

## **Wizard 141**

Chapter 141: Transcendent Endurance, Vast as the Great Lake! (5)

This time, Levi wanted to use the Seal of Hell to the maximum and store enough Cores of the Undead before leaving.

Wild Dog Knight rubbed the back of his head and said embarrassedly, "Alright, then, be careful, sir. I'll wait for you in the Snow Capital City. I'll help you keep an eye on the sale of Frost Heart. However, I've heard that Frost Heart seems to have been purchased by the royal family and the church. Very few of them are circulating.

After all, he only needed to lead the way for the White Wolf, and he could earn 100 gold coins. There was no danger in staying in Ice City.

He could tell White Wolf was probably here to collect Frost Heart.

He did not know what that was used for, but that was the man's secret.

"Just try your best. We will meet at the Shining Tavern in Snow Capital City.

Don't run around. I don't want to find out that you have gone to see Heavenly

Father in heaven after killing Snow Demons."

Wild Dog Knight boasted, "Don't worry; this isn't our first time working together. You've seen my character; I'm reliable."

Levi nodded and parted ways with Wild Dog Knight.

While traveling with Wild Dog Knight, Levi had learned several common languages of the Evernight Kingdom, enough for him to communicate with the people here.

The difficulty of learning the language in the Evernight Kingdom was much lower than in Tuva. It was similar to Japanese and Chinese.

Next, aside from needing Wild Dog Knight to continue leading the way to Icicle Islands, Levi did not need to bring him to translate for him at all times.

He would not always force Wild Dog Knight to follow him. If he did, he would only be a burden in the hunt for Snow Demons. After all, Wild Dog Knight was just a low-level knight. He was probably too weak.

After parting with Wild Dog Knight, Levi first visited the Shining Tavern in the city to establish some missions.

The task was nothing more than the things from before, such as the Turbellarian Egg, breathing techniques, etc.

He might have to stay in the Evernight Kingdom for a while, so he might as well try his luck here.

The trip to the Holy City was a lucky one.

He hoped that the Goddess of Luck would continue taking care of him.

When he left the Shining Tavern, Levi's complexion was good. He had already gained a basic level Bloodline Breathing Technique: Silver Mink Breathing Technique.

Fifty gold coins for it; it was a good deal.

This speed-type Bloodline Breathing Technique had twenty-four tiny figures. A beautiful and handsome silver giant mink was in the middle of the inheritance diagram.

This seemed to be a legendary beast that was circulating in the extreme north. It was rumored to travel through the void at a breakneck speed!

"Not bad. I can cultivate to the maximum of level 5 and gain two points to break through. I can arrange it in the next few days."

Levi's Siren Breathing Technique was only 2 points away from breaking the limit, and he could continue to gain experience points. This Silver Mink Breathing Technique was a timely help.

"As expected, the Goddess of Luck still loves me." "My cultivation will reach its maximum within two months."

Levi was in a good mood.

To him, cultivating a basic breathing technique was as easy as drinking water. Learning a peak level-5 breathing technique every two months was easy for him.

Moreover, he did not need to use many breathing techniques recently, so he might not even need two months. One month would be the maximum.

After leaving the Shining Tavern happily, Levi rented a quiet place in the capital. This would be his next residence in the capital. He would not go before he reached the maximum of the Seal of Hell.

Then, he went to the kingdom's military station and registered for tomorrow's hunting operation.

The kingdom would not pay hiring fees for wandering knights like Levi, who took the initiative to participate in the hunting operation. Moreover, Levi and the others had to prepare their weapons and defensive equipment.

However, to encourage more wandering knights to join the Hunting Team, the Royal City would provide a little subsidy based on the number of Snow Demons killed, which was better than nothing for Levi.

And the standard to determine the number of Snow Demons killed was the “Frost Heart.”

This was the Core of the Undead that Levi needed.

A Frost Heart could get him a subsidy of 5 gold coins. Naturally, Levi was not interested in it. However, this price was still attractive for those wandering knights in dire straits with no fixed residence.

Relying on this method, the Evernight Kingdom had gathered many wandering knights from other regions in the past few years.

Relying on the help of these outsiders, the Evernight Kingdom could barely resist the growing Snow Demon disaster..
