

## **Wizard 1531**

Chapter 1531: Reunion at the Gray Tower, the youth of then is still present today!

Triss said:

"I have some new research topics on potions on my side. If you have time, you could help me with some of the research work, and of course, I will pay you for the projects."

Levi said:

"No problem, lady, your business is my business."

Triss, covering her forehead, pondered:

"It seems there's nothing else... Oh, right, Lady Idrasala is a great opportunity. You could get closer to her. She is from the pure-blooded Dragon Clan, and although she just reached level 8 not long ago, in the scope of the Endless Sea, she is a top level powerhouse. The true combat power of the pure-blooded Dragon Clan can't be measured by common standards."

Levi said:

"I understand."

He knew that the little girl was strong, but he had not realized that she had already reached level 8...

Level 9 is the complete adult form, and level 8 could certainly be considered a sub-adult.

Levi began to worry a bit, wondering if the little girl would realize he was deceiving her... after all, she was a level 8 powerhouse, and her means were far beyond what Levi had imagined.

"Oh well, it's useless to think about this. If the little girl wants to kill me, I can't resist anyway. Since she hasn't reacted, it's highly likely she hasn't noticed anything, given that the Dragon Clan's mental maturity is relatively slow..."

As Levi was about to leave, Triss said:

"There's one more thing..."

Levi said:

"Please speak, lady."

Triss said:

"When you have time, go to the Association and get your Five-Ring Pharmacist Qualification Certificate. I will announce in the future that you are my direct disciple pharmacist. I know you don't like being in the

spotlight, but only this way, it will be convenient for me to introduce some real big shots in my circle to you. I have known these influential figures for many years, and their basic character is guaranteed, so you don't need to worry too much."

Levi pondered for a moment and said:

"Alright, I will get the certification as soon as possible."

Triss waved her hand, and a card flew into Levi's palm.

"This is my letter of recommendation. With this, you can go to the Pharmacist Association Headquarters in the Star Sea area for certification, and they will open some doors of convenience for you."

Levi gratefully said:

"Thank you, lady. I will repay this great favor in the future!"

Triss waved her hand, signaling Levi to leave.

Levi arrived at the Witch's Family shop, hoping to find some good items to purchase.

Upon opening the product list, he immediately noticed an excellent item.

"One portion of Immortal Banyan Dragon Bloodline Essence, price: 500,000 Aether Stone."

Levi was thrilled; he hadn't expected to stumble upon such a fortune.

He didn't bother asking why the price of the bloodline essence had soared so drastically and hurriedly made the purchase.

Before long, a bloodline essence, radiating with earthy yellow and pale golden hues, appeared in his hand.

Then he asked:

"Lady, I remember the previous price of bloodline essence was 100,000 Aether Stone per portion... Why has the price increased so dramatically?"

The store manager glanced at the somewhat unfamiliar Levi and indifferently said:

"I'm not sure, it was the organization's decision."

Levi looked contemplative and decided not to dwell on this issue. It must be related to the Immortal Banyan Dragon's promotion.

He couldn't complain about the 500,000 price tag; even if it was a million per portion, he needed to buy it.

The Immortal Banyan Dragon was from the earth dragon clan, and its bloodline essence, if nothing went wrong, was one of the main materials needed for the advancement to level 6 of the Golden Snake Breathing Technique. Next, he only needed to find one more water-element dragon clan.

Of course, he was merely speculating based on the materials required for previous advancements. Whether the actual situation for advancing to level 6 was as presumed, he couldn't be sure, especially since his Golden Snake Breathing Technique had not reached its maximum yet.

Moreover, if he had the chance to obtain evolution materials in the future, he would prefer to evolve the Golden Snake a notch. This would allow it to remain consistent with the other Five Dragons.

Levi glanced through the other items in the list, then left the shop expressionlessly.

The potion formulas required for the breakthrough of the primordial soul were not available. It seemed even if they were on sale, as an external wizard, he probably couldn't purchase them.

"I'll have to start with Triss... after all, she owes me a favor."

Triss definitely had the breakthrough formulas for the primordial soul; when the time came, he could just ask Triss to help directly, and Levi would prepare whatever materials were needed.

...

Nether Capital.

Witch's small shop.

Nearly seventy years had passed. Ms. Celia looked still youthful, but her cultivation seemed only to be that of a fourth-circle senior.

Being part of the Witch's Family was already considered outstanding among many, but there were still large gaps among these outstanding individuals.

When Levi appeared, Celia was slightly bewildered, until her memories flooded back and a hint of envy flickered through her calm eyes.

"Levi... senior, are you at five rings now?"

Levi smiled and said:

"Got lucky! Celia, you're also a fourth-circle senior, aren't you? Five rings are in sight for you."

Celia set down her book and said with a bitter smile:

"I... I'm already 500 years old, with only 200 years of lifespan left. Reaching five rings is difficult."

Levi frowned and said:

"Ms. Celia, how can you talk of giving up so easily? A lot can happen in 200 years."

Celia said:

"Thanks for the encouragement. You're really kind, always so easy-going despite being a genius, just like senior Anya."

Levi seriously said:

"Celia, has there been any auction in Nether Capital, or the Endless Sea lately?"

Celia thought for a moment and said:

"I haven't heard of any high-end auctions recently. The lower-end ones certainly wouldn't interest you. I'll keep an eye out and notify you immediately if anything comes up."

Chapter 1532: Reunion at the Gray Tower, the youth of then is still present today!

Levi handed Celia a bag and a slate.

"Thank you for your help. I still need some materials, so please keep an eye out for me and contact me if you find any clues."

Celia took the bag and discovered to her astonishment that it contained a hundred thousand Aether Stones, no small sum for her.

Most importantly, in the corner, there were several fourth-circle Meditation Art supplementary potions, enough for her to cultivate for some time.

Celia was not one to put on airs, so she quickly expressed her gratitude:

"Thank you, Senior, for your trust."

Levi replied:

"We've known each other for a long time, no need to be formal."

With that, Levi left.

Celia and the little witch watched Levi's departing figure, standing still in place.

"Is this the world of geniuses?"

...

Green Forest Island.

The grass was lush, and flowers bloomed brightly.

In the herbal garden, the Lush Forest Witch looked at the freshly matured Five-Ring Medicinal Herbs with delight.

Unbeknownst to her, a figure appeared beside her, causing her to startle, but she relaxed upon seeing who it was.

The newcomer was Levi, and the Lush Forest Witch said with a smile:

"Senior Levi gracing us with your presence, you must be looking for Marlene and the others, right?"

There was a time when Levi had to call her senior. Now the tables had turned, and it was her turn to address him as senior.

Two hundred years, to Lola, seemed to change little. Yet, it was enough for Levi to transform into a Dragon.

Levi said with a smile:

"Where have Marlene, Winnie, and Leah gone?"

The Lush Forest Witch replied:

"Marlene has gone to interview candidates at the Pharmacist Association, Winnie is applying for her second-circle pharmacist certification, and Leah has accompanied her."

Levi said helplessly:

"I see... By the way, where is White Snake Jorman?"

The Lush Forest Witch said:

"Jorman was taken away by his old master, Salman, the first Tower Master of the Gray Tower. He said there's a chance for Jorman."

Levi recalled the melee wizard in his mind, he had a good impression of the interesting old man.

It's worth mentioning that Jorman is now a third-level creature.

With this opportunity, his future journey would likely be longer.

