

## Wizard 145

Chapter 145: Fierce White Wolf! (4)

Creatures like Snow Demons were similar to Levi's "living dead."

The stronger one was when they were alive, the stronger they would be after mutation.

Ordinary people who had mutated into Snow Demons, Knight Attendants, or some strong people could be killed with mithril weapons.

If a Snow Demon had mutated into a knight, coupled with its indestructible characteristic, unless the mithril sword were pure, no knight would be a match for it.

As for the snow leopards in this world, although they only had the strength of a Quasi-Knight after they matured, they were swift and agile. Therefore, dealing with them would be challenging even for an Official Knight.

The Snow Demon caught Bray off guard. He roared angrily and threw the snow leopard down from his body. Then, he raised his vast axe and attacked, but the snow leopard dodged it.

"Calm down, don't attract the other Snow Demons," Kader said with a frown.

"It's too late. They're already here."

Levi pointed at the entrance of the village. He did not know when, but there were already 13 Snow Demons. Most were humanoid, while a small number were hounds or mutated creatures. They all emitted a blue light and charged at the trio quickly.

"Let's go, don't linger in the battle! Lure them to the main group and use the advantage of numbers to kill them. Even if we kill these Snow Demons, we will waste much energy and pay a big price. There is still one day before the destination. We can't waste our energy here!" Even Knight Kader, a peak Imight, was so afraid of these Snow Demons, which surprised Levi.

Knight Kader unsheathed his longsword and slashed at the snow leopard charging at him.

The snow leopard was cut in half at the waist and wailed in pain. There were burn marks on the cut, but they were relatively weak.

But soon, the blue light spread, and the bones were put together again.

Kader's expression was gloomy. He did not care about the snow leopard anymore and quickly retreated.

After failing twice, the snow leopard charged toward Levi.

Without saying a word, Levi stabbed his sword into the snow leopard's chest.

Instantly, the highly pure Frostmourne burned the snow leopard's body, causing it to struggle.

The snow leopard lunged at Levi but was caught by Levi's large hand filled with black energy.

Crack!

Levi only used a light force, and the snow leopard's fragile skull was crushed!

He tore the snow leopard in half from the middle.

Then, Levi used Frostmourne to pin the snow leopard to the ground. He stepped on the left side of the snow leopard's body with one foot and the other on the other side.

"I want to see how you can put them together!" Levi sneered.

He forcefully took out a stone that was emitting a dark blue light.

This stone was slightly larger than the one he had obtained before.

The quality should be a little better; perhaps it could provide more energy.

This was the Frost Heart.

After putting it away, Levi looked at the Snow Demon charging at him and stretched his muscles. He did not need a high-level combat technique like the Golden Cross Slash to deal with these ordinary Snow Demons.

Levi used Basic Sword Techniques and Frostmourn to reap their lives.

He violently stepped on a Snow Demon and crushed its head, getting increasingly familiar with the movements of taking out Frost Heart.

He did not care about the Snow Demon that attacked him.

Surging black gas burned around him. These Snow Demons, transformed from ordinary people, could not break Levi's defense.

He was still very safe as long as he did not run out of energy,

As for Levi, who had Transcendent Endurance, a dozen ordinary Snow Demons would not exhaust his stamina. At most, it would just be a warm-up.

Ultimately, all the Snow Demon's bones were scattered on the ground. Levi put away the 14 Frost Hearts in satisfaction. This was 1400 Seal of Hell Proficiency points.

Kader and Bray were stunned.

They suddenly realized that compared to the Snow Demon, this man who called himself White Wolf Geralt was even more terrifying....
