

## **Wizard 1101**

Chapter 1101: The Might of Hundred Flowers! King of Nightmares! (2)

From Levi's point of view, the Nine Infant had a bright future ahead of it, as long as it learned to live ignobly like him!

The Nine Infant used his life to exchange for some useful information for Levi. He said,

"Arachne is in the blood-colored forest in the middle of the Lord of Spider Nightmares. She used an illusion to create a huge spider phantom, probably to scare intruders. One of her abilities is spider silk that shoots out of the void. It has extremely strong penetrative power. Her Perception range is very far. I reckon that she has already sensed us before we sense her. Moreover, she has a very strong ability to predict danger. She must be on guard now..."

"Looks like a sneak attack is out of the question. We'll have to fight head-on," Elena said.

"That's right. This is going to be a tough fight."

"I'll deal with Arachne next. I'll apply the Flower Barrier on you. Wait for me here," Elena said.

Levi nodded and said, "Alright, I'll wait for your news here."

Immediately after, a familiar barrier covered his body, and a sense of security enveloped him.

This was not the time for Levi to show off. Against Arachne, with his strength, going with Elena would only cause her trouble and be of no use.

Therefore, he had already determined his position from the moment he entered this place.

He would stay in the valley until Elena defeated Arachne.

After all, if he, as the Nightmare Lord, died and returned to the city, even if Elena was about to win the battle, she would be forced to return to the city.

It would be even more difficult to kill Arachne next time.

After saying goodbye to Levi, Elena left the valley.

...

Lord of Spider Nightmares.

Below the giant spider phantom was a Nightmare Main Tree, which was a thousand feet tall. It was in the karst cave under the main tree.

The Nightmare Creatures were restless, and so were the enslaved wizards like Patricia and Brant.

On the huge platform in the middle of the karst cave, a humanoid creature with a round belly like a spider but with eight faces was scanning everything with its dark yellow eyes.

This was the true body of Arachne!

There were billions of black spider hairs on the surface of her body. At this moment, they were floating violently, indicating the arrival of danger!

As a Nightmare Lord, it had been a long time since he felt this way.

“Intruders have invaded our territory. Kill them!”

The next moment, a surging army of Nightmare Creatures surged out of the cave like a tide.

Most of these Nightmare Creatures had heads similar to Arachne’s face.

Beauty Snake, Beauty Crow, Beauty Cockroach... They were extremely strange and discordant.

Patricia grinned and said, “I didn’t expect someone to invade our Lord of Spider Nightmares. They don’t know what’s good for them.”

She led a small team of wizards and followed behind the army.

Mistress Arachne floated in midair, her figure gradually overlapping with the huge spider phantom in the sky.

In front of him, a human woman with a cold expression stood in the air.

“Human? Looks like you’re a traveler from the Wizard World. I didn’t look for you, but you came knocking on my door,” Arachne said with a smile.

In front of Elena, a rose that was as bright as fire attacked Arachne!

“Ugly fellow, die!”

Swoosh!

This seemingly ordinary rose was like a missile!

It was extremely fast and arrived in front of Arachne in an instant.

Arachne pushed with both hands. As a Man-Faced Spider, her willpower was extremely powerful!

The blooming rose stopped a mile in front of her.

Elena's expression did not change. She said softly:

"Explode!"

One petal after another shattered and exploded!

A violent shockwave spread in all directions.

Arachne's expression changed, and she retreated.

Some Nightmare Creatures that tried to ambush Elena were instantly annihilated. Not even their Corpses were left behind. Even their Nightmare Crystals were reduced to dust.

"A sixth-circle senior primordial soul wizard?" Arachne could not help but exclaim.

As a Nightmare Lord, she often visited the Blood Rain Overlord to discuss the plan to invade the Wizard World.

He also knew a little about wizards and knew that sixth-circle wizards were existences comparable to Nightmare Lords. And sixth-circle seniors were even more extraordinary!

However, as the Nightmare Lord, she also had the corresponding strength in the territory, so she wasn't afraid.

This was why she was unwilling to give up her territory.

On one hand, she could control millions of nightmare creatures and stand above tens of thousands of people.

On the other hand, the territory itself could also enhance the Nightmare Lord. The larger the area, the greater the enhancement!

This amplification was called "Nightmare Domain" by the lords!

"Patricia, Brad, lead the fungus team and see if other wizards have infiltrated the territory. Then, go to the surrounding Chaotic Wilderness to search. If there are any, kill them immediately!" Arachne was alarmed.

After Patricia received the order, she immediately led a group of strange-looking wizards whose organs had turned into fungi and began a carpet search.

White threads flew in front of Arachne.

“Pull the thread!”

Eight threads wrapped around her spider leg. Under her control, they covered a radius of dozens of kilometers!

These threads were like the sharpest blades, rocks, and trees. One layer was cut off.

Fortunately, the Nightmare World was of a very high standard and had a firm structure. If it were in a sub-dimensional portal where primordial souls fought, even the space in a small area would be unstable. Attacks might cause the void to shatter, and Legendary Wizards would tear apart the crystal wall and shake the continent!

Chapter 1102: The Might of Hundred Flowers! King of Nightmares! (3)

Flower Language, Thousand Mountain Butterfly!

Beside Elena, countless butterflies danced. This made her fly around the airtight spiderwebs like an agile butterfly. Occasionally, when attacks landed on her, they would be blocked by the force field.

At the same time, she muttered something, as if preparing some powerful spell.

She had nine great innate spells, and she had also carefully studied the combination and combination of spells. She was not worried about not having enough talent at all, and it was enough for her to adapt to most situations.

What she was preparing was a spell unique to the primordial soul. It was also known as the “primordial soul spell”.

primordial soul spells required the use of elemental power to cast. They were extremely powerful, but with her current realm, she could not cast them with a single thought.

The sense of danger in Arachne’s body grew stronger. She sensed that if she didn’t deal with the woman quickly, she might be doomed.

Her white threads suddenly gathered together and twisted into a white whip!

Slap! Slap! Slap!

An air-piercing sound was heard.

The whip was so fast that Elena’s Thousand Mountain Butterfly could no longer dodge it.

Fortunately, she wasn’t as biased as Anya.

Flower Language, Beauty's Captive!

Flower Language, Stars Forever!

One Violet flew towards Arachne, while the other Star Flower scattered into a sky full of stars. Outside Elena's primordial soul's protective force field, another defensive innate spell was added.

There was also an innate spell, Flower Barrier, which she had cast on Levi. Before that spell lost its effect, she could not use it again.

Violet was like an inescapable net that enveloped Arachne. The eight faces of Arachne suddenly opened, and thousands of Nightmare Creatures crawled out of their mouths and bit at Violet to prevent her from falling.

Seizing the opportunity, her fierce attack struck Elena's protective force field. Cracking sounds could be heard.