In the end,

Levi visited the graves of people like Tim and Marko, then left with a sigh.

He was also planning to go to the Pharmacist Association and might bump into Marlene and the others there.

But before that, he wanted to visit some old friends at the Starfire Wizard Academy.

...

Starfire Island.

Today marked the day when Primordial Soul Wizard Jacob formally assumed the position of vice chancellor of the academy, gathering teachers and students from all departments to celebrate the occasion.

The Rose Witch, returning from Ghost Gate, had successfully advanced to the fourth-circle, and now, with Newt at her side, was teaching at the wizard academy.

Huffman from the Pharmacy Department drank alone, reflecting on life. He was now a senior fourth-circle wizard and was very satisfied with his progress.

Xavier of the weapon-making department had just advanced to the fourth-circle, mingling in the crowd, laughing heartily.

The Holy Infant's acquaintance from the ancient tower, Wizard Beckman, with his fifth-circle cultivation, even became a professor at the Pharmacy Department.

The amiable Black Pearl Boy Garcia was among the crowd, not putting on any airs of a primordial soul.

Suddenly, the figure of a fifth-circle wizard arrived.

Rose and the others showed a surprised and happy expression at the newcomer.

Xavier laughed and said:

"Hahaha, Sir Levi... Ouch, you are now a fifth-circle, I was presumptuous, hello Senior."

Levi patted Xavier's shoulder and said with a laugh:

"Don't bother with all that flattery, let's go get a drink."

Gathering this group of friends, they found a quiet place.

Of the group from the past, only Levi had reached fifth-circle.

Huffman remarked:

"Back in Riptide City, I knew you were no ordinary person, time has proven my judgment."

Xavier said:

"I knew Levi was extraordinary when I was at the Black Pearl Market."

Rose joked:

"Levi, when will you visit Sword Flower Tower? My twenty sisters are waiting to get to know you and make friends."

The 24 Flowers had wilted by three, leaving only 21.

Levi's heart stirred.

Having come to the Wizard World, it was indeed time to visit Sword Flower Tower; otherwise, it would be too disrespectful to the Flower Knight.

He said with a smile:

"Once I'm done with the business here, I'll go and meet all the lovely ladies."

Newt said with feeling:

"Looking back at the past and seeing today... Levi, you're bound to be the one who goes the farthest among us all."

Looking up at the sky, Levi said:

"Perhaps, the path of a wizard is long and full of obstacles. Without entering the primal soul, one ultimately leaves in obscurity. I hope one day, you all will make a name for yourselves across the Endless Sea."

Before leaving the academy, Levi visited Senior Garcia.

Garcia was happy about this and once again invited Levi to be a guest professor at the academy.

This time, Levi happily accepted and went with the flow, joining the pharmaceutical department.

Before reaching the primal soul, he intended to make as many worthy connections as possible; these were all hidden treasures.

...

Several days later.

Star Sea.

Pharmacist Association.

Marlene, Winnie, and Leah took the airship and left the place, heading back home.

Winnie was excited.

"I'm now a second-circle pharmacist too."

Marlene said:

"Congratulations, being a witch in this wizard world, it's still necessary to have a specialty."

Leah said:

"I also want to become a pharmacist, but I plan to consider it after I reach the third-circle."

Looking at Leah, Marlene commented:

"It's because you're not diligent enough in your cultivation; with your talent, you should have been third-circle by now. You all should learn from Levi."

Chapter 1533: Reunion at the Gray Tower, the youth of then is still present today!

Leah pouted, feeling that she had been working hard, cultivating at least eight hours a day.

They spent three days talking and laughing, chatting about future plans.

They didn't know how long they had been traveling when suddenly, there seemed to be fluctuations of a battle coming from up ahead.

Marlene, with the highest cultivation, had her expression change, said,

"Let's take a detour. Just the remnants alone hold such power; it could be a fourth-circle or even Fifth-Circle Wizard fighting. With the ancient tower closed recently, some dark wizards have begun to surface, specifically targeting those returning from the ancient tower."

The three of them changed direction and quickly left.

Not long after,

a witch in a grey robe with slitted eyes caught up to them, raising her hand to conjure a wizard's hand tens of meters large, launching it towards Marlene and her companions.

The Grey Robe witch laughed,

"Giggle, giggle, giggle, thinking of running after seeing us in action? Stay right here!"

Marlene waved her hand, and streams of water formed dolphins that leaped from the sea surface and bombarded the giant hand.

The hand smashed everything and came attacking again.

The three witches fought back together but to no avail.

Seeing this, Marlene immediately threw out a blue, ring-shaped Fourth-Circle Wizard Tool.

This was the Ocean Ring, considered top-grade among the fourth-circle, a life-saving gift from Levi.

It's not that Levi grudged giving her a Fifth-Circle Wizard Tool; it was just that Marlene's cultivation couldn't handle the Fifth-Circle.

Caught off guard, the Grey Robe witch was trapped, and Marlene quickly led the two women and rapidly fled.

By the time the Grey Robe witch escaped the trap, Marlene and her companions had already gotten very far.

She cursed continuously.

Just then, a Mechanical Tyrannosaurus dropped from the sky, its sharp dragon claws instantly grabbing her.

The Grey Robe witch panicked,

"Which rat dared to use alchemical creatures to ambush me from behind? I'm from the Sunken Ancient Castle-Black Shark Ancestor Witch. If you dare to kill me, await revenge."

The Mechanical Tyrannosaurus's eyes sparkled red, and with a gentle squeeze, it turned the Grey Robe witch into a patty of flesh.

Herman mumbled,

"People from the Sunken Ancient City, huh?"

The Steel Sea Dragon emerged from the seawater, revealing its sleek streamlined body.

Stella said,

"Marlene and the others just ran into some misfortune, but fortunately, we arrived in time."

The Tower Master and his wife had been looking for companions from the Gray Tower and eventually found out Marlene's location. They hurried over excitedly, and before they could meet, Marlene had already run into trouble.

"Let's go, let's find Marlene."

Elsewhere.

The escapee Marlene breathed a sigh of relief and said,

"We've been saved by Levi again. From now on, let's not leave the house, just peacefully cultivate on Green Forest Island."

Winnie didn't respond, just staring blankly ahead.

A Mechanical Tyrannosaurus with a metallic aesthetic and a bloodthirsty aura descended from the sky. On the sea surface, the Steel Sea Dragon also slowly emerged, stirring giant waves.

The strength of these two mechanical creations was terrifying enough to suffocate these second-circle witches.

Marlene's heart also sank.

"What's really going on today?"

Just then, the Mechanical Tyrannosaurus suddenly spoke,

"Little Marlene, did I scare you?"

At that moment.

Marlene stood rooted to the spot, as if struck by lightning.

"Teacher?"

On the Mechanical Tyrannosaurus, an eerily lifelike human projection emerged. It was that familiar old man, Herman!

"I am back!"

A projection of Stella also appeared in midair.

"And me too."

Marlene cried tears of joy, her voice trembling:

"We just knew you would come back... So, you both turned into alchemical creatures?"

The Tower Master said,

"You could say that. This isn't the place for pleasantries. Let's find a safe place first; that woman had accomplices."

The Steel Sea Dragon opened its mouth wide and sucked Marlene and the others inside. Both mechanical creations disappeared on the sea surface.

Not long after,

a man in a shark-patterned black robe, accompanied by three fifth-circle wizards appeared.

