

Wizard 1601

Chapter 1601: The three major level 6s take action together, the might of the Dragon King subdues the Flame Demon!

Boom boom boom!

The entire Magma Cave seemed to tremble.

A thousand-foot-high column of flame erupted from the Lava Sea.

Atop the pillar, a Flame Giant, clad in armor with the lower body of a snake and the upper body bare, materialized.

Its body appeared as if cast from molten lava, and its eyes were filled with rampant fury.

"I am the Flame Destroyer! How dare you disturb my slumber, all of you shall die!"

In the hands of the Flame Giant, a massive flaming sword suddenly materialized.

The sword cleaved through the void, and a ten-mile-long blade of fiery light struck the Holy Infant.

At the critical moment, the Fiery Flame Iron Armor appeared on the Holy Infant's body, with mysterious patterns flickering.

At the same time, a rusty sword materialized in the mind of the Rust Dragon Wizard and slashed at the fiery light!

Boom boom boom!

The fiery blade of light and the rusty sword collided, the rusty sword was sent flying, and the blade of light shattered too.

The residual shockwave still struck the Holy Infant.

The Holy Infant grunted, was flung backward, and then appeared next to Alexandra with a serious expression.

"That was close! There is actually a level 6 Fire Element Lord hidden here."

Inside him, spell power surged wildly, and his spiritual force was somewhat unstable, but he was not seriously harmed.

The remnants of the level 6 attack were all blocked by the Fiery Flame Iron Armor, and his spitting blood was just a feint.

Alexandra and Elsie looked shocked, but they relaxed when they saw the treasure armor appear on the Holy Infant's body.

"It's good you're okay."

Fortunately, it was the treasure armor doing its job, otherwise the Master would be too defying.

"Primordial Soul Witch Prime Minister·Ancient Rust Dragon!"

A rusty dragon that stretched hundreds of meters emerged and waged a fierce battle with the Fire Element Lord.

Before long, the Rust Dragon Wizard appeared slightly at a disadvantage.

"You guys retreat first, I'll find you later. This Fire Element Lord has the home-field advantage here, I'm having some difficulty dealing with it."

Despite both being of the fire element, within this Lava Sea, it was clearly the Fire Element Lord's home turf.

Its realm was also a notch above the Rust Dragon Wizard.

The weapon in its hand was also a formidable sixth-level rare treasure; even with the Soul Artifact in hand, the Rust Dragon Wizard couldn't gain the upper hand.

Every motion of the monster stirred the magma in a radius of several miles, combining with the blade light, truly forming a terrifying force.

The Holy Infant and others dared not delay and transformed into light rays, swiftly departing from the Magma Cave.

Seeing them gone, the Rust Dragon Wizard fought and retreated, successfully disengaging.

After reaching safety...

The Rust Dragon Wizard heaved a sigh of relief and said with a wry smile:

"This Fire Element Lord has been demonized, has the location advantage, and possesses a rare treasure... Its strength is almost reaching the middle stage of level 6; only a Sixth Ring Senior Wizard could take it down steadily. Although the treasure is great, it seems we're fated not to have it."

Alexandra said:

"No matter, being safe is what's important. Our main goal this journey was medicinal herbs."

The three of them quickly left.

Meanwhile...

In another shallow cave, Levi had just wiped out a tribe with a peak level 5 Balrog Flame Demon.

In his hand appeared an antique staff resembling a purple long eggplant.

Levi, somewhat familiar with Abyss Text, muttered:

"Level 5 Demon Artifact, 'Staff of Fire Joy', crafted by the Enchanting Demon Lord, Bulonia Ginas..."

After inspecting it, Levi looked bemused.

This staff was an early work by an Enchanting Demon Lord and served three purposes:

First, to amplify the spell-like abilities of fire demons.

Second, to release an aura of pleasure, creating Enchanting Demon Illusions to control enemies with lust.

Third, it could serve as a "toy" for the succubus to facilitate the cultivation of pleasure energy...

"This Balrog Flame Demon, using a woman's toy as a staff, how embarrassing. This Demon Artifact was tailor-made for Miraya. With it, she can enhance her cultivation."

Besides, in Levi's possession were several level 5 crystal cores, rewards for Miraya and the Mind Flayers, two valued subordinates, to enhance their strength.

"Next, I'll hunt some more demon crystal cores on the way."

Suddenly...

An image of the Holy Infant emerged in Levi's mind.

"The Holy Infant just encountered a level 6 Fire Element Lord."

Levi's mind raced.

"I wonder if Mana and I together could subdue the Fire Element Lord. Not sure if we could use the Scarlet Contract to enslave it."

Although Levi was still over three hundred points away from the primordial soul in terms of spiritual force, the quantitative gap wasn't large.

He still had two contract slots. If he could contract another Fire Element Lord...

It would be greatly beneficial, both in battle and future weapon refinement.

Moreover, that Fire Element Lord also possessed a sixth-level rare treasure—essentially getting two for the price of one.

"Never mind, let's give it a try first. If it doesn't work out, just kill it. Either way, it's a win-win."

Levi reached out to fairyland.

Mana and Martha were chatting about sisterly topics.

Although Mana claimed to be the older sister and indeed was older, her mind seemed less mature than Martha's.

She pursed her lips at the moment, apparently talking about something unpleasant.

Levi said:

"Ladies, you might need to take action soon."

Mana looked at Levi and smiled brightly:

"What's up?"

Levi briefly explained his plan.

Mana replied:

"No problem. If there's a Fire Element Lord in this fairyland, that would be great."

Levi then went to the Ice Sea Secret Realm and woke up the sleeping Heaven Crystal Dragon Ant.

"Prepare for battle."

Hearing about the battle, the Dragon Ant got excited.

Last time when fighting that Cave Wizard, it felt like it hadn't performed well. It had just warmed up when he died.

This time, it must have a thrilling fight.

Chapter 1602: The three major level 6s take action together, the might of the Dragon King subdues the Flame Demon!

Levi, relying on the positioning and markers left by the Holy Infant, took some effort but finally arrived at the Magma Cave.

Danger Perception was in pre-warning, without a doubt, there was a level 6 presence here.

Behind Levi, the gigantic body of the Heaven Crystal Dragon Ant squeezed through the tunnel.

On top of the Dragon Ant's head, Martha gripped Frost Mourning, looking eager to try her hand.

Mana was very relaxed; she was the real confidence behind Levi's daring challenge against the Fire Element Lord. With the advantage of terrain and rare treasures, an ordinary Sixth Circle wizard was no match for the demonized Fire Element Lord.

Levi muttered to himself,

"Counting me, we are three and a half against one, if we lose, I, Levi, would be unworthy of the transmigrator title."

Magma Cave.

The Fire Element Lord, having calmed its rage, was preparing to go into slumber in the depths of the magma.

Its true name was "Flame Destroyer-Diabo."

It was a Fire Element Lord born naturally in this land, but because of the influence of demonic aura, it had completely lost its mind, turning into a demonic creature.

"Damn insects."

Diabo casually grabbed a fire element and consumed it, continuing its descent into slumber.

Before it could fall asleep, a piercing cold light exploded on the surface of the lake!

BOOM!

A terrifying explosion awakened Diabo.

"Who is it now?!"

It roared furiously, and waves of fire rolled out as its imposing figure appeared above the Sea of Fire in an instant.

Then, it was taken aback.

One, two, three... a full three level 6 auras instantly targeted it. There was also another creature that seemed strong enough to pose a threat to it.

Knowing it couldn't win but driven by rage in its heart, it still attacked.

In its hand, the Flaming Saber lifted a crimson river, charging towards the huge ant.

The Heaven Crystal Dragon Ant's body was covered in Frost Armor, its antennae emitting a blue light, sweeping across.

The river of fire and Frost Power collided, freezing and then falling into the magma.

