

## **Wizard 1221**

Chapter 1221: Supreme Archmage Tracking Mark

The items that Holy Infant called 'spell scroll' exploded in an instant!

The explosive power of a single piece of beast skin was actually only at the level of level level 3 or level 4.

However, this woman threw out hundreds of them at once.

Under some kind of miraculous reaction, like a large-scale array, the power of the explosion actually reached 250 Cas!

It was much more powerful than Holy Infant's Fire Dragon Tribulation, second only to the World Burning Flame Snake.

Earth Burst Barrier!

Earth Dragon Barrier!

Heavy Water Barrier!

Phoenix!

The four great defenses were placed on Holy Infant's body.

The terrifying explosion blew Phoenix into pieces. After breaking three layers of enchantments, only the Heavy Water Barrier was left.

"It was a false alarm. Sigh, without my knight skills, my defense has plummeted. I'm only at the level of an ordinary fifth-circle wizard now... I don't feel safe," sighed Holy Infant.

At this moment, he deeply realized how important knights were to him!

Phoenix reappeared, its stomach bulging with anger. It looked at Holy Infant.

Holy Infant understood. Phoenix wanted to use the fire phoenix's true form to fight. Although the fire element could change at will, Phoenix was born in the form of a phoenix. Therefore, its toad form limited its ability to use it.

"Go ahead."

In any case, a level 5 mage was not a boss on the fifth floor, let alone a projection. Holy Infant was not worried that the enemy would use Phoenix to lock onto his identity.

Moreover, fire elements in the form of a fire phoenix were very common. It was only because Levi was too cautious that Phoenix turned into a toad.

The toad gave a long roar and rose from the ground, turning into flames and rushing into the sky.

Then, a clear cry sounded in the sky.

The fire phoenix blazed a prairie, and red clouds filled the sky!

Phoenix the king, had returned!

The fire phoenix with a wingspan of a hundred meters swept over, and three thousand flaming blades shot out!

Whoosh!

After witnessing the method just now, Holy Infant no longer looked down on the native mages.

Water Dragon's Song, Bind Control!

Ice Dragon Prison, domain spread out!

Although the power of these two spells was not as good as the original body's, it was not a problem to use them to fight.

After exploding its cover, Phoenix showed off its might and suppressed the native mage.

This mage's spell scroll was very powerful, but after throwing it, she seemed to have run out of tricks.

Without any innate spell, how could she be a match for a wizard?

Soon, the female mage had the intention to retreat. She warned, "Evil demon, just you wait. I'll be back!"

"Do you think you can leave?" the Holy Infant sneered.

He used the Water Dragon's Song to control it while trying to use the Snake Eye Demon Ring and the Trembling Ring.

He wondered if it was the effect of the Lovers Rune.

The Trembling Ring was hit. As the light flashed, the female mage felt as if she had been struck by lightning!

In an instant, the female mage's body trembled uncontrollably. Her face was flushed red. She said angrily, "What evil spell did you use?"

Holy Infant flashed in front of the female mage. Her breasts were bigger than the Holy Infant's head, and her long legs were taller than the Holy Infant's body. **RÁNÖbES**

Holy Infant's small hand floated up and pressed on her chest. He icily said, "I only need to use a thought, and your heart will explode. Now, tell me the method of making those beast skins you just used."

The female mage was extremely embarrassed and furious. She lowered her head and said, "Don't even think about it! Only the mages of the Kane Empire can use the Supreme Divine Talisman. Even if I teach you, you won't be able to learn it!"

Boom!

The crimson divine dragon shot out from her body!

The female mage's chest was blown up. She was still breathing. She looked at her empty chest and muttered, "The Supreme Archmage will avenge me. Long live the Empire, long live Chaos, long live the Archmage!"

With that, she lowered her proud head and died.

The flames swept out and turned the female mage into ashes. There was no trace of a wizard's tracking mark.

Holy Infant commented calmly, "You're clearly a spellcaster. You're always engaging in these supernatural beliefs. Wizards only believe in the truth and themselves!"

He was just asking casually. There was no loss if he could not learn it.

In the next moment, something unexpected happened. The ashes of the corpses began to gather and form a tracking mark.

Holy Infant retreated as if he was facing a great enemy. His force field flickered as he looked in that direction.

An illusory eye covered in blood appeared in the triangular tracking mark and stared at Levi.

"I've noticed you, Foreigner."

When Holy Infant saw this, he heaved a sigh of relief. He sneered, "I know. Hurry up and disperse. You're bluffing. Aren't you just trying to arrest me?"

The eyeball remained silent and then slowly disappeared.

The Supreme Eye was said to be a supreme 'divine weapon' controlled by the Supreme Archmage. Anyone who killed a great mage of the Empire or a clergy of the Church of Chaos would be noted down by the Supreme Eye. Then, the Church of Chaos would publish a bounty list and mobilize the mage groups among the people to hunt down the wanted person.

Holy Infant did not panic because this thing had been triggered by many wizards, so it did not have much of an effect.

In the Kane Empire, the mage realm when measured by the wizard realm's first circle to the sixth circle, they were:

Low-level, Intermediate, High-level, Top Mage, Archmage, Supreme Mage.

Above that was the Supreme Archmage!

The Supreme Archmage was like a god, guarding the capital of the Kane Empire, and wouldn't leave easily.

Only Top Mages and Supreme Mages could pose a threat to the Holy Infant. There were not many of them in the Empire, and they were often in high positions, making it difficult for them to leave.

Holy Infant searched the ground and found a storage ring.

He broke the restriction on it and glanced at it. He found a book called Kane's Complete Collection of Divine Talismans and couldn't help but smile.

Chapter 1222: Becoming Minotaur Tribe's Guardian

"I still got it in the end."

Then, he left with the Mind Flayers.

In front of them, there were two groups of people fighting.

One of them was wearing the Empire's mage robes, and the leader was three Top Mages.

On the other side, there was a group of burly black minotaurs. They were bare-chested and waved bone clubs. They had a strength similar to demonic aura in their bodies. They were probably demons.

"Lord True Demon! Save us!"

Among the minotaurs, there was a leader who was about level 4. He was delighted when he found the Mind Flayers.

Holy Infant's heart stirred and he said to the Mind Flayers telepathically, "Kill those mages and save these people. I have a use for them. Also, I'll be your servant in front of other people from now on. You don't have to call me master. Just call me Holy Infant."

"Alright." Mind Flayers was smart enough to know what Holy infant was up to.

"Mind Shock!"

His spiritual force swept out, and a large group of low-level mages fell to the ground, unable to get up. Their brains were all shocked silly.

Mind Flayers was already at the peak of level 4. If it had not been for the lack of demonic aura, it might have been at level 5.

His strength was naturally not something these mages could compare to.

Soon, Holy Infant joined the battle. The red fire dragon swept out and killed all the mages of the empire.

The Supreme Eye came out and looked around again before disappearing again.

"My ranking on the bounty board is going to rise again. It doesn't matter anymore. A lot of debt doesn't weigh on me."

After the battle, Holy Infant cleaned up the battlefield and collected the spoils of war.

The minotaur demons followed a five-meter-tall chief and knelt before the Mind Flayers.

“Thank you for your help, Lord True Demon!”

“You’re welcome,” said Mind Flayers.

