

Wizard 1621

Chapter 1621: Three Hundred Years Golden Snake Maximum, Crossing Calamity Blood Tribulation Master!

Ancient Banyan Fairyland.

Flaming Mountain.

The Black-Scaled Giant Egg was still asleep.

The Iron Tree had grown taller since before.

In the distant sky, clouds of fire amassed, layer upon layer, like dragon scales.

The elemental power of fire within a ten-mile radius wildly surged forth.

At this moment, the Black Lotus Beast's place of closed-door cultivation had become the center of the Ancient Banyan Fairyland.

In the sky, several figures descended and came to Levi's side.

Mana said with a solemn expression,

"The tribulation of the Black Lotus Beast looks rather terrifying."

Levi asked,

"What was your tribulation, Senior Mana?"

Mana replied,

"My tribulation was the Thunder Fire Disaster. I was struck by lightning for three days and three nights, and then swept up by a sudden wildfire... sigh, it's better not to mention it."

Martha shared,

"When I advanced to level 6, I followed the path of the Plane Sovereign, but I also experienced a tribulation. My tribulation with the Ice Crystal Plane was a massive fire meteor that came from the Land of Darkness."

The Dragon Ant and Diya Bo nodded one after another; they each had their own calamities and disasters.

Levi thought to himself,

"Inexplicably, level 6 is a dividing line. To successfully advance to level 6, it seems one must endure a tribulation, and because of the different transcendent systems, there is also a variance."

The wizard's tribulation, from what can currently be seen, is the most terrifying, an ordeal of three calamities and four disasters.

This gave Levi the feeling that wizards were being targeted.

Levi and the others did not dare to approach the volcano where the Black Lotus Beast was located, for fear of affecting its advancement.

From the appearance of the anomaly to the present, the power of the fire element kept pouring into the volcano, and the Black Lotus Beast was slumbering within.

The area of the flame clouds continued to grow, as if someone was splashing ink and wielding a brush on the canvas of the sky, depicting a massive creature.

Dragon scales, dragon wings, dragon claws, dragon heads, and dragon tails appeared one after another.

The only thing not depicted was the hallmark Golden Eyes of the giant dragon.

Seeing this scene, Levi was shocked.

"Red Lotus Dragon?"

Yes.

The shapes formed by the flame clouds in the sky were conclusively that of a Red Lotus Dragon, the bloodline ancestor of the Black Lotus Beast!

"Indeed, for a sub-dragon species like the Black Lotus Beast to advance, it must pass through the trial of the bloodline's Primordial Ancestor."

This was consistent with what Levi had previously speculated.

"My Golden Snake Breathing Technique is formed through the fusion of two Legendary Creatures, the 'Black Snake' and the 'Golden Horn Beast'. Must I endure the trials of these two bloodline ancestors as well? Or is it that I must face the trial of the 'Golden Snake', which has never truly been born throughout ancient to modern times?"

Levi thought of the Crimson Emperor Dragon Breathing Technique, which contained an even more potent bloodline... When the time comes for his tribulation, it might not be as easy as he imagined.

"It looks like I need to make further preparations, first experiment with the Golden Snake Breathing Technique before applying it to other breathing techniques."

Once a wizard's tribulation began, it could end quickly.

However, the Black Lotus Beast's disaster was just brewing for three full days, with the volcano continuously trembling, as if it would erupt at any moment.

The Red Lotus Dragon formed by the flame clouds, apart from lacking eyes, could be said to be lifelike, as though a real Red Lotus Dragon descended to the world.

It silently observed from above, emitting a formidable aura. Even Mana and the others couldn't help but feel their hearts palpitate.

The voice of the Holy Grail echoed in the mind:

"Worthy of the strongest fire dragon, a Mythical level existence. Although it's only an illusion, such majesty is still so daunting... Perhaps even the Chaos Ancient Serpent, which controls Earth, Fire, Wind, and Water, is not necessarily its match."

Levi asked,

"Why? The Chaos Ancient Serpent commands Chaotic Power, shouldn't it be able to suppress the Red Lotus Dragon?"

The Holy Grail shook its head and said,

"Not at all. Commanding the power of Chaos is indeed very strong, but if one's understanding isn't sufficiently profound, then it's better to take the ultimate path of Fire instead. If we were to quantify it with what the Heavenly Father calls 'Authority', the Chaos Ancient Serpent only holds a small portion of the 'Chaos Authority'. The real bulk of it... lies in the hands of a God in the astral world."

Levi understood in his heart.

What the Holy Grail referred to should be the 'Lord of Chaos'.

This God, although not as prominent as the Seven Orthodox Gods in Nora, when looked upon the Multidimensional Plane, His influence far exceeds any one of the Seven Gods.