Black Shark Ancestor Witch·Sai Ke, a notorious dark wizard on the Savages List with Fifth-Circle Perfection-level cultivation, right-hand man of the Sunken Ancient City Six-Circle Wizard, Black Shark Devourer.

He had just robbed a fifth-circle wizard returning from the ancient tower. Unexpectedly, his woman, sent merely to handle a few minions, hadn't returned, clearly having been killed in retaliation.

He twitched his nose, his mouth curling into a smirk, revealing shark-like sharp teeth.

"Follow me, the enemy hasn't gone far. Kill them all, spare no one!"

...

On the sea surface.

Levi had already returned from the Pharmacist Association Headquarters.

He looked at the Five-Ring Pharmacist Qualification Certificate in his hand, feeling pretty good.

"Skipping the line makes things so convenient..."

The Five-Ring Pharmacist interview went smoothly. With Levi's expertise, plus Triss's connections, how could he fail?

Recalling the slightly fawning looks of the examiners, Levi knew Triss's status within the Pharmacist Association.

"A true man lives between heaven and earth, how can he languish under a woman for long... Eating soft rice is sweet, but I, Levi, still need to rely on myself. Let's go to Sword Flower Tower to see my team members and also the Legendary 24 Flowers."

Levi transformed into a beam of light, disappearing over the sea surface. After flying for who knows how long, the Jin in his mind started squeaking uneasily.

Levi called Jin out, saying sternly:

"Don't tell me the treasure is on someone else again. That's not treasure hunting, that's robbery!"

This kind of situation with Jin wasn't the first. Every time Levi went, he found just a wizard passing by. Turns out the treasure was always someone else's storage ring, and Levi could only sheepishly leave.

Jin, scolded, frantically ran circles inside the Divine Ring Tower.

"Could it really be an extraordinary treasure? Fine, let's go take a look this time. Lead the way."

Chapter 1534: Reunion at the Gray Tower, the youth of then is still present today!

Jin excitedly crawled out from Levi's nostril, his little hand pointing in a direction, squeaking loudly.

Levi's body was flashing with the Hermit Rune as he entered the Scarlet Dark Dimension, disappearing without a trace.

...

Above the sea surface.

The Steel Sea Dragon cut through the waves with the wind.

The Tower Master was guarded from behind, watching out for enemies.

He furrowed his brow.

Behind him, a creature resembling a shark, came hurtling toward them like a cannonball.

"So this is the Black Shark Ancestral Wizard? With the strength of a perfected fifth-circle, it is indeed somewhat troublesome."

Both the Tower Master and Stella now had strength comparable to that of an ordinary fifth-circle senior wizard since they had not been promoted for long and had not yet mastered many powerful mechanical techniques.

The Black Shark Ancestral Wizard, seeing the two mechanical creations ahead, subconsciously assumed they were someone's alchemical creatures.

If someone had such powerful alchemical creatures, they must be a perfected fifth-circle wizard.

He sneered:

"Hiding your heads and showing your tails, too scared to show your true faces... Since that's the case, I won't be polite and will take these two alchemical creatures for myself. You three, form the array and trap the enemy!"

Three fifth-circle wizards emitted three rays of light that soared into the sky.

At the same time, a massive triangular cage descended from the heavens, trapping the Tower Master and Stella within.

But in front of the Tower Master, mechanical runes like code floated and flickered.

"Zero, break the array!"

The Tower Master was calm in the face of danger, as a mechanical voice echoed in his mind.

[Zero has received the order]

Immediately after, hundreds of mechanical tentacles suddenly extended from behind the Tower Master.

These mechanical tentacles wildly danced, incessantly injecting mysterious mechanical runes into the major nodes of the triangular array.

The array flickered wildly and trembled.

Seeing this scene, the Black Shark Ancestral Wizard was flabbergasted.

"What kind of technique is this? Alchemical creatures can break arrays?"

He took action personally, transforming into a giant shark and plunging into the array.

"Interesting, this technology seems to be even more advanced than the School of Alchemy. Today, I'll capture you alive and bring you back for my teacher to study slowly."

Once a perfected fifth-circle wizard took action, their might was overwhelming.

Just as the Tower Master began to break the array, he was slammed into by a giant shark and sent flying.

His whole body, mechanical claws embedded into the giant shark's flesh.

"Rip!"

Terrifying strength tore the giant shark apart.

"Hehehe."

Accompanied by strange laughter, more and more giant sharks surged from all directions.

These giant sharks were transformed by the Black Shark Ancestral Wizard's spells and seemed inexhaustible.

If it were a common fifth-circle wizard, they would have been captured long ago. He was not some substandard Cave Wizard.

The Tower Master's mechanical arms whirled wildly, tearing apart these sharks, while at the same time, from the ends of his tentacles, one projectile after another was shot out.

Boom, boom, boom!

After a series of explosions, a mechanical voice came to the Tower Master's mind:

[Enemy energy level too high, it is recommended to flee...]

The Tower Master communicated with Stella through a message:

"You just run, I'll hold them off for a moment, and then find a way to join you."

Stella said:

"Are you... sure you can escape? We might have a chance if we join forces."

The Tower Master said:

"Trust me, I don't do things I'm unsure of."

The Black Shark Ancestral Wizard took a fierce breath, and boundless seawater was drawn up into a hundred-meter-wide flame flow, shooting towards the Tower Master.

Inside Stella's belly, Marlene and the others looked serious and worried as they asked:

"Stella, is our teacher alright?"

Stella fell silent, clearly worried, but she believed in Herman, and she spoke softly,

"Don't worry, we've retreated from the Great Expedition battlefield across planes; this is nothing."

The Tower Master drew a circle with his hands, and a round energy shield materialized out of the void.

Boom!

The fiery breath arrived in an instant!

The ocean trembled, and the beasts lay dormant.

Bewildered, the Tower Master retracted the energy shield; in front of him stood a towering, majestic figure, immovable as a mountain amidst the breath.

After the breath dissipated.

Invisible Qi erupted around him, scattering all the seawater; his sleeves billowed, revealing full, rounded muscles.

The Black Shark Ancestor Witch's expression froze; the person before him had a spiritual force fluctuation that didn't seem inferior to his own. There was a high probability that he was also a Perfection-level fifth-circle wizard.

He said coldly,

"Another meddler? Well then, you can all stay behind!"

The Black Shark Ancestor Witch's form swelled, and black scales emerged one by one.

Like many wizards from the Immersed Ancient Castle, part of the Ocean Abyss Alliance, he possessed the bloodline of the Sea Clan.

"Mad Shark Inverts the Sea!"

The now ten-zhang-tall Black Shark giant reversed the seawater around several miles, unleashing a tremendous pressure down upon Levi.

Levi looked on calmly, arms crossed over his chest, and said softly,

"Thunder God!"

Above the sea, a storm blasted in, dark clouds coalesced, lightning flashed, thunder roared, and a tempest descended.

A hundred-zhang-tall purple Thunder God Illusion, radiating divine power, appeared suddenly!

The reversed seawater charged toward Levi, but the Thunder God Illusion behind him lifted its hands, and a multitude of lightning, carrying a powerful repelling force, rolled back the water that threatened to overwhelm the heavens.

Rumble!

Black and purple collided, becoming the theme of this sea region.

The Black Shark Ancestor Witch was shocked.

"What is this... some kind of technique, primordial soul wizard form? No, impossible! While this illusion can manipulate elemental power, it's still far from a primordial soul wizard."

