Chapter 161: Demigod, Blue Frost Lord! (3)

"I'm not sure, but this feeling seems to be a sign of the invasion of the Blue Frost..."

'What Blue Frost?'

"A disaster, a terrifying disaster from the Blue Frost Plane."

"How terrifying?"

"Let's put it this way. The ruler of the Blue Frost Plane, the [Blue Frost Lord], exists at the demigod level. A long time ago, the Blue Frost Lord had invaded the mortal world under the summoning ritual of his cultists. That great invasion of the Blue Frost Plane had formed the ice continent today. How terrifying do you think it is?"

Tuten's heart trembled.

"Hurry up and leave before the subsequent explosion of the Blue Frost. It is terrifying and freezing, and those who are corrupted by it can also become dead. Wizard calls it [Blue Frost Undead].

"[Blue Frost Undead] was undying and extremely terrifying.

"I remember that some research by the Grand Wizard found that the Blue Frost Plane seemed inextricably linked to Hell.

"I don't mind. After all, I'm an artifact spirit. But you have to be careful. You might be corrupted by the Blue Frost and become a [Blue Frost Undead]."

After Tuten finished speaking, he waited for Levi's question.

Levi hesitated again as he looked at the blue tower.

His Spider Sensing a faint sense of danger.

It seemed that Tuten did not lie to him.

Moreover, Blue Frost sounded like something of a very high level. Levi was not sure if the Spider Sensing was accurate.

Ultimately, Spider Sensing was just a Special Effect of the knight's breathing technique. Levi was not sure if he could predict the danger that involved demigods.

He was curious about what was inside and whether there were any wizard or supernatural items.

However, he knew in his heart that the outcome would not be good with his current strength if he entered blindly.

After looking deeply at the tower, Levi left Bluefeather Castle with Magic

Shark.

Levi wandered around the abandoned city for a few days to see if he could find anything else.

He did not expect the unexpected gain.

He found three breathing technique inheritance diagrams in some noble houses in this city.

Thunder Bird Breathing Technique, Swift Dog Breathing Technique, and the Sandigo Breathing Technique.

The first two breathing techniques were shallow Bloodline Breathing

Techniques, both speed-type. However, their qualities were average and could only be cultivated to level 5 and level 4, respectively.

The Sandigo Breathing Technique was a strength-based breathing technique that could be cultivated to the limit of level 6.

Levi learned these three new breathing techniques on the same day.

Levi obtained four breathing techniques, including the Ostrich Mountain Breathing Technique, many Cores of the Undead, and the legendary weapon, Lion King's Pride.

This trip to Snow Valley City could be considered a good one.

"Many abandoned cities like Snow Valley City due to Snow Demons. These are all precious places."

Like a tiger, the Snow Demons that others feared were hardly life-threatening to Levi.

Therefore, he felt he could spend more time in Evernight Kingdom and go to other lost cities to pick up scraps.

In the Month of Warmth of the Holy Brilliance Calendar Year 101, Levi returned with a full load and brought Magic Shark back to the Snow Capital City.

He was travel-worn, carrying two swords and a black cloth bag. The Bag of Gluttony was too strange, so Levi could only wrap it in a typical cloth bag. Otherwise, if a bag suddenly had two eyes and a mouth, it would scare others terribly.

With the Bag of Gluttony, Levi's travel was much more convenient.

He folded the Lion King's Pride into the Bag of Gluttony.

This legendary weapon was too eye-catching, and Levi usually did not use it. Moreover, he was already used to Frostmourne, so he did not need to use the Lion King's Pride in regular battles.

There was also a pile of gold, Cores of the Undead, some small artwork, and food.

"It's beautiful to have a storage bag. It's a must-have for home and travel." Levi was in a good mood.

He came to the Shining Tavern and looked at the commission he had issued, but he still found nothing.

As for the antiques and artworks Duke Bluefeather obtained, Levi gave them to the Wild Dog Knight and asked him to sell them cheaply.

In this war era, everyone was in danger, and the willingness to buy this flashy art was very low.

Therefore, these items were only auctioned off for a few thousand gold coins.

However, Levi was already delighted.

He did not lack money at all now.

Just that pile of gold bars was enough for him to use in his next life.

"No matter how much money I have, it's a worldly possession. I have to convert it into my true strength," Levi sighed.

In his residence in Snow Valley City, Levi spent two days mastering the basics of the Ostrich Mountain Breathing Technique.

[Ostrich Mountain Breathing Technique: Level 1 (1/1000)]

"I currently have two excellent breathing techniques. Giant and Ostrich Mountain can be cultivated to the peak of level 9. The Giant Rhinoceros

Breathing Technique can also be cultivated to the peak of level 8."

"What I lack is endurance, physique, defense, and perception. These types of breathing techniques are relatively rare."

Levi planned to train all types of breathing techniques to the limits of what a knight could achieve.

The main ingredient in the secret formula of the Ostrich Mountain Breathing Technique was the egg of a black ostrich.

The black ostrich was a land bird that appeared in the desert area in the western part of the kingdom. It was three meters tall, had immense strength, dashed, and had the power of a knight.

However, compared to Earthly Dragon Beasts, black ostriches were more common.

Black ostrich eggs could also be bought in the market because they were very delicious.

Therefore, many people would steal black ostrich eggs yearly during the breeding season.

Then, they would sell it to the greedy nobles at a high price.

"Any problem that can be solved with money is not a problem."

Levi strolled around the Ice Snow Capital City.

He discovered that people were buying black ostrich eggs in the capital.

He immediately contracted all of them and made them into a secret medicine that was enough to cultivate for a few months.

Levi and the Wild Dog Knight agreed to set off for Icicle Islands tomorrow.

"I hope I can gain something.."
