

Wizard 1381

Chapter 1381: Fluorescent Illusion Tree

Northern Io.

Nameless Rift Valley, underground world.

After taking in the Shell Demons, Levi continued to venture deeper.

He was not in a hurry to head to the Barbarian Race.

It wouldn't be too late to explore the resource point that the Flying Scythe Beast had discovered first.

As Levi went deeper, his Danger Perception began to react.

Of course, these were all within the range of normal fluctuations.

The swordsman Gerri and the Wind God model were on Levi's left and right.

Under the impenetrable Sword Qi and Wind Blades, all the black beasts that dared to ambush Levi were killed.

The beast's skin and useful materials were left behind. The rest of the flesh and blood were piled under the ancient banyan tree.

"Even without the Ancient Shell Palace, this place is still worth a visit. There are so many black beasts here. It'll be enough for Long to eat for a long time."

Levi didn't know how long he had walked.

A tall forest of dead trees appeared in front of them, and fungi were everywhere.

A straight ravine that was ten miles long could be seen in the forest. It looked like it had been cut open by a weapon.

"These should be the traces of the battle between the Badger Barbarian King and that Supreme Mage... The power of a single attack can plow ten miles of land and change the terrain of mountains and rivers. A level 6 expert is so terrifying!"

Suddenly, a storm of blood rushed toward Levi as hundreds of small dragons that looked like bats charged toward him.

"Pterodactyl Clan. Unfortunately, they're all black beasts. We can't purify them for the time being. Let's kill them," said Levi.

Gerri's magnificent sword radiance swept across the sky, and the Wind God model howled with the wind.

These low-level mixed-blood dragon clans fell one after another.

In the forest of dead trees, a huge figure covered the sky and the sun. A fishy smell filled the air.

A black Winged Dragon with a wingspan of 100 meters stirred up a black gale.

Still, Levi did not need to make a move. The Wind God model and the swordsman spent some effort to kill the Winged Dragon.

“Black Wind Winged Dragon, a level five mixed-blood dragon. It just so happens that it can be combined with the bloodline essence of the Thunderstorm Wolf Dragon to form the Advancement Potion for my Sky Dragon Breathing Technique.”

Levi quickly collected the blood.

The Black Wind Winged Dragon’s skin, tendons, bones, and other materials were also good materials for refining weapons.

Levi was in a good mood to have such a harvest just as he entered.

Three days later, Levi arrived at an underground river that was dozens of miles wide.

The water system extended in all directions.

In the underground river, there were some black beasts that liked the dark and damp.

Pairs of green eyes emerged from the darkness.

One of them had a pair of water-tank-sized eyes.

“Roar!”

The monster let out a low roar as if an engine had started.

Hundreds of giant toads were hiding on the rocky beach.

Their tongues shot out like missiles at Levi.

Behind Levi, a body-tempering clone appeared and protected him.

Rumble!

Most of the attacks were deflected.

Only the tongue of the giant toad that was like a small hill pierced through the body of the body-tempering clone, but it was blocked by Levi's Indestructible Armor.

At the end of the tongue, there was actually a human-like face, ferocious and terrifying.

"Although there's no one here, you can't look so casual and ugly, right?"

Levi grabbed the giant tongue with his big hand and exerted force!

The level 5 toad kept struggling.

The toad was about to be pulled over by the strange person with great strength.

At the critical moment, the toad cut off its tongue to survive.

Levi raised his hand and slashed out with his sword, chopping off the toad's head.

Its body was still twisting as it was sliced into eight pieces by Levi. A suffocating poisonous fog began to spread. The Wind God model stirred up a strong gust of wind and blew away the toxic fog.

Levi skillfully took out the toad's poison sac.

"This thing can be used to increase the toxicity of the body-tempering clone."

In the Wind God model, Thunder Roc released thousands of thunderbolts, carpet-bombing the area.

Swordsman Gerri's sword lights crisscrossed.

The other toads all died.

This place was quiet.

On the rock where the toad leader was lying, a strange translucent plant with fluorescent light was twisting its branches and emitting a fragrance.

Around the plant, there seemed to be many illusions. If an ordinary wizard did not pay attention, they would fall into the trap.

“Fluorescent Illusion Tree... It is a rare plant that grows in extremely dark places. Its branches and leaves are ground into powder. It is a fifth-circle medicinal material. It is needed for several primordial soul breakthrough potions. Its medicinal properties are to train one’s spiritual force and help one condense one’s soul.

“Consuming it directly would also have miraculous effects. The powerful hallucinogenic factors contained within are enough to cause a fifth-circle wizard to fall into various illusions.

“If one could pass through the illusion, it would be very helpful in condensing their mind and improving their willpower.

“This item can increase the speed at which I condense my Ultimate Soul. It’s truly a timely help.”

Levi was overjoyed.

The further he went, the slower he would condense his soul to the Ultimate Soul. It would be better if he had this.

Of course, if one had ordinary willpower, it would not be recommended to take it directly. Otherwise, it would be easy to lose themselves in the illusions.

Although their life was not in danger, it was not a good thing.

However, with Levi's willpower, it should not be a problem.

Moreover, the Nightmare Dragon bloodline in his body was able to restrain all kinds of illusions.

"In the Wizard World, this is a treasure that even primordial soul wizards would fight over. After all, this thing is also good for strengthening the soul. This underground trip is too profitable!"

He entered the Ancient Banyan Fairyland and went to the medium-sized Element-Rich Land No. 034.

Netherworld Cave.

This place was thousands of meters below the Ancient Banyan Fairyland. The Spring Water of Immortality flowed into the underground river and nourished the earth.

The ecological environment here was the closest to the underground world.

"Very good. This will be your home from now on."

The Fluorescent Illusion Tree was relatively fragile. In order to prevent the transplant from failing, Levi carefully moved the entire boulder into the Netherworld Cave.

Chapter 1382: Snake Black Beast

Levi summoned the Scythe Demon Spirit and asked it to guard the Netherworld Cave to prevent other transcendent creatures from eating the tree by mistake.

The transplant was complete.

Levi muttered to himself, "This underground world is a true treasure land. It is not inferior to those large intersections on the surface... However, because the entrance is difficult to find and is also densely packed with black beasts, it makes it very difficult to develop this place."

Levi planned to take the Ancient Shell Palace and explore the place instead of leaving.

Firstly, he had to stock up on more black beast flesh and materials.

Secondly, he had to collect more precious animals and plants from the underground world.

In any case, he had the Ancient Banyan Fairyland now, so he was not afraid that he could not take it away.

As they went deeper, more and more black beasts appeared.

Levi's speed was slowed down again and again.

In order to get the treasure as soon as possible, he started to use Hermit Rune. After obtaining the treasure, he would continue to harvest the black beasts.

The underground world was far bigger than Levi had imagined.

The Abyss Great Rift was just an entrance.

He suspected that there were many underground worlds similar to this one in Io.

At the thought of this, Levi advanced carefully. If his Danger Perception felt strong, he would leave without hesitation.

In such a vast land, there might be a level 6 existence hidden. Levi could not let his guard down.

Three days later.

"My Lord, this is the place, under this underground lake."

The shell demon mistress shrunk and stood on Levi's shoulder, her small, smooth feet tickling his heart.

Levi used his Spiritual Perception to sense it.

There was indeed a huge building under the lake.