With hair dancing with the lightning, the Thunder God's right index finger emitted a thick pillar of lightning.

Rumble!

The Black Shark Ancestor Witch dodged with frenetic flashes, narrowly avoiding the strike.

The Thunder God turned directly into a bolt of lightning, appearing beside him as though teleporting.

A thunderous palm rested on the Black Shark Ancestor Witch's chest.

Crackle and Snap!

Bolts of thunder poured into the Black Shark, his body lighting up like daylight, streaks of purple glow suddenly appearing as his frame burst apart, disintegrating under the high temperature.

Charred Wizard Tools and rings fell, sucked in by the Thunder God.

Then, the remaining three were effortlessly slain.

Levi waved his hand, and the Thunder God dissolved into a sky full of lightning, returning inside him.

The sea surface returned to calm.

At this moment, Jin in his mind nodded in satisfaction as if to say, the treasure was indeed on this person.

"The Black Shark Ancestor Witch, a Savages List powerhouse, his head is worth quite a bit."

Levi murmured to himself.

He turned around, looking towards the astonished mechanical creation from which a familiar voice emerged.

"Levi?"

The Tower Master didn't retract his mechanical arms; he wasn't sure if the person before him was truly Levi. [novel.com](http://novel.com)

Given Levi's demonstrated combat strength, it couldn't be ruled out that he had been possessed by another primordial soul powerhouse.

Levi had already guessed the identities of the two mechanical creations through Marlene within the belly of the Steel Sea Dragon.

Otherwise, he would have killed all present just now.

He revealed a genuine smile and said,

"Long time no see, Tower Master!"

Chapter 1535: The Tower of Dawn reflects the dusk, wandering in the old lands of the Hurricane Secret Realm!

The Tower Master was momentarily stunned, then sighed:

"Indeed, it's been a long time. I almost didn't recognize you just now..."

As a fifth-circle being, he naturally knew how powerful the Black Shark Ancestor Witch was.

Therefore, after a comprehensive analysis, Zero's best advice was to flee.

Zero was the "Mechanical Biological Intelligence" he inherited from the Machine Sage, possessing superior computing abilities, and its judgments were always accurate.

Yet Levi could casually deploy lightning tactics to annihilate the Black Shark Ancestor Witch, a Perfect Primordial Soul, along with his three fifth-circle subordinates. Such strength was surprising even to the Tower Master, who was well-versed in the ways of war through his experiences on the expedition battlefield. After all, as it seemed, Levi had not yet stepped into the primordial soul realm.

In fact, even Marlene and the others, who had only been separated from Levi for a bit over seventy years, were greatly shocked.

They never imagined that, unbeknownst to them, Levi had grown so much.

The Tower Master's dramatic appearance was already a huge shock to them; but Levi's display was like a rollercoaster ride that sent them skyrocketing to the Cloud Summit.

Levi looked at the stunned crowd and smiled, saying:

"Let's leave this place first."

Some time after Levi and his group left, a wizard with dark skin and crimson slits on his cheeks squinted his eyes as he arrived at the scene.

His presence was strong, like the ocean, and the water elemental power around him surged.

"That idiot Black Shark is actually dead..."

He was Black Shark's direct superior, a sixth-circle wizard of the Immersed Ancient Castle, the Black Shark Devourer, one of the top hundred entities on the Endless Sea Savages List.

In the previous war between dark and righteous wizards, he also had a fearsome reputation.

"What a waste of a key to the Dragon Ruins Mysterious Realm... Never mind. The one who killed Black Shark probably did it for this key. He'll likely enter it too, so we'll meet again in the future, heh heh heh."

The Black Shark Devourer turned into a stream of Black Water and dissipated into the Void.

...

The Endless Sea.

An uninhabited island.

The group from the Gray Tower gathered here.

After setting up a hidden array, Levi looked at the impressive and mighty Mechanical Tyrannosaurus and smiled, saying:

"Tower Master, your new body is truly dashing."

The Tower Master laughed heartily:

"Of course, I designed it meticulously... Speaking of progress, you've improved a lot. When I left, you were just a first-circle wizard. Now, two hundred years later, even fifth-circle perfection wizards are no match for you. I thought my progress was fast, but it seems I still fall short compared to you."

Marlene and the others were also full of questions.

Unlike outsiders, as Levi's family members from his initial entry into the Wizard World, they knew about Levi's talent but kept it a secret all this time.

The kind of opportunities that could allow a Child of Chaos to break through four realms in just two hundred years seemed almost inconceivable.

Levi smiled and said:

"I've been lucky. Along the way, I've also stumbled upon some fortunes and, coupled with years of relentless cultivation, I managed to achieve this modest success."

After Levi finished, everyone smiled knowingly; they had grown accustomed to such modesty from Levi.

Levi said:

"I was actually planning to bump into Granny Marlene at the Pharmacist Association, but when I got there, I realized you had already left... and unexpectedly, we met on my way here."

Marlene said:

"The two of you came one after the other, quite synchronously, haha."

Winnie, as Levi's guide, was filled with emotion upon witnessing his transformation.

She recalled the first time she met Levi, as those memories surfaced in her mind.

She realized that in her perception, Levi appeared always to be engaged in cultivation, in meditation.

"It's true that the harder you work, the luckier you get."

Leah, on the other hand, remembered the Grandpa Keg from the Yellow Earth Continent and found it difficult to connect him with the Levi of today.

As the memories turned to dust and the greetings concluded, Levi became serious and said:

"Granny Marlene, now that the Tower Master is back as well, why don't you come with me... It seems that with the closure of the ancient tower, the dark wizards of the Endless Sea are becoming restless again."

He wanted to bring his closest friends from the Gray Tower back to the human realm and into the Ancient Saint plane.

Firstly, to provide them with shelter, as Granny Marlene was but a third-circle wizard—a stature insufficient for the Endless Sea.

Secondly, in recent years, the Knights had collected many wizards with exceptional talent in the Midland Continent and the human realm. Levi wanted to recruit some trustworthy individuals to establish a small wizard organization, to nurture it gradually. He had even decided on a name for the wizard organization.

"Tower of Dawn."

This way, it could form perfect synergy with the Dusk Holy Temple and the Twilight Knights.

He aimed to cultivate a group of wizards proficient in the Three Arts of Wizardry, giving place to his legacies.

As the organization expanded and the staff increased, depending on the Holy Infant alone for weapon refinement, arrays, and the like would be insufficient. A robust wizard organization was needed to provide logistical support.

Now that he had Andrew, Aya, Mia, and a host of other wizard talents, he could start making preparations.

After Levi explained, the Tower Master immediately declared without hesitation:

"I'm in!"

Stella nudged him with her tail and asked:

"Where are you going?"

The Tower Master said:

"The place Levi mentioned, of course. We two mechanical creatures have nowhere else to go, and here in the Wizard World, we keep being mistaken for ownerless alchemical creatures. It's simply too much of a hassle."

Upon hearing this, Stella found it quite reasonable.

Chapter 1536: The Tower of Dawn reflects the dusk, wandering in the old lands of the Hurricane Secret Realm!

"Fine, I will go too."

Marlene was naturally happy to go.

"I was originally waiting for the Tower Master to return. Now that he has, I might as well join," she said.

Winnie said:

"Wherever Granny Marlene goes, I'll follow."

Leah added:

"Me too."

Levi laughed heartily and said:

"If that's the case, Granny Marlene, you should say goodbye to the Lush Forest Witch. We'll meet in Nether Capital in one month. Then, I'll take you back to the human realm."

