed him to experience how difficult it was to deal with a grand knight.

On the one hand, it was because of his armor. On the other hand, it was because of the other party's powerful black gas and the body.

Even though this grand knight was not specialized in defense, just like the Fist of the Empire, a grand knight had no obvious shortcomings compared to a

Knight.

Similar to the Substitute panel in Jojo, if Sharktooth's strength was A, then his other attributes were C or even B.

After Levi rested, he looked at the frozen grand knight and began to loot his corpse.

It was his first time looting a grand knight's corpse. He wondered what precious items there were..