Martha descended from above, swinging her great shark-tooth-shaped sword in a dance of swordplay, emitting cold breath.

Levi could feel that Martha's "Cold Ice Breath" realm might be similar to his own. But the same sword skill, when she used it, was overpoweringly stronger than his. This was the difference in cultivation.

A round ice crystal ring with a diameter of about five miles appeared, binding Diabo with countless ice crystal particles.

The might of the Ice Sword Domain was terrifying indeed!

Diabo's movements with its great sword noticeably slowed down.

But it stood in the magma, its strength continuously surging, waves of fire striking all around.

Levi had also considered pulling this Fire Element Lord into the Ancient Banyan Fairyland to fight through Mana.

But ultimately, he abandoned this plan since the strength of the Fire Element Lord was not something that could be compared with a Cave Wizard.

A fight between it and Mana in the Ancient Banyan Fairyland would likely cause significant damage to the young fairyland. Although it could heal over time, the loss wouldn't be worth it.

Most importantly, inside the Ancient Banyan Fairyland, there were too many rare plants and animals belonging to Levi.

Any accident would be an irretrievable loss.

Thus, unless there was absolute overpowering strength, Levi dared not allow a level six expert to enter the fairyland.

Martha used the Ice Sword Domain to restrict Diabo's movements.

The Dragon Ant's jaws clamped down on Diabo's flame sword.

The sound of metal clashing came through as the Dragon Ant, like a fierce dog, bit and didn't let go, the flame sword making cracking noises.

Diabo kept waving its arms, trying to shake the Dragon Ant off.

Clearly, it was baffled, having never seen such a ferocious creature.

On the flame sword, the flames that burst forth were extinguished by green branches that lashed at it.

Mana also took action; her current cultivation had reached the Mid Stage.

Even though it was just a projection of her strength in the outside world, it was still formidable.

She brought her hands together, and a vision of an ancient banyan tree that stretched thousands of kilometers high appeared behind her, almost connecting with the ceiling of the Magma Cave.

"Ten Thousand Leaves Sealing Realm!"

Rustling sounds filled the air.

Countless green leaves turned into a deluge like the Yellow River, encircling Diabo.

Already slowed down by the Ice Sword Domain, the Fire Element Lord was instantly sealed within the Green Leaf Barrier.

Mana's slender fingers danced, and the Green Leaf Barrier continuously compressed.

Within it came terrifying suppressive force, doubling the pressure on Diabo.

Although it was now on its own turf, outnumbered, it was already at a disadvantage.

It roared like a true Molten Demon.

Martha said,

"If you will surrender to us, we are willing to strip you of your Demon Body and return you to a normal Fire Element Lord."

After demonization, the creature's strength did indeed increase slightly. However, like the black beast, it was always on the edge of madness and chaos, which was a torture of its own.

Diabo bellowed,

"Die!"

Boom, boom!

Endless magma surged toward Diabo, forming a suit of Molten Armor.

Diabo's body finally emerged from the Sea of Molten Lava, revealing its serpentine rear.

Its tail swept across, rolling up a large swath of the Sea of Fire, charging toward the barrier that bound it.

Martha's brows furrowed slightly as she said,

"You are no match for me."

With a single thought, the Queen Banyan within the fairyland rustled, and vast green energy flowed into her body.

In terms of endurance, as the divine tree rooted in the Earth and possessing the power of a whole realm, how could Martha lose?

Inside the Green Leaf Barrier, the pressure increased. The Heaven Crystal Dragon Ant and Martha's Ice Sword Qi continuously weakened Diabo's strength.

Its fire element body was immune to massive damage, and with magma providing energy, it managed to hold on until now. Any other Sixth Circle Ordinary Wizard would have already surrendered.

It roared furiously, its Flaming Saber breath freely spitting out, striking the barrier, causing it to tremble ceaselessly.

Unmoved, Martha had streams of green energy wrap around Diabo.

Diabo's enormous body struggled relentlessly, along with the barrier, darting around the cave, shattering the surrounding rock walls.

"The wind rises!"

Levi's Wind Disaster Pearl emerged, and the overwhelming Wind Disaster Power surged forth, forming a giant tornado, engulfing Diabo into it, turning it into a fire tornado.

Diabo's treasure sword was now firmly clutched by the Heaven Crystal Dragon Ant, preventing it from flying back to its master.

Martha's Ice Sword Qi left Diabo's fire element body scarred and damaged.

The Green Leaf Barrier compressed Diabo's massive body down to only ten meters tall.

A green orb floated in the air, hot to the touch.

Diabo struggled within, its movements and aura growing weaker and weaker.

At this moment, even Martha looked solemn, clearly at a critical point; she was drenched in sweat and said,

"Levi, get ready to make your move."

Levi replied,

"Thank you all, let me give it a try."

Levi's Primordial Spirit Projection emerged. f

Behind it, the shocking apparition of the Thunder Emperor took form.

Seeing this, both Martha and Martha were taken aback.

They subconsciously thought this was Levi's Primordial Spirit wizard form, even wondering how Levi had silently broken through to the sixth circle.

Upon closer inspection, it was merely a technique similar to wizard forms.

Levi flew into the body of the emperor, closing his eyes, channeling all of the Scarlet Dragon's power within him; in the emperor's apparition's hand, a Crimson lance materialized. Chaotic Power wrapped around the lance, dyeing it white.

The lance was thrown, piercing through the barrier and into the body of the Fire Element Lord.

The surging Scarlet Dragon's power, protected by the Chaotic Power, spread wildly within the weakened body of the Fire Element Lord.

Inside Diabo's mind, it was a world-shattering scene.

An apparition of an emperor standing atop six dragons commanded:

"Submit to me!"

Boom!

Like the roar of thunder, like the descent of heavenly might.

Levi realized that in terms of spiritual force, this Fire Element Lord was, after all, inferior to his current self.

The apparition of the emperor overwhelmed its spiritual sea, and the fire element's true soul, with a serpentine body, eventually bowed its proud head under the influence of the Scarlet Dragon's power.

In the outside world.

Levi looked pale; to ensure success in one strike, he had expended all his Scarlet Dragon's power, and his spiritual force was also depleted.

It seemed as if he hadn't fought, but in reality, the expenditure was significant.

A smile appeared on his face, feeling a secret joy within. Another level six was in hand, and the lineup of the Four Heavenly Kings was now complete.

Chapter 1603: Millennium Giant Fir Bears Divine Fruit, Dragon Abomination Falls at the Rising Sun!

Dragon Ruins Mysterious Realm.

Magma Cave.

The Green Leaf Barrier burst apart, revealing the weakened Fire Element Lord within.

Under the Scarlet Contract, Diya Bo lowered his noble head, submitting before the Thunder Emperor.

"Master."

The emperor slowly dissipated.

Levi said,

"I'll take you out next, and find a way to purify this demonic aura enveloping you."

As a Lord-tier demonic creature, staying within the fairyland for too long would inevitably contaminate the surrounding environment, and Levi didn't want to associate the fairyland with the Abyss's demonic aura. While demonic aura was useful to him, overall, the disadvantages outweighed the benefits.

The Ancient Banyan Fairyland opened.

Martha and the others took Diya Bo with them into it.

Levi temporarily placed him in another Fire Elemental Spirit, convenient for Diya Bo's cultivation.

As for Flaming Mountain, he worried that the demonic aura might have contaminated both the Ashen Dragon Egg and the Black Lotus Beast that were in seclusion.

Inside the fairyland.

Martha said,

"Do you have a way to purify this demonized Fire Element Lord?"

Levi replied,

"I do. My Purification Elixir can now be mass-produced. Next, I'll find a way to gradually remove the demonic aura and restore its true nature as a fire elemental spirit."

Martha responded,

"That's good... Becoming a Fire Element Lord is not easy."

Martha sheathed her longsword, smiling,

"Sir Levi's methods are truly formidable, to actually subdue demonic creatures—I am impressed."