The Minotaur Chief’s eyes turned and he quickly asked, “May I ask if Lord True Demon has any spawns now? Our Minotaur Tribe is considered a medium-sized tribe in this area. However, there are no true demons guarding it at the moment, so we would like to invite My Lord to join our tribe!”

“Agree to it,” Holy Infant said to the Mind Flayers telepathically.

“Sure, bring me to your tribe. This evil mage is my servant, Holy Infant. He is very powerful. Come with me,” said Mind Flayers.

The Minotaur Chief had seen Holy Infant’s methods before, so he naturally couldn’t ask for more.

“Lord Holy Infant, please come.”

Holy Infant's expression did not change as he followed the group of demons and disappeared into the forest.

Several days later.

This group of tens of demons arrived at the entrance of a huge cave.

Inside, Holy Infant sensed the auras of hundreds of demons, who were mostly at level one and level two.

"Lord True Demon, please come in!" The leader of the Minotaur Tribe was extremely polite.

Their tribe finally had their own true fiend guardian.

Moreover, it was a buy one get one free, and a powerful evil wizard was also given as a bonus.

Following that, the surrounding tribes no longer dared to harass them.

Before long, the Mind Flayers and Holy Infant arrived at a hall.

They were surrounded by the demons, and men and women, old and young, sized them up curiously.

“Everyone, this is the Mind Flayers Lord Guillermo, a true demon! From now on, Lord Guillermo will be our clan’s guardian.”

“That’s great. We have a true demon now. And it seems that Lord Guillermo isn’t too far away from becoming an Ancient Demon. When he becomes an Ancient Demon, will attaining the Demon King still be far away?”

“Wuwuwu, Lord True Demon is here. We’re saved!”

Holy Infant looked at these fanatical demons. Along the way, he also knew why this was the case.

It turned out that only true demons could use the “Demon Well” in the tribe to let the newborn demons undergo the “demonic aura invigoration” ritual by offering sacrifices to the seven demon kings of the Demon God Temple.

Only after being infused with demonic aura could one begin the path of demonic cultivation, using the demonic aura in the Million Mountains to cultivate.

The upper limit of a tribe’s true demon strength also determined the ceiling of the demon warriors in the tribe.

Previously, the Minotaur Tribe had a peak level 4 True Demon, but when he was about to advance to level 5, he was killed by a level 5 Archmage from the Kane Empire.

This caused the Minotaur Tribe's strength to continuously decline. Currently, there is only one level 4 expert, the tribe leader, and very few level 3 experts.

Therefore, the Mind Flayers at the peak of level 4 was practically their savior!

In the next few days, the Mind Flayers enjoyed the support of the tribe. Some female minotaur even offered their bodies to satisfy the true demon.

Mind Flayers refused.

Among the demons, the strong were respected. Although Holy Infant was not as important as the Mind Flayers, he was still respected.

One day, Holy Infant followed Mind Flayers to the deepest part of the cave.

There was a pitch-black Demon Well here.

Surrounded by minotaur, the Mind Flayers officially became the tribe's guardian.

At that moment, the Mind Flayers felt as if they had become the minotaur's... God.

The long-lost demonic aura began to flow into Mind Flayers' body.

The shackles of the peak of level 4 had actually loosened.

"Master, I can feel that my strength might reach level 5 very quickly here. This is a very magical experience. These demons are closely related to me. Every time they absorb a mouthful of demonic aura, a trace will enter my body," Guillermo sent telepathically.

Holy Infant sent a voice transmission, "You can cultivate here from now on. Attain level 5 as soon as possible. Also, from tomorrow onwards, mobilize your men to help me find the Devil Blood Grass. If there are any hostile tribes or Kane mages who intrude, just contact me. The demonic aura here is rather dense, and it's not convenient for me to cultivate. I want to change places to cultivate."

Chapter 1223: Spell Divine Talisman

"Yes, Master!"

Just like that, Holy Infant left the Minotaur Tribe and found a place with thin demonic aura. He opened up a shelter and set up an array.

“With the Scarlet Contract, even if Guillermo advances to level 5, he won’t betray us. There’s no need to worry about that. With a group of free workers, I don’t need to look for the Devil Blood Grass myself. I might as well focus on researching the method of making the beast skin here. This way, I can make up for the strength of my Holy Infant clone, and wait for the notice from Arctic Wizard.”

Holy Infant took out the spoils of war from the female mage and looked at them.

Other than the book, Kane’s Complete Collection of Divine Talisman, there was also the Encyclopedia of Fire Mage Spells.

It recorded all the fire-type spells from level 1 to level 5 in detail. It was very systematic.

There were not many types of spells, and compared to the Wizard World, it was simply a drop in the ocean.

In essence, Kane mage’s profession was derived from the inheritance left behind by wizards and spell casters from other civilizations on the Io Continent. It could be said that it was pieced together.

The wizards’ knowledge was the original and Kane’s knowledge was a derivation of it.

It was very easy for Holy Infant to understand this.

This included a mage’s magic tool, which was essentially a wizard’s Wizard Tool.

“No matter what, it’s still knowledge. I’ll save it first.”

Other than knowledge, the female mage's spoils of war were only some 'magic coins' from the empire, as well as casting materials.

On the magic coin, there was a drawing of an extremely dignified middle-aged mage surrounded by a circle of holy light. He must be the Supreme Archmage.

"Magic coins... Isn't this just a coin made of the Aether Stone? They even carved the portrait of a Supreme Archmage. How flashy. Sauron has such great achievements, but he didn't do this on the Aether Stones," Holy Infant ridiculed.

Then, he opened Kane's Complete Collection of Divine Talisman.

"The first Supreme Archmage created the way of divine talismans. It is said that he comprehended the will of the Io God during meditation... Divine talismans need to be drawn from tree bark or animal skin that is rich in elemental power, supplemented with rare transcendent materials such as beast blood or tree sap. They are formed from spell runes. All the talismans that are triggered at the end must have the written words [Earth, Fire, Wind, Water, Chaos Return to One, Supreme Archmage Token]! One must note that the power of the divine talisman does not come from one's own body. Only those who believe in the Supreme Archmage can use the power of the divine talisman!"

After reading it, Holy Infant frowned slightly.

"What kind of thing is this? I can't believe I have to borrow an outsider to use it. It's unorthodox. No wonder they can make spell scrolls without using their origin spiritual power. So this divine talisman is just a passageway. The true source of power is the Supreme Archmage!"

Initially, he still wanted to learn, but from the looks of it now, it was better to forget about it.

He was worried that the Supreme Archmage might have left something behind in these divine talismans and harmed him.

“Wait, why can’t I try to use myself as the source of power to modify these divine runes? It’s equivalent to storing your strength in the beast’s skin when you’re free. When you need it, you can throw it out all at once and win using quantity.”

The reason why Levi suddenly had a flash of inspiration was because he remembered that when Holy Infant cast a non-Burning Faction spell, it was essentially using Holy Infant’s clone as a channel. What it cast was the power of the original body, and what it consumed was the original body’s spell power.

The principle was similar to the way of divine talismans.

Therefore, Levi had a bold idea.

First, he could try to modify the divine talisman and change the source of its power from the “Supreme Archmage” to “Holy Infant clone” or Levi’s original body”. This way, he could carve the spells mastered by the Holy Infant clone on the beast’s skin extensively. For example, he could make hundreds of copies of the crimson dragon’s scourge. When he threw them out at the same time, anyone below the primordial soul realm would have to retreat!