She had been a Nightmare Lord for many years. Actually, with the Man-Faced Spider's ability, it wasn't good at fighting head-on. However, this was the Nightmare World, her home ground.

Elena's eyes were filled with killing intent! Behind her, the primordial soul wizard form, Hundred Flowers, suddenly appeared!

Shaman manifestations could increase the power of primordial soul spells.

At the same time, the wizard form could also be used as an attack and defense method, similar to Levi's Bloodline Dharma Idol.

Primordial soul spell, Mandala Umbrella!

As the Flower Witch finished her incantation, the giant tree behind her suddenly swayed, and a 1,000-meter-diameter Mandala Flower turned into a huge light purple umbrella that covered the sky! R

An irresistible suction force came from the huge umbrella. Caught off guard, it sucked in the Man-Faced Spider below.

Not only that, but thousands of Nightmare Monsters around him were also sucked in.

Thud!

Thud!

Thud!

Accompanied by the sound coming from the huge umbrella, it seemed that something huge was hitting the umbrella.

Elena hurriedly used the primordial soul wizard form to mobilize the elemental power in the world to suppress and refine the sealed Arachne.

At the same time, a colorful bracelet appeared on her fair arm.

With the crazy influx of spell power, the bracelet kept enlarging until it was more than a thousand feet in diameter like the rings of Jupiter!

The Seven-colored Star Ring was made up of countless petals of different types.

At this moment, Elena was the ruler of the Hundred Flowers!

Primordial Soul Wizard Tool—Star Ring!

As Elena's Natal Soul Artifact, its power was naturally not something a Fifth-Circle Wizard Tool could compare to.

The surrounding elemental power surged crazily as soon as the Star Ring appeared.

The Star Ring slowly rotated, like a millstone that obliterated all things!

As it spun, a huge vortex began to form between heaven and earth.

Countless Nightmare Creatures were sucked into it and died instantly!

A powerful gravitational force firmly sealed the Mandala Umbrella and Arachne inside, preventing them from moving.

However, because of the Nightmare Lord's powerful vitality, Elena knew it might take some time to kill this Nightmare Creature.

With this thought in mind, she sat cross-legged in the void. Eight level 4 and two level 5 alchemical creatures flew out of her ring.

These alchemical creatures had the same appearance. They were all female swordsmen in armor.

She had asked a Fifth-Circle Wizard from the alchemy faction to custom-make it for her in case of emergencies. Most of the time, it was not needed.

Now that there were not enough people, it came in handy.

“It’s a pity that there are too few primordial soul-level alchemy wizards. Otherwise, I could have asked someone to customize a level six alchemy creature.” Elena sighed.

She shot out a few rays of light and sent piles of Aether Stones into the bodies of the alchemical creatures as if they were free. She chanted an incantation to activate them.

Then, these alchemical creatures protected Elena.

In the battle between the primordial soul wizard and the Nightmare Lord, Elena was the winner.

Even with the support of the Nightmare Domain, Arachne still underestimated Elena’s strength.

If she was an ordinary sixth-circle primordial soul, she might not be able to win against Arachne so steadily.

However, Elena was a primordial soul with nine talents. She had many methods that far exceeded ordinary.

Her talent was outstanding. She had only been a primordial soul for less than a hundred years and had already stepped into the senior realm of the sixth-circle. The vastness of her spiritual force and spell power far exceeded that of an ordinary sixth-circle primordial soul.

She had also mastered three primordial soul spells, each of which was an earth-shattering great divine power.

In addition, she was powerful enough to be ranked on the Soul Artifact Ranking and Wizards Ranking. The Soul Artifact—Star Ring and the wizard form—Hundred Flowers and Thousand Trees!

Chapter 1103: The Might of Hundred Flowers! King of Nightmares! (4)

To her, defeating Arachne was not luck, but true strength!

It had to be known that in the entire Wizard World, including the 50 plane federations and plane-traveling wizards under his command,

On the surface, there were thousands of primordial soul wizards. Coupled with some old monsters that could not be hidden, there might be even more.

The Soul Artifact Ranking and the Wizards Ranking were rankings established by half of the civilian and semi-official top factions of the Thousand Star Tower. The rankings targeted the famous primordial soul wizards and only listed 1,000.

Of course, the list only listed those wizards with public battle records and were willing to be on the rankings.

Many low-key and cautious primordial souls did not want to be famous and would not participate in the rankings.

Someone like Elena, who could be ranked on the list not long after stepping into the primordial soul, was also extraordinary among the primordial soul wizards.

Elena sat in the air and continuously injected spell power to refine the Man-Faced Spider. The movements in the Mandala Umbrella became smaller and smaller. It was only a matter of time before they were completely wiped out!

“Levi is protected by the barrier I gave him, so he should be fine. Speaking of which, the corpse of a level 6 Nightmare Lord is something that some old fellows in the Wizard World who are researching the Nightmare World want even in their dreams. Unfortunately, they don’t have the ability to enter the Nightmare World at a low risk like Levi. Sister Triss is right. Levi is still worth investing in. In that case, I’ll raise the stakes too!”

Many primordial soul wizards would be like Triss, investing in young elites with potential and good character.

Firstly, they could use a price that was insignificant to them to obtain the good karma of a potential stock. They might be able to obtain a richer report in the future.

Secondly, in their relatively long lives, apart from cultivating and researching, they would also use this method to invest in the younger generation to compete. It was also a pleasure to see whose investor would have the last laugh.

Many so-called nomadic wizard geniuses had big shots behind them.

On the other side of the valley.

Levi was inside Elena's protective barrier, waiting for the results.

"The battle between the primordial souls is a protracted battle. The winner has yet to be decided."

Judging from his lord's mark, Elena was fine. It should be the final stage now.

Suddenly, Levi's Danger Perception sensed danger. He immediately became alert. More than ten layers of defense could appear at any time to defend against the enemy.

In the wilderness outside the valley, a team of wizards was advancing.

The leader was Patricia. Her powerful spiritual force scanned the front, unaware that her master had been suppressed.

"Judging from the Danger Perception, there should be a level 5 existence coming over. It's a little troublesome... It's not a problem for my array to hide from a level 4 existence. If it's a level 5 existence, it's a little difficult." R

Levi calculated. The runes of the Hidden Snake around him flickered and disappeared into the void.

If he continued to stay there, there was a high chance that he would be surrounded. It was better for him to leave this place invisibly and act according to the situation.

The Nine Infant lay dormant in the valley, waiting for Levi's orders at any time.

With the enhancement of the Hermit Rune, Levi saw the person from afar.

"Patricia, it's her. She should have ordinary fifth-circle strength, about the same as Madam Ghost," Levi thought. Elena had learned all this from Leonard!

Patricia, on the other hand, did not seem to have sensed Levi and continued forward.

After thinking for a moment, Levi immediately turned back and quietly followed behind them.