Levi responded,

"Haha, it's nothing. Thank you for your help, Martha."

Martha replied,

"No problem, we're all family now. Shared glory, no need for formalities. Besides, if I stay too long in the fairyland without fighting, I'm afraid I'll forget the Ice Crystal Clan's combat techniques."

Elsewhere.

The Heaven Crystal Dragon Ant was still holding Diya Bo's treasure sword in its jaws, shaking its head wildly.

Levi seriously suspected that in its past life, the ant was very likely a dog.

He called the Dragon Ant over and took the Sixth-level Treasure from its mouth.

It was a simple-looking greatsword, and its maker was unknown, but it seemed quite good.

Levi asked,

"Would either of you seniors be interested in this rare treasure?"

Martha showed no interest at all, having returned to swinging on a tree, looking preoccupied.

Martha shook her head,

"I have the Frost Mourning, that sword is superfluous to me. You keep it, Sir Levi."

The Heaven Crystal Dragon Ant seemed to express its desire...

Levi smiled,

"What would an ant do with a greatsword? I should return it to Diya Bo—it is his treasure after all."

Within a volcanic vent, Diya Bo lay in the magma, facing upward, absorbing the fire elemental power to heal his ravaged body.

Levi said,

"Diya Bo, I'm giving you back your treasure."

Diya Bo propped himself on the edge of the vent, speaking in a low voice,

"Thank you, master. I found this treasure, and it has served me well; truth be told, I was somewhat reluctant to part with it."

Levi replied,

"Focus on your recovery."

He went back to the outside world.

In the Magma Cave, there seemed to be several rank five fire elemental spirits, which Levi didn't waste; he slew them all, turning them into crystal cores.

"Phoenix is following me and is indeed fortunate. Such precious Fire Element Crystal Cores are excellent for making Fifth-Circle Wizard Tools, all to be fed to it... I hope this youngster will reach level 6 soon and not let down my expectations."

Levi restored his strength to peak condition within the Magma Cave, and after ensuring there were no other resources, he quickly left.

It had only been two days since he entered the Dragon Ruins Mysterious Realm, and he had already gathered many herbs, a vast amount of fire elemental and demon crystal cores, and even subdued a level 6 Fire Element Lord, along with an additional treasure.

This bounty far exceeded his expectations. The only issue was that he still had no clues regarding the crucial bloodline crystals.

Through Diya Bo, Levi learned that the creatures in these devil's dens seldom left their lairs.

But Diya Bo was different; it had migrated from the deeper parts of the Catacombs three thousand years ago.

The reason for its departure was the overpowering strength of the creatures dwelling deeper within.

This included powerful Dragon Abominations.

This piqued Levi's interest, but unfortunately, Diya Bo also couldn't remember how to reach these Dragon Abominations' lairs, and such creatures might be mobile; the coordinates from a thousand years ago were likely different now.

In essence, it seemed Levi could only rely on luck.

Three more days passed in this way.

Levi's luck remained favorable. Along the way, he collected some herbs and materials rare in the outside world.

By comparison,

Things were quite ordinary on the Holy Infant side.

Protected by the Rust Dragon Wizard, they ventured deep quickly but also stumbled into several Catacombs holding level 6 entities.

Yet, these were powerful demon lords.

There were Flame Demon Lords, and Snake Demon Lords too, but fortunately, with the Rust Dragon Wizard, they all managed successful escapes.

Levi, on the other hand, mapped out the positions and routes of these caves but didn't continue to waste time hunting demon lords.

These creatures were much tougher to deal with than Fire Element Lords.

Even with his many Guardian Vajras, Levi didn't want to risk it without substantial benefits.

His successful contract with Diya Bo also involved an element of luck.

Of course, once Diya Bo recovered, if there was time, Levi wouldn't mind letting the Four King Kongs take action and annihilate these demon lords.

That way, he could use the crystal cores and other materials in future weapon-making and Pharmacy endeavors.

Moreover,

Through the Holy Infant's information, Levi found out that the Dragon Ruins Mysterious Realm was only open for one month.

Chapter 1604: Millennium Giant Fir Bears Divine Fruit, Dragon Abomination Falls at the Rising Sun!

Before the deadline, Levi had to leave the Demon Land and return to the surface.

At that time, the tokens on their bodies would take them out. The next opening would be in five hundred years.

Levi felt that this Shadow Realm was somewhat like a low-end Dark Ancient Tower and might also be the work of a wizard.

The Demon Dragon Crystal Core he needed was likely in the Deep Cave, Levi dared not delay, and continued to delve deeper.

Along the way, Jin gradually demonstrated the powerful aspects of being a Treasure Seeking Mouse.

There were several catacombs that Levi couldn't be bothered to enter. But when Jin sniffed out the scent of treasures, Levi followed and indeed found some decent items.

Seven days later.

The opening time of the Dragon Ruins Mysterious Realm had passed by half.

That day, following Jin, Levi once again deviated from his route, winding his way.

While passing through a medium-sized catacomb, something like a Scythe Demon Spirit suddenly emerged.

These things seemed to be formed after the death of some powerful demons.

The Scythe Demon Spirit stood thirty feet tall, exuding overwhelming Demon Flame and the aura of peak rank five.

Levi casually launched a Fire Dragon Tribulation spell, which exploded resoundingly.

The catacomb was illuminated by the firelight, and the Scythe Demon Spirit, having taken a hit from the Fire Dragon Tribulation, did not die.

Instead, it let out a pitiful howl and ran out through a passage.

Levi quickly caught up with Jin and did not chase after it.

The routes were complicated, and once it escaped into a passage, it would be very difficult to catch again.

Not long after, they hunted many demonic creatures and demons, clearing several catacombs.

Jin stopped in front of a Crystal Membrane in a catacomb, squeaking frantically.

They had reached the depths of the catacombs, and the Danger Perception was on alert.

"There should be a level 6 presence inside."

Levi summoned the Heaven Crystal Dragon Ant and entered.

...

Elsewhere.

In a certain medium-sized catacomb.

A Sixth-Circle Wizard dressed in earthy yellow wizard robes was engaged in combat with a strange creature that had a body like a ghost and a head with thirty-six tentacles.

The creature exuded the strength of a Level 6 Mid Stage, clearly a Mind Flayer.

The Sixth-Circle Wizard had only ordinary cultivation; his primordial soul wizard form was a solid large mountain, casting golden light that forced back the robust demonic aura of the Mind Flayer.

The Mind Flayer's octopus-like head suddenly inflated like a balloon.

"Divine Stealing Needle!"

Boom!

Terrifying spiritual force fluctuations swept through the catacomb.

Tens of thousands of invisible spiritual force spikes swept through.

The wizard from the Earth School of Thought's complexion changed, and he grunted.

In his mind, the Six-layered Magic Ring Holy Tower spun, blocking most of the psychic attacks.

But still, some hit his primordial soul.

Mind Flayers, among demons, were notoriously difficult to deal with; they were masters of manipulating spirit and excelled in psychic attacks to the point of mastery.

The wizard, knowing he was no match for the Mind Flayer, produced a measuring tape a hundred meters long from his mountain-like wizard form.

As soon as the tape measure appeared, its powerful suppressive force made the Mind Flayer struggle as if in a swamp.

At the same time, the tape measure struck, and the Mind Flayer, caught off guard, was repelled, immediately bearing a ferocious wound that was difficult to heal.

It was thoroughly enraged and said,

"Not bad strength, this body of yours will be mine... I want to leave this cursed Shadow Realm."

By absorbing other people's brains, the Mind Flayer learned that this place was a Shadow Realm. With grand ambitions, it naturally did not want to stay here but aimed to seize the body of a primordial soul wizard and leave.

The Earth School of Thought's wizard was the body it had chosen.

Thunderous rumbles!

Increasingly powerful psychic attacks targeted the wizard.