The Holy Grail continued,

"The Red Lotus Dragon is the pinnacle of Strength. The Flame Dragon of World Annihilation is proficient in '[Strength]' and 'Flame'. However, these are too far removed from you, and in time you will understand."

Levi nodded.

These things mentioned by the Holy Grail, he probably wouldn't be able to engage in until above level 9.

As days went by, on the seventh day,

Boom!

Accompanied by the eruption of millions of tons of magma and volcanic ash reaching the Sky Dome,

The volcano where the Black Lotus Beast was in closed-door cultivation erupted!

A giant beast, two hundred meters tall and wrapped in Black Flames, opened its eyes and looked towards the Sky Dome with a gaze of destruction.

There, the Red Lotus Dragon with a wingspan of more than a kilometer had hollow sockets that now emitted a radiant golden light.

With the finishing touch, the giant dragon's Golden Eyes were finally complete!

"Roar!"

Accompanied by a dragon roar that echoed throughout Flaming Mountain,

The Red Lotus Dragon came to life!

It plunged down ferociously, its Wings of Death cutting through the heavens, searing pieces of the void.

Levi was startled.

"Senior Mana, can the Ancient Banyan Fairyland hold up?"

Mana seemed somewhat uncertain, and she said,

"It should not be a problem. The two forces have not yet reached a true level 6 standard, they are only infinitely close."

Levi calmed his heart and watched intently to see how the Black Lotus Beast would overcome its disaster.

Facing the oncoming Red Lotus Dragon, the Black Lotus Beast's body instinctively trembled, a suppression at the level of bloodlines.

With the might of the Black Lotus Beast, if it were to undergo a wizard's three calamities and four disasters, it might not be difficult at all.

Chapter 1622: Three Hundred Years Golden Snake Maximum, Crossing Calamity Blood Tribulation Master!

But what it had to overcome was suppression from the power within its own bloodline.

To reach level six, it had to tear apart the Bloodline Ancestor that weighed upon its own head.

The Black Lotus Beast mustered its courage and let out a roar, its feet stomping the Earth, its sturdy dragon claw reaching out to collide with the Red Lotus Dragon's claw.

Boom!

The explosive shock wave flattened the volcano, spilling magma everywhere.

Fire meteorites splattered across the sky, thankfully the area was uninhabited, otherwise the plant life would have suffered greatly.

The Black Lotus Beast had chosen this place to undergo its Tribulation, considering this very point.

Unbeknownst to it, the Black Lotus Beast grew to a height of two hundred meters.

Its strength had multiplied several times over from what it had been before.

But under the immense pressure of the Red Lotus Dragon, its massive body was mercilessly flung away.

Rumble...

The Black Lotus Beast carved a ravine in the Earth with its body, scales bursting apart, blood vessels gushing blood.

At that moment, Levi felt incredibly distressed... he almost wished he could rush over with a jar and collect it all.

But he dared not, fearing he would disturb the Black Lotus Beast's Tribulation, or get himself involved, which would be disastrous.

To him, the Red Lotus Dragon's aura was no less than that of the Cave Wizard he had previously killed.

In other words, if the Black Lotus Beast wanted to overcome this tribulation, it had to rely on its not yet fully formed level six body to defeat the level six Red Lotus Dragon.

The Red Lotus Dragon, seizing the opportunity to be relentless, flapped its wings, drawing in the fire elemental power within a range of seven or eight miles, and then unleashed the extremely high-temperature Solar Wind!

Wherever the Solar Wind passed, the Earth turned to scorched earth and molten lava.

The Black Lotus Beast stood up, let out an enraged roar, and charged forward, resisting the Solar Wind while simultaneously opening its gigantic maw.

It unleashed the Annihilation Breath, which was significantly more powerful than before, even Levi wouldn't dare to withstand it directly!

Black light ran wild, striking the Red Lotus Dragon and sending it flying.

Levi thought to himself in a whisper,

"Come on, Black Lotus Beast, I believe in you!"

He had seen the Black Lotus Beast's efforts firsthand.

The Red Lotus Dragon's chest was blown open, flames and clouds constantly repairing it as it roared, opening its dragon mouth.

Boom!

A Red Lotus Breath that was even more massive than the Annihilation Breath shot out!

Wherever the flame flow passed, the Void bloomed with red lotuses, forming the Red Lotus Domain covering a five-mile radius!

Mana's expression changed.

"Such a powerful attack, Black Lotus Beast, hold on!"

At this time, the other members of the Dragon Palace had all arrived to watch the battle.

The Dragon Turtle minister, Ratti, cheered,

"Black Lotus, you can do it!"