Marlene said:

"Alright."

Levi and the Tower Master sent Granny Marlene back to the Green Forest Island to pack their things.

For now, Levi was not keen on recruiting too many people. He primarily wanted to include those who had a good relationship with him, such as Granny Marlene and her group, who were absolutely trustworthy.

However, just to be safe, Levi still planned to have them swear an oath on Excalibur, although the content of their oaths would not be as strict as it was for others.

He had to consider the safety of the organization, something they would surely understand.

...

Several days later.

Sword Flower Tower.

This place was located on a small island in the Star Sea, filled with the chirping of birds and the scent of flowers, where clear springs and waterfalls enshrouded by clouds gave it the appearance of a fairyland.

The laughter of orioles and swallows echoed faintly, likely belonging to the witches taken in by the Flower Knight.

This was also a nation of daughters, much like the Witch's Family. As Levi, a man exuding an aura of masculine pheromones, entered, he drew many gazes his way.

Within the colorful small pagoda made of flowers.

In the laboratory.

The Flower Knight looked at the various drafts for the wizard tower with apparent dissatisfaction.

She was researching a truly meaningful "wizard tower" of her own. Once constructed, the wizard tower would fuse with the "Divine Ring Tower" inside her mind, creating an item akin to a rare architectural treasure, with the Divine Ring Tower itself becoming the operational core of the "wizard tower."

This was the traditional concept of a wizard tower, an entity fused with the wizard itself, not merely a residence.

However, building such a wizard tower required vast amounts of time, energy, and financial resources. Most primordial soul wizards have forsaken this path in the current era.

Perceiving Levi's arrival, the Flower Knight opened her eyes with a flicker of joy.

"This guy, having been invited so many times, has finally agreed to come," she mused.

She put away the drawings and, with a flicker of her form, disappeared from the spot.

Outside the island.

Levi was quickly surrounded by a dizzying array of witches.

Among them were some familiar figures, like the Violet Witch, the Lily Witch, and others...

Many were complete strangers to him.

Of course, due to the Flower Knight's influence, these witches all recognized Levi.

Their magical whispers continually entered Levi's mind, giving him quite a headache.

"Giggle, such a rugged man."

"Is this the man even Lord Elena finds interesting?"

"Hello, I'm the Mandrake Witch."

"I'm the Lilac Witch."

"..."

Levi's fifth-circle cultivation made him stand out among these witches.

Apart from him, only the silent Sakura Witch, clad in a sakura witch robe and with hair black as a waterfall, was a fifth-circle wizard and she seemed to have only recently been promoted. The Flower Knight provided refuge mainly for companionship, hence there were not many powerful ones among them.

In the sky, the impressive figure of the Flower Knight appeared as she scolded:

"Go back to your cultivation, acting as if you've never seen a man before, what is the meaning of this?"

The crowd of witches fell silent and receded like the tide. Finally, the world quieted down.

Levi thought to himself:

"Women are indeed the noisiest creatures in the world..."

He just wanted to finish his visit with the Flower Knight and leave the place as soon as possible.

The Flower Knight laughed:

"What a rare guest, my commander. You've finally come. Look how much the girls like you. Why not settle down here from now on?"

Levi responded with a wry smile:

"I'm here on some business in the Wizard World, and thought I'd stop by to see you as well."

The Flower Knight said:

"Just stopping by? Well, never mind that, come inside and take a seat."

At the Flower Knight's invitation, Levi entered her laboratory and took a brief tour.

The two chatted and discussed serious matters.

Levi brazenly sought advice from the Flower Knight on the insights and experiences related to advancing to a primordial soul, gaining immense benefit from it.

He also shared his own achievements from the Knight's Practice with the Flower Knight.

Finally, he asked:

"Flower Knight, have you heard of the Host God Fruit?"

The Flower Knight replied:

"I have heard of it. Many primordial souls need it. I once saw it at an auction where it was snatched up by a primordial soul wizard for billions of Aether Stones... Why, are you thinking of creating a duplication? You don't even have a primordial soul yet, so focusing on this now is too hasty. Cultivation of the main body is of utmost importance."

Levi laughed and said:

"No, I was just asking casually."

Flower Knight said:

"As long as you understand. The path of duplication has its pros and cons, even primordial soul wizards are very cautious about it. However, if you really need the Host God Fruit, I do know of a place where it might be found."

"I'm all ears," said Levi.

Flower Knight explained:

"The Realm of Death... of all the wizard factions today, the School of Death is the most fond of the path of duplication. You should pay attention to their large auctions. You might find the fruit there. However, such auctions typically attract some primordial soul wizards. Ever since the Great Expedition, with the order of the Wizard World in disarray, killings and treasure looting happen frequently. Furthermore, the School of Death is essentially a hive of dark wizards. If you do decide to go there, you must be extremely careful and cautious."

Levi thanked her and said:

Chapter 1537: The Tower of Dawn reflects the dusk, wandering in the old lands of the Hurricane Secret Realm!

"Thank you, Flower Knight, I won't disturb your research any longer. Remember to come home often."

The Flower Knight chuckled and said,

"So that's why you came to see me. Let's go, I am indeed quite busy recently."

She watched Levi's retreating figure and, supporting her forehead, said,

"This guy, he just takes off just like that... It's no wonder he's a supreme knight, so straightforward."

Half a month later.

Levi met with Marlene and the Tower Master in the Nether Capital.

Marlene had already greeted the Lush Forest Witch, who, upon hearing that it was Levi who needed help, naturally had no objections.

Moreover, Levi had already secretly met with the Lush Forest Witch and given her three fifth-circle top-grade Wizard Tools in return for her care of Marlene and the others.

The group left the Endless Sea and returned to the human realm.

...

Ancient Saint plane.

At the entrance.

God Nick sat at the center of the Eight Heavenly Dragon Prison.

Although it was an alchemical creature, it emanated a hint of divine majesty.

As a successor of a great sage from the Mechanical School, the Tower Master immediately noticed the creature's extraordinariness and said in amazement,

"Levi, did you refine this alchemical creature yourself?"

By the standards of the School of Alchemy in the Endless Sea, this creature was of the top level.

Levi laughed and said,

"Sort of. I refined it with another friend."

He thought to himself, although I only did one percent of the work, it wasn't wrong to say I did it alongside the Holy Infant.

The Tower Master exclaimed,

"Impressive! However, from the perspective of the Mechanical School, there are some areas where this alchemical creature could be improved. We can discuss this when we have time."

Upon hearing this, Levi laughed and said,

"That would be great. The Mechanical School of the Myriad Machine Plane is indeed the forerunner of the School of Alchemy and is even more advanced. I've already heard much about it and look forward to learning from you, Tower Master."

Seeing the two powerful figures talking about high-end topics they couldn't understand,

Leah and Winnie couldn't help feeling envious.

"I wish I could become a strong wizard like Senior Levi."

Marlene tapped Leah and said,

"That's what you get for not working hard on your cultivation. Regretting it now, aren't you?"

Bringing his companions back to the Ancient Saint plane, Levi called the Holy Infant over.

Seeing the Holy Infant, the Tower Master didn't react, but Marlene and the others' expressions changed.

"Master Fire Dragon?"

The Holy Infant said with a slight smile,

"You are all friends of Sir Levi. Please, there's no need for formalities. Just call me Ace. I'm not worthy of the title 'Master'."