It was completely white and surrounded by a circle of purple stripes. Its overall shape was like a beehive. It was densely covered with passages, and its surface was covered with algae. There were also heavy traces of battle damage.

Ancient Shell Palace.

It was a treasure that the Shell Demon Clan had forged for generations with their collective strength. It was the crystallization of their civilization's wisdom!

On the surface of the Ancient Shell Palace, there were spikes that protruded like sea urchins. The tallest one was over a hundred meters long.

According to the shell demon mistress's introduction, these things were called lightning pillars. They were the firepower system of the Ancient Shell Palace.

The lightning pillar naturally grew on the surface of the ancient giant shell.

The shell demons modified it into a thunder cannon barrel.

The source of its attack energy was also from the giant shell itself.

Levi analyzed that after the giant shell died, it left behind some level 6 lightning-type power in the shell. The shell demons used their own shell refining techniques to develop and utilize it.

It was said that even a level 6 expert would have to retreat from the might of a single blast from the highest lightning pillar.

The Barbarian King had been able to kill the Supreme Mage because the Shell Demon Clan had used this cannon to assist him.

This made Levi's heart burn.

To Levi, it could be said that he had grasped a great killing weapon that was enough to threaten a primordial soul!

Of course, after such a long time, it was unknown whether the lightning pillar could still be used. It was not wise to have high expectations.

Next to the Ancient Shell Palace, there was also a huge snake that was sleeping. It was a black beast that Levi did not recognize.

It was completely black and had merged with the lake water, so it did not notice Levi's arrival.

Judging from its aura, it was a peak level 5 black beast.

This was the strongest black beast Levi had encountered since he entered the underground world.

The Wind God model and the swordsman Gerri couldn't deal with it.

Levi had already thought of a countermeasure.

His figure flickered and disappeared from where he was.

When Levi reappeared, he was already in front of the snake.

In the next moment, a huge hole appeared and sucked the snake in, completely unaware of the situation.

It was not that Levi could not defeat the snake without the help of the array, but he did not want his battle with the snake to be projected.

After all, the snake was also a peal level 5 mini-boss.

Eight Heavenly Dragon Prison.

Rolling Stone Hell.

The snake descended from the sky and opened its bloody mouth. Black poisonous water flooded the ground and corroded everything.

Levi's body-tempering clone charged forward, his Rock Demon form taking on the level 5 snake head-on.

The clone was sent flying again and again, but it kept getting up.

Levi waved his hand.

Purgatory mist flew out and wrapped around the snake.

The snake was controlled.

At the same time, a crisp wind chime sounded.

A thousand wind chimes spun and surrounded the snake.

Top-grade Wizard Tool, Bell of a Thousand Winds.

A thousand hurricanes formed a hurricane domain that enveloped the snake.

The snake felt like it was stuck in a quagmire, unable to move.

The scales on his body collided with the hurricane, sending out countless sparks.

Levi's current cultivation had already surpassed the Wind Witch by a lot.

When he used this Wizard Tool, its power would be even greater.

The power of a top-grade Wizard Tool was starting to show.

He only relied on the two top-grade Wizard Tools, [Dance of the Purgatory] and [Bell of a Thousand Winds], to complement his body tempering technique.

Levi would be able to fight against a peak level 5 snake.

The results of his cultivation over the years could be seen.

The snake's scales were riddled with wounds. Black blood spurting out and wailed incessantly.

Levi pitied it and did not want it to continue suffering.

The muscles on his arm bulged, and a huge force erupted. The Heavenly Dragon Sword Codex was activated, and he slashed vertically!

The indestructible red Sword Qi split the snake into two.

The snake's internal organs flowed out, and it gradually stopped struggling.

Levi frowned and realized that things were not that simple. The sense of danger had not disappeared.

Immediately after, a twisted human face appeared on the snake's head.

This face had a vicious expression and looked ferocious.

In the blink of an eye, the snake's head had actually turned into the head of a brawny man. His face was covered with giant snake scales, making him look ugly and terrifying.

Levi swung his sword again, but it was swatted away by the water snake's tail.

Chapter 1383: The Barbarian King's Obsession

The snake raised its upper body. Its body was stitched together by some kind of strength, and a pair of thick and powerful arms grew out.

"There's still a second stage?"

This was the first time Levi had encountered such a situation.

The current snake could already give him a strong sense of danger.

His intuition told him that even an ordinary perfected fifth-circle wizard would not be a match for the snake.

This gave Levi the illusion that he was facing a peak level 5 Amethyst Race member.

“Kill... Kill... Kill!”

The snake let out a deep roar.

Its left hand dispersed Levi’s Sword Qi. The snake inserted its right hand into its body and took out a thick and sturdy rib.

Strange black flames spewed out of the head, giving the bone the shape of a battle axe.

Boom!

The battle axe fell.

An extremely violent attack wave tore through the Rolling Stone Hell.

Levi’s figure flashed and he appeared in the Inferno Hell with a solemn expression.

He could vaguely guess what was going on.

Levi didn't dare to underestimate his opponent. After the Crimson Emperor Dragon Flames swept out, the Flame Dragon's true form appeared.

Not only that, Levi even conjured the Crimson Emperor Dragon Armor.

The void energy in Levi's body burst forth and he appeared behind the giant snake. He planned to take the snake away with a single blow.

"Crimson Dragon in the Sky!"

The Sword Qi that was enough to make a perfected fifth-circle wizard retreat was ineffective.

The snake seemed to have been possessed by a god and was suddenly enlightened. It had predicted Levi's flash attack.

The giant axe slashed backward, clashing with Levi's Sword Qi.

An earth-shattering shockwave swept out, and the Inferno Hell began to tremble.

"Such powerful battle awareness and techniques!" Levi exclaimed in his heart, but he did not panic.

The snake turned around and swung its huge Opening Slash, looking like Pangu separating the heavens and earth!

“Uncontainable Fury...”

Levi could vaguely hear the human-like roar of a giant snake.

This snake seemed to know how to use extremely powerful combat techniques.

With a slash, the black blood in the giant snake’s body suddenly exploded, turning into endless black energy that condensed on the axe light!

The void trembled in front of the axe light. It could be seen how terrifying the power of this attack was!

“Interesting.”

Dragon horns appeared on Levi’s head, and his body kept growing. A vast amount of power gathered on the Crimson Dragon Steel Slash.

Hah!

In terms of brute force, who was Levi afraid of?

The greatsword and the great axe collided, and the aftershock of the collision shattered the Inferno Hell.

The Eight Heavenly Dragon Prison became the arena for Levi and the snake.

Two Gods of War used cold weapons, clashing with brute force and combat skills!

The snake hacked and slashed as it muttered, "Domineering and Independent!"

A terrifying pressure swept across, but it was blocked by the Nightmare Helmet.

"This guy actually knows mental attacks?"

Levi suppressed the doubts in his heart and blocked with his sword.

The two figures moved freely in the array. Between the saber light and sword shadow, it was a killing move!

"Delightful!"

Ever since the Crimson Emperor Dragon reached level 5, Levi had never fought so freely.

The giant axe on the other side became even more ferocious, fearless, and reckless!

The Wind Blade Hell was shattered in the battle between the two.

The giant snake swung its giant axe down like a god stepping down. A low roar sounded, "Traceless Star Stepping..."

Rumble!