The three brothers Ganwen Cui shouted and waved flags in support, while also learning from the experience, because they were likely to face such calamities themselves.

The Bloodsucking Demon Dragon quietly said,

"Big brother, if you can't get through this tribulation, who among the sub-dragon species in the world will be able to?"

In fact, the odds of the Black Lotus Beast successfully overcoming the tribulation weren't any higher than those of other sub-dragon species.

It was certainly powerful, but the calamity it faced was much more severe than those faced by other sub-dragons.

For the most part, they only had to confront bloodline powers of Legendary level, but the Black Lotus Beast was facing a Mythical level Red Lotus Dragon!

On the wilderness.

The Black-Scaled Giant Beast and the Red Lotus Beast constantly collided in the most primitive and brutal battle.

Within the Red Lotus Domain, the Red Lotus Dragon's strength surged, completely suppressing the Black Lotus Beast, which was now a blur of blood and flesh, covered in wounds.

While its physique was formidable, it was not specialized in physical endurance, and its self-healing ability was inadequate.

In a short time, these injuries caused its strength to leak away, weakening it further.

But the unyielding spirit and will of the Black Lotus Beast made it rise to its feet time after time to battle the Red Lotus Dragon.

The Red Lotus Dragon was not faring much better, its body shattered, wings broken, and tail torn off. Relying on the Red Lotus Domain, it was still dominating.

The Black Lotus Beast's gaze turned towards the Dragon King, towards the members of the Dragon Palace.

"Roar!"

Accompanied by the roaring sound,

Like the heart of a star engine, it throbbed violently.

A black ripple emanated from the center of the Black Lotus Beast, rippling outwards!

Within the ripple, black lotuses bloomed eerily!

One, two, thousands upon thousands!

"Black Lotus Destruction!"

In the prolonged battle,

The Black Lotus Beast imitated the Red Lotus Dragon, grasping its own Domain ability.

It was the first level six spell ability it had mastered!

As the Domain expanded, fire elements from a ten-mile radius converged towards the Black Lotus Beast.

The sky filled with Black Flame and in the shadow of the Black Lotus Beast, a black dragon phantom, similar to but entirely different in color from the Red Lotus Dragon, took shape.

Seeing this scene, approval flashed in the Red Lotus Dragon's eyes, as if it were a teacher proud of its student from the Church.

It roared, as the Red Lotus Domain and Black Lotus Domain collided.

Red and black illuminated heaven and Earth.

Eventually,

The Black Lotus Domain tore through the Red Lotus Domain, the black giant dragon phantom completely shattered the flame cloud illusion of the Red Lotus Dragon.

Silence fell upon the land.

The flame clouds in the sky completely dissipated, and the Black Lotus Beast, despite its severe wounds, stood tall and alone on the wilderness.

A phantom shadow of the Red Lotus Dragon looked at the Black Lotus Beast, silent.

Moments later, the Red Lotus Dragon turned into a ray of light that poured into the body of the Black Lotus Beast.

The wounds of the Black Lotus Beast healed at a visible rate, new flesh and scales emerging.

Like a rebirth, the Black Lotus Beast's body completely transformed into that of a level six, exuding terrifying majesty.

Though it had just advanced to level six, it put pressure on the present level six experts. Such was the might of the strongest sub-dragon species!

The Black Lotus Beast closed its eyes, seemingly contemplating something.

Clearly, after overcoming the tribulation, it had much to gain, not just a level six body.

Chapter 1623: Three Hundred Years Golden Snake Maximum, Crossing Calamity Blood Tribulation Master!

Several days later.

The Black Lotus Beast opened its eyes, an excited look directed at Levi.

"Lord Dragon King, I've reached level 6!"

Levi's heart swelled with pleasure as he laughed out loud:

"Congratulations! Our Dragon Palace has gained another strong warrior!"

Now under Levi's command, there were already five Great Kings!

The Black Lotus Beast had just advanced and needed to stabilize its realm. After everyone offered their congratulations, it found a new volcano to begin its cultivation.

Levi didn't rush to extract blood from the Black Lotus Beast either; he was a considerate boss.

By the Small Stone Pond.

Levi also had some idea about the upcoming advancement of the Golden Snake.

"The Black Lotus Beast is already at level 6, and as the Dragon King, I can't lag behind. In this secluded cultivation, I will cultivate the Golden Snake to its maximum and start its evolution."

...

One year later.

The year 1286 of the Holy Brilliance Calendar, the Month of Beginning.

The 186th round table meeting had concluded perfectly.

The Eighteen Twilight Cavalry had already been training in the Nightmare World for twenty years.

After the Blood Knight.