...

At the edge of the valley.

Patricia's gaze was cold as she said, "There's an array here. It seems that the wizards who invaded our territory came from here... Now, it seems that Leonard was also killed by them. This is a premeditated invasion! Let's go in and investigate and report to Mistress Arachne."

The group activated their abilities and began to attack the array Levi had set up.

Levi had only set up some simple concealment and protective arrays. Not long after, the arrays were broken.

"Judging from the array, this wizard shouldn't be very strong." Patricia analyzed in her heart.

"Lord, look, it's that Wailing Infant Bird... It's here too," Brad said.

After the Nine Infant discovered the enemy, it roared fiercely at them. Flames spewed out from its eight heads.

"You don't know what's good for you!" The fungus in Patricia's lower body began to spread. Finally, it formed eight tentacles that resembled octopuses. They waved as they charged at the Nine Infant.

At this moment, something unexpected happened!

In the sky behind Patricia, against a backdrop of red and black.

Accompanied by a mighty Sanskrit chant that they had never heard before, a giant phantom that was 20 stories tall stood in the air.

The giant had three heads and six arms, and his Dharma Idol was solemn. He wore pitch-black magic armor and held many divine weapons, Wizard Tools!

Six Heavenly Gods descended!

A figure sat cross-legged on the giant's head.

He pointed at Patricia with his right hand, and then the giant slashed with his sword!

The Destruction Sword Qi that was wrapped in the Black Flame Void and the Crimson Emperor Dragon Flame swept out, and the black river hung upside down!

Boom!

Accompanied by the explosion of the Twin Dragons Playing with Pearls and the insufferably arrogant sword aura, more than half of the low-level Nightmare Creatures in the area were killed or injured.

Patricia's eight dancing tentacles were cut off by the sword's aura.

Her reaction was extremely fast, and the fungi around her formed a protective layer like armor.

The remaining sword qi poured onto the armor. The armor shattered, and the sword qi disappeared.

Chapter 1104: The Might of Hundred Flowers! King of Nightmares! (5)

"He's an intruder! Kill him!" Patricia pointed at Levi, exasperated.

As the Head Chief of Arachne's subordinates, she had a very high status. At this moment, she was embarrassed in front of so many subordinates. She was extremely unhappy!

In an instant, Brad and the other wizards, as well as some Nightmare Creatures, all charged towards Levi.

"Deep Blue Sage!"

Although Levi had an invincible turtle shell now, he was not someone who would take a beating passively.

The Deep Blue Sage body-tempering clone separated from him and transformed into a blue monster. The Deep Blue Sage's arm turned into a blue saber, and countless blue vines shot out from its entire body.

Then, it entered the Uninhabited Realm and killed crazily.

Levi leaped up from the Six Heavenly Gods' heads.

“Kill that woman!”

The Six Heavenly Gods did not need him to control them in real time. They could fight on their own.

Immediately, the Six Heavenly Gods activated the three Dharma Idols—Wind and Thunder Surge, Heaven Burning Crimson Emperor, and Golden Snake Dance!

He held the Crimson Dragon Slash in his hand, and his sword aura was peerless. He tore through the atmosphere and fought Patricia, who was controlling various fungi.

Patricia was also using fungus to form a rotten behemoth to fight the gods.

Levi let the powerful Heavenly Gods use the divine weapon and Wizard Tool while he relied on the Invincible Barrier to activate the Flame Dragon's true form. He relied on innate spells to kill his way into the crowd.

“Fire Dragon Tribulation!”

“Wind Dragon Scamper!”

He was like a phantom, killing unparalleledly. Every time he flashed, wizards or Nightmare Creatures would die!

In the human world, he had never fought to his heart’s content like today.

Soon, the Corpses of these Nightmare Creatures piled up on the Earth, and Nightmare Crystals were everywhere.

Before long, Levi, Deep Blue Sage, and the Nine Infant killed all the wizards and Nightmare Creatures.

“It’s great to not have to worry about killing. However, the barrier is about to end. I wonder how Elena is doing?”

Levi quickly put away the spoils of war and the Nightmare Crystal.

On the other side, the Six Heavenly Gods’ every move was earth-shattering. Soon, Patricia was unable to withstand them.

“So powerful. As expected, the power of my Six Heavenly Gods is completely comparable to ordinary fifth-circle wizards!”

However, these descendants of the Dreamland Steeple could no longer be considered proper wizards. Their abilities did not come from spells, but from the “fungi” in their bodies!

A blinding light lit up in the sky, and high temperatures swept over!

Fifth-circle spell, Solar Aggregation!

The Six Heavenly Gods began to use their ultimate move, the Fifth-Circle Wizard Tool—Secret Fire Sphere.

Levi instantly felt that his spell power was surging like flowing water and soon consumed thousands of points!

Then, a fiery red sun began to form above Patricia’s head.

The Solar Aggregation evolved from the Sun Splitting Strike, and its power far surpassed the Sun Splitting Strike!

Patricia wanted to dodge for the time being, but she realized that the light of the surrounding arrays had lit up.

During the battle between Patricia and the Six Heavenly Gods, Levi had already set up the fourth-circle array, the Demon Cage.

Not only that, but the Water Dragon's Song roared and the aqua-blue Divine Dragon wrapped around Patricia tightly.

Levi even used the Paralysis Spell and the Snake Eye Demon Art once.

Unfortunately, all of them failed.

However, by relying on arrays and innate spells, he had also successfully stopped Patricia for a moment, completely destroying her hope of escaping!

Boom!

The sun exploded.

The flames engulfed Patricia. The temperature inside could instantly turn rocks into magma.

"Ahhh, Mistress Arachne ... help me!" Patricia's gut-wrenching voice came.

The last of her fungal armor completely shattered, and her fat body began to burn. She turned into a burning person and struggled, and soon, she stopped breathing.

“As expected, I have to let the flames purify everything.”

Levi rushed into the flames and collected the loot that Patricia had yet to burn.

It was a small black bottle and a metal plate. It seemed to be some kind of knowledge inheritance.

“The Art of Fungus—Written by the Fungus Queen... Is this the source of Patricia and these wizards’ strength? The Fungus Queen should be a powerful Abyss Lord comparable to a god. Why is this place related to the Abyss again?”

Levi felt a headache coming on.

It seemed that the ability to use fungi to control others was not Arachne’s original creation, but came from the Fungus Queen.

“Put it away first. We’ll study it when we get back. Perhaps Miraya and Guillermo know more.”

The black bottle was labeled with words.

“Spores.”

Spores are the breeding organisms of fungi.

There was no explanation of what spores they were. Perhaps the answer was in the book *The Art of Fungi*.

Levi cleaned up the battlefield and picked up many storage bags that were corrupted by the fungus.

“There are no Aether Stones, but there are many Nightmare Crystals and a strange artifact similar to the Blood Ax.”