The Mind Flayer willed it, and the spiritual force formed a cage, squeezing the wizard within, rendering him immobile.

"Spirit Sucking Prison!"

Even the recent invincible Soul Artifact tape measure could not break the spiritual force barrier.

"I've had enough of this damned place."

The Mind Flayer transformed into a ghostly light, flying toward the wizard.

The next moment.

A Black Silk Scarf surged from all directions, encircling to protect the wizard. The ghostly light hit the scarf and was reflected back.

The Mind Flayer's expression changed as it turned around.

In the catacomb, a graceful and mature figure appeared.

It was Triss.

These days, although she hadn't found a second Demon Dragon Grass, she had made considerable gains within the catacombs.

The silk scarf tore open the spiritual force barrier, and the yellow-robed wizard emerged with lingering fears, his face brightening upon seeing Triss.

Triss said,

"Mountain Ruler Wizard, you are unharmed."

The Mountain Ruler Wizard replied,

"Thank you for your assistance, this Heart Demon indeed was a tough adversary. How about we join forces to eliminate it?"

Triss smiled and said,

"No need for that, I alone am sufficient."

Her fingers danced, and the silk scarf transformed into a black torrent, slapping toward the Mind Flayer.

The Mind Flayer darted to dodge, completely losing its earlier prowess.

In front of a Sixth Circle Perfection wizard, it truly paled in comparison.

The Mountain Ruler Wizard, after hesitating for a moment, said,

"Then I will take my leave first; you are welcome to visit the Central Earth Pharmacist Association Headquarters."

This Sixth-Circle Wizard was also a high-level member of the Pharmacist Association; no wonder he was acquainted with Triss.

Knowing that Triss seemed interested in the Mind Flayer and did not want to share, he cleverly took his leave.

In the catacomb, only Triss and the Mind Flayer remained.

The Black Silk Scarf had completely enclosed the area, trapping the Mind Flayer like a frightened bird bouncing back and forth.

Triss chanted an incantation, and the Black Silk Scarf continually shrank.

Surging spiritual force tides erupted from the Mind Flayer.

Chapter 1605: The millennium giant cedar bears Divine Fruit, as the Rising Sun heralds the fall of the Dragon Abomination!

"Divine Thought Breaking Wave!"

Boom!

A terrifying wave of spiritual force struggled fiercely against the encirclement of the black silk scarf.

Triss looked like she was handling things with ease, and she thought to herself with a smile,

"Levi probably hasn't collected the complete brain of the Mind Flayer yet... This kid owes me another favor, hehe."

As it turned out, Triss killed the Mind Flayer not for herself, but for Levi.

A Mind Flayer's brain was a rare find. Since she had come across it, she naturally could not let it go. Even if Levi didn't need it, she could use it to refine potions.

As the black silk scarf and the Mind Flayer were entangled in battle,

Triss took out a golden feather pen from the pocket of her coat.

With slender jade fingers, she held the pen and drew talismans in the void.

After completing each one, her slender fingers flicked it away.

The runes turned into chains and plunged into the body of the Mind Flayer.

Just like that, a total of eighteen chains thoroughly bound the Mind Flayer.

Ripples of spiritual force continuously emitted from around the Mind Flayer.

Around Triss, an invisible protective force field emerged, blocking all shocks.

This woman was a treasure trove of artifacts; if the Mountain Ruler Wizard from before had seen her, he would have been green with envy.

Triss used the feather pen as a hairpin, inserting it into her hair and twisted it up.

Then she took off a beautiful pink butterfly hair clip - another Sixth-Circle Wizard Tool.

"Go, clamp it to death!"

The butterfly hair clip transformed into a butterfly with a wingspan of hundreds of meters. Its wings, like clamps, fluttered towards its prey.

The Mind Flayer looked desperate, unable to use any of its transcendent abilities against such a combination of moves.

How could this woman be so terrifying?

The colorful light swallowed the Mind Flayer.

The cries of the Mind Flayer could be heard.

After a brief moment,

The hair clip returned to Triss's side, holding a semi-transparent octopus-like head.

A black suitcase appeared on Triss,

From within, white arms extended holding scalpels, test tubes, and various potions.

Soon, the Mind Flayer's body was dissected as if by a skilled butcher.

A fresh, pulsating brain floated in mid-air, and lastly, was tucked into the suitcase.

Triss joked,

"I really am too considerate. Levi must be incredibly touched."

"However, it seems the Mind Flayer hasn't completely died; I just saw a part of its Demon Soul escape... It doesn't matter, as long as the brain is in hand, the rest has nothing to do with me. It wouldn't dare to try and possess me."

The black silk scarf flew back, landing on Triss's fragrant shoulder. The lady found an exit and disappeared.

Somewhere in the Catacombs.

The Scythe Demon Spirit, which had been severely injured by Levi before, suddenly emitted a purple glow.

An extremely ethereal shadow of a Mind Flayer emerged.

"Damn it, where did that wretched woman come from! My thousands of years of cultivation, ruined in an instant! Fortunately, I have a Demon Soul Avatar; otherwise, I truly would have no place to be buried."

To truly kill a sly Mind Flayer was an extremely difficult task.

"However, in the memory of this Demon Soul Avatar, it seems that it encountered an attack from a Fifth-Circle Wizard. That wizard's body seemed quite impressive; comparable to primordial soul wizards. I might as well possess him."

Now that the Mind Flayer was only peak rank five, it naturally did not dare to target a Sixth-Circle Wizard.

But with its methods as a Mind Flayer at the Level 6 Middle Stage, possessing a fifth-circle perfection wizard was still possible.

Even if the wizard was extraordinary, it would make no difference.

In matters of possession, the primordial soul of wizards paled in comparison to the Mind Flayer.

With that thought, the Mind Flayer turned into a wisp of spectral light, seeking out the Fifth-Circle Wizard.

Unlike Diya Bo, it was very familiar with the paths through the Catacombs.

That Fifth-Circle Wizard was like a lamb in a maze, waiting for slaughter.

"Hehehe! I will be free very soon!"

...

Before Levi was a small Catacomb.

The place was shrouded in clouds and mists, with a demonic aura pervading the air.

In the foggy distance, a giant fir tree nearly a kilometer tall could be faintly seen, as if a mountain peak.

The fir tree rose high into the clouds, straight and towering. Wrapped around the trunk was a decaying monster snake, its flesh rotting away, bones and flesh intertwined.

The colossal snake emitted the aura of a level 6 upper-level creature; clearly, it was a level 6 demonic lord.

It coiled around the giant tree while, below the tree, the accumulation of food remains from over the years spread an atrocious stench.

Levi was excited, not because of the level 6 giant snake, but because of the kilometer-tall tree.

"The Dragon Fir... The legendary rare giant tree, maturing in two thousand years and then bearing fruit every hundred years. Its fruit – Dragon Scale Fruit – is a sixth-circle medicinal herb that can significantly strengthen one's physique. When consumed by Dragon Clan creatures, it even aids their physical development. This is a true Heavenly Material and Earthly Treasure, beyond price!"

Besides, Dragon Scale Fruit was also a material for various Primordial Soul Potions, with infinite medicinal value.

Compared to the Iron Tree, which only grew a hundred feet in ten thousand years, Dragon Fir grew extremely fast, one meter a year. Its current height meant it had lived for a thousand years.

Thousand-year Dragon Fir itself was an excellent weapon-making material.

In terms of value, bloodline crystals couldn't even compare to the Dragon Fir; it was an heirloom treasure that could benefit generations to come.

With that in mind, Levi firmed his resolve.

"I must take this thing away."

He patted the Heaven Crystal Dragon Ant beneath him and asked,

"Do you think you can kill it? Should we call Senior Mana out?"

Chapter 1606: Millennium Giant Fir Bears Divine Fruit, Dragon Abomination Falls at the Rising Sun!