The second thought was even more ridiculous. Levi felt that the chances of success were very slim. That was to change the source of power to “Levi’s Knight Body”, communicate with the divine talisman to open a channel, and draw in the “Bloodline Seed” and “Blood Qi” of the original body. Then, in a way similar to a Talent Brand, copy the original body’s knight ability into the beast skin, and make the original body the “God” of the clone!

From there, he could use the divine talisman to mobilize the power of a knight! If he wanted to solve this problem, he would have to overcome many difficulties.

However, if it was truly realized, then Holy Infant clone would have many methods to travel between planes in the future. It could be said that the strength of the clone would not be weaker than the main body. As for the main body, he could rest assured and cultivate in the wizard tower. The dangerous things would be done by his clone.

Thinking of this, Levi’s mind spun rapidly.

“Let’s start the research. Whether it succeeds or not, it can open up my train of thought.”

...

Time passed quickly.

Four years passed.

Year 1190 of the Holy Brilliance Calendar, Month of the Furnace.

Dark Ancient Tower, fourth floor.

Currently, other than Levi, who had just celebrated his 200th birthday, there were probably only a bunch of rookies left on the fourth floor.

A few ordinary fourth-circle senior wizards had also entered the fifth floor by forming teams.

On the isolated volcanic island. Levi was like an old dog, completely unflustered.

In the level 5 underground fire, Levi activated his Flame Dragon's true form and his Black Scales protected his body. He kept tempering the black substance in front of him at a high temperature that was enough to burn a fifth-circle force field.

This mass of matter emitted a colorful dreamy black color. Levi kept refining rare materials and adding them into the mix.

He had been forging in the volcano for almost half a year.

The Nightmare Dragon's divine dragon was made of level 6 materials, and it was extremely difficult to forge.

In the past four years, Levi's state of mind has become calmer and calmer.

His spiritual force had already reached 546 points, only 24 points away from Perfection.

Levi's path of knights had also improved greatly.

The Scarlet Dragon Breathing Technique was not far from advancing to the Second Transformation of the Blood Source.

If he had not struck while the iron was hot and forged a divine weapon, he might have been able to advance it now.

He had waited for more than six years for the divine weapon. Naturally, he had to prioritize the divine weapon.

On the fifth level, in the Million Mountains.

The Mind Flayers had completely adapted to its identity as a true demon.

With the endless supply of demonic aura, he was only one step away from level 5.

It was a pity that Levi did not get the succubus to follow along. Otherwise, if he had let her cultivate in the Minotaur Tribe, she might have been able to advance to level 5.

Moreover, Levi had been studying the way of divine talismans through the Holy Infant clone. With Levi's knowledge, there was still hope for him to develop the first type of "spell divine talisman".

As for the second type of "knight's divine talisman", it might take a long time. Of course, it was also possible to have an epiphany and understand it immediately.

Furthermore, the collection of Devil Blood Grass had not been delayed. With hundreds of people familiar with the Million Mountains, this was a matter that could be easily accomplished.

The Devil Blood Grass that had been collected over the past four years as well as the other medicinal herbs and materials was enough for Levi to make potions for decades of cultivation. His goal was to collect enough potions for him to cultivate for more than 100 years. That way, he should be able to push himself to attain Perfection in the fifth-circle realm and directly reach the primordial soul realm!

As for the relic of the Arcanist of Blood, Arctic Wizard still did not inform him. It seemed that the fifth-circle array wizard he had hired was only average. After such a long time, that array wizard still had not developed a way to break the array.

Just like that, the Month of Winter came.

In front of Levi, a black helmet that looked like a dragon's head appeared. The helmet had distinct edges and corners, and it exuded a domineering aura!

Levi ignored the high temperature, raised his helmet, and laughed.

After seven years of tempering, the sixth divine weapon was completed!

Chapter 1224: Nightmare Helmet

On the Nameless island.

Levi dripped his blood into the Nightmare Helmet. The helmet turned into a black stream of light and entered his body. Then, it perfectly fused with the head of the Nightmare Dragon Seed.

The helmet's thick aura complemented the Nightmare Dragon's dreamy Black Scale!

"Perfect!"

With a thought, the Nightmare Helmet appeared on Levi's head.

A sense of security arose from within.

“As expected, even someone as iron-headed as me needs to protect my head,” Levi muttered to himself.

He looked at his current appearance. This was called handsome!

He was wearing a black helmet with sharp edges, a Black Scale armor with black flames wrapped around it, a Scarlet Cloak that billowed in the wind, a golden shield with two dragons circling in his left hand, a World-Destroying Flame Sword carved with a crimson dragon in his right hand, and three thousand feather blades spread out in the void!

The elegant demeanor of a supreme knight could be seen at a glance!

He first admired his beautiful face.

Then, Levi began to study the Nightmare Helmet.

In his eyes, a black dragon with broken wings streaked across the sky.

The Nightmare Dragon’s power surged into his head. At the same time, in the mouth of the black dragon in the Nightmare Helmet, a formless and colorless concentrated attack wave formed. A level 3 sea beast, Black Halberd Fish, five kilometers in front of him suddenly straightened its body and lost its vitality. It was dead!

“The first function is called [Nightmare Dragon’s Breath]. It uses the power of the Nightmare Dragon to gather my spiritual force into a ray and focus it on the enemy in the distance! With my current level of spiritual force, I can kill anyone below fourth-circle in one strike. Even wizards of the same realm as me

can be injured as long as their spiritual force does not exceed mine. A moment of absent-mindedness can create an excellent opportunity for me to attack!”

Levi had learned a few spiritual force attack spells before, but he was not specialized in them.

Now, the appearance of the Nightmare Helmet made up for this shortcoming.

The second function of the Nightmare Helmet was to weaken the enemy’s spiritual force attacks and illusion attacks. It was extremely effective against primordial soul’s soul possession, Mind Flayers, and most other Nightmare Creatures.

It could be said that the Nightmare Helmet and the Divine Ring Tower formed an unbreakable barrier that protected Levi’s sea of consciousness, soul, and spiritual force!

And this had always been the shortcoming of many transcendent classes.

As for the third function, it was related to the material of the Nightmare Helmet itself, which was the Man-Faced Spider.

Levi closed his eyes and spread out his spiritual force.

Domain Expansion – Heaven’s Net Deceit!

With a thought, these fish started to kill each other.

“[Heaven’s Net Deception] is a domain skill similar to [Ice Dragon Prison], but its effect is to make all living beings within the range fall into an illusion and be controlled by me. In the domain, I will know all the subtle movements of the enemy, predict their attacks, and move. In short... Anyone who enters the domain will have their fate decided by me!”

Mental attack, mental defense, and illusion domain. These three functions were all extended functions of the Nightmare Helmet.

Its basic function was to increase Levi’s perception range and accuracy by 10%. Of course, as the level of the divine weapon increased, the amplification would also gradually increase.

“After experiencing countless hardships, the six godly equipment is complete... Unfortunately, it doesn’t have a complete set effect like you would get in a game.”

Levi could not help but complain.

He was still fantasizing about having a set effect that increased all attributes by 100%, but he was obviously overthinking it.