Levi held an exaggerated greatsword in his hand. The greatsword was slightly curved, and its surface was covered in sharp barbs. It looked like the tongue of some creature.

Levi called it Tongue Sword and put it away.

“The heart is a giant ax, and the tongue is a big sword... These strange artifacts seem to be directly made from the organs of some creature.”

Other than that, there were not many other gains.

With Levi's current realm, he was not interested.

The greatest gain was a huge number of Nightmare Crystals.

The Nine Infant ran over, its body riddled with injuries. With its physique, it would recover in no time.

Chapter 1105: The Might of Hundred Flowers! King of Nightmares! (6)

Levi threw some corpses of Nightmare Creatures to it for it to devour.

The Six Heavenly Gods turned into golden specks of light and slowly dissipated. Levi sat cross-legged on the ground and recovered his strength.

Not long after he dealt with Patricia and the others, in the Lord of Spider Nightmares, Elena's face was pale. She seemed to have consumed a lot of spiritual force.

In front of her eyes, the Star Ring shrunk and finally entered her mind. It circled around the Divine Ring Tower on the sixth floor, and the Mandala Umbrella slowly opened.

Among them, there was a huge spider corpse that was like a small mountain. The eight faces on it all closed their eyes at this moment and were completely silent.

The lord of the Lord of Spider Nightmares, Man-Faced Spider Arachne, was dead!

In Elena's hand, an emerald green innate spell longsword appeared.

Flower Language, Dragon Tongue Sword!

The long sword stabbed into the tough body of the Man-Faced Spider, as if it had pierced into metal. Sparks flew everywhere. After an unknown period of time, the corpse of the Man-Faced Spider had been completely dissected.

After the weak Nightmare Creatures died, many of their bodies would dissipate, leaving only the strongest Nightmare Crystals.

For a powerful Man-Faced Spider, its corpse might not rot for hundreds of years. If it was used, it could also be used to refine Wizard Tools, alchemy, and so on. Therefore, its entire body was a treasure. Even someone like Elena had a smile in her eyes.

The Corpse of a Lord-tier Nightmare Creature had very strong research value.

Following that, after dividing the spoils with Levi, she planned on studying the corpses with Triss. This would be a major breakthrough in unveiling the Nightmare World's mystery.

Not long after, Levi, who had cleared the monsters the entire time, arrived.

“As expected of Lord Elena. Killing the Nightmare Lord is no problem,” Levi said with a smile.

“Stop bragging. See if there’s anything you need from these Corpses. Choose whatever you want. Without you, I wouldn’t have been able to enter this place,” Elena said as she rolled her eyes at Levi.

Levi smiled and said, “Then I won’t stand on ceremony. Please don’t blame me, Lord.”

Then, he activated his protective force field and arrived before the Man-Faced Spider’s corpse.

“Even though I’m already dead, this residual power still makes me feel suffocated. The gap between me and the primordial soul is like a natural chasm.” Levi sighed in his heart.

He chose a large piece of shell from the toughest back of the Man-Faced Spider.

“These should be enough for me to refine a Nightmare Dragon divine weapon...”

He put away the shell. On the abdomen of the Man-Faced Spider, he saw a huge Nightmare Crystal the size of a human head. It was round and emitted a beautiful luster.

“This high-level Nightmare Crystal should be able to be used for Weapon Refinement. Perhaps this is the most valuable thing on the Man-Faced Spider.” He hesitated and did not know if he should take it.

Elena picked up the Nightmare Crystal with the Wizard's Hand and handed it to Levi.

"I told you, you can choose whatever you want. Don't dawdle... I won't be polite to you the next time we work together," Elena said bluntly. She had long seen through Levi's thoughts. ❖

"Thank you, Lord. I do need the Nightmare Crystal of the Nightmare Lord, but I don't need it so big. As for the remaining crystals, I will refine a [Nightmare Avatar] that can perfectly unleash your strength for you. It should be enough for you to use many times," Levi said with a smile.

Although he was the guide, Elena would not be able to enter without him. The problem was that other than leading the way, he did not do anything to kill the Man-Faced Spider. Therefore, he was embarrassed to take this precious crystal for himself.

That way, even if Elena's character was not good enough to argue with a junior like him, she would have a grudge deep down.

Therefore, he decided to refine a Nightmare Avatar that could be used multiple times for Elena.

After taking the Nightmare Crystal, Levi did not covet anything else. To him, the most important thing was his territory.

"No more?" Elena asked.

Levi nodded.

“Then I won’t stand on ceremony. However, if I put these things in my storage bags and return to the real world, will they still be there?” Elena suddenly thought of a problem.

“Any Nightmare Avatar I create can bring back the things here. Lord, you don’t have to worry,” Levi said.

When Elena heard this, she put the corpse of the Man-Faced Spider into her storage bags. Then, her body collapsed and turned into black smoke, disappearing on the spot.

Endless Sea.

Elena suddenly opened her eyes from the bed.

“Did it go smoothly?” Triss asked with concern.

In the Witch’s Family, she had the best relationship with Elena. The two of them were like sisters, advancing and retreating.

“It went especially smoothly. Rose can have a good sleep now.” Elena smiled.

“Where’s Levi?”

“He should have other things to deal with. Don’t worry. His understanding of the Nightmare World far exceeds ours. Sister, you’re so accurate. He’s indeed extraordinary and worth investing in,” Elena said with a smile.

Triss had a smug expression as she said,

“Of course. Other than being blind once when I found a partner, I’ve always been very accurate at other times! Since you can’t go to the Dark Ancient Tower, why don’t you stay in the Endless Sea with me to study this Nightmare Lord’s corpse?”

“Yeah, that’s what I thought,” Elena said.

Levi was still in the Nightmare World when the two girls were chatting.

He arrived at the forest of flesh and blood that had been destroyed by the aftermath of the battle. The main tree in the center was safe and sound.

“As long as there’s no problem with the main tree, it’s only a matter of time before the other mother trees grow back. Let’s start refining this main tree now and make this place my territory.” Levi did not waste any more time and immediately came to the main tree.

He transformed into the form of a Nightmare Dragon and a miniature black dragon appeared. The black dragon's forehead gently pressed against the trunk of the main tree.

Levi could feel the immense life pulsating in the main tree, as well as the mysterious power of creation.

The pitch-black power of the Nightmare Dragon converged on the main tree to resist the remaining power of the Man-Faced Spider inside.

The Man-Faced Spider was already dead. Its strength was just a paper tiger that was quickly destroyed by Levi.

Without any obstacles, his consciousness wandered unimpeded in the main tree. Following the main tree, he could also spread to the mother trees on all the other roots.

He saw some embryos of Nightmare Creatures nurtured in the mother tree. The Nightmare Power from the Multidimensional Plane kept projecting here, molding their flesh, blood, and bones.