The Dragon Ant's antennae lifted as it said,

"No problem, I am enough by myself."

Levi thought for a moment and then said,

"I'd better call out Diya Bo, just to be on the safe side."

He actually didn't want to trouble Martha and Mana with everything.

Having recovered for some time, Diya Bo's strength had been restored by half.

Paired with the Heaven Crystal Dragon Ant, killing this Giant Snake Lord shouldn't be a problem.

The Giant Snake Lord obviously noticed Levi's presence as well.

Its grim gaze fixed on Levi, its snake tongue flickering in and out.

The snake's mouth opened, and a surge of poisonous breath came forth, even corroding the surrounding void, clearly demonstrating its mastery of poison.

The Heaven Crystal Dragon Ant charged like a Raging Bull, its antennae sweeping across, its blue light freezing the poisonous breath.

At the same time, a spatial rift appeared and Diya Bo's towering figure, holding a greatsword, emerged from within.

"Standing before you is the Flame Destroyer, Lord Diya Bo!"

It roared, its blade cleaving through the mist and flames trailing behind it as it charged towards the Giant Snake.

Levi hurriedly said,

"Be careful not to destroy that tree."

Diya Bo responded,

"Understood, I'll get this big guy down from the tree first."

The Giant Snake, seeing its enemies were two level six experts, didn't flee. But it refused to descend from its high perch, spewing poisonous fog that spread over a ten-mile radius.

The Heaven Crystal Dragon Ant ferociously bit onto the tail of the Giant Snake and then started dragging it toward the base of the tree.

Diya Bo's great hand grasped the snake's head, aiding the Dragon Ant in dragging the Giant Snake away.

The Giant Snake, with ordinary strength when facing single combat, was no match for either Diya Bo or the Dragon Ant. Now, caught between the two, it was even more powerless to fight back.

Soon, the Giant Snake was pulled down from the Magic Tree and dragged aside, where the two brawny men surrounded and beat it down to the ground, where it writhed in struggle.

The Heaven Crystal Dragon Ant's jaws clenched onto the head of the Giant Snake and exerted a powerful force.

Crack, crack.

The head of the Giant Snake was crushed to pieces.

But in the next instant, a new snake head sprouted from the wound.

The new head bit the Dragon Ant and flung it through the air with a violent shake, causing it to crash into the ground with such force that the mountain quaked and the earth split.

Diya Bo raised his flaming greatsword, gathering the fire elemental power from within a ten-mile radius.

The blazing sword light swept across, decapitating the Giant Snake once more!

Boom!

The Giant Snake's tail thrashed, sending Diya Bo flying.

The headless corpse struggled, and yet another snake head grew in its place.

This time, both the Dragon Ant and Diya Bo were stunned.

"An immortal body?"

Upon seeing this, Levi's Primordial Spirit Projection emerged, and the silhouette of the Thunder Emperor appeared.

Chaotic Power wound around the Emperor's Sword's surface, radiating a destructive aura.

"Hold it down for me, I'll give it a try!"

He commanded authoritatively.

The Dragon Ant and Diya Bo attacked again, the two colossal beings slamming the airborne Giant Snake back to the ground.

Diya Bo's flames enveloped the Giant Snake, and magma submerged it.

The Giant Snake struggled and squirmed in agony within it.

After the flames subsided, the Heaven Crystal Dragon Ant's Frost swept in.

The Giant Snake was encased in ice, momentarily trapped within.

Under the dual torment of Ice and Fire, the Giant Snake's body was already deeply scarred.

Just at that moment.

Levi descended from the sky, stepping out of the void, as an aura of profound mystery wrapped around him and flowed into the Emperor's Sword!

Boom!

The Chaos Sword Energy slashed towards the Giant Snake's vital spot!

Having already suffered from the devastations of Ice and Fire, the body of the Giant Snake was extremely fragile.

The Sword Qi from Levi, unstoppable, pierced into its body.

Ultimately, at the vital spot, a bead resembling a black hole suspended in the air, emanating powerful energy.

Boom!

The Sword Qi struck the bead, but to everyone's surprise, it did not shatter.

Instead, under the tremendous force, it was expelled from the Giant Snake's body.

The bead turned into a wisp of ghostly light, seemingly with spirituality, and attempted to escape.

The Heaven Crystal Dragon Ant intercepted it, clamping the bead with its jaws and rendering it immobile.

At the same time, Diya Bo's flames scorched the bead.

A shadow of the Giant Snake twisted and writhed within the high temperatures, eventually disintegrated into nothingness.

Ultimately, the bead fell to the ground, motionless. And the Giant Snake was silent no more.

After confirming the death of the Giant Snake, Levi collected its corpse.

Some materials from the Giant Snake's body were excellent for weapon-making and arrays.

The rotten flesh could also be fed to Long.

The last time, Levi regretted not keeping the body of the Cave Wizard for a long time.

He was curious to see the effects of sixth-level Golden Fertilizer.

As for the black bead, Levi guessed it was something similar to a crystal core, naturally nurtured inside the bodies of some sixth-level transcendent creatures.

Containing dense dark energy within, it emitted an exotic fragrance; upon smelling it, Levi felt his vitality surge, evidently containing extreme poison.

However, his physique was strong, and being of the Crimson Dragon itself toxic, Levi quickly absorbed this poison, using it to enhance his Scarlet Poison Body.

"I'll study this object properly when I return, it must be top-grade material for Weapon Refinement."

Levi pocketed the Demon Snake Poison Pearl for the time being and approached the giant Magic Tree.

The Magic Tree itself seemed to have been transformed by the demonic aura's corruption, but that was no hurdle.

The Purification Elixir could cleanse even the corrosive power of the Land of Darkness; the demonic aura wasn't an issue.

The Wizard World itself also possessed a mature purification mechanism to deal with the Abyss's demonic aura.

Levi performed the Crimson Dragon Slash around the giant Magic Tree, a technical task, as the tree, a kilometer high, had its roots spread throughout the inside of the Catacombs.

Now, the value of Long's abilities was revealed.

Chapter 1607: Millennium Giant Fir Bears Divine Fruit, Dragon Abomination Falls at the Rising Sun!

Only a two-hundred-meter-long giant worm was seen, burrowing directly into the base of the giant tree, accompanied by the spread of yellow light.

Wherever Long passed, the soil layer began to soften and become breathable; the Dragon Fir giant tree also started to shake, with millions of developed roots surging out, like earth dragons.

In mid-air, the rift in the Ancient Banyan Fairyland had been stretched to the Maximum, relying merely on the suction of the fairyland, it was no longer sufficient to draw the giant tree into it.

From within the crack, millions of green branches flew out, entwining the trunk of the Dragon Fir giant tree.

Mana's hair danced in the air as she shouted softly, and the great strength of Queen Banyan burst forth.

Mana's petite figure and her pitifully charming face contrasted starkly with her commanding presence, reminiscent of Lin Daiyu uprooting willows—so powerful yet delicate.

Eventually, the Dragon Fir giant tree was finally dragged into the Ancient Banyan Fairyland.

Levi heaved a sigh of relief and quickly followed.

Inside the fairyland.

He had already found a good resting place for the Dragon Fir giant tree in advance.

No. 012 Element-Rich Land, Hidden Mist Mountain.

This place was rich in water vapor, and miasma emerged, with a heavy yin energy.

When Long returned to the fairyland, he immediately set to work and quickly cleared a large area of soft soil.

Levi's Sword Qi swept through, digging a large pit, and he hurriedly transplanted the Dragon Fir tree. After that, various care and maintenance were still needed before it could truly be out of danger.

Such a grand project attracted many members of the Dragon Palace.

They looked at the giant tree curiously; Levi said,

"This tree will bear Dragon Scale Fruits, which are of great benefit to the Growth of the Dragon Clan. Work hard at your cultivation, participate more in the World's First Dragon Tournament, and dragon scale fruits will be distributed according to the competition rankings."