“Forget it, I’ll stop dreaming. I’ll hurry up and cultivate. I’ll attain the fifth-circle soon.”

Currently, his spiritual force was only four to five years away from reaching Perfection.

Levi already had the Lightning Melting Crystallization Technique, which he had taken from Sorrett and could assist in the crystallization process.

The materials needed for the level 5 breakthrough potion [Night Demon's Eternal Darkness] had been found after more than 20 years of searching. In addition to his previous material reserves, he had already obtained all of them.

However, some of the materials were found by the Holy Infant clone on the fifth level.

Therefore, Levi still needed to meet the Holy Infant once more. After getting the materials, Holy Infant continued to do his own things, while Levi found a safe place and began to cultivate in seclusion.

After reaching the fifth-circle realm, there would be a vast world!

"After staying in the fourth level for so long, it is time to go out and get some fresh air... lo Continent, your Three-Headed Dragon Abomination has returned!"

Levi immediately started packing.

He sealed Sawkins and Leon in the book. Night Fang hid in the shadows. The shrunken transcendent creatures, the Flying Scythe Beasts, and Qing Niao all burrowed into the shell of the giant lobster to hide.

“Let’s go!”

Levi rushed to the fifth floor.

At the entrance of the teleportation portal.

Chapter 1225: The Knights' Progress

Levi did not make a move.

“Pixar, open the passage.”

He cleverly used Pixar’s identity as a native to defeat the ones who were guarding the teleportation portal.

Then, he took advantage of the time when the water element guards were condensing to enter the teleportation portal.

This way, he could effectively avoid being broadcasted. Now that he had more pets around him, he had to be careful.

Fifth level.

Levi sent out the Flying Scythe Beasts and let them enter the Wind Disaster Stratum, flying freely above the vast Io Continent.

Levi looked towards the south. The Holy Infant clone had already found a place for him to cultivate.

“Next, I’ll have to bring this group of transcendent creatures along with me. I must be careful on the road and avoid fighting. It’s fine if they injure me, but they can’t injure these little fellows!”

A few months later, he cautiously arrived at his destination, which was located at the border between the Million Mountains and the west coast.

A short three-foot-tall boy had been waiting here for a long time.

“We’ve finally arrived. This place isn’t considered a place of convergence and is lacking in resources. However, to me, it’s the most suitable place for cultivation. There’s no one to disturb me and it’s very quiet.”

He obtained the other materials needed to refine the breakthrough potion, as well as the Devil Blood Grass.

Holy Infant left in a hurry and headed to the vicinity of the Minotaur Tribe to continue studying the way of divine talisman.

Levi, on the other hand, followed his usual habit and directly dove into the uninhabited sea, hiding until the sea dried up and the rocks crumbled!

Several days later.

He found a small island in the middle of the sea with birds chirping and fragrant flowers.

“Come, come, come. We’ll move into our new house. Everyone, quickly return to your jobs.”

The transcendent creatures dispersed.

Levi, on the other hand, set up an array and opened up a shelter.

After doing all of this, he would continue to refine level 5 red, blue, and green potions. He would first use these potions to practice, then refine the [Demon Soul Potion] for meditation. Finally, when his fifth-circle pharmaceutical skills became more proficient, he would start refining the [Night Demon’s Eternal Darkness]. ㄹaᄇÖbĚś

Before he started refining the potion, Levi held the 90th round table meeting.

He had been busy forging divine weapons, and the meeting that should have been held in the first month of this year was postponed.

For this meeting, all eighteen official members were present.

Among the three knights who joined last. [Bear Mountain Knight] was gone, replaced by a brand new face.

Fire Dragon Knight Baylon.

The Fire Dragon Knight was a four-meter-tall brawny man wearing a crimson armor of flames. The reason why he was so tall was partly due to his natural talent and partly due to the influence of his breathing technique.

He was also one of the knights with potential from a few years ago. He cultivated the first-class excellent quality 'Fire Dragon Breathing Technique', which was a strength-type and fire-type technique.

It could be said to be the low-level Red Lotus Breathing Technique, the ultimate low-level version of the Crimson Emperor Dragon Breathing Technique.

Of course, a low-level version of those was relative. Fire Dragon Knight was someone who could unleash his breathing techniques and combat techniques to the extreme.

He combined his own breathing technique and created the Fire Dragon Nine Slashes sword skill. He relied on the huge sword that was like a door to defeat Bear Mountain Knight, who was also a strength-type knight.

It had to be said that the advantage of the dragon-type breathing technique was incomparable to other breathing techniques.

Amongst the knights, excluding Levi, the dragon-type breathing technique already had Ash, Silver Dragon, Hundred Flowers, Steel Dragon, Snow Dragon, and Fire Dragon, which made up one-third of the total number of knights.

Levi felt that the Twilight Knights could be renamed the Dragon Knights.

There was nothing he could do about it. Dragons were just so awesome!

Of course, this also highlighted the strength of the Pheasant Knight, Feather Knight, and the others. It was even more commendable that they were able to defeat the Dragon Knight challengers in the fierce competition!

There was another benefit to cultivating the dragon-type breathing technique. As long as they had enough contribution points, they could easily exchange them for the corresponding Dragon Blood secret medicine.

After all, there were several retired mixed-blood dragon clans and in the Ancient Saint plane, there were many mixed-blood dragon clans as well.

However, Levi hoped that everyone would be like Hundred Flowers instead of a bunch of Dragon Knights.

During the years that Levi had been in seclusion, the members had made rapid progress.

The Blood Knight was already at the peak of level 3 and was beginning to prepare for level 4. The Ash Knight, who also only cultivated the path of knights, followed closely behind. They joined the team later, but the Divine Light Knight who practiced solo was already a level 3 senior.

For example, Golden Lion, Saint Ape, Goddess, Black Knight, and the other older generation dual cultivators were already at level 3 senior.

The knights of the Middle Ages, Silver Dragon and Dark Moon, had also grown and reached level 3. They also began to prepare their own divine weapons.

Among the new generation of knights, Flowers Knight was progressing rapidly and was almost at level 3. Levi guessed that the Flower Knight was a primordial soul wizard and had stayed in the legendary knight realm for hundreds of years. She was knowledgeable and had even cultivated the way of the Energy Sect. Naturally, she was not slow. On the other hand, as a primordial soul wizard and the top boss of the Witch's Family, she might have a way to obtain the bloodline essence of the Immortal Banyan Dragon that was tailor-made for her. That was why she could catch up from behind.

As for Andrew, he was a hot shot. He was now a second-circle wizard and a second-circle knight.

Apart from that, the Halberd Knight had also advanced to level 2.

The other knights had also made some progress, but it wasn't something that could be done in a day. They needed to work hard and accumulate experience before they could succeed.

At the end of the meeting, Levi listened to everyone's reports on their research results over the years and obtained a lot of new combat techniques and knowledge about the Talent Brand.

After the meeting ended, the knights bid farewell to Levi and returned to their respective posts.

Chapter 1226: Thunder God's Finger

The Flower Knight did not leave his seat. She sat opposite Levi and looked at him with a smile without saying a word.

Levi coughed and asked with a smile, "Elena, is there anything else?" He still had to hurry up and refine the medicine in seclusion. Every minute and second was extremely precious.

"Take a guess."

The Flower Knight smiled sweetly and looked at Levi.