The Tower Master said,

"It seems we have yet another incredible wizard among us."

According to Zero's analysis, his chances of winning against Master Fire Dragon were... almost zero.

Winnie blushed with admiration and said,

"The Master is not just any strong wizard; he's the first on the ancient tower ranking list..."

Stella was surprised.

Although she and the Tower Master hadn't paid much attention to the news about the ancient tower, they knew how prestigious it was to be ranked first on that list.

The Holy Infant said with a smile,

"It's all just an empty reputation. There are many stronger than me inside the ancient tower."

Leah asked curiously,

"Master Fire Dragon, why didn't you claim those rewards?"

The Holy Infant said with a wry smile,

"I was in seclusion when the congress released those rewards... By the time I came out, it was already past the deadline, alas."

Marlene said regretfully,

"That's such a pity, ten million Aether Stones, three top-grade Wizard Tools, one Sky-Grade Oddity... Many fifth-circle wizards couldn't earn that much in their entire lives."

The Holy Infant said,

"There's no need to talk about things that are past. Next, I'll take everyone to visit our organization and discuss our plans."

The Tower Master said,

"Yes, please show me around. Even the Lizardmen here have the strength of level 4 or even rank 5, which is truly unthinkable."

A few days later.

It was like Grandma Liu entering the Grand View Garden. They visited the Dusk Holy Temple, the Giant Beast Paradise, and the Ancient Dragon Empire. They were even more astounded to learn that this place was a small-scale plane.

Levi, in their eyes, became increasingly unfathomable. Otherwise, how could he possibly be friends with Master Fire Dragon?

In the days that followed, the Holy Infant began to busy himself with the Tower Master and others setting up the Tower of Dawn.

As such.

After months of preparation.

In the year 1234 of the Holy Brilliance Calendar, on the first day of the Month of Beginning,

The Holy Infant gathered Mia, Andrew, and other wizards from the Ancient Saint plane with promising wizarding talents.

He said,

"Ladies and gentlemen, the grand intersection of planes grows more intense, and the Dark Wave Revival is unstoppable. The era of great strife is about to arrive... I wish to establish a haven for those with wizarding talent. Next, we will recruit some promising wizard seedlings from multiple channels, secretly forming a wizard organization unknown to the world. This organization will be named... the Tower of Dawn. It will be a sibling organization to the Dusk Holy Temple, the Ancient Dragon Empire, and the Giant Beast Paradise. I hope everyone will support each other in times of crisis!"

In fact, inside Levi's Ancient Banyan Fairyland, there was another organization called the Dragon Palace, but its members were too few, and it was Levi's hidden trump card, not yet intended to be made public.

"Great, I support it!"

Andrew applauded and cheered.

He had already completely refined the oddity known as the Tortoise's Heart, mastering a second innate spell of the Earth Faction called Rock Shield Guardian. With his talent, it was indeed effortless for him to step into the third-circle senior.

The Tower Master and others also applauded and cheered. For them, it didn't matter which organization they were part of; what was important was that they continued to be together.

In the Wizard World, an organization with the warmth of the Gray Tower was indeed a rarity.

That's why Levi treasured this connection so much and did his best to help everyone within his capabilities.

Chapter 1538: The Tower of Dawn reflects the dusk, wandering in the old lands of the Hurricane Secret Realm!

The path to truth is long and winding, and if one were to become completely heartless and unprincipled, they would truly be nothing more than a robot.

On Levi's 234th birthday, the fourth organization of the Ancient Saint plane was established in a low-key manner.

The four major organizations would stick closely to Levi's side, relying on Excalibur and Levi's personal charisma, watching over each other, helping each other, and making progress together.

At the same time.

The first "Dawn Tea Party" of the Tower of Dawn was officially held.

At the meeting, Master Fire Dragon Ace was appointed as Tower Master of the Tower of Dawn, and head of the Artifact and Magic Array Departments. Herman, Stella, and Mia were appointed as Deputy Tower Masters. Herman also took on the additional role of head of the Alchemy Mechanical Department, while Marlene became the head of the Pharmacy Department...

Other wizards from the Ancient Saint plane also joined, becoming the first-generation members.

Aya, who had been on her own, joined as well, meeting more of her peers.

Following that, the main task of the Tower of Dawn was to travel to mortal gathering places in the wizard world such as the human realm, the Midland Continent, and the Yellow Earth Continent, to recruit wizards with wizarding talent.

In principle, they only recruited those with triple affinity talents or those with special talents. However, those with great determination or those whose life trajectories indicated they were favored by fortune could also receive special recruitment into the organization.

What Levi wanted to establish was a wizard organization of select, high-quality members.

Such an organization would grow faster and could control its numbers, preventing a mix of good and bad members.

However, he would still give real hard workers or those favored by fortune some opportunities. In this way, if he could occasionally find one or two individuals who fit the template of being favored by fortune, it would be a great profit.

The first meeting of the Dawn Tea Party hosted by the Holy Infant came to a perfect close.

At the same time, the 134th round table meeting of the Twilight Knights, presided over by Levi himself, was successfully held.

It was learned at the meeting that the puppets re-refined by the Holy Infant had been brought to the Midland Knights. The Blood-Armored Corpse Demon, Poison Fire Corpse Demon, and Tyrant V had directly become the "Treasure of the Sect" for the Midland Squad.

With these three level 5 puppets, as long as they did not foolishly provoke the Primordial Soul Organization and continued to work discreetly, the safety of the Midland Squad was assured.

People like the Black Knight were overwhelmed with gratitude, and felt even more confident about their future work.

At the same time, the Goddess Knight had successfully advanced to a level 4 knight by the end of last year. The Dharma Idol she birthed was called "Aurora Wings." When deployed, a pair of wings as glorious as the aurora would appear behind her, significantly increasing her flight speed. In the level four realm, in terms of flight speed, it was enough to leave most of the same realm wizards far behind.

Since Levi came up with the idea and established the Twilight Knights with Emperor Mu in the Wizard World, 212 years of trials and tribulations have already passed.

Along the way, the oldest generation of knights that joined early had all advanced to level 4, stepping into a new era.

Meanwhile, the middle-generation powerhouses like Steel Dragon, Dark Moon, Earl of Silver Mountain, Thousand Illusions, and Hundred Flowers were also nearing the pinnacle of level 3. Except for Hundred Flowers, who was not a solo knight, their speed was naturally fast. f

The new generation of knights who joined after Levi entered the ancient tower were steadily progressing towards level 3.

Over these years, the resources Levi brought from the ancient tower were continuously consumed and absorbed by the Knights.

It can be said that the present age is the golden era of growth for the Twilight Knights.

In this era, as long as everyone is willing to work hard, resources will surely not be lacking; there is no need to scheme against fellow organization members or compete with each other.

Next, everyone would follow their commander Levi and ride wildly into the future, bracing for the great storms ahead!

...

After the organization was established, Levi once again played the role of a hands-off manager, delegating a plethora of tasks to the Holy Infant and Mia.

The Holy Infant was in charge of crafting talismans and overseeing arrays while coordinating the grand scheme of things. Mia took care of specific administrative matters.

One day.

Levi was in the Emperor's Palace, holding a black token, frowning deeply.

This was one of the spoils from the Black Shark Wizard he had previously come across.

From Jin's reaction, this was likely the treasure it was looking for.

Besides, the spoils from the Black Shark Wizard were pretty standard; they were, at best, marginally beneficial for Levi.

