

Wizard 137

Chapter 137: Transcendent Endurance, Vast as the Great Lake! (1)

The whale song was melodious.

The black cocoon at Levi's heart slowly broke open.

A life-like Blood Whale Seed that looked the same as the one on the breathing technique inheritance diagram appeared in Levi's heart.

As soon as this Blood Whale appeared, it caused the hibernating level 7 Giant Rhinoceros Seed and Level 7 Siren Seed to feel a wave of pressure. The same was true for the level 6 Man-Faced Spider Seed.

"The Blood Whale has turned around," Levi muttered.

At this moment, the Black Snake with a Candle circling Levi's heart raised its head and looked down at the Blood Whale Seed that was not inferior to it.

Endless prestige approached!

The Blood Whale's imposing aura began to become uneasy. Ultimately, it lowered its proud head in front of the Black Snake.

The level of the Black Snake Breathing Technique was still a little higher than his.

"Phew, Black Snake can still suppress it now, but I can see that it's already a little strenuous. At most, after I upgrade the Giant Rhinoceros Breathing Technique to level 8, I'll have to slow down for a while. I have to let Black

Snake reach level 9 first. Then, I can continue to raise the others to level 8."

Levi muttered, "Otherwise, it would be no laughing matter if there were to be a conflict between so many Life Seeds born from breathing techniques."

Although the proficiency panel allowed him to ignore the bloodline curse and cultivate other breathing techniques, with so many Life Seeds entrenched in Levi's heart, if they did not have a supreme leader to suppress them, Levi's intuition told him there would be chaos.

He opened the proficiency panel.

[Blood Whale Breathing Technique: Level 8 (Maximum), Special Effect:

Transcendent Endurance]

As he had expected, the Blood Whale Breathing Technique's eighth level was the limit.

In general, it was the same as a shallow-grade breathing technique.

Excellent breathing techniques were also divided into three levels.

The Black Snake and Giant breathing techniques were first-class techniques. He should be able to cultivate to the peak of the ninth level, making him a top-notch expert among the grand knights. The Northern Seven Flying Cavalry should be at this level.

As for the second-class breathing techniques, Blood Whale was one of them. He should be able to cultivate it to the limit of the eighth level and become an ordinary grand knight, such as the level of Magic Shark or Demon Mountain.

The worst was the Vortex Beast Breathing Technique, a third-class technique. At most, it could be cultivated to the limit of the seventh level. Becoming a

Grand knight with that breathing technique alone would be impossible.

Perfect breathing techniques should be able to be cultivated to the limit of the tenth level. According to Levi's visual estimation, the boundary of the ninth level was a top-notch grand knight, and the edge of the tenth level was probably the Fist of the Empire's level.

Above that, it might be legendary.

No matter what, after the eighth level of the Blood Whale Breathing Technique, he had the combat power of a true grand knight.

Levi looked at the brand-new special effects.

[Transcendent Endurance: Your endurance has exceeded the limits of mortals. This means that your burst of power will be much more extended than others, and your upper limit of pain tolerance will also be much higher. If a mortal's endurance was like a small pond, then your endurance was like a vast lake. As long as the lake did not dry up, you would never fall!]

After reading the introduction, Levi felt that only one word could describe it.

"Enduring!"

If this Blood Whale Breathing Technique were in his previous life, it would be one that all men should practice.

After Levi was done complaining, he decided to put his so-called "Transcendent Endurance" into practice.

There were only two aspects to test endurance. One was the endurance in combat, and the other was the escape.

Levi first tested his combat endurance.

Magic Shark and Demon Mountain had high endurance levels.

After all, the two of them were like robots. They could fight tirelessly and endlessly if they were not worn out and had enough Cores to provide energy.

Levi did not have many Cores of the Undead in his hands.

He reluctantly exchanged a brand new Core for Magic Shark.

"Come on."

As soon as Levi finished speaking, Magic Shark attacked him.

Levi did not use any weapons. He only needed to use his palms.

With his current strength, using the Golden Cross Slash to deal with Magic Shark would be a little bullying.

Two grand knights were fighting in the wilderness.

[Seal of Hell Proficiency +1]

[Seal of Hell Proficiency +1]

Magic Demon fought tirelessly as Levi's Seal of Hell's proficiency increased.

At the same time, the energy in the Core of the Undead was also constantly being consumed.

From the initial 100% to 90%...

Unknowingly, half an hour had passed.

After half an hour of high-intensity battle, half of the energy of the Core of the Undead in Magic Shark's body had already been consumed.

After such a high-intensity battle for half an hour, most grand knights who were not endurance-type would have been exhausted.

On the other hand, Levi felt that he had just finished warming up and was ready to go all out.

"So this is Transcendent Endurance. This Special Effect is too useful."

Levi did not waste any more of the Core's energy, and there was no need to test his escape time.

He had already wholly felt the most vital part of Transcendent Endurance.

That was to transform into a fighting machine that did not know fatigue or pain!

Grand knights were mighty, but they would still have to avoid the sharp edge of the enemy's attacks and flee in a large-scale war..