“I’m guessing that you’ve successfully obtained a Morning Star-level oddity?” Levi asked.

“How did you know? I’m only a sixth-circle wizard, but the Letney family has a seventh-circle wizard leading them, and they’re in a home ground like the Thunder Pool Secret Realm,” said the Flower Knight with a smile.

“Because you’re my guild member. I trust you!”

Although Levi said that, he was shocked. In reality, after learning about the situation in the Thunder Pool Secret Realm, he had already given up on the Morning Star-level oddity.

The corners of Hundred Flowers’s mouth curled up as she extended her jade-white palm. In the middle of her palm was a purple finger.

On that finger, complicated truth runes seemed to form a fingerprint. Threads of thunder power spread out and emitted a dangerous aura.

“A broken finger? Is this the Truth Oddity nurtured in the Thunder Pool Secret Realm?” asked Levi.

“That’s right. For this broken finger, the seventh-circle wizard of the Letney family spent a lot of effort to defeat the thunder elemental lord. However, before that, with the help of Sorrett, I lured another thunder elemental lord over and stole this broken finger during the chaos. Now, the Letney family is looking for me all over the world on the seventh floor.”

“Are you safe now?” Levi asked worriedly.

“Thank you for your concern. I am very safe. However, in order to obtain this oddity, I used my trump card... Commander, I suggest you stay in the ancient tower and think about how to compensate me for my losses,” Hundred Flowers Blossoms joked.

“Definitely!” Levi looked at the oddity and quickly promised.

Hundred Flowers waved her hand and laughed, “I’m just joking. Don’t take it seriously. The key to the ancient tower is enough. After all, I’ve obtained more treasures here. Hehehe.”

“Elena, you’re very knowledgeable. Do you know what this is? There’s no information about this oddity in my illustrated book,” asked Levi.

Hundred Flowers shook her head and smiled as she said, “I don’t know either, but I’ve seen something similar to this at a primordial soul wizards’ gathering. It’s a purple thunderbolt eyeball. They call it the [Thunder God’s Eye]. I think this should be the [Thunder God’s Finger]... As for the specific function, you will know after you refine it.”

“Thank you so much!”

“You’re welcome. I’ll take my leave first. I’ve arranged for Sorrett to be in a safe place. Moreover, he has also obtained his own opportunity in the Thunder Pool Secret Realm. His future is promising... I still have to continue exploring the seventh floor. Also, the Amethyst Race’s level 8 expert has already entered the eighth level. Just as I predicted, he is attempting to enter the ninth level.”

“Sigh, there’s nothing we can do. The Amethyst Race is too powerful. This isn’t something we can worry about,” Levi sighed.

“You’re on the fifth floor now, right?”

“Yeah.”

“Be careful.”

“You too.”

After the video conference ended.

Levi suddenly remembered that Deep Blue Organization was on the west coast.

“I’ll go and secretly visit Anya first, then come back and cultivate in seclusion.”

He disguised himself as a nomadic wizard from the Ocean School of Thought and headed north.

With the True Mask, as long as he didn’t make a move, Anya wouldn’t be able to recognize him.

Deep Blue Organization was also on the west coast, but it was in the middle of the continent.

Relying on the Scarlet Dark Dimension, Levi arrived at the organization's headquarters a week later.

Here, the six towers of the Star Sea built a magnificent wizard city.

Deep Blue City.

It was named in memory of the Deep Blue Sage.

Deep Blue City was divided into six regions, which represented the six towers.

Through his Danger Perception, Levi sensed that there should be dozens of fifth-circle auras guarding the place, and there was no lack of existences with perfected fifth-circle.  $\mathbb{R}\hat{a}\tilde{N}\tilde{O}\tilde{E}\tilde{S}$

Many nomadic wizards came and went in the city. Most of them had average strength and did not dare to take risks alone. They could only accept employment from large organizations to earn money.

In the Witch District, which was almost full of witches, he saw the team from the Witch's Family.

Under the envious gazes of the crowd, the Snow Lotus Witch triumphed. Her fifth-circle aura was like a crane among chickens.

As the descendant of the two primordial souls, she had so many resources. In addition to being a Water Element Child and a special water-type talent, it was a certainty for her to advance to the fifth-circle realm. Previously, it was just to limit the limit of her spiritual force.

On the other side, the team led by the Phantom Witch who had reached Perfection in the fourth-circle realm and was about to go out for a mission. Anya was among them, still wearing that stoic handsome face that kept strangers at bay.

It had been a long time since they last met. Anya was indeed different from before. With his current spiritual force, Levi estimated that Anya would be able to reach Perfection in the fourth-circle realm in another ten to twenty years and would try to advance to the fifth-circle realm.

Levi watched as Anya's back disappeared from his sight and Levi sighed in his heart.

"Why do I feel like an old father from the countryside who secretly went to a school in a big city to visit his son..."

"Get out of the way, where did this male wizard come from? This is not a place you can come to. Are you using the photographic slate to record us again?" A fourth-circle senior witch came to Levi with her hands in front of her chest, looking aggressive.

Her name was Nola, and her mother was a fifth-circle leader of the Witch's Family. She had also participated in this ancient tower trip.

Nola looked at the middle-aged male wizard in front of her. He looked old and ordinary. His every move revealed the poor, self-abased, and cautious temperament of a nomadic wizard. There was also a hint of envy in his eyes. He must have longed to see a genius witch like her from the Witch's Family.

Chapter 1227: Mind Flayers Leveling Up

"He must think that he's powerful enough to show off in front of us just because he has a fourth-circle senior cultivation base. During this period of time, haven't there been a few male wizards coming to the Witch's district to seek trouble?" The other witch said calmly. Her name was Winnie, a perfected fourth-circle wizard of the water element. She was the team leader of the wizard team, and Nola was her team member.

Levi smiled awkwardly. He spread out his hands and said helplessly, "I don't have any records. I've admired the heroic talents of the geniuses of large organizations for a long time. I came here to take a look. You've misunderstood. I'll leave immediately."

Snow Lotus Witch came over and said coldly, "You two, don't talk nonsense. Go and carry out the mission!"

The two witches immediately kept quiet and muttered, "Okay. It's just that recently, there have been some self-righteous wizards harassing us in the Witch's district. They don't even look at their own cultivation..."

"Yeah, my sweetheart is the Fire Dragon Destroyer, hehe."

Snow Lotus Witch's eyes turned cold as she said, "He's just passing by to take a look. How is he harassing you? Besides, with your cultivation, would the Fire Dragon Destroyer take fancy to you? In the ancient tower, he is our competitor. When we meet, we will fight to the death. You should correct your attitude!"

"I know, I was just joking. Snow Lotus, don't take it seriously."

The two witches were angry, but they did not dare to show it. They glared at Levi and left with icy expressions. Snow Lotus Witch was a big shot in Deep Blue Organization, and they could not afford to offend her.

Snow Lotus Witch looked at Levi and said, "Although it's not explicitly prohibited, it's indeed not convenient for male wizards to enter the Witch's district. Please leave, Sir."

Levi said with a sincere smile, "Thank you, Senior. I'll leave now."

He just came to visit Anya. Seeing that this kid was full of energy, Levi was relieved.

As for the two witches picking on him, he was already used to it when he was an external wizard in the Witch's Family.

After returning to the island, Levi immediately went into seclusion.

