

Wizard 108

Chapter 108: Level 7 Black Snake! (2)

Levi looked at the 17 breathing technique inheritance diagrams and began to copy them.

The first breathing technique was the Rock Dragon Breathing Technique. It was a shallow Bloodline Breathing Technique that focused on defense. The Rock Dragon was an ancient giant beast similar to a giant lizard. The only thing that was related to the legendary giant dragon was that it had scales. There were only 16 small human patterns on it.

Levi used an hour to finish copying.

The second breathing technique, Wind Cat Breathing Technique, was a Bloodline Breathing Technique focused on speed. There were 20 small figures on it, and it took him an hour and a half to copy.

In the end, Levi finished copying all 17 breathing techniques within a few days.

He finally left Silver Mountain Castle with satisfaction.

This month's weapon and equipment forging work had been delayed because of Levi's copying. Levi promised the Earl of Silver Mountain that he would gradually make up for it in the next few months, so Silver Mountain Earl did not say anything.

Levi, who had succeeded, returned to the Black Water Valley after bidding farewell to the Earl of Silver Mountain.

"I'm exhausted."

After Levi returned to the shelter, he lay on his bed, exhausted.

Although it was only a life skill, pushing a special effect to the limit within a month was difficult.

After all, copying a painting requires a lot of time. To Levi, this delicate work was even more tiring than forging iron.

The breathing technique inheritance diagrams he had copied had the special effect of [Fake or Genuine?]. Although it was obvious from the material that it was fake, in terms of content, it was no different from the authentic inheritance diagrams.

Of course, he was not trying so hard to copy this for money. No one would buy this fake Bloodline Breathing Technique. He could make money much faster through forging if he wanted to make money.

Levi did not hurry to cultivate. Instead, he let Magic Shark guard the house

While he slept happily for three days and nights.

Until his stamina and energy were fully recovered.

He then took out one emulated inheritance diagram and prepared to cultivate it.

The Wind Cat Breathing Technique focused on speed.

Levi's Siren breathing technique was about to reach the sixth level, and he would need a few powerful speed-type breathing techniques to break through the limit. Therefore, he planned to produce powerful breathing techniques in an emergency.

A day later, Levi joyfully looked at the new skills on his proficiency panel. [Wind Cat Breathing Technique: Level 1 (1/1000)]

"Alright, then, what's there to say? Proficiency panel! Please let me see where your limit is!"

So, Levi obtained the 17 shallow Bloodline Breathing Techniques from the Earl of Silver Mountain.

Regarding actual value, these 17 shallow Bloodline Breathing Techniques might not even be comparable to the mithril armor that Levi forged. Who knew how long it would take if Levi wanted to collect all 17 of them?

To him, time was money.

"Unfortunately, the Earl of Silver Mountain refused to let me copy the four excellent and perfect grade ones."

Levi felt a little regretful, but he was content.

Days passed, and Levi was focused on cultivating.

After working with the Earl of Silver Mountain, Levi had long given up on his partnership with the Wild Boar Knight.

Recently, the Wilderness Brotherhood had been plotting something. It had been a long time since there had been any news.

If not for fulfilling his promise to Little Milan, Levi could not be bothered to settle the score with the Wild Boar Knight. With his current strength, dealing with the Wild Boar Knight was like bullying a kindergarten child. He did not feel any sense of accomplishment.

Besides, Black Water Valley was developing so fast that it did not matter if there was an Official Blacksmith like Old Toby in the territory.

However, he still had to take revenge.

It's not about profit; it's about understanding.

Besides, he had promised Little Toby he would bring his father back, and Levi had to keep his promise.o

It was not as if Levi did not have the strength to do so.

However, after Levi asked his subordinates to investigate, they found that the Wild Boar Gang's base that Fred had mentioned had been abandoned. There seemed to be traces of a battle at the scene.

The most painful thing in the world was when he wanted revenge, only to find out that his enemy had f*cking disappeared!

Levi helplessly retracted the idea of vengeance.

Levi picked up a tattered piece of parchment and added a note.

The note said, "Wait a little longer."

On this parchment, other than Wild Boar Knight, there were also names of some people who had offended Levi in the past.

This was to prevent himself from being too busy and forgetting about taking vengeance.

Levi had specially listed out the Revenge List.

This was to constantly remind himself not to forget his past humiliation and work hard to gain experience!

The first person on the list was the Duke of Montenegro, whom Levi marked

"Undefeatable for now."

The second and the third were the Earl of Blood and the Earl of Silersilk, respectively. Levi marked them with the same note as the Duke of Montenegro.

There was also the Bird of Death's Voice, Priest Abraham, etc.

In short, anyone recorded in this book by Levi was not an ordinary person.

As the days passed, Levi gradually became stronger.

It was the harvest period again in the Month of Harvest of the year 1009 of the Holy Brilliance Calendar.

The serfs in the territory were carrying out the autumn harvest work. This year was another bumper harvest year.

However, Levi knew such a good year might not last long, given the cold wave gradually moving south and the Undead Snow Demon creatures in the cold wind.

They could easily destroy everything that seemed beautiful.

If these problems could not be solved, his territory would be gone. At that time, Levi would have to save himself.

Of course, it would take some time for these problems to reach the Black Water Valley. Moreover, with the Evernight Kingdom and the great nobles in the north handling them, the Black Water Valley would not have to deal with them for the time being.

In the past few months, Levi had pushed himself to the limits of three speed-type breathing techniques.

They were the Wind Cat breathing technique, the Moon Rabbit Breathing Technique, and the Flying Snake Breathing Technique, whose maximum limits were level 4, level 4, and level 5, respectively.

Now that he had cultivated these shallow breathing techniques to their limit, it was difficult for Levi to feel any sense of accomplishment.

It was just like a max-level account abusing noobs in a novice village. It was boring.

After the wheat harvest was completed and before the Month of the Northern Wind, Levi's Siren Breathing Technique and Giant Rhinoceros Breathing Technique were both at the peak of Level 6.

[Siren Breathing Technique: Level 6 (Maximum, breakthrough available, current progress 0/4), Special Effect: Advanced Speed.]

[Giant Rhinoceros Breathing Technique: Level 6 (Maximum)]

The effects of Levi's three-speed-type breathing techniques were displayed at this moment.

However, Levi was not in a hurry to break the limit of the Siren Breathing Technique.

His Black Snake Breathing Technique had not reached Level 7 yet.

What if the Siren Breathing Technique fought with the Black Snake after reaching Level 6?

Levi wanted the Black Snake Breathing Technique to suppress the other breathing techniques to a certain level before breaking through.

Accompanied by Magic Shark, Levi cultivated for another month.

The north wind howled, and the cold arrived as expected.

Levi's Black Snake Breathing Technique had successfully broken through to Level 7•

[Black Snake Breathing Technique: Level 7 (1/50000), Special Effect: Top-tier

Defense.]

"Level 7 is Top-tier Defense? Then what should we call it?" Levi was curious.

Levi came out of his cultivation state.

At his heart, the Black Snake Seed grew more potent. Levi could even feel that on its surface, there seemed to be scales that were beginning to appear.

This was a sign that the Life Seed had reached a very high level.

Black gas much larger than before surged out continuously within the Black Snake Seed.

Levi's upper body, including his waist, which was previously unprotected, was covered in black gas.

The amount and thickness of the black gas were not as good as Magic Shark's.

However, Levi knew that the defensive power of this black gas should be above that of the Magic Shark's black gas. After all, this was the specialty of the Black Snake Breathing Technique.

"Unknowingly, I've reached the peak knight realm. I'm only 50,000 proficiency points away from becoming a grand knight.."