“What a magical feeling.”

After an unknown period of time, when the power of the Nightmare Dragon in Levi's body was about to be exhausted and he had to leave,

He was pleasantly surprised to discover that a Nightmare Dragon mark had appeared inside the Nightmare Main Tree.

At the same time, the Nightmare Creatures nurtured in the mother tree seemed to be connected to the Nightmare Dragon.

The Nightmare Dragon was the ruler of this territory, and these Nightmare Creatures born in the territory were born as the citizens of the Nightmare Dragon and could be mobilized by the Nightmare Dragon.

With a thought, the surviving Nightmare Creatures in this territory began to appear.

These Nightmare Creatures did not have Arachne's face. Those Nightmare Creatures with a woman's face had already dissipated with the death of the Man-Faced Spider.

Levi noticed several level 4 creatures about the same strength as the Nine Infant had also gathered.

They all prostrated on the ground and surrounded Levi in the form of the Nightmare Dragon, as if they were making a pilgrimage.

Not only that, Levi could also feel that as he entered the territory, his strength had also increased in all aspects. This was the power of the Nightmare Domain!

Roar!

Accompanied by a dragon roar, the Nightmare Dragon's black flames shot into the sky!

The four seas and thousands of mountains prostrated themselves. Ugly monsters roared at the sky, swearing the birth of a new king!

"King of Nightmares!"

Looking down from the sky, the flesh world mountains around the territory were like wrinkles on the skin of a giant. They were continuous and crisscrossed.

On Realm Mountain, new words began to appear.

"Black Dragon Territory, Levi Nightmare... There's an evil dragon inside. Do not disturb!"

Chapter 1106: Lovers Advancement, Wizard Wedding, Hundred Flowers Returns Home! (1)

Holy Brilliance Calendar Year 1161, Month of Harvest.

It had been a while since the end of the Great Expedition. Other than the fallen Deep Blue Sage, the other Legendary Wizards returned to the Wizard World one after another.

Central Realm.

As the core sub-dimensional portal of Nora's plane, Sauron had chosen this location after several inspections.

Firstly, the Central Realm could directly connect to any Realm of the Unbelievers, making transportation convenient.

Secondly, it was easier to observe the situation in the Multidimensional Plane in the Central Realm, making it easier for the Wizard World to prepare in advance for foreign enemies.

It was said that one could observe 108,000 planes using the Legendary Wizard Tool, the Eye of Sauron.

The area covered by these observable planes was called the Sauron Plane by the congress.

The traces of the wizard civilization were all over these planes. Some of them left a deep impact, such as being colonized. Some of them were just trying to build fragile plane friendships.

The origin of the Pan-Plane Wizard Council was also because of this concept.

Out of the 108,000 planes, there were only 3,000 or so civilizations.

The rest were planes with extremely harsh environments, poor resources, or already dead and collapsed.

Although the wizard civilization was powerful, they only occupied 50 planes. There was still a lot of room for development in the future.

However, there were many ancient civilizations in distant lands. Although they were not as powerful as the Abyss, there was no lack of level 10 existence. Their overall strength was not much inferior to the wizard civilization.

After the wizard civilization gradually grew stronger, it was not easy to set off due to the long journey. Coupled with various reasons, they had not been able to take it down so far.

Many planes even established a pan-plane alliance to prevent wizards from colonizing and invading. They joined forces to fight against wizards.

In the previous rebellion of the five federations, other than the five evil gods, there was also the support of these anti-wizard coalition forces.

After more than a hundred years of internal and external troubles, the wizard civilization had temporarily given up on expanding outwards and began to deal with internal problems.

Regardless of the individual's willpower, from a macroscopic perspective, the main direction of all wizards had to be the same!

Otherwise, it would be difficult for civilization to advance. Sooner or later, it would be devoured by a great enemy like the Abyss!

Outside the crystal wall.

A giant Sky City that looked like it was carved out of ice tore through the crystal wall and slowly approached.

“Legendary Councilor, the Frost Witch is back!”

“All units, prepare to welcome the Frost Witch!”

The Central Realm instantly became lively.

In Sky City, the Frost Witch looked calm. To her, the 100 years of the Great Expedition was equivalent to half a year for mortals.

“Welcome home, Lady Gullwig.” A hearty laugh sounded, and a middle-aged wizard in a gorgeous robe and a flaming crown appeared in the air.

“Thank you, President Edmund,” Gullwig said calmly.

“You’ve worked hard. Without you, there would be no stability in the Wizard World!” Edmund said with a sincere expression.

“Is that so? But the Wizard World hasn’t settled down yet. The Realm of Frost of our School of Frost has even been occupied by some people,” Gullwig said bluntly. †

Edmund’s expression remained the same. Then, he smiled bitterly and said, “You must think that as the head of the congress, I am incompetent and helpless. Too many things have happened in the Wizard World recently. It’s not something that can be explained in a few words. Some people have always wanted to dismantle the congress and let the Wizard World operate according to their will... How about this? I’ll set up a banquet in my Sky City to welcome you. We’ll talk at the banquet.”

“I understand your job. There’s no need to welcome me. I’m going back to the Realm of Frost to take a look,” Gullwig said.

Edmund’s expression changed. He said, “Lady Gullwig, this is not good. According to the rules, Legendary Wizards are not allowed to go to the ancestral lands of the various schools of thought, let alone participate in the battle. You must understand this.

“Moreover, several level 10 civilizations have been restless over the years and are trying to make things difficult for our Wizard World. I need your help. You don’t have to worry about the sect. I’ll help you resolve it.

“I still need some time to figure out who wants to part ways with us. I also want to give them a chance to return to us... If they’re stubborn, we’ll settle the score later. How about that?”

Although you're extremely talented and can be said to be the fastest legendary in recent times, I, Edmund, have lived longer than you. For some people in the congress, some problems... should be clearer than you. Some things can't be solved by capturing a few dark wizards."

Gullwig thought for a moment and said, "I understand, but the matter of the School of Frost has to be resolved quickly."

"Don't worry," Edmund said with a smile, looking confident.

...

Endless Sea.

Star Sea.

Half a year had passed since the Man-Faced Spider was killed.

Rose had completely gotten rid of the nightmare. She could finally sleep and meditate in peace.

She and Newt planned to hold a grand wizard wedding in a month and invite some friends and family to attend.

A heavyweight like Levi was naturally invited.

As for Elena and Triss, they were busy studying the human-faced spider's corpse. With the Dreamland Steeple as a lesson, their research would be especially careful.

On the other side of the Dark Ancient Tower, the various wizard organizations rubbed their fists and were eager to give it a try.

It could be foreseen that the Dark Ancient Tower would welcome an unprecedented fierce competition.

Chapter 1107: Lovers Advancement, Wizard Wedding, Hundred Flowers Returns Home! (2)

Most importantly, it was not just the wizard civilization. In the Multidimensional Plane, people would be selected to enter wherever the Dark Ancient Tower traveled.