"There are only three things I need to do in this seclusion. Meditation Art, breathing techniques, and making potions! Other matters can wait!"

Time passed quickly. In the blink of an eye, half a year had passed.

Apart from making medicine, Levi's Scarlet Dragon Breathing Technique had naturally reached level 16, the Fourth Transformation of the Blood Source Realm.

He opened his eyes and looked at the proficiency panel calmly.

Levi-

[Scarlet Dragon Breathing Technique: Level 16 (1/800,000). Special Effect: Scarlet Poison Body (Level 4). Scarlet Contract (4/5).]

...

After testing for a while, he found that after the Scarlet Dragon Fourth Transformation of the Blood Source Realm, there were three changes:

Firstly, his basic speed would increase.

Secondly, the survival ability of the Scarlet Poison Body had increased. If he encountered a fatal danger, he could scatter into more Blood Flying Dragons to escape. As long as one escaped, he could reconstruct his body. ㄟㄢㄣㄣㄣ

Thirdly, the position of the Scarlet Contract had an additional slot.

This meant that if he met a suitable target, he could recruit loyal workers again.

“In the future, my contract partner must be at least a fifth-circle senior. Ordinary fifth-circle are not worth wasting my quota unless they have a special status.”

After the Scarlet Dragon broke through, Levi temporarily stopped cultivating his breathing technique.

In just a few years, it would be difficult for the six great breathing techniques to have a major breakthrough.

However, his spiritual force was already at 550 points. He was only 20 points away from Perfection.

Within four years, he would be able to reach his limit, so he had to refine [Night Demon’s Eternal Darkness] before his spiritual force reached its limit.

Therefore, the main direction of his next goal was to make medicine!

“Let’s continue.”

...

Million Mountains.

At the Minotaur Tribe, beside the Demon Well.

Mind Flayers floated above, surrounded by the sacrifices sent by the Minotaur. Many of them were the bloody internal organs of humans and other demons.

Ever since Mind Flayers settled in, the Minotaur Tribe’s life began to improve.

More and more demon warriors went through the body tempering ceremony and embarked on the path of cultivation.

Mind Flayers, on the other hand, had made rapid progress in their cultivation thanks to the dense demonic aura in the Demon Well and the feedback from the hundreds of Minotaur.

On this day, he finally broke through the bottleneck that restricted him to level 4!

As the surging demonic aura flowed into Mind Flayers' body, his aura grew stronger and stronger, and his mental power was like a vast ocean.

In the mind of Mind Flayers, the dark demonic aura began to gather and compress. Together with its vast spiritual force, a qualitative change occurred.

In the end, everything transformed into a black crystal core.

The men, women, and children of the Minotaur Tribe felt the change in the surrounding demonic aura, and their expressions changed.

The Minotaur Chief was delighted as he exclaimed, "Hahaha! The heavens have blessed our Minotaur Tribe! Don't panic! This is the true demon advancing into an ancient demon. After he becomes an ancient demon, our tribe will have a powerful level 5 warrior one day!"

"Great, we have an ancient demon now. According to the rules of the Demon God Temple, any tribe with an ancient demon can be promoted to a large-scale tribe. Next, we can occupy more territories and mountains and raise more Minotaur warriors!"

These people were extremely excited. The relationship between the demons and the ancient demons determined that they would always be the vassals and subordinates of the demons.

At the Demon Well.

Mind Flayers opened his eyes, his tentacled face beaming.

“Once the core of the Abyss is born, I will be a level 5 demon. Even in the Abyss, I will be an elite warrior. In the first layer of the Abyss, I will be a general.”

Mind Flayers spread out his spiritual force and saw the entire Minotaur Tribe.

In the Demon Well, a shadow slowly appeared.

Chapter 1228: Creating The Talisman!

“Lord Demon King!” Mind Flayers flayer greeted respectfully.

“That’s right. After you become an ancient demon, you will be qualified to hold important positions in the Demon Temple. I will appoint you as the 168th General of the temple and give you the title [Ancient Demon of Heart]. Next, all the small and medium-sized tribes near the Minotaur Tribe will be under your command. We demons have been bullied for too long, so it’s time to teach the Kane Empire a lesson.”

A majestic voice came from the shadow.

Mind Flayers knew that this was a real demon lord, comparable to the primordial soul stage among the wizards!

“Roger, Guillermo will definitely not disappoint My Lord expectations!”

When the shadow disappeared, Mind Flayers felt helpless.

“Why did I inexplicably get into the enemy’s higher-ups position again... It seems that in the near future, the Io Continent will become even more chaotic.”

...

Not far from the Minotaur Tribe, at the edge of the Million Mountains, in a hidden shelter.

Holy Infant’s eyes were bloodshot. He drew runes on the ground again and again, and countless animal skins piled up in the corners, forming a small mountain.

These were all scrap goods.

After an unknown period of time, Holy Infant suddenly looked ecstatic and laughed wildly, “I did it, I did it! I finally know how to ask for help from myself. So that’s how it is, hahahaha!”

Holy Infant took out a new piece of beast skin. In his mind, the model of the first-circle Fireball Technique kept flashing. At the same time, he chanted an incantation and then used a special quill to draw a rune on the beast’s skin.

A mysterious fireball pattern began to appear.

In the end, the quill signed on the lower right corner of the animal skin.

“Earth, Fire, Wind, and Water, Aether Concealment, Aether Dominance Token!”

As the outline of the rune was completed, only a portion of his spiritual force and spell power were consumed. It did not involve the origin of his spiritual force. A divine rune that was similar to a spell scroll but completely different at the same time appeared.

“Hahaha, Fireball Talisman!”

Holy Infant threw the beast’s skin into the air, and the Fireball Talisman exploded.

At the same time, on an isolated island overseas.

Levi opened his proficiency panel.

Levi-

[Talisman Creation: Level 1 (1/1000)]

...

“Sure enough, it worked. The reason why I was able to succeed is closely related to my unique Aether Meditation Art. If one wanted to become the source of divine talismans, one had to possess authority similar to Chaos. As for Aether, it was born from chaos and then divided into four elements, which then evolved into other mutated attributes. Now, I can be considered to have created a new wizard skill, and I am the source of the power of all the major Elementalist School’s divine talismans such as Earth, Fire, Wind, and Water!”

“According to the legends of this realm, it was the Supreme Archmage who created the divine talisman. The Supreme Archmage received a revelation from Io. Io was the God of Creation. He should be related to Sauron. It could be Sauron or the tower spirit of this ancient tower... Since the Supreme Archmage can be the source of power for the divine talisman, it means that the most powerful person in Io is the same as me. He has also cultivated a technique similar to the Aether Meditation Art, which includes all schools. That’s why he can provide power to the divine talismans of all major schools.” r’ANòBĒś

Levi’s intuition told him that the Supreme Archmage was not a simple level 7 expert.

This was because even Legendary Wizards were divided into factions. There was no one like Levi who cultivated in all factions. The Supreme Archmage could not be more awesome than a Legendary Wizard, right?

“In my opinion, the Supreme Archmage should still be related to the Dark Ancient Tower. After all, the ancient tower was refined by Sauron using the Chaos Ancient Serpent, and the Chaos Ancient Serpent is a powerful God who controls the four elements, Earth, Fire, Wind, and Water!”

Suddenly, Levi thought of a terrifying matter.