Under normal circumstances, the Dragon Fir tree would need a thousand years to bloom and bear fruit.

But with Long's Golden Fertilizer and Levi's cultivation methods, three to four hundred years would suffice.

At that time, the Growth of the Dragon Palace will also embark on the fast track.

Hearing of its importance, the members of the Dragon Palace were all spirited and competitive... Surely a self-disciplined trend would sweep through the Ancient Banyan Fairyland before long.

Within the Catacombs.

Levi inspected again meticulously; he collected the Corpses spat out by those giant snakes to feed Long in the future—not a bit wasted.

"It's good I came in this time; if I had been as timid and hesitant as before, who knows how many opportunities I would have missed... When my strength permits, I still need to take more initiative."

He continued deeper, in search of traces of the Dragon Abomination.

Several days later.

Within the Catacombs, a figure quietly emerged.

A miniskirt, black stockings, a mature yet youthful and pretty aura—it was Triss.

"Has my luck run out? It's one thing not to see the second Demon Dragon Grass, but to encounter no other treasures either? I really want to capture Levi and drain all his luck."

Triss deeply believed in Levi's luck for him to have grown swiftly. Talent and effort alone could not account for Levi's progress.

Triss released her spiritual force, sensing the battle traces in this place.

"It seems several level 6 upper-levels have battled here."

Suddenly, she noticed a huge pit ahead, and the scattered leaves around it.

She picked up one and her expression was one of shock.

"Dragon Fir Tree, it's such a rare plant; who lacks the decency to dig up a whole tree..."

"Judging from the leaves, it was at least a thousand-year level Dragon Fir Tree. Not an easy task to relocate."

Seeing that the place was empty, Triss no longer wasted time and continued downward.

...

In the blink of an eye.

Seven days passed.

There was only a week left before the closure of the Dragon Ruins Mysterious Realm.

Under the lead of the Rust Dragon Wizard, Holy Infant and others made decent gains as they delved deeper.

The deeper they went, the fewer the devil's dens became and, at the same time, the devil's dens kept enlarging.

Almost any devil's den was comparable to a small secret realm.

One day.

In a Catacomb filled with black sand, Holy Infant and others met a burly man on the narrow path.

Six-Armed Gedwin!

Seeing this man, Holy Infant felt stirred.

"Unexpectedly, this person has also come to the Dragon Ruins Mysterious Realm... Truly, the ways of Heaven are like Reincarnation."

Six-Armed Gedwin naturally did not know about the relationship between Holy Infant and Levi.

He attacked with a sinister laugh, with black Energy Balls emerging in his four dragon claws, exuding a destructive aura.

Boom, boom!

Without saying a second word, he directly launched an attack on Holy Infant and the others.

"Really shameless, attacking the younger generation," the Rust Dragon Wizard's cold snort came from the darkness.

A rusty sword tore through the sky, blocking all the Energy Balls. The shock wave made the Catacombs tremble.

Holy Infant moved subtly back beside Alexandra.

He wasn't the original, with a bunch of level 6s to substitute, he naturally wasn't a match for the burly man.

After a short time, the burly man, seeing no advantage to be gained, laughed sinisterly and said,

"I have a feeling we'll meet again."

Amid the dazzling flash of light, the Rust hurriedly used wizard forms to protect the two women and Holy Infant.

When the light faded, Rust said with a grave expression,

"This man seems very familiar with this place, and he has a rare Holy Light Series Treasure, it appears he came prepared, let's try to avoid him."

Alexandra said,

"Let's continue."

Holy Infant followed, deep in thought.

"It's time for the original to take action."

...

In a certain Catacomb.

Levi's gaze was cold and stern.

"What a small world. The one who was eyeing me before was this burly man. Next, the roles of hunter and prey are going to be reversed."

The number of pits deep inside was not many; it wouldn't be hard for Levi to encounter the burly man.

But with the closure of the Dragon Ruins Mysterious Realm imminent, his urgent task was to find the bloodline crystals, other matters aside.

Chapter 1608: The millennium giant cedar bears Divine Fruit, as the Rising Sun heralds the fall of the Dragon Abomination!

Levi had not gone out of his way to hunt down that burly man.

The following day.

In a certain devil's den.

Levi's figure emerged; through Spiritual Perception, he discovered there was a Demon Tribe here, which included several level 5 demons.

Meanwhile, his continuously alert Danger Perception signaled the presence of a level 6 being.

The Demon Tribe of this place were the Horned Bull Demons, a commonly seen humanoid demon resembling minotaurs.

Levi casually captured one and contracted it; after some questioning, he found out.

This catacomb was home to a Dragon Abomination!

The Dragon Abomination proclaimed itself the "Rock Monarch," ruling over this group in the Minotaur Tribe.

The Bull Demons were responsible for waging war in other catacombs, gathering food and treasure to satisfy the Dragon Abomination's needs.

Nevertheless, these Bull Demons had no idea of the Dragon Abomination's actual strength.

Levi covertly arrived at the dwelling place of the slumbering Dragon Abomination and saw from afar the two-hundred-meter-long spine of the giant beast buried in the muddy swamp.

The Dragon Abomination of this place, due to a lack of natural enemies, had nearly no sense of vigilance.

Levi, through studying the shape of its spine, already understood the dragon's species.

Swamp Rock Dragon.

This was a sub-dragon species of the Level 9 Pure Blood Dragon Clan Rock King Dragon.

Without a doubt, the Rock King Dragon was an earth-element dragon known for its defensive nature.

Legend had it that its body was covered with a rocky shell much like Earth's crust, emanating a strong magnetic attraction.

When it slept within the Land of Darkness, this attraction would continuously pull in meteorites, Plane Fragments, and other materials.

Eventually, this encased the Rock King Dragon at the Earth Core, forming a solitary star floating in the Void.

"It's you, Swamp Earth Dragon!"

Inside Ancient Banyan Fairyland.

Both Heaven Crystal Dragon Ant and Diya Bo were prepared for battle.

With a wave of his hand, Levi opened a massive spatial rift, and Dragon Ant transformed into a streak of cold light, charging first into battle.

Diya Bo, whose strength had mostly recovered, descended with his large blade from the sky.

From a distance, the Bull Demon village watched this scene in shock, then scattered like birds and beasts; they had been forced here by the tyranny of the Dragon Abomination.

Levi casually killed some level 5 demons to harvest their crystal cores, not bothering to expend his energy on any below level 5.

With a thought, he projected his Primordial Spirit into the outside world, the Thunder Emperor's ethereal form grasping an Eight-Armed Demon Emperor, wrapped in the aura of the Moon, as it slashed down from the Void!

Boom!

Chaos Sword Energy stirred up the swamp, and only then did the Dragon Abomination open its eyes.

It radiated an aura of brutality, the might of a Level 6 Early Stage creature evident for all to see.

This made Levi even more reassured; with the help of Dragon Ant and Diya Bo, slaughtering the Dragon Abomination was entirely possible.

The Dragon Abomination roared, causing the swamp within a ten-mile radius to churn and convert into armor around the beast.

Even the jaws of the Heaven Crystal Dragon Ant failed to fully penetrate its defenses – a true descendant of the Rock King Dragon.

Diya Bo's fiery blade light slashed down from the Sky Dome, the heat wave evaporating the swamp.

The Dragon Abomination roared; with a fierce stomp, hundreds of feet-thick layers of earth were hauled aloft, colliding with the blade light.

Boom!

In the face of the true might of a Level 6 being, Levi's Chaos Sword Energy seemed somewhat insignificant.

But he did not give up; every battle with a Level 6 was an excellent opportunity for him to hone his skills.

With the assistance of Dragon Ant and Diya Bo, coupled with the protection of the Wind Disaster Pearl, Levi had no need to worry about his safety.