This fellow didn't even have a top-grade Wizard Tool yet had the audacity to mix in the world, truly brazen.

Levi rubbed the token, which had a rough texture.

It had concentric circling patterns and the image of a door on it.

"Judging by the texture and aura of this token, it should be made from dragon scales. Moreover, its aura is faint but stronger than the Black Lotus Beast's, likely refined by a Dragon Clan of level 6 or above. Could this insignia of a door mean that this object is the key to entering some secret realm?"

With that, Levi took out a crystal ball from his storage bag, within which gusts of hurricane were swirling in formation.

"No matter. The Hurricane Secret Realm is about to open. It's time to set off for the Yellow Earth Continent."

Levi packed away the token, preparing to leave the Ancient Saint plane.

Suddenly, a disturbance was felt.

Through the Scarlet Contract, Levi sensed that the Heaven Crystal Dragon Ant had awakened.

In the fairyland.

A blue giant ant about a hundred meters long was nibbling at a shell that emitted an icy blue chill.

Isa said excitedly:

"Lord, the Ant Ancestor is awake."

Levi nodded, approaching the Heaven Crystal Dragon Ant.

The piercing cold was so intense that even someone with Levi's cultivation could feel the chill.

The Ant Ancestor was different from the Tiger Ancestor; perhaps due to being a Zerg, it did not speak. But it expressed its affection by lightly touching Levi with its ice-blue antennae.

Chapter 1539: The Tower of Dawn reflects the dusk, wandering in the old lands of the Hurricane Secret Realm!

This convinced Levi that the Scarlet Contract was a success.

Through the contract, he could feel that the aura of the Heaven Crystal Dragon Ant was stronger than that of any Roman or Rust he had ever seen, surpassing them by a bit.

Mana said,

"After shedding its skin this time, the Heaven Crystal Dragon Ant's strength is infinitely close to the Level 6 Mid Stage. I estimate that after another shedding, it will truly reach the Level 6 Mid Stage... In this vast world, nothing is impossible, even a seemingly weak ant can fight a giant dragon!"

Levi thought wryly to himself,

"It could be described as at the 'Peak of Level 6 Early Stage Great Perfection' realm."

He gently stroked the forehead of the Heaven Crystal Dragon Ant, saying,

"Ant Ancestor, what do you like to eat? I will send someone to get it for you."

This was the thickest thigh before his primordial soul; he must serve it well.

The Heaven Crystal Dragon Ant expelled a breath of cold air, taking on the form of a giant dragon.

Levi was full of black lines on his face.

This... This is making things difficult for me, Dragon King Li, isn't it?

He sighed to himself,

"Forget it, I'll just hunt down some Earth-type mixed-blood dragon clans and purify their meat for you."

After much thought, that was the only option he could come up with.

In his storage ring, he already had plenty of level 4 and level 5 black beast dragon clan flesh, just waiting to be purified after the Saint Fruit's mass production.

After placating the newly awakened Dragon Ant, Levi took another stroll around Flaming Mountain.

Gazing at the black-scaled giant egg in the flames, he mused,

"When will you wake up, Master Ash."

...

Yellow Earth Continent.

Lion King City.

Once a renowned force on Yellow Earth Continent, only the Golden Lion Jostar Family now stands supreme as the sole Fourth-Circle Wizard organization on the continent.

The Al Hidd Family was destroyed in the early stages of the war, and the Wham Family met its end at the hands of a dark wizard during the Ancient Tower Era.

Only the Golden Lion stood unshaken.

All this was, of course, thanks to Dinos's care.

Long ago, the Knights had followed the ways of the Midland Continent and established a stronghold on Yellow Earth Continent to recruit wizard and knight recruits.

After retiring, the Old Golden Lion handed over his position to Dinos, the one who had thrived the most.

Dinos transformed the family into a bulwark for the Knights.

Now with the establishment of the Tower of Dawn, one visible and one hidden, the Jostar Family is as stable as Mount Tai in the Outer Ring Region.

"The Jostar Family always pays its debts."

Years ago, an encounter brought about by a Wind Disaster in the Endless Sea forged the foundation of the Jostar Family's millennium-long prosperity, a saga worthy of high praise.

The residence of the Old Golden Lion.

The old man, now a fourth-circle wizard, had chosen a timely withdrawal from the current to enjoy a leisurely life.

A young maid said,

"Old Master, there is a visitor named Levi."

The Old Golden Lion frowned and said,

"This is a distinguished guest, are you new here?"

The maid was scared, stuttering,

"Old master, I'm new, I don't know the rules..."

Just then, a hearty laugh came from outside.

"I was just passing by and decided to visit, please don't go to any trouble, Lord Golden Lion."

Levi, dressed in a white robe, revealed a sunny smile.

The Old Golden Lion hastily said,

"It is an honor to have such an esteemed guest."

Levi was invited into the wizard tower by the Old Golden Lion. After some pleasantries, Levi took his leave.

Watching Levi disappear from his wizard tower in a single step, the Old Golden Lion felt a shock that he could not settle for a long time.

"An ordinary fifth-circle wizard wouldn't possess such an effortless strength... Just who exactly is Levi?"

...

After discussing some affairs with the Old Golden Lion, Levi headed to the Rogue Rift.

The former territory of the Colin Family had become ruins buried under sand and wind.

"How time flies."

Levi left the ruins and wandered through the Wind Disaster.

With his fifth-ring aura on display, no transcendent creature with even a bit of sense or fear dared to approach.

Except for a small flock of Flying Scythe Beasts that seemingly flew in from nowhere.

"Are you Lord Scythe?"

A childish voice asked, coming from the Clan Leader of the Flying Scythe Beasts.

Levi smiled and said,

"Yes, I am."

The Clan Leader asked,

"Lord, may we follow you?"

Levi's spiritual force scanned the area and discovered that there were more than three hundred Flying Scythe Beasts present. He ripped open a small spatial rift.

"Welcome home, my children."

As the god of the Flying Scythe Beasts, it was his duty to shelter these worshipers stranded in the wilderness.

The chattering Flying Scythe Beasts cheered and rushed in, bolstering Levi's flock of Flying Scythe Beasts.

After this, his form flickered, and when he reappeared, he was in front of several Wind Tunnels.

His Danger Perception gave no indication of threat, suggesting there was probably no danger within.

Without hesitation, he stepped in.

...

Hurricane Secret Realm.

The Colin Family's greatest secret.

This was a small secret realm, not very large in area.

Levi had previously obtained numerous rare wind-element medicinal herbs here, as well as a second-level Ice Ape, an Ancient Strange Species that was now doing well in the Giant Beast Paradise and had advanced to level 3.

Levi swept his spiritual force across the secret realm, carefully probing it.

Before long, he discovered a rank five medicinal herb he didn't have in his collection.

"Indeed, there's still something to be gained."

At the spot where he had once found Seven Days Soul Returning Grass, a four-leafed black herb was growing quietly there.

"So there really is more. It's just a pity that it hasn't reached a seven-leaf complete body. In two hundred years, it has only grown four leaves. To mature completely, it probably needs at least another hundred and fifty years. But I have Golden Fertilizer; a hundred years should be enough."

Chapter 1540: The Tower of Dawn reflects the dusk, wandering in the old lands of the Hurricane Secret Realm!

Levi unsheathed his shark-tooth-shaped sword!

Four streaks of Sword Qi directly uprooted the valley that gave birth to the Seven Days Soul Returning Grass.

