

Wizard 162

Chapter 162: Great Ice Ape King! (1)

The following day, Levi emerged from his state of cultivating the breathing technique.

He was in high spirits.

"Silver Mink Silver Mink Breathing Technique has reached its Maximum."

[Silver Mink Breathing Technique: Level 5 (Maximum), Special Effect:

Intermediate Speed.]

"I can infuse it with the Siren Breathing Technique and break through its limits."

Levi's Siren Breathing Technique was only 2 points away from breaking through.

The Silver Mink Breathing Technique could provide 2 points.

Soon, the fusion was completed.

The fusion of these low-level breathing techniques did not pose much of a burden to Levi.

Levi opened the interface again.

[Siren Breathing Technique: Level 7 (1/50000). Top-tier Speed. Bone Shrinking Transformation]

"When the Siren Breathing Technique reaches level 8, I'll have Transcendent Speed. At that time, under full power outburst, I should be able to run 100 meters in one second. My explosive speed is about the same as a high-speed rail for a short period."

A mortal could reach the speed of a high-speed rail. This was indeed inconceivable. This was the power of the breathing technique.

Of course, it could only be used for a short period. For an ordinary speed-type grand knight, it would not last long.

However, Levi had Transcendent Endurance, and his burst time was extended. He should be able to last longer than the other grand knights.

Standing up, Levi began to enjoy his time.

He wanted to fill up the whale sac before his journey.

Not only that, but Levi also replenished the Bag of Gluttony with some food.

Since the Bag of Gluttony was not as reliable as the previous one, Levi carried most of the valuable items and did not put them inside the Bag of Gluttony.

After all the preparations, Levi brought Magic Shark and called for the Wild Dog Knight.

He quietly left the city of ice and snow.

In Snow Valley City, the Hunting Team led by Knight Kader arrived at the city once again.

This time, the team had 300 people.

He was determined to go deeper to save more neonle-

However, the situation was not right.

"Why haven't we met any Snow Demons after walking for a long time?"

The team members muttered and complained, "Yeah, what's happening?"

Where did the Snow Demons go?"

Knight Kader had a solemn expression.

"Be careful; Snow Demons might be hiding in the city's depths," he said.

However, when their team went further, he was shocked that the Snow Demons in the city's depths were even rarer.

"This is impossible. There have to be at least a few thousand Snow Demons here. How could they all disappear in just a month?"

Knight Kader frowned. This phenomenon was too strange and abnormal. It made him feel unreal as if he was dreaming.

Then, the team went deeper until they arrived in front of the castle in the middle.

There were still a few Snow Demons.

"Had those two people cleared out all the Snow Demons in this city in just a month?"

"Even if it were two grand knights, it would still be tough."

It was not that no grand knight had come here before.

However, although grand knights were strong, they could only kill 20 to 30 ordinary Snow Demons in a day. This was under the condition that they had a

High-purity mithril sword. Moreover, they had to rest well the next day to replenish their strength.

After all, even a grand knight could not be surrounded by too many Snow Demons. They could only attack those alone or in small groups of three to five. Otherwise, their lives would be in danger.

Moreover, there were many knight-level Snow Demons in Snow Valley City.

This made it so that no grand knight would come here to kill the Snow Demons.

However, Levi had the Frost Giant Armor, all-rounded warrior attributes, and Transcendent Endurance. His endurance was far beyond that of the other grand knights.

Although Magic Shark's strength was average, it could fight tirelessly if it had enough Cores of the Undead.

These two tireless killing machines worked together, and their efficiency was several times that of the other grand knight.

"No matter what, it's convenient to save people now," Knight Kader thought, hurrying to save some survivors.

Then, he returned to the Snow Capital City and told Snow Queen Elsa what he had seen.

Queen Elsa sat on the frozen throne in the magnificent palace, wearing a gorgeous ice-blue dress. She held her chin and seemed to be in deep thought.

In front of her was the kneeling Knight Kader.

The Queen asked., "You're saying that the Snow Demons in Snow Valley City have been eliminated?"

"Yes, Your Majesty. I led two grand knights in the Hunting Team a month ago. They moved freely after entering Snow Valley City.

"From the looks of it, these two grand knights should have killed these Snow Demons," Knight Kader said.

"They're not from our country, right?" Queen Elsa asked. "No, he sounds like someone from the Emerald Kingdom."

"How's the situation over at the Bluefeather Castle?" Elsa asked.

"I'm too weak to go in and investigate the Bluefeather Castle, but from the looks, there shouldn't be many Snow Demons left," Kader said.

"Quickly contact these two grand knights and have them come to my palace for a chat."

Queen Elsa seemed to have found a life-saving straw.

The Snow Demon crisis would significantly improve if these two people were willing to work for her.

Therefore, no matter the price, she had to fight for them.

"Alright, Your Highness. I'll send someone to look for him immediately.."