Chaos Sword Energy slashed onto the Dragon Abomination's rocky armor, leaving deep ravines.

The Dragon Abomination opened its massive maw, spewing swamp breath in a fluid state, but Dragon Ant's antennae shone with blue light, countering the breath attack.

Seizing the moment, Diya Bo bellowed, and the fiery blade light swelled once more!

Boom! novel.com

With that strike, the entire swamp was cleaved in two.

The Dragon Abomination's armor was completely shattered.

Diya Bo pressed the advantage mercilessly. With a wave of his hand, countless lava emerged from the Sky Dome, transforming into rivers and rushing forth.

The terrifying force washed over the Dragon Abomination's body, blasting it away.

The Dragon Ant clamped its large mandibles onto the Dragon Abomination's tail. It was much smaller in size compared to the Dragon Abomination, but in terms of strength, it was no less formidable, even stronger.

Swinging its head left and right, it even performed a death roll, much like a crocodile.

Under the great force of the Dragon Ant, the Dragon Abomination was whipped back and forth like a flail.

Where it passed, the Earth cracked, and none of the demons or demonic creatures were spared.

The Thunder Emperor flickered into existence.

Bolstered by the "Pirates of the Caribbean" theme song, "He's a Pirate."

The Dragon Ant, Diya Bo, and even Levi, their auras were even more formidable.

Levi let out a great roar.

The Eight-Armed Demon Emperor forcefully thrust into the Dragon Abomination's wound.

He looked up at the Sky Dome; the aura of the sunrise seeped into his body, a relentless stream of strength flooding in.

The veins on his arms bulged, immense power burst forth, and he heaved the Eight-Armed Demon Emperor upward from below!

This strike, like the sunrise surging from beneath the sea level, brimming with life force and vitality, was unstoppable!

Warlord Catalog, Sixth Layer.

"Rising Sun!"

At that moment, Levi finally mastered the essence of this technique, elevating it to perfection.

With a ripping sound.

Under the immense strength of the Thunder Emperor, the Dragon Abomination was sent flying.

Earth, Fire, Wind, and Water converged, Chaotic Power was born, and a burst of white light as brilliant as the Great Sun gushed forth!

The Dragon Abomination's wound was torn apart, its innards spilling out.

Of course, had it not been for the Dragon Ant and Diya Bo breaking through the Dragon Abomination's strongest rock layer defense, Levi's Primordial Spirit would not have been able to easily penetrate the Dragon Abomination's armor.

Yet, this strike was infinitely close to a Level 6 standard, also Levi's strongest attack!

Blood sprayed across the sky, the Dragon Abomination wailed in agony.

The Heaven Crystal Dragon Ant and Diya Bo swarmed it, with cold and fiery lights intertwining, severing the Dragon Abomination's body in two.

Since Levi intended to harvest the bloodline crystal of the Dragon Abomination, naturally, he could not spare its life, delivering a deadly blow.

He had also considered, like Diya Bo, to subdue the Dragon Abomination with the Scarlet Contract and slowly purify and transform it later.

But with the opportunity for Evolution before him, he ultimately made this cruel decision.

White, blue, red.

Three terrifying attacks shone brilliantly together, turning the Catacombs upside down, demonic aura churning.

In the end, the Dragon Abomination let out a wail, collapsing into a pool of blood, its ferocious Dragon Head looking at Levi as it gradually lost its lustre.

Levi swung the Eight-Armed Demon Emperor, severing the Dragon Abomination's Dragon Head.

The Dragon Soul of the Dragon Abomination emerged, trapped by a spider's web extending from the spatial rift, dragged into it.

Leon struggled with effort, his eyes filled with longing.

To the heartless creature, it was time for a feast.

Levi dismembered the Dragon Abomination's corpse, stored it into his storage ring, reserving it for later extraction of the bloodline crystal.

"If we don't count the black beast, it's been a long time since I've slain a member of the Dragon Clan. Today, I guess I've broken the taboo once again."

After doing all this, Levi slaughtered all the level 5 demons in the area, harvested some crystal cores, and quietly departed.

The next day.

The silhouette of Six-Armed Gedwin appeared here.

He looked travel-worn, his body still bearing wounds, seemingly having undergone a fierce battle.

After a thorough investigation of the Catacombs, his expression turned ugly.

"The Swamp Earth Dragon is gone? Damn it, who stole my Earth Dragon!"

Chapter 1609: Enemies meet on a narrow road, overflowing success and profits skyrocketing!

Dragon Cave.

The burly man regretted his decision at this very moment.

He had considered the Swamp Earth Dragon to be easy prey within this cave.

However, en route, he had been pursued by two primordial soul wizards from the Immersed Ancient Castle, forcing him to take a detour.

Unexpectedly, this brief delay meant that the Swamp Earth Dragon had already been claimed by another.

Gedwin said coldly,

"I know there are only so many deep-layer devil's dens, I will find you!"

Last time, he missed the auction of a rare treasure because he was bidding for a bloodline crystal.

This time, with the opening of the Dragon Ruins Secret Realm, he would leave no regrets.

With that thought in mind, he located a catacomb and disappeared from the spot.

Half a day later.

Rust Dragon Wizard and the Holy Infant, among others, arrived here.

The scene before them bore the marks of devastation, with unrestrained fire and ice, faintly indicating the fierceness of a past great battle.

Elsie's mouth slightly agape, then commented,

"Numerous level 6 battles took place here; the deeper we go, the more dangerous the devil's dens become."

Alexandra touched her chest, looked at the fiery chasms on the ground, pondered for a moment, and then asked,

"Does this chasm look familiar to you?"

Pretending to survey the scene, the Holy Infant spoke gravely,

"This is the work of the Fire Elemental Lord!"

Alexandra nodded,

"That's right, the fearsome Elemental Lord has resurfaced, we need to be cautious going forward, especially since we have provoked it before."

The Rust Dragon Wizard flew over and mentioned,

"There are no remnants left here; let's move on, we'll be leaving soon, we must hurry."

Alexandra smiled,

"Our luck hasn't been bad this time, we've collected most of the main materials we needed, just missing the 'Fire Dragon Fruit' and other such rare items. If we can't gather it this trip, we'll wait for the next auction."

Elsie added,

"Safety first."

As time passed, the remaining wizards within the catacombs ventured even deeper.

Soon.

Just three days were left before the closure of the Dragon Ruins Mysterious Realm.

In the deeper large catacombs, opportunities increased, but so did the dangers.

Yellow Sand Catacomb.

This place probably hid an ancient wizard ruin, evidenced by the crumbling remnants of wizard civilization buildings submerged within.

Levi was meticulously investigating the area but ultimately found nothing.

"This place has already been visited, most likely by people from the Immersed Ancient Castle."

For some unknown reason, the Immersed Ancient Castle had acquired numerous keys, greatly outnumbering other organizations.

Suddenly.

Levi's Danger Perception intensely warned him, as if a level 6 was descending.

Levi's figure flickered, disappearing swiftly from the spot and reappeared on the other side of the catacombs.

At the original spot, a mysterious amethyst light appeared, accompanied by a surprised voice.

"Void travel capabilities, seems like a Fifth-Circle elite Wizard."

A figure in a black robe looked around. He was dressed in the uniform of the Immersed Ancient Castle and seemed to possess the strength of a Fifth-Circle Perfection. However, the spiritual force fluctuations and aura he emitted were already touching a sixth-circle standard.

This entity was indeed a remnant soul of the level 6 Heart-stealer that Triss had obliterated that day.

The Demon Soul had been reborn within the measures it had left behind and, after a period of recovery, now barely had the strength of a "half-step level 6."

It had tracked Levi down because it was deeply impressed by his body, despite some complications along the way.

It thought that its stealth abilities would allow for a successful attack at once.

Unexpectedly, Levi seemed to have foreknowledge of the danger and blinked away as if anticipating the attack.