The Dead Sea Hell that had just appeared was split open by the snake's axe!

"Hahaha."

As Levi laughed, he used his Sword Qi to block the axe light.

The giant snake leaped up and spun its body. The axe drew a perfect arc in the air, and lightning appeared. A crescent-shaped slash was seen.

“Half Moon Thunder!”

Seeing the terrifying power of this move, the phantom of a three-headed, six-armed giant appeared behind Levi.

“Six Heavenly Gods!”

It seemed a little strenuous not to use the Heavenly Gods. For safety reasons, it was better to use the Bloodline Dharma Body...

With the might of the Heavenly God, the sword shattered half a moon!

The giant snake’s axe slashed out from below!

“Rising Sun...”

The axe light was like the rising sun, illuminating everything.

The Six Heavenly Gods’ Sword Wielding suppressed the sun with the power of man conquering the heavens!

The morning sun was extinguished by the Sword Qi, and the world once again fell into darkness and silence!

After this strike, only the skeleton of the snake remained. Its flesh and blood had already been burned to nothingness.

A twisted figure like an evil spirit lingered within.

He was wearing heavy armor that looked like a hedgehog. He was tall and sturdy, and he held a huge stone axe in his hand.

He took a step forward and leaped high into the air. The phantom of the evil spirit burned and fused into the giant axe.

“Sacrifice Oneself for Righteousness!”

Levi’s expression changed.

This attack was stronger than any enemy attack he had encountered before.

Even if it was a peak level 5 Amethyst Race member, they would probably be cut into two.

“Send him off...”

Night fell, and there were no restrictions.

The Six Heavenly Gods burned the Dharma Body and slashed out!

The sword light and axe light collided like a supernova explosion. The night was as bright as day, and the last Shadow Hell was shattered...

The curtain was removed, and the world became clear.

The blue sky and white clouds of the Ancient Banyan Fairyland were revealed.

The illusory evil spirit looked at Linabell, who was watching the battle from afar.

“Rosabella...” He murmured softly.

“I’m Linabell, and Rosabella is my grandmother... Are you Senior Badger Barbarian King?” asked Linabell.

The evil spirit was silent, but it also seemed to have been relieved of a heavy burden. It sighed faintly and disappeared.

The bone axe also completely collapsed and turned into dust.

A bloody snakeskin floated down with the wind, and Levi reached out to grab it.

“The ‘Warlord Catalog’. Take life and death lightly. If you’re not convinced, fight...”

Levi was pleasantly surprised, but then he was filled with respect. He looked at the void in front of him and said, “Thank you for your teachings, Senior!”

Linabell flew over and sighed, “I didn’t expect that Senior Barbarian King’s obsession to protect the Ancient Shell Palace would actually turn into an evil spirit.”

She was smart and naturally understood what had happened.

Chapter 1384: Comprehension of the Warlord Catalog

The revival of the snake that had just died was related to the Barbarian King’s evil spirit.

Perhaps, thousands of years ago, after his death, due to his strong obsession, by chance, the obsessive spirit parasitized the snake and fused with it, making it an incarnation of an evil spirit.

However, the snake had always been the leader.

The snake gradually grew into a giant beast at the peak of level 5, but the evil spirit remained in a deep sleep.

When the snake died, the evil spirit would instinctively continue to fight until it dissipated.

Levi sighed, "There are true feelings in the human realm and there is true love in the human realm..."

After learning about the Badger Barbarian King's deeds, Levi felt even more respect for him.

Levi didn't really approve of the Barbarian King's methods and ideals, but the Barbarian King was indeed a real man.

Before the Badger Barbarian King's evil spirit completely dissipated, it had dedicated its entire life's effort to create a powerful combat technique and carved it on the snake skin before giving it to Levi.

The Warlord Catalog.

It was a combat technique book that was suitable for most cold weapons.

The Badger Barbarian King used an axe, but Levi's greatsword, halberd, broadsword, spear, and other weapons were also suitable for this technique.

The Warlord Catalog was divided into nine levels. The higher the level, the more profound it became and the harder it was to comprehend.

The lower three levels, middle three levels, and upper three levels corresponded to level four, five, and six barbarian warriors respectively!

The above-mentioned corresponding relationship was just the entry threshold for learning.

It did not mean that the lower three levels could only display level 4 battle prowess.

Rather, it meant that unless one was a monstrous genius who had reached level 4, they would be able to start learning the lower three levels of The Warlord Catalog. Otherwise, their bodies and willpower would not be able to withstand it, and it would only harm them.

Lower three levels:

Uncontainable Fury, Brave Man is Fearless, and Domineering and Independant.

Middle three levels:

Traceless Star Stepping, Half Moon Thunder, Rising Sun.

Upper three levels:

Sacrifice Oneself for Righteousness, Fight Against Heaven and Earth, There is Only One King!

“Combat techniques are not divided by race or occupation. They are just different techniques for using power. On this basis, there are slight differences due to the different transcendent systems... Although I’m not a barbarian warrior, I should be able to cultivate this combat technique.”

He roughly glanced at the first level of ‘Uncontainable Fury’ and felt that it was not difficult. He resisted the urge to start learning now.

Levi copied The Warlord Catalog onto the memory slate to prevent the content from being lost due to the damage done to the snakeskin.

Levi returned to the underground lake.

The Ancient Shell Palace was like a sunken ship. It had been lost for many years and was full of traces of time.

Levi had completely eliminated the black beasts hidden within.

Then, a huge hole appeared in the Ancient Banyan Fairyland. A suction force came and sucked the Ancient Shell Palace into it.

On the grassland, the Ancient Shell Palace landed on the ground with a loud bang. Dust flew into the air, and the surroundings shook.

The Holy Grail's surprised voice sounded, "This thing is not bad. Where did you get it?"

Levi was in a good mood and said with a smile, "Hahaha, this is a treasure of the Shell Demon Clan."

After Sauron's Four Treasures and the Flame-Gathering Pot, Levi obtained another rare treasure.

Moreover, this treasure was extremely special. It was a rare fortress-type treasure.

In the Wizard World, it was also something that primordial soul wizards would also flock to obtain them.

Linabel and the rest of the shell demons flew over and surrounded the Ancient Shell Palace. They were so excited that they couldn't even speak properly.

“I actually saw my clan’s sacred relic again. I thought I would never see it again.”

“I wonder if it can still be used?”

Everyone looked at him curiously.

The shell demon mistress said, “Sir, we want to study the Ancient Shell Palace next and try to get it up and running again as soon as possible.”

Levi replied, “Sure. Tell me if you have any research results.”

Levi was also looking forward to seeing if the level 6 lightning pillar could still be used.

In the future, if he encountered a great enemy of the primordial soul realm, he would let them have a taste of the might of this ‘Italian Cannon’!

The shell demons flew into the Ancient Shell Palace, and Levi followed them around.

The inside was like a beehive, densely packed with shell houses. There were also some strange-looking buildings that were made of shells.

This reminded Levi of the sound shell Bagh had given him.

Io's water seemed to be filled with many strange shells with incredible abilities.

After some modifications, it was a simple and primitive transcendent item.

Levi left the Ancient Shell Palace and returned to the outside world.

This trip to the underground world could be said to have yielded a lot for Levi... Black Beast, Fluorescent Illusion Tree, Ancient Shell Palace, Shell Demon Clan, and The Warlord Catalog.

