

Wizard 157

Chapter 157: Sweep the Castle! (2)

"Magic Shark, use this."

Levi threw the Lion King's Pride to the strength-based grand Imight.

Levi still used Frostmourne.

Magic Shark silently took the Lion King's Pride. Although his two-meter-tall body was not as big as Bluefeather Duke's, he could still use it.

Moreover, Magic Shark was a strength-type weapon. Using Lion King's Pride would be more suitable than Frostmourne.

Boom! Boom! Boom!

Levi and Magic Shark stood back to back, forcefully carving out a bloody path among the Snow Demons.

He brought Magic Shark and ran wildly until they ultimately got rid of the group of Snow Demons.

After a short rest, Levi quickly inspected Magic Shark's body.

'Multiple fractures and his kidney was eaten? There were only three fingers left on his left hand...It's too tragic.' Levi had a headache.

At this moment, he realized that Magic Shark could also be "tired." Although Magic Shark could fight endlessly for the Core of the Undead, that was only in theory.

Magic Shark was also made of flesh and blood. Even though some "fatal injuries" would not cause Magic Shark to die, its body would still wear down gradually until its "durability" dropped to zero.

"If only there were a way to repair Magic Shark," Levi pondered.

Suddenly, he looked at the Lion King's Pride in Magic Shark's hand.

Even a grand knight's body of flesh and blood could not compare to a body of steel without the support of the black gas. If he were to replace the broken parts of Magic Shark with the steel prosthetic limbs he had forged, he wondered if it would work.

The brain was the core of the "living dead" summoned by the Seal of Hell. As long as the brain of Magic Shark was not destroyed, theoretically, Magic Shark should be able to function normally.

As for the brain, Levi could forge a better mithril helmet for Magic Shark. Under normal circumstances, it would not be damaged.

Magic Shark's limbs and torso were the most accessible places to wear out.

"In that case, I can try to modify Magic Shark in the future. With my skills as a craftsman, it won't be a problem for me to forge some prosthetics. It was better to take it slow. The most difficult power problem was solved with the Core of the Undead. Everything else was easy to deal with."

However, with Levi's current level, he naturally could not forge steel prosthetics. He guessed that wizards could.

"I really can't make do with this for now. In the worst case, I will swap out Magic Shark," Levi sighed.

"Let's go, Devil Shark. We'll continue. This time, we'll clear out all the Snow Demons in the castle."

Levi gave Magic Shark a new Core of the Undead.

He also replenished his food. The castle's cleaning went smoothly without Duke Bluefeather and his retainer knights.

As the Lord of Snow Valley City and the Duke of the Evernight Kingdom, Levi looked forward to the harvest of Duke Bluefeather's mansion.

Levi and Magic Shark worked together. Levi had Frostmourne, and Magic Shark had Lion King's Pride!

Levi had Transcendent Endurance, while Magic Shark had the Core of the Undead!

The two men transformed into Snow Demon meat grinders. Five days later, the Snow Demons in the castle were all gone.

In the open space of the castle, Levi looked at the pile of Cores of the Undead on the ground and felt extremely satisfied.

"It's enough for a long time."

"Especially since I obtained more than ten knights' Cores and two grand knights' Cores. The cruising ability of a grand knight's Core was a hundred times that of an ordinary one."

Levi packed the Core of the Undead into a bag and had Magic Shark carry it on his back.

"The next step is to search for treasures. I have to be extra careful. I can't let my guard down because there's no Snow Demon."

Levi grabbed a bunch of materials for the Seal of Protection, ready to cast Bright Silver Protection at any time!

Magic Shark stood behind Levi, protecting him.

Bluefeather Castle was massive, and Levi began to explore between rooms.

However, Levi did not go to the tower that was emitting blue light in the middle. His intuition told him that it was not a simple place. It was very likely that Duke Bluefeather had guarded the tower. He wanted to figure out the situation here from other sites.

The ancient castle exuded the aura of time. The Bluefeather Family was also an old family, and Levi traveled through it.

Levi opened the rooms one by one. The interior looked the same as a few years ago. There were no changes. The tables, chairs, and vases were all in perfect condition.

However, there was a layer of frost on the surface of these things.

"This is a sudden disaster. Only living beings will be affected. These dead things

Seem to be fine," Levi speculated.

It was said that this place was one of the sources of the Snow Demon's mutation, so Levi was extremely cautious.

After all, he might face something from the Dark Wave from the Multidimensional Plane.

Half a day later, Levi had already cleared most of the buildings and rooms of Duke Bluefeather.

Apart from some remnants of Snow Demons, there was nothing else.

However, Levi found some treasures in a highly hidden underground secret room.

With Advanced Vibrosensing, Levi could quickly tell which parts of the castle were empty and which secret chambers were hidden.

Therefore, such a chamber would not pose a problem to him unless Duke Bluefeather built a room deep underground, beyond the range of Advanced Vibrosensing.

In front of Levi in the secret room were treasures from Duke Bluefeather. There were jewelry, jewelry, paintings, and rare antiques..
