

Wizard 122

Chapter 122: The Path After Grand Knight! (1)

It was the New Year's first month of the year 1011 in the Holy Brilliance

Calendar.

The flames of war continued.

Levi looked at the citizens celebrating in his territory, his heart calm.

Other than breaking through, these ordinary festivals could hardly bring Levi joy.

After the dull festival, Levi was bored out of his mind as he inspected everything in the territory.

Ultimately, he brought Magic Shark and Demon Mountain to the mountain forest in his territory. He wanted to test his current strength.

He was now with the Transcendent Defense of a level 8 Black Snake Breathing Technique, the Top-tier Strength of a level 7 Giant Rhinoceros Breathing Technique, the Top-tier Speed of a level 7 Siren Breathing Technique, and the Top-tier Endurance of a level 7 Blood Whale Breathing Technique.

And he wanted to see how he fare without relying on a heaven-defying sword skill like the Golden Cross Slash, his seals, the Frost Giant Armor, or any other armor if he relied solely on his physical body.

Magic Shark and Demon Mountain were fully armed. They were clad in heavy armor, wielding greatswords and huge axes, weapons with high offensive power.

Levi was wearing nothing but underwear.

"Come, attack me fiercely!"

Then, he ordered the two brothers to attack him freely!

The two huge creatures charged toward Levi. Their huge axes tore through the air, and their greatsword soared. The forest was filled with a murderous aura! The Black Snake Seed was jumping at Levi's heart, and a surging power was brewing. The surging black gas circulated through his blood.

He seemed to be wearing a pitch-black devil helmet, and his upper body was pitch-black. Thick black gas flowed on his upper body, and so was his lower body. His legs seemed made of copper, shining with a metallic luster.

"Is this Transcendent Defense?"

Levi was shocked.

Bang!

He covered his palms with black gas and caught the Magic Shark's greatsword!

Then, he kicked the Magic Shark's abdomen with his Top-tier Strength. Magic Shark could not help but take a few steps back. However, he was a strength-type grand knight, and his strength was stronger than Levi's. If it was an ordinary grand knight, Levi's kick might have sent them flying.

At the same time, Demon Mountain's huge axe came slashing down.

Levi used his fist to smash his giant axe, and metal clashing could be heard.

The black gas on his fist trembled violently. The force of the giant axe dispersed the black gas covering Levi's fist, causing his fist to feel intense pain. "It's still not enough to fight head-on with a weapon wrapped in black gas."

"Although the black gas has strengthened my physical defense, a body of flesh and blood is still inferior to steel."

"But a short confrontation is not a problem."

Levi calmly dealt with the berserk attacks of the Magic Shark and Demon Mountain.

He calculated his current strength.

His greatest strength was not his great defense but his all-rounded body attributes.

The other grand knights might be able to surpass Levi in a certain attribute.

For example, although Magic Shark was still stronger than Levi, his speed, endurance, and defense were inferior to Levi's.

His identity as a grand knight gave him no obvious shortcomings, but he was still inferior to Levi, who had cultivated to the peak.

This was Levi's strength!

An all-rounded warrior!

Platinum Star on the 5A panel!

Ultimately, Levi stopped the battle with his two companions to conserve their energies. Although he could get one or two Cores of the Undead monthly, they were still in high demand, and Levi did not dare to waste them.

On the one hand, this battle allowed him to test his strength.

On the other hand, he had also gained some proficiency in the Seal of Hell.

Now that he had become a grand knight, he would be considered a powerhouse in the kingdom and even the seven kingdoms. Levi had to think about his next step.

The first was the breathing technique. He would continue to practice them. Before he truly stepped on the path of a wizard, the knight's breathing techniques were still the foundation of his body.

Moreover, being a grand knight was not the end of the knight's path.

Since he had already set foot on this path, Levi still wanted to reach the top and become a legendary knight if the conditions permitted.

However, with his proficiency panel, would a legendary knight be his limit?

Others could become legendary knights without the proficiency panel.

He had the proficiency panel. He must become a legendary knight no matter what. It could even be possible for him to surpass the legendary realm.

Secondly, after becoming a grand knight, it would be the battle of black gas. At this time, if he could master advanced black gas usage like the Pale Shadow, his strength would be immense. Therefore, Levi also wanted to expand in this aspect.

Finally, there was the wizard path Levi had always considered.

So far, among all the clues that Levi had found, Witch Gullwig and Ms. Rollin were both suspected to be wizards. Although they had briefly appeared in the human world, it was still very difficult for Levi to find them.

Most importantly, even if Levi found them, he was unsure if they were friends or foes. The uncertainty was too great.

Apart from these two, Levi could also explore the four major families, mainly the Constantine Family and the Winchester Family, which might still exist..