Levi was not in a hurry to return to the surface. He planned to continue hunting black beasts here, search for resources, and cultivate at the same time.

A month later, somewhere in the underground world.

A black beast that looked like a giant jellyfish released black lightning. It covered the sky and earth, and its might was terrifying.

A swordsman in pitch-black magic armor was bathed in lightning. He held a greatsword in his hand and was furious!

“The Warlord Catalog, Uncontainable Fury!”

A furious attack appeared, and the power of the Sword Qi was even stronger than Levi’s Sword Qi previously.

The black beast was dead!

Levi put away his sword and stood there silently.

“What a powerful combat technique. Just the lower three levels are not inferior to my ‘Heavenly Dragon Sword Codex’...”

In the past month, Levi had been killing black beasts while practicing The Warlord Catalog. Levi had been immersed in it and had a great time.

Because of Levi’s strategic position, he quickly grasped the first level.

Its power did not disappoint him.

On another battlefield, the Black Lotus Beast used its dragon claws to open the mouth of a level 5 giant crocodile, and the pitch-black Annihilation Breath shot into its mouth!

The giant crocodile was pierced from the inside out by the Black Lotus Beast's breath. The scene was extremely violent.

On the ground, the corpses of the black beasts piled up like a mountain. The smell of blood was still attracting more black beasts.

Chapter 1385: Underground Cultivation!

Levi praised, "Well done."

The Black Lotus Beast smiled honestly and said, "I haven't fought in a long time, so I'm a little rusty. Lord Dragon King, let me fight with you outside. I have to be of some use..."

After the Black Lotus Beast's body recovered, Lord Dragon King would give him a physical examination every once in a while.

Moreover, the Black Lotus Beast received all kinds of nutrients, Evolution Potion, and the Spring Water of Immortality.

How can I repay such a great kindness?

The Black Lotus Beast thought about it and felt that his brute force was the only thing that could help the Dragon King.

Therefore, he volunteered to fight for Levi.

Levi laughed and said, "No problem. Next, we'll see who kills the most level 5 black beasts."

The Black Lotus Beast was filled with fighting spirit as he said, "That's a good suggestion."

Then, it stepped into the Darkness in search of new prey.

Looking at the Black Lotus Beast slaughtering his way around, Levi leaned against the rock wall to rest.

This underground world was simply a paradise for practicing combat techniques and spells.

Levi could not be bothered to attack the low-level black beasts. Instead, he sent out the Undead army, level 5 transcendent creatures, and alchemical creatures.

Levi and the Black Lotus Beast would deal with the level 5 black beasts.

As a result, Levi's killing efficiency could be said to be quite high.

Under the banyan tree, Long ate until it was round and full.

It could not eat anymore.

Levi stored the black beast flesh in his storage ring for future use.

After resting, Levi continued to cultivate and practice his combat techniques.

Time flew by and a year had unknowingly slipped through his fingers.

Year 1218 of the Holy Brilliance Calendar, the Month of Grass.

In the underground world.

Beside Levi, there was a mountain of corpses and a sea of blood, and the stench of blood soared into the sky.

This year, his combat skills had become more and more refined.

His entire person seemed to have undergone some kind of transformation.

Levi opened the proficiency panel.

Levi-

[The Warlord's Catalog: Level 4 (1/20000). Special Effect: Uncontainable Fury, Brave Man is Fearless, Domineering and Independant.]

...

“After more than a year, I’ve already completely grasped the lower three levels of The Warlord Catalog. I’ve also gained a preliminary understanding of the fourth level... With such speed, I’m a genius that only appears once every ten thousand years in the history of the Barbarian Race, right?”

Levi put away his panel and held his longsword in high spirits.

The reason why he was so fast was because of his proficiency panel, his level 5 knight realm, and his sword skill level.

In that one year of studying, Levi discovered that the first three levels of The Warlord Catalog were all different.

In fact, it was a combat technique that used the three different auras of the human body to increase one's combat strength.

These three auras were:

Anger, courage, dominance!

Anger.

Needless to say, the emotion of anger, or the sin of anger.

Many people could burst out with power beyond common sense under extreme anger and burn their own small universe. This was the most common use of aura.

Courage.

As the name suggested, it was an aura that only the brave could give birth to.

"We don't have to be afraid when we encounter difficulties. We have to face them bravely!"

The epic of mankind was the epic of courage.

After using this move, the user's aura would reach its peak. The user would dare to cut down any enemy with one sword!

It could also directly ignore the mental intimidation attacks of ordinary enemies!

Levi quickly comprehended this move.

Although Levi adhered to a steady and cautious path, when it was time to be brave, Levi thought that he could still do it.

Domineering.

This was an aura that was of a higher level than anger and courage.

According to The Warlord Catalog, not everyone could comprehend the 'Domineering and Independent' move.

That was because the birth of dominance was influenced by both acquired factors and innate factors.

Some people, no matter how much they learned, did not have this kind of domineering aura.

Of course, this was not a problem for Levi.

Dragon's Might was essentially a high-level domineering aura.

Dragon's Domination.

Levi only needed to instinctively use the Dragon's Might on his body to slash out this move.

After using the 'Domineering and Independant' move, other than dealing powerful physical attacks, it could even deal mental attacks that could intimidate the mind.

This was an extremely rare technique among combat techniques!

So...

The profoundness of The Warlord Catalog's combat techniques was far beyond Levi's imagination.

As for the middle three levels, Levi had only grasped the fourth level:

“Traceless Star Stepping.”

At this level, Levi was only at the beginning stages and had yet to gain any profound understanding.

The lower three levels were all about the use of one’s aura.

Human strength had its limits, and so did one’s aura.

Therefore, the middle three levels were even more profound and began to use external auras.

If one’s aura wasn’t enough, then one could borrow the aura of the world!

This method was similar to how wizards borrowed the power of heaven and earth elements.

These three auras were:

“Sun Aura, Moon Aura, and Star Aura!”

Traceless Star Stepping.

This move needed to be cultivated under the stars in the sky, and the 'star aura' had to be integrated into one's strength technique.

The power of one strike shattered the stars.

The following 'Half Moon Thunder' and 'Rising Sun' were all based on this principle.

Just as the Badger Barbarian King described in The Warlord Catalog:

"Take life and death lightly. If you're not convinced, fight!"

'I can't beat you. However, I definitely can't lose to you in terms of aura.'

'If a person's aura wasn't enough, then I would borrow the aura of heaven and earth to suppress you!'

'Only by being brave and fearless and Fighting Against Heavens and Earth can one become a... the Only King!'

It was said that the Badger Barbarian King's The Warlord Catalog was also influenced by his tribe totem, the Sky Badger Giant Beast.

The personality of this giant beast was exactly the same as the Badger Barbarian King.

Inspired by The Warlord Catalog, Levi's Heavenly Dragon Sword Codex also benefitted a lot from it.

Chapter 1386: Repaying the Barbarian King

Levi was confident that he could push it to a higher realm, and even surpass The Warlord Catalog.

"I can't cultivate Traceless Star Stepping in the underground world. It's dark here, and I can't see the stars. I can't borrow the aura of the stars. I've practically attained Perfection during this year of underground cultivation. I can leave now."

During this one year, Levi and his subordinates had hunted nearly a hundred different types of level 5 black beasts.