"Forget it. Let's switch targets; this person is too complicated..."

The Heart Demon pondered briefly, then transformed into a dim light, preparing to leave.

Suddenly.

In the void.

A golden divine palace descended from the sky, its immense suppressive force abruptly pinning the unsuspecting Heart Demon to the ground.

The Heart Demon's expression shifted drastically as it triggered an immense spiritual force akin to a torrential wave, transforming into thousands of palms striking the divine palace.

The palace shook intensely, quickly becoming covered in cracks.

This would have been possible for Levi only after the advanced stages of Golden Snake Breathing Technique. If it were in the past, even if the Heart Demon's realm had fallen, it would be unthinkable to trap it.

But being trapped instantly was sufficient.

A vision of an emperor, wreathed in thunder and radiating a brilliant golden light, stepping on a Heaven Crystal Dragon Ant appeared!

Levi stated lightly,

"To think of ambushing me, then stay behind."

Levi felt that with his own strength, he could handle this peculiar black-robed wizard.

However, with a level 6 being available, why not use that power? Now was not the time for him to show off.

The Heaven Crystal Dragon Ant's antennae emitted blue light waves, engulfing the black-robed wizard.

Under the unrelenting blue light, a ghostly soul was violently shaken out from its body.

Seeing the form of this soul, Levi's expression changed.

"Heart Demon?"

The Heart Demon, seeing the Dragon Ant, also showed a drastic change in expression.

"A level 6 existence!"

It panicked and instantly lost the will to fight, quickly fleeing.

In its prime, it could have easily crushed this ant.

But now, as merely a Demon Soul without even level 6 standard, forcing possession was like a moth to a flame, a pursuit of death.

Though its realm had fallen, it still had many tricks left. It surrounded itself with amethyst light, and a passage of void formed by spiritual force clearly took shape.

Just as it was about to step in, suddenly from the side in the void, an immense flame-hand struck.

"Another level 6?"

The Heart Demon was stunned.

How did this boy manage to summon two level 6 beings to fight for him?

Diya Bo appeared majestic against the sky, enveloped with a mighty fire.

With the Dragon Ant in front and the Flame Demon behind,

the Heart Demon swiftly thought of escape strategies, resolutely preparing itself.

Chapter 1610: Enemies meet on a narrow road, overflowing success and profits skyrocketing!

"Spirit Shock!"

Boom!

The soul of the Heart Demon exploded completely, turning into countless fragments of spiritual force and demonic aura, scattering into the universe.

Levi looked puzzled.

"Self-destructing when unable to win? Knowing the cunning nature of Heart Demons, it's probably a trick."

And sure enough, a sense of crisis struck him. Amidst the explosion of spiritual force, a worm-like creature, with the mouth of a Seven-gilled Eel, darted through the void directly towards the Thunder Emperor's Primordial Spirit.

"This kid is the only rank five here, his spiritual defense must be the weakest. Possessing him is my only chance at survival!"

In a life and death crisis, the Heart Demon was still analytically calm.

Under normal circumstances, his analysis was right.

With its ability, even a cornered tiger could easily possess a Fifth-Circle. However, its target for possession was Levi...

The Nightmare Divine Palace descended from the sky, protecting the Thunder Emperor's Primordial Spirit.

Levi, having anticipated the Heart Demon's attack, was already prepared.

Crack!

The worm, with extreme penetrating power, actually pierced through the spiritual defense of the Nightmare Divine Palace.

"This sort of defense, you think it can stop me?"

Disdain filled the Heart Demon's heart. A ghostly light surged, pushing deeper.

The next moment, on the head of the Thunder Emperor's Primordial Spirit, a fantastical black helmet appeared, emitting a blast of spiritual breath.

The Heart Demon, struck as if by thunder, endured this hit but barely penetrated the helmet's defense.

"Hahaha, I've reached his mind, now this body is mine."

The Heart Demon looked forward and saw Levi's "Primordial Spirit" sitting cross-legged inside the Divine Ring Tower, looking at it with a quasi-smiling expression.

Thud!

Thud!

Thud!

With a sound akin to a grand bell tolling, the Heart Demon's soul felt shattered.

"Divine Ring Tower, you're a Primordial Soul Wizard? Impossible!"

Its soul, like facing devastating waves, was thrown out.

Boom!

Just as the Heart Demon's soul left Levi's mind, a beam of blue light swept across and captured it.

At the same time, a spider web shot out, wrapping it layer by layer.

Leon, while injecting venom, muttered:

"Inexhaustible, truly inexhaustible..."

The soul of that Dragon Abomination from the other days hadn't been consumed yet. And now, another feast. Such is the drudgery of a bug's life.

The voice of the Heaven Crystal Dragon Ant in Levi's mind:

"This guy's tough."

Levi said,

"Heart Demons are like that, unpredictable. But now that Leon has him under control, there's no worry."

Ancient Banyan Fairyland.

Levi looked at the Heart Demon's soul, now deeply asleep and wrapped up like a huge dumpling, with Leon lying on top, slowly sucking.

"This guy must've been a Sixth-level being before, or he wouldn't be so difficult to deal with... Can it be that inside the Dragon Ruins Mysterious Realm, there are Sixth-level Heart Demons? My quest for the Heart Stealer Brain has a destination now."

This realization brightened Levi's eyes; the journey to the Dragon Ruins Mysterious Realm truly paid off. The crucial element for the advancement of knights and wizards to Primordial Soul was seemingly within grasp.

With that thought,

Levi approached the Heart Demon's soul, wondering if he could use the Crimson Contract to subdue it while it was in deep slumber, thereby learning the whereabouts of other Heart Demons.

Leon stepped aside, and the force of the Scarlet Dragon in Levi spread to the ephemeral soul of the Heart Demon.

Eventually, Levi left with a pale face.

"It didn't work, it failed... The soul of the Heart Demon is so powerful, compared to Diya Bo it's nearly a junior. Its realm before death had to be at least Middle Stage Level 6."

Levi pondered.

"Now, with less than three days until the Mysterious Realm closes, I must leave a day to return the same way to the surface and converge with the Holy Infant. With another day to explore, even if we find nothing, we must leave."

The rules of the Mysterious Realm explained by the Rust Dragon Wizard, he dared not violate.

Meanwhile, in other Catacombs of the Mysterious Realm, many wizards had started to return, no longer delving deeper.

Only those bold and skilled Primordial Spirit masters continued downward.

The next day.

In a certain Catacomb.

The Holy Infant and others appeared.

Three Fifth-Circle Perfection Wizards, using their respective methods, cleared a tribe of Molten Giant Trolls.

Not long after, they reached the air above a rift.

Below, there was a pile of messy red bones, still radiating some heat.

The Rust Dragon Wizard said,

"This is a Dragon Abomination that died over ten thousand years ago, seemingly fire element. Look around here, if there are no Fire Dragon Fruits, then we can head back the way we came. Going deeper might even be beyond my ability to protect you all comprehensively, and our time is also running short."

Alexandra said,

"Let's split up and look."

Everyone dispersed, sweeping their spiritual force across the bottom of the rift. The Rust Dragon Wizard also helped in the search.

Soon,

The Holy Infant stopped in front of a crevice, looking at a cactus-like, emerald-green plant rooted there.

Its leaves were full of sharp spikes, gleaming coldly. In the center of the leaves were several plump, round fruits covered in dragon scales and radiating heat, tantalizing to the eye.

"Is this the legendary Fire Dragon Fruit?"

He immediately contacted Alexandra and the others.

A while later, Alexandra's surprised voice came,

"Truly, it's you, Master. You're our lucky star! I didn't expect that our trip to the Dragon Ruins Mysterious Realm would actually succeed in completing the mission."

Elsie hurried over, equally excited.

Alexandra said,

"There are a total of five fruits. My sister and I need two for alchemy, one for Rust Senior, and two for you, Master."