“Could the Chaos Ancient Serpent still be alive? Could this Supreme Archmage be a product of the awakening of the Chaos Ancient Serpent’s consciousness... That’s why they set up a Church of Chaos and tried to make a comeback?”

The more Levi thought about it, the more he felt that things were not simple in the ancient tower.

“Forget it. This isn’t something I should worry about. I’ve earned a lot anyway. Once the ancient tower closes, I won’t have anything to do. The next time it opens will be ten thousand years later.”

Levi was no longer worried.

He believed that with Sauran’s strength, it should not leave behind the hidden danger like Chaos Ancient Serpent. Perhaps this was Sauran’s intention.

Levi wiped his sweat and sighed, “Controlling the Holy Infant clone to do research is too tiring. I can relax for a while now.”

In the past few years, it seemed that his avatar was doing research, but in fact, it was still using his main body’s “computing power.”

While he cultivated, he had to study at the same time. It was equivalent to multitasking. He couldn't stay in this state for too long, or else he would suffer from schizophrenia sooner or later, and he might even end up in a state of sitting and forgetting.

"When can my avatar become more mature and be able to do research on its own? It can think independently on its own at a deeper level and take on all the things that need to be thought of... Forget it, this is too dangerous. If I produce a clone with its own personality and consciousness, wouldn't I be harming myself? I'll just use my clone as a simple tool."

"Mind Flayers have also advanced to level 5 and infiltrated the Demon God Temple. I can make use of his identity. Perhaps I can get more information about the upper circles of Io."

Now that Phoenix and Mind Flayers had advanced to level 5 before their master, Levi was too embarrassed as their master. He had to speed up the progress.

As for the Holy Infant clone, the most difficult part of creation was over. The next step was to continuously increase his proficiency in talisman-making.

Holy Infant and Levi were one, and they were all operating with Levi's consciousness. If Holy Infant researched, Levi would be researching. If Holy Infant created talismans, Levi would be creating talismans. Compared to research, creating talismans was much easier. When Levi was cultivating, he would give some of his "computing power" to his clone, just like how he would do it usually, and Holy Infant would be able to "hijack" itself.

Chapter 1229: Begin Crystallization!

Furthermore, Levi's main body's panel also had Proficiency feedback while Holy Infant made the divine talismans.

Levi was a perfected fourth-circle wizard, so he was very knowledgeable and proficient in the Three Arts of Wizardry. Moreover, he was also the creator of the way of divine talisman. Under such circumstances, his talisman crafting skill was still quite fast. It was improving rapidly every day.

...

Cultivation had no time limit.

In the blink of an eye, three years had passed.

During this period, Levi successfully refined a large amount of [Demon Soul Potion], enough for him to cultivate for a long time after reaching the fifth-circle realm.

Not long ago, he had also successfully refined a portion of [Night Demon's Eternal Darkness]. The fifth-circle breakthrough potion was ready!

Now that everything was ready, all that was left was to attain Perfection for his spiritual force!

A year later.

Year 1195 of the Holy Brilliance Calendar, the Month of Beginning.

In the midst of his busy schedule, Levi went online for the roundtable meeting.

He could tell at a glance that the Blood Knight had undergone a qualitative change.

Levi said with a carefree smile, "Congratulations to Blood Knight for stepping into the realm of a level 4 knight!"

Blood Knight laughed, "Thank you, Commander! I didn't let you down. I've finally caught up with these young people!"

The other knights looked at him enviously.

After the meeting, Levi and the Blood Knight chatted for a long time.

It was indeed difficult for Blood Knight to reach level 4.

He named his Bloodline Dharma Idol the King of the Sky. He wanted to become the ruler of the sky like the Maya Eagle!

The Blood Knight did not have the talent of a wizard, so he had been focusing on the path of knights for a long time. Coupled with his outstanding talent and the accumulation of his long lifespan, it was considered a good thing after a long time.

Levi had always believed that he was close enough to become a 'legendary knight' in the Doomsday Era.

His temperament, talent, and luck were all extraordinary!

All they lacked was a suitable era!

As the saying goes, how could golden scales be something in a pool? They would turn into dragons when they encountered wind and clouds!

After the birth of the Bloodline Dharma Idol, the Blood Knight's strength had increased exponentially. The defensive measures that he lacked the most had finally been completed. **PaNŎBEŠ**

He relied on his divine weapon, his Talent Brand, and his sword skills to the point of perfection. He was able to fight with an ordinary fourth-circle wizard without falling into a disadvantage!

This was a huge breakthrough for the knights who had been established for more than 170 years!

After witnessing the Blood Knight's methods, the other knights were also motivated and moved towards the Dharma Idol stage!

After the meeting, Levi continued his cultivation.

Several months later, Levi's consciousness came to his mind.

The Divine Ring Tower rotated slowly. In the projection on the tower's surface, the Holy Infant was drawing the divine talismans continuously. Levi's talisman crafting proficiency was increasing steadily.

After four years of hard cultivation, Levi's talisman crafting skill had already reached level 3.

According to his tests, a level 3 talisman crafting skill was enough to draw a third-circle divine talisman. In the Kane Empire, this was the equivalent of a High-level divine talisman mage.

After reaching level 3, Holy Infant continuously refines hundreds of third-circle Fire Dragon Tribulation divine talismans. As the divine talisman was only at level 3, they could not unleash the full power of the Fire Dragon Tribulation. They were only at the level of the Fire Dragon Tribulation when Levi was in the third-circle realm. Even so, their power was far stronger than the Fireball divine talisman from that Kane female mage.

If these divine talismans were thrown out at the same time, they would explode in a chain reaction. If an ordinary fifth-circle wizard were to take it head-on, they would either die or be injured!

Moreover, the source of power for these divine talismans was "borrowed" by the Holy Infant from Levi. It was stored in the divine talisman and could be used in battle. As long as one had enough spiritual

force, they could activate it by chanting the talisman. It was very convenient and did not require any additional spell power.

To make a divine talisman, one needed a transcendent beast skin of the same level. As for Levi's beast skins, they were all taken from the 'black beasts', not ordinary creatures hunted.

The materials on the black beasts had corrosive power from the Land of Darkness. They could not be used to make Wizard Tools because Wizard Tools needed to be used for a long time. If they used black beasts as Wizard Tools for a long time, they would definitely corrode the wizard's body, spiritual force, and will.

However, using the black beast materials to make one-time-use divine talismans was not a problem at all. After all, they were consumables and would not be used for a long time. Moreover, Levi had the Purification Elixir now, but he was reluctant to use it. After all, he didn't know if the Saint Fruit could be transplanted outside, so he didn't dare to waste them.

He was filled with excitement.

Levi's consciousness entered the interior of the Divine Ring Tower.

Among them, there were 570 spiritual stars hanging high in the sky. The starlight was dazzling and illuminated his sea of consciousness!

Seeing this scene, Levi sighed and said, "It's not easy. Raising the upper limit of one's spiritual force while raising it at the same time. This is both painful and happy!"

He could have attained Perfection long ago. However, he was too lucky. Along the way, he refined four Truth Oddities, which increased his maximum spiritual force by 70 points. Thus, it took him a long time.

He didn't want to be stuck in the same realm. It was all because of these Truth Oddities!

"Although the Morning Star-level oddity is already in the hands of the Flower Knight, I don't know how long it will be before I get it..."