Low-level black beasts were even more difficult to count.

Levi could feel that the number of black beasts in the underground world he was in was clearly fewer.

If Levi wanted to hunt more, he had to go deeper.

However, the sense of danger that came from it made him stop.

There should be dangerous beings above level 6 hiding in the underground world.

With his strength, Levi could not go any further.

Now...

Scarlet Dragon and the Advancement Potion of the Sky Dragon Breathing Technique... Levi had already prepared everything.

Levi only needed to attain Perfection in his breathing technique before he could refine it and advance it.

The only flaw was that he didn't find the potion materials for the Death Ember Dragon.

"The Undying Bird bloodline creature is really hard to find," Levi muttered.

As for the Nightmare Dragon breathing technique, the Human-Faceless Infant Dragon was enough.

At the thought of this, Levi held his greatsword and left the underground in a flash.

Next, he would head further north and enter the land of Barbarians to seek more opportunities.

...

lo.

Northern Territory.

Levi hurriedly flew over the grassland, snow mountain, and forest.

Before meeting the Winged Tiger Barbarian King, he planned to find some small Barbarian tribes and ask around. He would make plans after he had a better understanding of the Barbarians.

Suddenly, the sounds of battle came from up ahead. On the ground, in the air, two groups of people were fighting.

One of them was filled with vitality and blood, and their barbaric might was peerless. They were clearly Barbarians.

The other party was wearing the Empire's mage robes and was well-trained. Arrays, divine talismans, Dharma artifacts, and so on bombarded the Barbarians.

The number of Barbarians was slightly higher than the mages of the empire, but they were at a disadvantage.

It had to be said that in most dimensions, Spell Casters were considered noble spell masters.

This made Levi deeply moved.

However, the situation of the Barbarians was much better than that of the knights.

Levi observed the situation. With a thought, sparks flew in the air and his figure disappeared.

“Kill!”

“Protect the old and the young!”

“The Badger Clan’s warriors are brave and fearless. They will never retreat!”

A short and brawny young man with a crew cut held a huge axe in his hand and was furious.

He was the current leader and the strongest of the Badger tribe.

Silver Badger Tam!

A totem warrior at the middle stage of level 5.

Opposite him, two Empire Archmages in flame robes bombarded him with fire-type spells. They were high and mighty, and their eyes were filled with disdain.

They were the Flaming Twins, famous level 5 experts in the north of the empire. The twins had killed several level 5 Barbarian warriors together.

“They just look strong but they are not powerful!”

“Everyone, release the fire attack divine talisman. Let these Barbarians witness the might of the Supreme Archmage!”

The Flaming Twins waved their hands.

Level 3 divine talismans descended from the sky. At a glance, there were hundreds of them!

Tam's expression changed drastically.

"Level 4 warriors, form the blood qi combat array and protect the old and the young!"

He swung his axe horizontally.

"Fury Slash!"

Endless rage surged, and his aura merged into this attack.

Hundreds of divine talisman flames were extinguished by the axe!

"They're just putting up a stubborn resistance. Try our Dharma artifact!"

A fiery red flag flew out from each of the Flaming Twins. The symbol of Kane was drawn on it.

World-encircling Giant Snake!

It was said that when God Io created the world, he could not do without the help of the World-encircling Giant Snake

Therefore, the giant snake became Kane's symbol.

"Kill them!"

Tam wasn't afraid at all. A Badger warrior would rather live standing than die kneeling!

Beams of stunning axe light broke through the seal of the divine flame talisman and charged toward the Flaming Twins.

The divine talisman was broken, but the Flaming Twins did not panic at all. They smiled faintly and said, "Interesting. I didn't expect that the Badger tribe, which has already declined to such a state, would actually have a natural-born warrior like you. You have trained your combat skills to such an extent that they are as pure as fire... Unfortunately, in front of spells, they are all unorthodox!"

The twins' spell was destroyed by Tam.

They each threw out two divine talismans that were emitting treasure light.

"Forget it. I won't capture him alive. I'll kill him on the spot."

This divine talisman was a high-grade level 5 divine talisman,[The Flame King Arrives].

Even a late-stage level 5 warrior would be severely injured if he didn't die, let alone a mid-stage level 5 warrior like Tam.

Rumble!

The four divine talismans surrounded Tam from four directions.

The terrifying shockwave of the explosion instantly drowned Tam.

In the flames, Tam's protective blood qi was shattered and melted.

"Courage Slash!"

He endured the intense pain and brandished his giant axe with all his might, wanting to cut through the Sea of Fire, but it was useless.

"D*mn it, I, Tam, haven't comprehended my ancestor's Tyrannical Slash. Otherwise, I might have been able to fight these two!"

Tam wasn't afraid. He was just unwilling.

At the moment of life and death, in the Sea of Fire, a muscular swordsman in black armor appeared in the air. He grabbed Tam and took him away.

Tam didn't understand what was going on, but he was already ten miles away from the Sea of Fire.

The swordsman stood upright with his sword in hand.

Tam didn't know who it was, but since it was his savior, he quickly thanked the swordsman.

"Thank you, Senior. However, I still have to save my clansmen..."

Tam looked at the Sea of Fire in the distance with a worried expression.

"Even if you go, you'll be courting death. Let me do it. I know you have many questions. You just need to know that I'm indebted to the Badger Barbarian King."

The swordsman turned around and stepped into the void.

Tam quickly said, "Senior, the two people opposite have powerful divine talismans. I'll go with you!"

"If you go, you will only implicate me."

The swordsman disappeared, and his voice echoed in the area.

On the battlefield.

The Sea of Fire dissipated.

The Flaming Twins looked at the sky. They couldn't sense Tam's aura anymore.

"Hehe, you're still far from being able to compete with the Empire. A bunch of country bumpkins who only know how to use brute force. Kill all the remaining soldiers and defeated generals. Leave no one alive."

In the void, a figure appeared, and an invisible and intangible domineering aura gathered on his body. A total of six dragon phantoms formed by Dragon's Might fused into the greatsword!

"The Warlord Catalog, Domineering and Independent!"

Levi was like a dragon descending upon the world, slashing out with his sword.

The illusory aura of a tyrant suppressed the world.

The mages and barbarian warriors could not help but tremble. They stood rooted to the spot, instinctively wanting to prostrate themselves in worship.

In the Flaming Twins' shocked eyes, only the arrogant black-armored swordsman remained.

After the sword light passed, the Flaming Twins' eyes were unfocused, and their heads had already fallen to the ground.

Levi looked at the sky and murmured, "I've used Senior's method to save Senior's people, I'll take it as repaying your kindness."

Chapter 1387: Staying at Badger City

Io, Northern Territory.

In the wilderness.

Within the army of the Empire's mages, figures of level 1 and level 2 mages fell from the sky.

Their eyes were open, but they had lost their spirit.

If one observed carefully, they would notice.

In their minds, their spirit, will, and souls were completely scattered.

Silently, under Levi's 'Domineering and Independent' sword, the domineering aura emitted by Levi alone had killed all of them!

The consciousness of the mages above level 3 came back and looked at the black-armored swordsman who had killed the two Archmages in one strike.

The mage's voice could not help but tremble as he said, "You... Don't come over. We are the mages of the Empire. The Supreme Archmage is watching you."

The black-armored swordsman's expression was calm. His sword aura was like a pillar of light that destroyed everything, blasting the mages in front of him into pieces.