This was not only the stage for wizards, but also the stage for all races in the Multidimensional Plane. Different transcendent races and Strength systems were about to burst into intense sparks on the same stage.

According to the observations and statistics provided by the officials, more than a hundred planes were confirmed to have participants among the 3,000 Sauron Planes.

Among them, there were four level 10 planes. There were even more planes below level 9.

This was only an observation. In the long 10,000 years, the range that the Dark Ancient Tower had gone to had long exceeded the observation radius of the Eye of Sauron.

Hence, Edmund, the Grand Council Chairman, repeatedly emphasized:

In the Dark Ancient Tower, the first thing the wizards had to do after entering, no matter which school or organization they came from, was not to fight a civil war. Instead, they had to work together to clear the participants from the other dimensions!

Then, within the wizard civilization, everyone would compete fairly with their own abilities.

This way, no matter who won or lost, it would be beneficial to the development of the wizard civilization.

Of course, even if that were the case, it would be very difficult to achieve.

After all, wizards were not the Dark Insects. They did not have the supreme mother nest's will that surpassed all individuals and completely turned them into a part of the civilization's machine.

In terms of efficiency and execution, they were inferior to the insectoids.

Apart from Nora, the four level 10 planes were the Amethyst Plane, the Tomb Plane, the Dragon's Evil Plane, and the Red Plane.

The Amethyst Plane was famous because it was shaped like a huge amethyst. A powerful Amethyst Race was living in it. These naturally powerful transcendent races were born from the magical amethyst ore.

It was said that the older the ore, the more powerful the Amethyst Race that was born. A long time ago, the Amethyst Plane was once a subsidiary plane of the wizard civilization. A hundred thousand years ago, in an amethyst mine that had probably existed for hundreds of millions of years, a humanoid transcendent lifeform called "Terence" was born. In the Amethyst Race, "Terence" meant the most ancient person older than the gods!

This existence was born powerful and quickly became a level 10 powerhouse. He led the Amethyst Race away from the enslavement of the wizard civilization and was revered as the Amethyst Saint. At that time, the number of legends in the Wizard Council was only half of what it was now. With powerful enemies surrounding them, the Amethyst Plane was never taken back.

Now that 100,000 years had passed, more than a dozen Legendary powerhouses of the wizard civilization had arrived, and Legendary Wizards had changed one after another. However, the Amethyst Saint relied on his long lifespan to become stronger and stronger. Ordinary Legendary Wizards were no longer his match.

The Tomb Plane, the Dragon's Evil Plane, and the Red Plane were similar. They all had powerful level 10 beings guarding them. Each of them was the ruler of the Multidimensional Plane, whose name shook the entire plane. They were comparable to gods.

In the wizard tower, Levi put away the information on the Dark Ancient Tower that he had spent a lot of money on. While he looked forward to it, he also warned himself to be more careful.

There must be something powerful about these planes that could survive under the claws and teeth of wizards.

For example, the Amethyst Plane was a special crystal lifeform. Everyone was a soldier.

Although there were very few of them, the weakest was a Level 1 lifeform from the day they were born.

The moment they were born, they were comparable to a primordial soul wizard. This was even more impressive than a pure-blooded Dragon Clan!

The Amethyst Race had a strong resistance to spells of any Elementalist School. At the same time, their physical bodies were also extremely powerful because they were non-flesh lifeforms formed by the toughest Amethyst Ore. They were equivalent to special earth element spirits.

The scariest thing was that the Amethyst Race was the same as the Primary Blood Clan. Strictly speaking, they did not have souls, only true souls, and were not afraid of mental attacks. After they died, they would send the ore bodies back to the Amethyst Plane to be buried. After ten thousand years, they could give birth to new Amethyst Race members.

It could be said that other than the fact that they were few and were extremely slow to be born and could not reproduce naturally, this was a rather perfect race. Their lifespan was also among the top of the longevity species. That Amethyst Saint had already lived for 100,000 years and was still fine. This was proof.

The congress had once experimented. In the same realm, the average strength of the Amethyst Race was higher than that of wizards.

Therefore, the Amethyst Race was a potential enemy that Levi needed to pay special attention to. They liked to collect rare metal ores, gems, and other resources. Moreover, by devouring these, they could evolve and become stronger.

“Fortunately, we humans have an advantage. We can give birth and are creative. Without the wizard civilization, how could humans compete with such a perverted race? Nora’s plane would have been captured long ago.”

Levi muttered and went to his alchemy room.

Phoenix was working hard to refine the shell left behind by the human-faced spider. No matter how hard it tried, there was little effect.

“Level 6 remains are still too high. Phoenix’s level 4 is not enough.”

Levi felt helpless.

He had underestimated the hardness of the Nightmare Lord's powerful body.

Phoenix was a level 4 fire element. If he couldn't refine it, Levi wouldn't be able to. Even if he could, it would take too much time.

He still had to prepare for the Dark Ancient Tower. He decided to put aside the refinement of the Nightmare Dragon divine weapon for the time being.

Chapter 1108: Lovers Advancement, Wizard Wedding, Hundred Flowers Returns Home! (4)

He had the four commanders set up patrol, hunting, intelligence, and guard teams.

The patrol team was in charge of preventing the territory from being invaded. The hunting team was in charge of harvesting the Nightmare Crystals from the Chaotic Wilderness to feed the Nightmare Main Tree. The intelligence team was in charge of investigating the situation in the other territories, and the guard team was in charge of protecting the Nightmare Forest.

Until he reached Level 6, he would consider expanding and socializing.

The Nightmare Dragon's bloodline was noble and its upper limit was very high. However, it was currently a level 3 Nightmare Dragon Hatchling.

For a pure-blooded Dragon Clan like this, they would only be considered to have entered sub-adulthood after stepping into level 6. After level 9, they would be in full form. Before level 6, they would all be teenagers.

Then Levi asked:

“Have you seen the Dragon Clan in the Chaotic Wilderness these days?”

Butcher suddenly said hoarsely, “So far, we haven’t encountered the Dragon Clan. If we find anything, we will inform you immediately, Master.”

“Alright, go back to your work.”

Levi’s expression was calm. He was used to it.

After entering the Dark Ancient Tower, he could still descend into the Nightmare World, so there was no hurry.

“From the looks of it, Arachne’s death did not attract the attention of the other lords. I still have some time to develop.”

Nightmare Lords had extremely long lifespans. It was normal for them not to interact with each other for a hundred years.

The last time Arachne went to Blood Rain City, it was already a rare gathering for the lords.

As long as Levi was given another one or two hundred years to develop and become a level 6 primordial soul wizard, he would truly be comparable to the Nightmare Lord.

At that time, even if they discovered it, it would not be a big deal.

