

Wizard 142

Chapter 142: Fierce White Wolf! (1)

At night, Levi organized the things for tomorrow's operation.

Although he had absolute confidence in his strength, he was still used to preparing in advance.

After all, he was unfamiliar with this place. Levi had to be wary of the Snow Demons and the people here.

Then, Levi opened his proficiency panel.

[Seal of Hell: Level 2 (500/5000)]

"A normal Core of the Undead can provide 100 Proficiency points. The Seal of Hell's maximum is level 5, so I need 34500 proficiency points. In other words, I'll have to kill 345 Snow Demons. That isn't too difficult," Levi calculated.

Of course, besides cultivating, Levi also needed to store many Cores of the Undead for future use.

The level 5 Seal of Hell required five Cores of the Undead, which was quite a considerable consumption. Therefore, Levi needed to store at least 1,000 Cores. Coming to the Evernight Kingdom was difficult, so it was better to get more at once.

Of course, he was unsure if the Seal of Hell's maximum was level five. It was just that the Constantine Family's ancestor had cultivated to level five, but that did not mean that the seal's limit was level five.

"Try to settle it in a month; then we'll set off for Icicle Islands."

Levi had a sleepless night. After becoming a grand knight, he needed very little sleep. He only needed to sleep for a few hours every day. It was okay, even if he did not sleep for a few days.

This was the Liver Emperor's self-awareness. How could Levi sleep before he became the strongest?

He cultivated breathing techniques and waited for the arrival of tomorrow.

The Blood Whale Breathing Technique was already at its maximum, and there were no other endurance breathing techniques to break through the limit, so this could be considered a temporary graduation.

Levi could only cultivate the Giant Rhinoceros Breathing and Black Snake

Breathing Techniques. Levi could develop the Giant Rhinoceros Breathing Technique to the maximum level 8 by the end of the year if everything goes smoothly. Of course, there was also the Silver Mink Breathing Technique that he had just obtained.

Thinking of this, Levi took out the breathing technique inheritance diagram.

He began to cultivate the breathing technique according to the posture shown on the inheritance diagram.

A few hours later, another new skill appeared on Levi's proficiency panel.

[Silver Mink Breathing Technique: Level 1 (1/1000)]

"I'm getting faster at cultivating elementary breathing techniques."

Levi could not help but remember that he had spent one or two months learning the Frost Wolf Breathing Technique, but now, he only needed a few hours.

"The secret medicine of the Silver Mink Breathing Technique is widespread. It's the mink claw. It's straightforward to obtain it in the extreme north."

With the supply of secret medicine, Levi was confident that he could push this breathing technique to maximum within two months.

The time spent cultivating the breathing technique flew by. After Levi rested for a while, it was already dawn.

In the extreme north, the time of day was limited, so the sky outside was still pitch-black.

It was already time to gather. Levi packed his things and set off for the military camp with Magic Shark.

When he arrived, there were already many wandering knights at the scene. They had all brought their defensive equipment, weapons, and rations. Many of them looked highly excited.

After all, for every Snow Demon killed, they could receive 5 gold coins from the kingdom.

This was already a considerable reward for these wandering knights who had no skills, no territory, and nothing to do all day.

Killing a few more Snow Demons would allow them to get decent equipment.

Those who signed up for the Hunting Team and passed the screening were at least Knight Attendants.

Theoretically, mortals could also kill Snow Demons with mithril weapons, but that was inefficient. Moreover, mithril weapons were not popularized.

Rather than handing the mithril weapons to mortals, it was better to hand them over to knights. At the very least, they had to be Knight Attendants. Only then could they hunt Snow Demons relatively efficiently.

Levi noticed that regardless of whether these wandering knights wore armor, they all had a mithril longsword. It could be seen that mithril could restrain Snow Demons. This was already a well-known fact in the region.

However, although the weapons consisted of mithril, their mithril purity was too low, perhaps not even 1%. Such weapons could only cause limited damage to Snow Demons. It might take a long time to grind a Snow Demon to death completely. It was only slightly stronger than iron weapons but better than nothing.

After all, they were relatively poor wandering knights. They had saved up a long time to buy this bit of mithril.

Levi immediately felt superior.

He realized that not only was his strength far superior to these people, but he was also a crane in a flock of chickens.

His equipment was far exceptional.

His mithril sword was highly pure, and after Levi's continuous recasting, it had almost reached 50%.

It could be said that Levi's Frostmourne cost thousands of gold coins in mithril alone, which was beyond the imagination of the wandering knights.

Not to mention Levi's 100% pure Frost Giant Armor.

With such luxurious equipment, it would be hard not to kill thousands of Snow Demons.

Soon, all the teams that had left the city to participate in the hunting operation were gathered. There were a total of 200 people.

The Knight Attendants and Quasi-Knight comprised most of this team of two hundred Deoole.

There were only about 20 Official Knights, and most of them were low-level knights. There were very few mid-level knights and only one high-level knight. He was a burly man with a nose ring, and he was very eye-catching in the crowd..