Some people took advantage of the chaos to flee into the distance, protecting themselves with divine talismans.

"Quick, quickly report to Archmage Myriad Thunder that a peak level 5 powerhouse from the Badger tribe has appeared!"

The mages fled frantically.

Levi's right arm turned into a red dragon head.

The dragon head opened its huge mouth, and terrifying Crimson Emperor Dragon's breath gushed out!

The high temperature swept through the wilderness, burning a passage that stretched for several miles.

The escaping mages were reduced to ashes.

After the world became quiet, the Badger Clan's warriors stared blankly at the invincible figure who had saved them.

"Who is this?"

"I'm not sure..."

"He's really strong."

“That move just now is a little like the ultimate skill of the former Clan Leader... It’s the Tyrannical Slash, but it’s even more powerful than the Tyrannical Slash.”

“But he doesn’t look like a Barbarian.”

Tam chased after the black-armored swordsman and landed on the ground.

“Senior, what’s your relationship with the Badger Barbarian King?” Tam was shocked and asked.

“I accidentally received some kindness from Senior Badger Barbarian King. I happened to pass by this place and saw his descendants, so I helped out,” Levi said honestly.

Tam suddenly understood and said, “I watched Senior fight. You should have obtained the Badger Barbarian King’s inheritance, right?”

Levi nodded.

He took out a copy of the inheritance and gave it to Tam.

“This thing was left behind by Senior Barbarian King. Now that it has returned to its original owner, I can be considered to have repaid Senior’s kindness.”

Tam's hands trembled after reading the inheritance.

"The Warlord Catalog... This is the king-level battle manual created by the Barbarian King. The clan originally had it, but it was lost due to the war a thousand years ago. Thank you, Senior. This is simply a timely help."

The moves they were learning now, such as the Fury Slash, the Domineering Slash, and the Courage Slash, were all simplified versions of The Warlord Catalog.

As for the middle three levels and the upper three levels, there was not even a simplified version.

"Senior, you aren't a barbarian, right?" asked Tam.

"I am a foreigner. I have come to the Northern Territory to seek refuge with the Winged Tiger Barbarian King. I want to work for him and gain some benefits," Levi said bluntly.

This was a common occurrence in the Northern Territory.

Tam said, "Among the six Barbarian Kings, the Winged Tiger Barbarian King is indeed the most suitable for an outsider like you. He is a man of his word, and it is very pleasant to work with foreigners."

Levi's heart skipped a beat.

It seemed that the Winged Tiger Barbarian King's credibility was not bad.

Tam said, "Senior, our tribe is not far from here. If you come with us, we can entertain you. After you rest, you can go find the Winged Tiger Barbarian King."

Levi readily agreed.

The Badger Clan was a tribe that once had a Barbarian King. Although it was declining now, its foundation was still there.

It was indeed a good choice to start from here.

...

Several days later.

Sunset Plains.

From afar, Levi could see the giant rock city of the Badger Clan.

Badger City.

The giant city was majestic and exuded an ancient aura.

“Our Badger Clan was once a tribe of a Barbarian King. However, everything changed when the Sky Badger Giant Beast died. But now that we have The Warlord Catalog, although we can’t become a Barbarian King Tribe for now, we can have a place below the Barbarian King. Senior’s great kindness is something our tribe will never forget!” Tam said solemnly.

Besides Tam, there were also two level 5 warriors guarding the city.

A level 5 warrior asked, “Clan Leader, I heard that the migration was ambushed by the Empire’s mages?”

Tam said, “Yes, this time, the Empire sent out the Flaming Twins of Sala City. We were almost completely wiped out. It was all thanks to this senior’s help that we were able to escape death.”

The Badger Clan warrior looked at the unattractive Levi.

This person was as burly as a Barbarian and looked extraordinary. The aura on his body was comparable to that of the Clan Leader.

“Thank you, Senior!”

“Thank you, Senior.”

“I didn’t expect that there would be such a brave person among the humans!”

The warriors hurriedly thanked him.

“Alright, that’s enough. Let’s go back to the city.”

Following that, Levi was temporarily staying in Badger City.

After he cultivated, Levi would go to the training ground.

Barbarian children who looked like they were only seven or eight years old were undergoing the ‘Spirit Awakening’ ceremony.

In the center of the training ground, the heads of all kinds of giant beasts were neatly placed in a sacrificial position.

Clan Leader Tam was standing there, holding an ancient bone axe.

Looking at the giant axe, Levi suddenly thought of the Badger Barbarian King. The giant axe he used was like this.

Tam began to sing a complicated ballad that was rough and ancient.

The elders of the clan also started singing.

Amidst the singing, a wisp of green smoke suddenly appeared from the bone axe.

The green smoke floated into the sky and transformed into the phantom of a giant beast that was hundreds of meters long and as tall as a mountain.

Chapter 1388: Heading to Saba City

The giant beast's head was like a hyena's, and its mouth was full of iron teeth.

Its body was thick, its muscles were strong, and its four claws were sharp.

"Is this... the spirit of the Sky Badger Giant Beast?" Levi muttered.

The transcendent inheritance of the Barbarians had a long history.

They were a race that was born when Io was created.

When Sauron first created the ancient tower, he probably brought some planes along with their civilizations.

“This transcendent method is quite novel. This giant axe must be a treasure refined from the remains of the Sky Badger Giant Beast.”

Looking at the giant axe, Levi thought of the Bloodline Divine Weapon of a knight.

There should be some similarities between the two.

The spirit of the Sky Badger Giant Beast transformed into rays of light that surged into the bodies of the children below.

At the same time, the elders in the clan all held a bowl of blood. They used a pen that looked like a silver needle to absorb the blood and began to draw the blood totem of the Sky Badger Giant Beast on the children.

The elders were like tattoo artists, careful and meticulous.

“This blood should be the blood of the Sky Badger Giant Beast that their clan has preserved. This tattoo should be able to communicate with the spirit of the Sky Badger Giant Beast... Did the power of the totem warriors come from the badger? If that’s the case, how does one become a level 6 Barbarian King?”

Levi was puzzled.

Logically speaking, the Sky Badger Giant Beast was only a level 6 being.

There was no reason for the totem warriors below to be so strong.

“Looks like it is because of the uniqueness of the Barbarians themselves...”

After the Spirit Awakening was over, Levi called Tam over and asked him about the cultivation and history of the Barbarians.

Tam told Levi everything he knew.

This was because the Transcendent Power of the Barbarian Race, which relied on the giant beast totem, could not be used by non-Barbarians.

After the conversation, Levi looked at the sky alone and pondered.

The Barbarian Race's path and the knight's bloodline path were two completely different transcendent systems.

Barbarians were not humans.

They were a humanoid race, just like elves and dwarves.

They were born as a transcendent race with boundless strength.

Even if a Barbarian does not do anything and simply grows up, the Barbarian's strength would be comparable to Nora's 'legendary knight'.

To put it bluntly, this race was born with the ability to obtain power from the transcendent giant beast.

Therefore, every clan would worship a totem giant beast as a guardian.

The so-called Spirit Awakening was only to open the treasure vault in the Barbarians' bodies.

If the previous totem giant beast died... The Barbarians could also find a new giant beast and worship it as a totem.

The stronger the totem, the stronger the tribe.