Even though the Nightmare World was filled with experts, there weren't many Nightmare Lords above level 7.

After patrolling the territory, he finally came to the Blood Flesh Forest.

More than half of the forest destroyed by the battle began to sprout new branches.

"The growth is gratifying. It's not in vain that I fed the Nightmare Crystal to the main tree."

According to his statistics, 1,001 Nightmare Mother Trees and one Nightmare Main Tree were in his territory!

The speed at which Nightmare Mother Trees gave birth to Nightmare Creatures was closely related to the Nightmare Main Tree. During Arachne's reign, these thousand Mother Trees could produce about a thousand Nightmare Embryos every year.

Among these embryos, the earliest Nightmare Creatures would hatch. Most of them were at level zero, and apprentice wizards could deal with them.

Some of the more talented commanders, such as the Level 4 Nine Infant, were born at Level 1. As for Levi, he was born at Level 3.

However, the growth of Nightmare Creatures was relatively slow. They needed to constantly absorb the Nightmare Power, Fear Power, and other negative emotions of living beings from the Multidimensional Plane.

These emotions also used the Nightmare Forest as a medium to come to the Nightmare World from the Multidimensional Plane. Like the oxygen released by plants for photosynthesis, they were released to the entire Nightmare World for them to absorb and grow.

Most young Nightmare Creatures would die from all kinds of accidents and killings of their kind.

This was unavoidable. The competition in the Nightmare World was intense, and the speed at which the Nightmare Creatures were reborn was extremely fast. Only by becoming a lord could one stand out and dominate an area.

It could be said that the Nightmare Forest was the cornerstone of the Nightmare World. It was also the most important means of production for a lord.

Now, in the forest, less than a third of the Nightmare Mother Tree was intact.

This caused the production efficiency in the territory to be relatively low. It would take a long time to restore the standards of the Man-Faced Spider's rule.

Levi returned to the main tree. Underneath this place, there was a huge karst cave. Inside were some relics left behind by the lives of other planes that had been persecuted by the Man-Faced Spiders.

In the past six months, Levi had been picking up trash here. He had already picked up a few useful Wizard Tools and some low-level knowledge inheritances.

Apart from that, the entire Black Dragon Territory could be said to be poor.

In fact, this territory was the most barren place in the Blood Rain Territory ruled by the Blood Rain Overlord.

Arachne's lord life was not ideal. This was also the reason why Arachne was obsessed with invading other planes. She could not defeat the other lords, so she could only think of other ways.

Levi planned to start developing this territory after he was done with the Dark Ancient Tower. He wanted to see if there were any undeveloped minerals and biological resources. Then, he would bring them back to the real world to increase the strength of himself and the Ancient Saint plane.

After confirming that the territory was safe, Levi quickly returned to the real world.

...

Time flew by.

In the blink of an eye, a month passed by.

In the Nether Capital, Levi was immersed in his sea of consciousness.

Around the wizard tower on the fourth floor, the Rune Language, which represented the Lovers Rune, grew a little stronger.

Vaguely, Levi's connection with the Aries constellation seemed to have become even closer.

Levi—

Lovers Rune: Level 5 (1/30,000). Special Effect: Power of Aries constellation (Level 5)

Strength Rune: Level 9

Chariot Rune: Level 9

...

[Power of Aries constellation (Level 5): The Rune Language communicates with the Aries constellation. The power of stars increases your luck. Current luck increases by 40%. In addition, your charm and fertility have also increased.]

“It’s not easy. As expected of runes related to luck. It’s really difficult to cultivate. Now that I have 40% luck enhancement, a beautiful tomorrow awaits me.”

Now, Levi could clearly feel the Lovers Rune’s blessing effect on his luck. It was a useful rune!

Chapter 1109: Lovers Advancement, Wizard Wedding, Hundred Flowers Returns Home! (5)

To be honest, if not for this rune, Levi would not be so interested in the Dark Ancient Tower.

It was because of this that Levi kept having the illusion that all the treasures in the Land of Darkness should belong to me, Assemble!

He felt that he should be able to gain a lot from it.

In addition, Levi's Chariot Rune and Strength Runes had also reached level 9. The increase in Strength and speed had reached a terrifying 80%!

This allowed his combat strength and running ability to increase greatly again.

"The Rune Language has unlimited potential. Sooner or later, I'll be able to cultivate the real Language of Stars! It's just so-so!"

Levi, who was in a good mood, opened the book he had obtained from Patricia.

The Art of Fungus.

After his research, this book was not the original copy of the Fungus Queen.

It was just a version translated by an ancient primordial soul wizard, and the content was incomplete. Because the content at the back was too profound, this primordial soul wizard could not understand it and almost fell into madness. Later, it disappeared without a trace, and only a single copy was left.

The first sentence of the book was extremely domineering.

"Art is the explosion of spores! Only fools regard fungi as the lowest form of life. They don't know that the Great Dao is simple and returns to simplicity. Only fungi can achieve eternity and immortality! Fungi is the perfect form of life Evolution. Praise the spores, praise the fungi!—Fungus Queen Zucker Maureen."

Levi took a cursory look and realized this Fungus Queen was an anomaly among the Abyss Lords.

She could be said to be one of the few great scholar-type demon lords in the Abyss. She was very knowledgeable and familiar with biology, evolution, and mycology.

According to the description in the book, this god had traveled across the ocean many times to learn and seek knowledge. She hid in the Wizard World as a saint incarnation and studied and secretly learned the knowledge of wizards. Her identity was exposed. Before she left, she did not forget to abduct several primordial soul wizards.

It was also this spirit of seeking knowledge that allowed this demon lord to use an inconspicuous fungus to forge her own unique path to heaven. She crossed the natural chasm and stepped into level 10, calling herself the Fungus Queen!

She was good at creating powerful parasitic fungi. Relying on fungi, she could achieve ever-changing spell-like abilities.

There were many cultivation methods for fungi recorded in it.

Music Fungus could play beautiful music and adjust to sentiments.

Monk Hat Fungus could extend one's lifespan and achieve immortality in a fungus form... The price was to become a lost mushroom that could not be reversed.

Explosive Mushroom could be used to make powerful mushroom bombs. It was divided into seven colors: gray, white, green, blue, purple, gold, and red!

It was said that the explosive power of the Explosive Red Mushroom was comparable to a seven-circle spell. Fungus Lady liked to call it Little Red Riding Hood.

Levi was dumbfounded. A seven-circle spell was a true nuclear bomb-level spell that only experts at the level of the Molten Gold Wizard King could cast.

This was not a mushroom, but a nuclear bomb!

There were actually higher-level Explosive Mushrooms above level 7, but that primordial soul wizard could not translate them.

It was said that the Fungus Queen had once thrown a level 10 mushroom into a small plane to test the power of her Explosive Mushroom.

She called it the Fungus Emperor.