He opened a spatial rift and completely absorbed it.

"The Seven Days Soul Returning Grass thrives in cold environments; let's transplant it to Little Cold Mountain and let the Ice Phoenix guard it."

Little Cold Mountain.

The Ice Phoenix, in the midst of its cultivation, saw a small piece of land slowly drifting down from the sky and landing on the Snowfield.

"Ice Phoenix, you shall guard this object here."

The voice of Levi, like that of a heavenly deity, reached out.

The Ice Phoenix hastily said,

"As you command!"

Inside the Hurricane Secret Realm.

Levi muttered to himself,

"Didn't expect to achieve the goal of this trip so smoothly; used to the twists and turns inside the ancient tower, I'm somewhat unaccustomed."

Half a day later.

He had explored every nook and cranny of the Hurricane Secret Realm, finding nothing more than some meaningless medicinal herbs and ores.

"Can't be too greedy, I should be content."

As Levi was about to leave.

Jin squeezed out of his nostrils, its greedy little eyes looking at the sky of the secret realm, its nose quivering.

"Speaking of which, you have been quite active lately... That wasn't the case before."

Levi felt that since coming out of the ancient tower, Jin might have evolved unknowingly; it seemed to be truly useful now and not just a mascot.

He looked up at the sky.

Hurricane Secret Realm, as the name implies, is a place where strong winds blow incessantly throughout the year.

Levi was curious where exactly these Wind Disasters came from?

Last time, with only First Ring Cultivation, he dared not explore upwards, deeper into the Wind Disaster Stratum... But this time, why not give it a try?

The Earth Dragon Barrier, Golden Dragon Shield, and eighteen other protective measures were all applied to him in unison.

Levi, fully on guard, stepped into the Wind Disaster Stratum.

As he ascended higher, the intensity of the Wind Disaster suddenly increased.

When he reached ten thousand meters, even the protective force fields of third or fourth-circle wizards could not withstand it.

The intense Wind Disaster seriously impaired perception, but seeing Jin getting more excited, Levi continued deeper.

At twenty thousand meters, it was already the maximum that an ordinary Fifth-Circle Wizard's protective force field could endure.

But the top was still not in sight...

Levi gathered his energy and shot straight up to thirty thousand meters.

Defensive fields like the Earth Dragon Barrier vanished instantly, the Golden Dragon Shield almost blown away, and his blood-red cloak fluttered loudly.

In an instant, Levi revealed a three-headed, six-armed form of the Six Paths Heavenly Gods Dharma Body.

The Dharma Body protected Levi within it, continuing to ascend.

Soon, Levi felt as if he had reached the ceiling of the Hurricane Secret Realm.

He saw the crystal wall of the secret realm's bubble. Below the crystal wall was a white crystal ball about a hundred meters in diameter.

It appeared similar to the key to the Hurricane Secret Realm.

The secret realm key in Levi's hand buzzed and trembled. The white crystal ball did the same.

The next moment, the key to the Hurricane Secret Realm flew out of his hand, turning into a beam of light, rushing into the giant crystal ball.

Subsequently, the giant crystal ball emitted waves of precious light, and the countless hurricanes torturing the Hurricane Secret Realm turned into streams of air tornadoes, all sucked into the crystal ball.

Not long after,

the entire Hurricane Secret Realm completely quieted down and there was no difference from an ordinary secret realm.

The white crystal ball kept shrinking until it was the size of a human head, radiating precious light.

"Is this... some kind of rare treasure?"

Levi's heart stirred, and he summoned the Wizard's Hand, reaching out for the treasure.

The treasure did not resist, but just as Levi was about to grasp it, a pure white object about a yard long burst out from the crystal ball.

Upon closer inspection, it turned out to be a White Tiger.

The White Tiger was as white as jade, with patterns on its body that were surprisingly composed of Truth Runes.

"Well, well, buy one get one free? It appears to be an oddity, and a Sky-Grade one at that."

Seeing Levi, the first reaction of the White Tiger wasn't to run, but to show aggression towards him.

Levi simply cast a Water Dragon's Song with a wave of his hand, trapping it within.

After all, it was just a Sky-Grade oddity, how could it be a match for Levi?

In an instant, the White Tiger was subdued by Levi.

The size of the White Tiger kept shrinking, escaping the control of the Water Dragon's Song and darting back into the bead of the treasure.

Levi snatched the bead in his hand, applying several spell restrictions onto it.

As Levi touched the bead, streams of information flooded into his mind.

"A Sixth-level Treasure... Wind Disaster Pearl, created by a Sixth-Circle Wizard, Doster Collin."

Levi looked at the bead in his hand, fell silent for a long while, and then said with a sense of melancholy,

"Who would have thought that the seemingly unremarkable Colin Family... had an ancestor who was an ancient primordial soul wizard. It's a pity that in the face of the relentless passage of time, these descendants probably have no idea about the Sixth-level Treasure hidden within the secret realm."

Now, the Colin Family most likely only had Stella left as a member.

And Stella was no longer human, but a mechanical creature.

"Even the legacy of Legendary Wizards can be worn down by time, let alone that of primordial soul wizards... throughout the history of the congress, there are very few Legendary Wizards known to posterity. There is only one who, across three hundred thousand years, still exerts overwhelming influence over the present, that is... Sauron!"

At this moment, a sense of pride surged in Levi's heart.

"If not for a lack of strength, who would want to be a nameless and timid commoner... One day, I, Levi, will stand shoulder to shoulder with Sauron, or even surpass him, and become famous across the Multidimensional Plane!"

Having boasted to himself, Levi stroked the proudly begging for tribute, Jin, and left the empty Hurricane Secret Realm.

Gazing at the starry sky, one must still stay grounded. For now, better think of a way to do with the primordial soul first.

...

In the Ancient Saint plane,

Levi returned to the Emperor's Palace and exclaimed,

"This return to the old grounds has truly been immensely rewarding, and it's a good thing I've kept this matter on my mind. Otherwise, had I missed it, I would have had to wait another two hundred years."

Afterward, he spent several days studying and managed to understand the function of the Wind Disaster Pearl.

This Wind Disaster Pearl was crafted by Doster using a Sixth-level Wind Mirage Pearl, collecting many precious materials and refining them.

It had three functions:

First, releasing a Dense Qi that unleashes all the Wind Disaster Power inside the pearl to its Maximum, blowing away even the defensive field of a primordial soul wizard. However, afterwards, it would require a long time to recharge in the Wind Disaster Stratum in the material plane.

Second, when idle, it automatically gathers wind elemental power, and through the Wind Disaster Pearl, generates regular wind disasters; the Hurricane Secret Realm was formed this way.

Third, before the Wind Disaster Power within the pearl is exhausted, it can create an unending "Wind Spirit Shelter," forming a powerful, continuous protective force that can withstand three strikes from an ordinary Sixth-Circle Wizard and one from a Sixth Ring Senior Wizard. Once the Wind Armor shatters, it requires a lengthy incubation period.

Levi inhaled sharply.

"I didn't expect such a treasure to be so powerful... Offense and defense in one, it's absolutely heaven-defying."

The most important thing is that treasures are different from Sixth-Ring Magical Artifacts, even if given to Levi, he wouldn't be able to use them, while there are no such restrictions for treasures.

"This treasure has survived through the long ages, just waiting for someone like me to come along, this alone proves that Assemble rightfully belongs to me!"