Levi pondered. Currently, the ancient tower has been open for 30 years. According to Madam Triss, based on the usual average, the ancient tower had only been open for about half of the time. The ancient tower might have been open for the longest time in history. Therefore, it would take at least a few decades before the ancient tower closes.

Levi was hesitating and struggling in his heart.

Now, he already had an additional 7% success rate. Presumably, most of the top geniuses of those large organizations' success rates were not higher than his.

If he waited any longer, perhaps the upper limit of his spiritual force could be increased, and the success rate of his advancement to the primordial soul stage in the future could be even higher.

"But... Is that necessary?" Levi asked himself.

He was already prepared to advance to the fifth-circle realm. He believed that he would definitely succeed in this advancement. There was no way he would fail!

Should he advance to the fifth-circle realm in one go? Or should he continue to limit his spiritual power and wait for decades? This was a difficult decision.

“The future is unpredictable. There are too many variables. Not all Truth Oddities can increase the upper limit of one’s spiritual force. If I wait for so long and find that it doesn’t have the expected effect, it will be even more hopeless. I’m already much luckier than the others to be able to consume four Truth Oddities.

“I have the Divine Ring Tower, six talents at Perfection, 570 points of spiritual force, and the panel. I have other ways to increase the success rate of attaining a primordial soul... Perhaps there are other Truth Oddities on the fifth floor, but these were all uncertain. These need time to explore, and there is a high chance that they would be accompanied by danger. I need strength to gain a firm foothold on this fifth level where experts are as common as clouds!”

Thinking of this, Levi’s gaze was firm as he looked in the direction of the Io Continent.

“Next, I’ll find a stable place of lightning and then use the Lightning Melting Crystallization Technique of the Sorrett family to infuse my body with lightning and condense the crystals!”

Chapter 1230: Thunder Basin

Year 1195 of the Holy Brilliance Calendar, Month of the Furnace.

It was the 30th year since the Dark Ancient Tower opened.

Levi, who was cultivating in seclusion overseas, stepped onto the Io Continent.

He let Pixar guard the transcendent creatures on the island while he left quietly with Sawkins. Sawkins could protect him while he was in seclusion.

“A stable thunder land is either some secret realm, such as the seventh level’s [Thunder Pool Secret Realm], or a thunder array is built in a place rich in thunder element. It gathers thousands of thunder and creates suitable conditions. The Thunder Dragon Family uses the second method.”

Levi naturally used the second method. The place he was going to was the [Thunder Basin] in Io Continent.

This basin was located in the western part of the Kane Empire. The basin was covered in dark clouds all year round, with frequent thunderstorms.

This was also a place of convergence, but it had been occupied by the Empire a long time ago. The Church of Chaos had set up the Thunder Punishment Tribunal here, which was responsible for judging heretics and evil mages in the Empire.

It was said that the sinners here would be thrown into the “Pool of Thunder” in the square in front of the church. The Pool of Thunder would not instantly kill the sinners. Instead, it would rely on the endless

thunder inside to “electrocute” the criminals, causing them to be on the verge of death for a long time and suffer pain.

The one who created such a vicious method of punishment was a lightning-type Supreme Mage from the Church of Chaos.

People called him Lightning Supreme Mage!

The person in charge of the Thunder Punishment Tribunal was a level 5 lightning-type Archage, Kostas. He had been guarding this place all year round. He was the disciple of the Lightning Supreme Mage. He was strict and impartial. He was a terrifying nightmare in the hearts of evil people!

This Thunder Pool was actually the best place for Levi to cultivate in seclusion. However, it was obviously too dangerous and Levi had to avoid it.

Several days later.

Levi arrived at the Thunder Basin. High up in the sky, dark clouds covered the sky, and lightning snakes covered the sky.

“Not bad. The power of the thunder element is extremely dense, it’s even better than the Realm of Thunder. Next, I’ll find a quiet place and use an array to draw the power of thunder. I’ll build an artificial Thunder Pool for my seclusion.”

Levi’s Hermit Rune flickered as he moved stealthily along the mountain ridges surrounding the basin.

The next day, he went to one of the hidden sinkholes.

“The terrain here is not bad. It’s suitable for me to build an array.”

Levi immediately got busy, setting up concealment, alert, and protective arrays in the surroundings.

Then, in the center of the sinkhole, he set up the array to attract the heavenly thunder.

After a few days of busyness, the already dense dark clouds above the sky became even gloomier and more oppressive.

Terrifying lightning and thunder were brewing within, and then it was guided by the array and fell into this sinkhole.

Countless electric snakes surged and spread inside, and the aura of destruction swept out.

As Levi stepped into it, the lightning was not enough to threaten his life.

Generally speaking, other than the Lightning Faction, it was extremely dangerous for the other factions to use the Lightning Melting Crystallization Technique because they could not control the strength of the lightning well and could easily electrocute themselves to death. ㊦㊧㊨㊩

However, Levi was different. He had an invincible physique, and he could directly take it head-on, just like when he had liquefied his spiritual force in the Cold Pond.

By the time the lightning liquid was already surging at the bottom of the sinkhole, Levi revealed his Flame Dragon's True Form and jumped into it.

"Sorkins, protect me. Kill anyone who approaches!" Levi said calmly.

Sorkins nodded and accepted the 1000 Fate Coins that Levi had given him in advance!

At the bottom of the sinkhole, Levi's entire body was engulfed by the endless lightning liquid, like a cocoon.

He closed his eyes and began to circulate the Lightning Melting Crystallization Technique.

In his mind, a total of 570 drops of spiritual stars began to tremble under the power of lightning.

Countless electric lights flashed on the spiritual stars. These stars were attracted by a kind of gravity and began to fuse with each other.

Then, the 570 stars gathered together and formed a white liquid star.

“The spiritual force fusion has been completed. There’s no more room for regret now. Let’s begin the crystallization!”

...

Three months later.

Million Mountains.

While Levi’s main body was in seclusion, the Holy Infant clone was still working hard on the talisman crafting skill.

Suddenly, a message came from the communication device that had not sounded for a long time.

[Sir Holy Infant, everything is ready. Let’s go...]

Currently, most of his energy was focused on researching how to crystalize, so he probably couldn’t care less about the Holy Infant. However, the Holy Infant looked at the dense Fire Dragon Tribulation divine talisman in front of him and smiled.

With a wave of his hand, all the divine talismans disappeared.

Holy Infant flew quickly toward the coordinates of the relic of the Arcanist of Blood.

Before he left, he summoned the level-five Mind Flayers and sealed them in the Book of Dead Souls.

It was not necessary to use the Mind Flayers, but he just brought Mind Flayers along just in case.

With a level 5 demon and a fire element, this trip to the relic should be safe.

Several days later.

Somewhere in the Million Mountains, there was a deep valley.

The valley was shrouded in clouds and fog, and the situation inside could not be seen clearly.

A terrifying beast roar could be heard.

Two figures stood there silently.

One of them was wearing a white robe and had an old face. It was Arctic Wizard.

The other was an icy witch. Above her head, a huge alchemy eagle was hovering and monitoring everything around it.

“That person is here,” the witch said calmly.

Arctic Wizard was delighted. He had been waiting for this day for a long time.

From the horizon, a three-foot-tall wizard that looked like a child flew over and landed there.