As the Land of Darkness blazed with flames and a mushroom cloud rose like a nebula, the small plane disappeared...

“Awesome.”

Levi had to admire the genius of the Fungus Queen.

He glanced around and found a few fungi that he could cultivate at this stage and that were useful to him.

One was Explosive Mushroom, and the other was Breeding Gear Fungus.

Explosive mushrooms. Needless to say, art was explosive.

As for the Breeding Gear Fungus, it was a trick of the bizarre wizards.

The youngling of the fungus was transplanted into the organism's body. Then, through the development of the fungus, the organism would evolve.

Between different individuals, the organs that the fungus could germinate were also different. In the end, these organs that were specialized by the fungus were called Breeding Gear! R

The more critical the specialized parts were, the more powerful the parasite would be.

For example, Patricia's entire lower body had been specialized. Her strength was comparable to a Fifth-Circle Wizard.

Heartless Leonard, on the other hand, had a specialized heart and was very strong, comparable to a fifth-circle cultivator.

As for the Unseen and the Unheard... they were generally at the fourth-circle level.

If one's entire body was specialized by the fungus, a Fungus Breeding Gear comparable to the complete body of a primordial soul wizard would be born.

At this moment, the Host had completely mutated from an ordinary creature to a fungus creature.

The Fungus Queen called it the Fungus Apostle.

After Levi studied it, he realized that the bottle of spores he had obtained was called the Origin Spore.

Although the black bottle contained ordinary white powder, this powder was the initial reproduction of all kinds of fungi of the Fungus Queen.

Under the influence of different temperatures, nutrients, incantations, and other factors, these spores would gradually differentiate and walk a completely different path.

Therefore, whether it was an explosive fungus or a fungal biology suit, they could all evolve from this bottle of spores.

Of course, if one wanted to nurture these spores to germinate, they needed a lot of relevant professional knowledge, powerful spiritual force, suitable mediums, precious nutrients, and various other complicated conditions.

Chapter 1110: Lovers Advancement, Wizard Wedding, Hundred Flowers Returns Home! (6)

Arachne put Patricia in charge of the project the entire time. Patricia had studied it for five hundred years and had only managed to cultivate a fungus team.

Moreover, not everyone was suitable for spore transplantation.

Most of the subjects died not long after the transplant.

Generally speaking, the stronger one's vitality and physique were, the easier it was for the transplant to succeed.

"I can use some Lizardmen for experiments... Although this is a little cruel, let's start with the prison of the Ancient Dragon Empire."

Levi put the book away. It might be his most precious inherited knowledge so far.

This was because this was not only a fungus cultivation manual, but also a complete transcendent evolution path with very strong potential.

The Fungus Queen had single-handedly created a brand new transcendent path. She was indeed worthy of being a god!

Levi planned to build a spore cultivation laboratory after returning to the Ancient Saint plane and plant some spores.

By the time he returned from the Dark Ancient Tower, these spores should have already split into different fungal younglings.

At that time, he could start researching about fungus Lizardmen.

If this path could succeed, he would nurture another Fungus Special Force besides the Ancient Saints, knights, and giant beasts.

At that time, a group of Lizardmen wearing fungus biomass suits and equipped with Explosive Mushrooms would appear out of nowhere. They would kill Gods and Buddhas alike.

“However, I have to consider carefully. Before cultivating these spores, I need to use a purification potion. If the Fungus Queen leaves some secret tracking mark inside, in the end, all my research results will be taken by the Fungus Queen. That will not be worth it.”

...

The next day.

While Levi was cultivating, Anya's voice came from outside the door.

"Sir Levi, for the wedding."

"Here we go."

Levi tidied up and walked out of the house. This was his first time attending a wizard's wedding.

He was wearing a black tuxedo. His tall and sturdy figure filled the tuxedo.

In comparison, Anya looked much more elegant. He was elegant and charming. Coupled with his dreamy silver hair, he looked especially regal.

If it were some anime, a big and muscular man like Levi would definitely be cannon fodder. He would not survive more than three episodes. However, Levi's aesthetic sense was like this.

After boarding the airship, they soon arrived at Starfire Island where Garcia's wizard academy was located.

There were already many wizards gathered on a grassland on Starfire Island. The people who came and went were all Intermediate Wizards.

Newt and Rose's statuses were not low, so their social circle was mainly made up of Intermediate Wizards.

Among them, the most eye-catching was the bridesmaids' team beside the Rose Witch.

They were all wearing gorgeous gowns embroidered with different types of flowers. All of them were extremely talented and had extraordinary temperaments. The weakest among them was a Third-Circle Wizard.

At this moment, they were gathered together like a group of chattering larks, chatting and laughing.

"Wow, at least half of the 24 Flowers are here..." Anya could not help but exclaim.

Levi also looked on with interest and muttered in his heart, "Violet, Lily, Butterfly, Wind Chimes, Lilac..."

He had to admit that the 24 Flowers were the type that were beautiful and had their characteristics.

Newt was dressed very handsomely today. Coupled with his handsome looks, he was the main character of the day.

The Rose Witch wore a long light pink wedding dress that reached the floor.

The guests who came and went sat below. Levi and Anya also found seats and drank wine.

“Haha, Levi, you’re here too.” Huffman’s voice sounded.

“That’s right. I’m Newt and Rose’s good friend.” Levi smiled.

“Long time no see! Levi, no... you’re a fourth-circle?” Xavier was shocked, then he smiled bitterly. “I have to call you senior from now on.”

“Let’s call it Levi. I don’t mind,” Levi said with his usual easygoing smile.

He could feel that there was a thick barrier between Xavier and him. It was as if they were no longer from the same world.

It was all because of his damn talent. His strength had increased too quickly, and he was becoming more and more distant from his friends!

Levi glanced around but saw no sign of Elena.

In the next moment, the auras of two primordial souls descended!

Countless petals fell from the sky like rain.

All the guests looked up in shock.

The sky above Starfire Island was filled with colorful rain of flowers and illuminated with colors!

In the middle of the sea of flowers, Flower Witch Elena and Black Pearl Garcia descended from the sky.

“It’s Principal Garcia. He’s here personally? Is Wizard Newt’s status so high?” Someone whispered.

“Wizard Newt is a founding member of the Starfire Wizard Academy and the head of the Appraisal Department. However, the most important reason should be because of the Rose Witch. As the parent of the Rose Witch, the Flower Witch is here. It’s not appropriate for Principal Garcia not to appear.”

“Sob... I’m so envious. Both of them have connections as primordial soul wizards. They’re a match made in heaven.”

“And they’re very close.”

After Elena and Garcia landed on the ground, she saw Levi from the corner of her eye. Levi was looking over with a smile.

“Welcome to Wizard Newt and the Rose Witch’s wedding. Today, I, an old man, and the young and beautiful witch Elena will host the wedding for this couple.”
