

Wizard 130

Chapter 130: Giant Rhinoceros Breaks Limit! (2)

Levi returned to the shelter and took out 10,000 gold coins and about 100 pounds of gold from his savings to forge a knight's sword. With Levi's Fine Craftsmanship and his Wind Axe Special Effect, a perfect master-level knight's sword soon appeared.

"D*mn it, just this material alone is worth 10,000 gold coins. In this world, who is more extravagant than me?" Levi could not help but ridicule himself.

Furthermore, those who did not have enough strength would not be able to swing this knight's sword at all. It was too heavy.

"Now that we have the mithril iron sword, the silver sword, and the golden sword, why don't we make a peach wood sword?"

Levi remembered the Taoist priest in his previous life. He seemed to have used a peach wood sword to kill ghosts.

"I'm quite the wits," Levi could not help but praise himself.

Thus, Levi made another peach wood sword.

Following his example, he made a variety of longswords.

He was prepared to give them a try in the future.

This time, he only tested three types of swords against Naiad.

The silver, golden sword, peach wood sword.

After forging the weapon, Levi prepared enough casting materials, wore layers of armor, and replenished the whale sac with enough food for three months.

Then, he called his two companions and protectors!

Magic Shark and the Demon Mountain were at the front. They would lure Naiad out and restrain her while Levi was in charge of attacking from the back.

"This should be good enough," Levi sighed in his heart.

It would not make sense if this could not subdue the evil spirit.

To be safe. Levi chose to fight during the day

Levi knew that Naiad could appear then.

The next morning, cold air permeated the air. The Black Water River had just thawed recently.

The cold river water flowed slowly. Levi followed his memories and came to where the original owner had once fished.

No one was here because the lord forbade anyone from going to the river.

Levi could not help but feel a little nervous when he thought about his childhood trauma, even though he had successfully killed an evil spirit.

However, they were all the same.

"Phew."

Levi took a deep breath to calm himself down.

The Black Snake Seed in his body had already begun to roar like an engine. Black gas had already spread all over his body to prevent a sudden attack from the evil spirit.

At the same time, the Frost Giant's Sigh was ready. Although it might not be able to attack the evil spirit, it was still possible to try.

After all, this was a genuine spell, so it could still be useful.

The two brothers, Magic Shark and Demon Mountain, were not afraid of death. They stood quietly on the shore while Levi stood behind them, ready to attack at any time.

The river flowed, and time passed.

"Could the evil spirit not be home today?"

"Or did she not dare to come out after seeing the three of us?" Levi guessed.

Just as Levi was about to leave for the time being, Spider Sensing reacted.

His hair stood on end. This sense of danger was much stronger than when he faced the Chained Prisoner in Icewind City.

However, it was still far from a match for the Fist of the Empire.

He did not know if it was because he became stronger or because of the sense of danger, but he knew that her strength was weaker than Fist of the Empire.

All in all, black smoke rose from Levi's body like demonic flames. His entire body flowed with a sticky black flame that emitted a metallic luster.

At this moment, Spider Sensing activated once again.

Levi's body tensed up!

"Behind you!"

Levi suddenly felt a weight on his back, as if something was lying on his back!

His Advanced Vibrosensing did not work on evil spirits.

The opponent's every move did not cause the air to vibrate!

"You're out!"

The black flames behind Levi's back swelled by a foot!

At the same time, a silver-white light had already lit up around his body!

The level 2 Seal of Protection was the Bright Silver Protection!

The black smoke burned the evil spirit on his back. The existence on his back seemed threatened and used all its strength to break through Levi's Bright Silver Protection, then floated behind him.

Levi turned around and finally saw the enemy who had haunted him from childhood and brought nightmares!

Naiad!

Her swollen, tattered skin filled with holes seemed to flow with clear water. Dense algae and water plants crawled out of these holes.

The stinky fish and rotten prawns were nauseating.

That face seemed to have been soaked in water.

Terrifying and strange.

For a moment, the surroundings seemed to have become even colder.

This was not an ordinary coldness. The coldness made one's scalp numb, and their hair stood on end.

Without hesitation, Levi snapped his fingers.

Behind him, the shadow of the Frost Giant appeared again.

The Giant also snapped his fingers.

In an instant, a radius of ten meters around Levi, including Naiad's evil spirit, was frozen.

Crack, crack.

The Black Water River froze, and it only took one breath!

Levi noticed that Naiad's movements were not affected at all. She screamed and spat out water. Countless green algae and seaweed grew in a complicated manner as she charged toward Li Wei.

Although it was useless, Levi had expected it.

Spells specialize in magic, and he probably needed a specific type of magic to deal with evil spirits..