In Levi's opinion.

This was a very ancient transcendent path that was similar to the path of faith of the gods.

The 'totem giant beast' was the 'God' of the Barbarians.

Generally speaking, only the Barbarian tribes with giant beast totems above level 6 had a chance of producing a level 6 Barbarian King.

However, there was an exception. Tens of thousands of years ago, a tribe with only level 5 totems had a level 6 Barbarian King.

Not long after, the level 5 totem also benefited from this and advanced to level 6.

In short, because of the special nature of the Barbarians, they could establish a subtle connection with the giant beast totem that they believed in. This would strengthen their physique and blood qi, and then they could cultivate powerful combat techniques.

“These paths are not suitable for us humans, and they are different from my Bloodline Path.”

Levi was not discouraged.

He had received some inspiration from the Barbarians.

Moreover, after tasting The Warlord Catalog, Levi was also looking forward to gaining more and more powerful combat techniques while he stayed with the Barbarians.

A month later.

Badger City.

Levi looked at Tam and the others who were sending him off and said, “Please go back.”

Tam and the others thanked him again, “Thank you for your kindness, Senior!”

Levi waved his hand and said goodbye.

He had a good impression of the Badger Clan.

They were straightforward, frank, brave, fearless, but lacking in the brain department...

In the Badger tribe, he had collected some low-level combat techniques, but it was far inferior to The Warlord Catalog.

Levi planned to let the knight refer to these combat techniques and create combat techniques that were more suitable for knights.

Levi left Badger City and headed north.

A month later, in front of Levi was a giant city that was even grander than Badger City.

Saba City.

The Winged Tiger Clan's Holy Land.

There was a mountain peak in the city.

At the peak of the mountain, a huge black tiger that was hundreds of meters long and had a wingspan of a thousand meters was lying in wait.

It was in a deep sleep, snoring loudly and emitting a wild aura.

The current level 6 totem giant beast of the Winged Tiger clan, the Winged Tiger.

After Levi contacted Bagh, he learned that Bagh was still fighting in the south and was not in the city.

However, he had already sent someone to contact Levi.

Not long after, a group of people flew in front of Levi.

“You are the person recommended by General Bagh, right?”

“That’s right. I wonder if Lord Barbarian King is here?” Levi asked.

“Yes, he is. I’ll bring you to see the Barbarian King.”

...

In the city.

In the main hall.

A burly man, who was two stories tall, was sitting on the throne, drinking hard liquor from a large wooden barrel.

On the left, there were many level 5 Barbarian powerhouses, all of whom had vigorous vitality.

Most of them had the totem of a Winged Tiger, but there were also other totems.

On the right were guests of honor like Levi.

Levi even saw the shadow of an acquaintance.

He was wearing a flame robe with the pattern of the Fire Bull family.

His expression was calm as he sat there with his eyes closed.

“Farrah... It’s actually this fence-sitter,” Levi sighed.

Io was indeed really small.

Levi’s entire body had changed and was different from before. Therefore, Farrah didn’t recognize Levi.

Of course, there was no harm in recognizing Levi. With Levi’s current strength, he had nothing to fear from an ordinary perfected fifth-circle wizard like Farrah.

Chapter 1389: Sparring with General Kirby

Most of the other guests were wizards, and there was no lack of fifth-circle senior wizards.

“Is this the expert Bagh mentioned?”

On the throne, Barbarian King Barr’s voice was like thunder.

Barbarian King Barr’s aura was restrained, but his body seemed to contain a dazzling strength that made the level 5 experts present dare not look at him directly.

“Lord Barr, you can just call me Victor. I’m not considered an expert...”

Although it was fine to reveal his real name, Levi still made up a random name.

The Barbarian King also knew.

These foreigners definitely had ulterior motives, and none of them showed their true faces.

However, it didn't matter. As long as it could be driven by benefits, it was fine.

The Barbarian King said, "I wonder what talents you have... Can you show me? After all, my honored guest definitely can't be an incompetent person."

Levi smiled confidently and said, "Lord Barr, I know a little about spells and some combat techniques. How should I display them?"

The Barbarian King laughed and looked around. He asked loudly, "Generals, distinguished guests, who would like to experience Victor's abilities for me?"

At the honored guests' area, Farrah opened his eyes and glanced at Levi.

"Fifth-circle senior spiritual force. It's just so-so. It looks like he's dual-cultivated the path of body tempering, which is why he's so confident."

Farrah closed his eyes and continued to meditate.

Not long after he escaped from the Nine Cities Alliance, he encountered the year of unrest in Io.

Farrah took this opportunity to head north. With his perfected fifth-circle strength, he easily became the Winged Tiger Barbarian King's honored guest.

Farrah had already completed a few missions successfully and had gained a lot.

"Let me experience the abilities of the foreigner."

On the side of the Barbarians, a general with a violent ape totem on his body jumped out.

He was dressed in beast skin and did not conceal his vitality as he soared into the sky.

In his hand was an iron rod made of rare metal.

He was not from the Winged Tiger Clan but from the Violent Ape Clan.

He had just joined not long ago, so he naturally needed to display his strength to gain the Barbarian King's attention.

The Barbarian King laughed, "Good! General Kebi, I heard that you reached the middle stage of level 5 some time ago. Although the Violent Ape Clan has declined, you can't be underestimated."

General Kirby said in fear and trepidation, "It's not worth mentioning. Since I've joined the Winged Tiger Clan, I'll definitely go through fire and water for the Barbarian King."

Kirby looked at Levi and clenched his fists. He laughed and said, "If I hurt you, remember to shout for me to stop. Otherwise, I'll accidentally kill you... And you'd have to be buried in a foreign land, foreigner."

Obviously, this Barbarian fit Levi's impression of him very well. He was barbaric and rude.

A greatsword appeared in Levi's hand.

"My greatsword might be careless. Sir, please be careful as well."

Everyone headed out of the hall.

There was a huge arena with a diameter of about one kilometer in the city.

Its entire arena was made of hard rock, and the Barbarian King used a secret technique to solidify it.

It was to make it convenient for the brave Barbarian warriors to spar here.

A group of generals and distinguished guests who were watching the show watched from both sides. The Barbarian King descended from the sky and sat on the central platform.

The Barbarian King said, "Let's begin."

As soon as he finished speaking, General Kirby stomped on the ground with his right foot, and a circle of ripples swept out.

His speed was extremely fast, like a real ape. His arms exploded with strength, and his vitality was strong.

"Multiple Wind Strike!"

The combat technique General Kirby cultivated was the Violent Ape Clan's Giant Ape War Scripture.

Although the Violent Ape Clan had never produced a Barbarian King powerhouse since ancient times, they could not be underestimated.

There had been many peak level 5 experts.

As the giant rod flew, a 100-meter-tall dragon tornado formed in the arena.

Immediately after, wave after wave filled the entire arena.

This was a vortex formed by a combat technique. It was extremely fast and dangerous!

Such a powerful attack made the other generals nod their heads slightly.

“General Kirby is indeed a rare genius of the Giant Ape Clan. He should have mastered the Giant Ape War Scripture.”

“Yeah. Next, it would be up to the foreigner to deal with it... He sounded like an expert. Let’s see if he has the skills to back it up.”

In the arena, Levi was trapped by the airflow. He slashed his greatsword vertically!

