

Wizard 120

Chapter 120: Advance to Grand Knight! (1)

The Black Snake's cocoon in Levi's heart was dormant.

A terrifying aura came from within the black cocoon, causing the Giant Rhinoceros, Man-Faced Spider, Siren, and Blood Whales Life Seeds outside to worship it.

It was as if something terrifying was brewing in the black cocoon, suppressing others.

Levi sat still, waiting for the day when the Black Snake broke out of its cocoon.

He had already stored a month's worth of food in the whale sac, enough to complete the transformation without eating or drinking.

If the transformation were short, it would take one day; if it were long, it would take seven days. If the transformation were not completed after seven days, the transformation would fail.

The process also requires a lot of energy. Many knights did not accumulate enough energy before going through the transformation. As a result, they failed at the last step. Some of them even became Lunatic Knights. However, for Levi, who had the whale sac, this was not a problem.

With the whale sac in hand, this was never happening to Levi!

He firmly believed that his transformation would succeed.

He had spent seven years working steadily to get to this stage!

With the help of his reliable panel, the breakthrough would not fail.

If a mere knight failed, wouldn't it be even more difficult for a wizard in the future?

However, the failure of the Black Snake Seed's transformation was not as life-threatening as the condensation of the Life Seed.

However, it would be even more difficult to transform again.

The path of a knight was like this. One had to work hard. Once one fails, the path might be destroyed. One could only stagnate for life.

In the shelter, the two brothers, Magic Shark and Demon Mountain, stood guard beside Levi. They were like two tall statues. If there were any intruders, they would not hesitate to destroy them.

Levi had already forged high-quality full-body mithril armor for the two brothers. Each set was not inferior to Leviathan Armor, which made the two brothers' defense stronger than ordinary grand knights!

In the sky above the territory, snow eagle Harris was soaring in the sky, overlooking the Black Water Valley, monitoring everything in the territory in real-time.

The three brothers lay together like a small mountain on the ridge behind the castle, guarding their master's territory.

During this period, Levi had already finished forging the armor for them.

The materials used were Earthly Dragon Beast scales, refined iron, and even a little mithril. Levi had spent a lot of money.

The three sets of Giant Bear Armor were, of course, very sturdy.

Moreover, the main material was Earthly Dragon Beast scales. It was not very heavy and would not limit their strength too much.

The three brothers were now wearing armor. This was Levi's training for them.

They were now adults, and their true strength resembled high -level knights.

At this stage, their body size would not increase too much. The strength of the Giant Bear of the Northern Territory was basically at the realm of peak knight.

Unless a mutation similar to the Mountain Wolf King appeared, breaking through to the grand knight level would be possible. However, such a situation was extremely rare!

And they had a lifespan of 40 years.

They were in their Prime, and when the three brothers joined forces, no one

Below the grand knight could match them.

With their protection, Li Wei was confident in his transformation process in his shelter.

While Levi was transforming, the outside world was also changing.

The Devil Duke, the Montenegro Mountain Knight, used his iron cavalry and evil spirits to sweep the southern region.

The Northern Coalition Army defeated the Southern Coalition Army.

The worst part was that an elite Montenegro Mountain troop had already reached the Green Dragon Territory, where the Royal Family was.

In this battle, the royal family revealed their trump card for the first time.

The moment this trump card appeared on the stage of history, it attracted countless gazes.

A new king's organization appeared before the nobles.

Seven Godly Swords!

It was an organization formed by four grand knights and three peak knights!

Because of the Church of Holy Light, the Imights of the Emerald Kingdom always liked to use the number "seven."

For example, the seven grand knights of the Church's Radiant Knights were also known as the "Seven Holy Knights of the World."

The seven strongest grand knights in the north were known as the "Northern Seven Flying Cavalry."

The kingdom had also established the “Seven Godly Swords” this time.

It was a violent organization that took orders from the king.

It was unknown when this organization was formed. Still, many people guessed it was a temporary combination the Royal Family put forward to compete with the northern nobles.

After all, be it the “Seven Holy Knights of the World” or the “Northern Seven Flying Cavalry,” the organizations comprised true grand knights.

The four grand knights and three peak knights.

This came across as a little forceful.

However, even so, the Seven Godly Swords still displayed their powerful strength.

They were all sword experts, led by the strongest “Nation Guarding Divine

Sword,” Zod. Zod was also the captain of the royal guards, but the White Horse Knight, the strongest member of the Royal Family, had suppressed him. As the second most powerful member of the royal family, his reputation was not prominent before.

And now, the Seven Godly Swords were indeed extraordinary.

This was the first major victory for the Southern Army and the Royal Family since the outbreak of the civil war, and it boosted the morale of the Southern nobles.

All sorts of names started to spread. Some aristocrats tried to replicate the Seven Godly Swords. In this era of chaos, they could use war to gain fame and honor. This way, after dealing with the Duke of Montenegro, they could boost their reputation when the higher-ups gave out war merits..