The Warlord Catalog- Uncontainable Fury!

Apart from the most basic physical fitness and combat techniques, Levi did not use any other methods.

He had come to the Barbarian Race to cultivate and hone his combat techniques. Using spells or knight transformation would be bullying the Barbarians.

Of course, that was unless he encountered danger.

The fury merged into the sword in front of him, like the roar of a god or the roar of an evil dragon!

Sword light swept out.

The dragon tornado blocking Levi's path was destroyed.

General Kirby hid behind and was about to launch a surprise attack when a sword light collided with his giant rod.

Boom!

The power of the sword light sent him flying.

General Kirby looked incredulous.

In terms of pure physical strength, this foreigner was actually stronger than him, a level 5 Barbarian.

The foreigners he had dealt with before were not like this!

General Kirby retreated.

“Ape Strike!”

His body expanded, and his vitality filled his muscles, causing them to expand and making him transform into a three-story-tall violent ape.

“Ha!”

The giant rod split open the sky, a head-on blow!

“Good move!”

Levi swung his arm and swung his sword!

Thump!

After a dull metal collision, General Kirby felt as if he had been pushed up by a bull and couldn't help but rush into the sky.

His face was ashen.

After two rounds of confrontation, General Kirby was actually slightly inferior.

In front of so many great generals and the Barbarian King, this made him look bad in front of them.

If the Barbarian King found out that he only had this much strength, the Barbarian King would probably immediately ignore him.

Chapter 1390: The Elephant King's War Scripture

"I have to end this quickly. Otherwise, if he uses a spell, I won't be his match."

Kirby roared at the sky, and his vitality completely swallowed him.

“Sanguine Ape Technique!”

Kirby raised the giant rod, and the blood-colored rod’s shadow smashed down from the sky with a force that suppressed the sky!

Levi rose from the ground and stabbed forward with his longsword without fear.

Brave Man is Fearless!

The power of courage merged into his combat technique, causing Levi’s attack to become even more fierce!

Whoosh!

The heaven-shaking sword sent the Giant Ape’s giant rod flying!

Levi’s sword flashed and stopped in front of General Kirby.

General Kirby’s breathing quickened, and his heart trembled. Then, he smiled bitterly and said, “Thank you for your mercy, Sir.”

Levi chuckled, “It’s just a spar. Let’s stop here.”

General Kirby's face turned red as he fell to the ground.

Whether it was mentality or strength, he was completely crushed by the other party!

General Kirby was convinced of his loss.

"Kirby, can you do it? Did you lose just like that? That guy didn't even use any spells..."

Kirby retorted, "Don't grumble. If you can do it, go ahead."

The general with the giant bear tattoo said, "I'll go then."

After that, not long after...

Following the sounds of banging on the ring, the giant bear general ran down with a dejected expression.

"I was wrong. I can't..."

The foreigner in front of them was even more ferocious than the Barbarians. He was simply not human.

The giant bear general was also unable to force out the other party's spell and was knocked down by a few sword moves.

Some Barbarian generals didn't believe it wanted to go up, but they were stopped by Barr, who had an ugly expression on his face.

Barr scolded angrily, "Are you guys going to take turns fighting? Don't you have any warrior spirit?"

The generals lowered their heads and accepted the reprimand.

Barr smiled and clapped his hands.

"Good, good. It's our tribe's fortune to have you join us, Sir. May I know what you want from the Barbarian Clan?"

Levi said, "Naturally the resources that we foreigners need, or... Barbarian combat techniques."

Hearing this, Barr said, "No wonder I saw that your combat technique had a hint of the Barbarians style. It turns out that you want to learn Barbarian combat techniques. I have collected many Barbarian combat techniques. Other than the secret techniques of my Winged Tiger Tribe, you will have a chance to obtain them as long as you complete my mission."

Levi's eyes were filled with joy. He said, "Thank you, Barbarian King."

After that, everyone drank and chatted at the banquet.

Levi felt someone looking at him and saw that it was Wizard Farrah.

Farrah smiled at Levi and continued drinking.

After the banquet, Levi left Saba City.

Levi already had the Barbarian King's contact information. All Levi needed to do now was complete the mission.

As a foreigner, he felt uneasy staying in the land of barbarians.

Levi found a place, opened up a shelter, and settled down.

In the wilderness.

The starry night was silent.

Levi practiced the fourth level of The Warlord Catalog alone – Traceless Star Stepping.

Following the guidance of The Warlord Catalog, he looked at the stars in the sky and sensed the aura of the stars.

The cultivation difficulty of the middle three levels was much higher than the lower three levels.

Levi swung his sword continuously, trying to comprehend the profoundness within.

Days passed.

During the day, he meditated, cultivated breathing techniques, and studied spells.

At night, Levi cultivated the Rune Language and The Warlord Catalog.

A month later, Levi was already able to comprehend the aura of the stars.

Levi stepped out of the void and slashed out with his sword. The power of the sword was brilliant and dazzling as if it covered the entire sky.

The Sword Qi swept through the wilderness, tearing everything apart.

A thousand-meter-long ravine was formed!

[The Warlord Catalog proficiency +289]

“This is the feeling!”

Levi was in a good mood and continued practicing his sword.

Besides practicing, he would also look at the other combat techniques he had obtained.

Soon, Levi began his first mission.

The mission wasn't difficult. Levi had to head to an empire city and kill an enemy that was a level 5 Archmage.

Since Levi had successfully completed the quest, the Barbarian King had kept his word and allowed Levi to choose one of the rewards.

Levi chose a combat technique from the extinct Giant Elephant Clan.

The Elephant King's War Scripture.

This was a fist-and-foot combat technique. It was much weaker than The Warlord Catalog, but it was still very powerful.

This combat technique only had five levels, and Levi quickly learned the first three levels.

Levi –

[Elephant King War Scripture: Level 4 (1/20000). Special Effect: Elephant Stomp, Elephant Crush, Elephant Armor, Elephant Sky.]

...

The special effects of these Barbarian combat techniques were their moves.

Every advancement represented a breakthrough.

“One day, I will master all these combat techniques and create more powerful combat techniques!”

Levi was in a heroic mood.

After learning The Warlord Catalog, Levi seemed to have opened up a whole new world.

...

Time flew by.

Two years passed by quickly.

Year 1220 of the Holy Brilliance Calendar, the Month of Beginning.

Dark Ancient Tower Calendar Year 55.

Levi was 230 years old.

The 119th round table meeting.

There were no level 1 Knights left among the 18 Twilight Cavalry.

Even the weakest was at level two.

Time did not hold back, not even the new generation who joined the last. The 'Pheasant Knight' and the 'Snow Dragon Knight' were all from forty to fifty years ago.

Among the older generation, the Black Knight had finally stepped into the realm of a level 4 knight.

The Black Knight relied on his knight cultivation and the resources of the Midland to push his wizard cultivation to the second-circle. Then, he started to cultivate other things.

After all, the knights had many tricks up their sleeves now.

The Black Knight's Bloodline Dharma was called the Raging Battle Roar!

This was a towering minotaur Dharma Idol.

It was obvious that the Black Knight had carried out the minotaur path to the end.

The breathing technique, Bloodline Dharma Body, and Bloodline Dharma Idol were all minotaurs.

[Raging Battle Roar]'s ability was very powerful. After using it, it could greatly increase the Black Knight's strength.