The Ash Knight also stepped into the fifth level and named his Blood Source Armor "Withering Armor."

As the name suggests.

While boosting his physique and self-healing ability, he could also use the Ashen Power to corrode the life force of his enemies, causing them to wither like dry leaves.

After reaching rank five, the Ash Knight further developed his control over the abilities of the Ash Dragon through the Blood Source Armor and divine palace externalization.

Among the older generation of knights, Divine Light, Golden Lion, Saint Ape, and Goddess had all advanced to the late stage or peak of level 4, not far from level 5.

Furthermore, after obtaining the "Cold Ice Breath" sword skill, Levi passed it on to the Goddess Knight.

The Goddess Knight, after her cultivation, found the sword skill unexpectedly compatible with her, greatly enhancing her combat strength. Now she is utterly immersed in it and cannot extricate herself.

The middle generation knights, all of rank four, were still honing themselves in the early or intermediate stages.

Among the level 3 newer generation knights, the Fire Dragon Knight was still far ahead, but it would take decades of forging to reach level 4.

After the 24 Flowers joined the Tower of Dawn, they filled the gaps in personnel, propelling rapid organizational development.

After more than fifty years of growth, the Tower of Dawn now had a total of 200 disciples and masters. Though not many in number, they were all elite, with many among them being Fifth-Circle Wizards.

In the Endless Sea, this was enough to hold their ground in the inner sea region.

Over these years, Levi's weapon-making and pharmacy enterprises had steadily grown.

In Inner Ring District 1, the Fire Dragon Shop's business was still booming. Whenever the Holy Infant introduced new Wizard Tools, they were snatched up in an instant, in high demand but short supply.

Everyone was eager for Master Fire Dragon to increase production capacity, otherwise, it would be impossible to meet market demand.

Regarding this, Master Fire Dragon stated that his time was limited, and as the shop pursued a top-quality approach, a production increase was not possible for the time being.

However, he would gradually put up for sale some top-quality Witch Artifacts made by his students. Those interested could make purchases.

With this move, the Holy Infant aimed to gradually wean the Fire Dragon Shop off its reliance on Master Fire Dragon and begin pushing products made by the Tower of Dawn, including low-level and mid-level Witch Artifacts.

Leveraging the reputation of Master Fire Dragon, they sought to expand their industries.

Of course, to avoid tarnishing their own reputation, all Witch Artifacts sold at the Fire Dragon Shop were to be strictly quality controlled by the Holy Infant or the Alchemy Masters trained by the organization.

Those that weren't top-quality were directly offloaded at a reduced price in the black market.

The medicine shop under Gandaph's leadership followed the same principle.

Gandaph's reputation and character couldn't be compromised for the sake of profit; that would be a loss not worth the gain.

Additionally.

With Gandaph's persuasive "encouragement," the Cave Elf Queen, the beauty Shakira, along with her tribe, migrated to the Ancient Saint plane, starting a paradise-like life. Along with the halflings, they laid a foundation for the future weapon-making enterprise of the Tower of Dawn.

...

Four years later. [nøvel.com](http://novel.com)

The year 1290 of the Holy Brilliance Calendar, the Month of Beginning.

Levi turned 300.

As a significant milestone in life, he had a simple celebration for his 300th birthday.

At this age, the Flower Knight had already advanced to the primordial soul.

By now, his maximum had condensed 50 paths. With 31 paths remaining to perfection, he had exerted countless efforts to bring together an upper limit of 1620 points of spiritual force, and there was certainly no reason to give up.

After celebrating his birthday alone, he attended the 190th round table meeting of the Knights.

The Divine Light Knight became the third member of the Knights to advance to level 5.

Her Blood Source Armor was named "Peacock Armor." Once activated, her body would be covered with colorful feathers, forming a magnificent set of Peacock Armor.

The Peacock Armor possessed an extremely strong regeneration ability, somewhat similar to a lower-tier Undying Bird.

Denise demonstrated it: once the armor manifested, anomalies abounded, and numerous birds, like a display of Hundred Birds Paying Homage to the Phoenix, flocked to it.

If Maya was the deity of birds of prey, then the peacock was the king of birds.

Relying on the armor, Denise comprehended a domain skill called "Hundred Birds Domain."

Those covered by the domain would suffer from the dense onslaught of birds.

The birds could also heal allies and restore their injuries.

Furthermore, the Divine Light Knight's "Peacock Divine Palace" also possessed a suppressing force akin to the Golden Snake, capable of controlling enemies. It could also allow teammates to enter the divine palace to replenish their strength, serving as a mobile supply station.

Paired with the "Five-colored Divine Light" Dharma Idol, Denise instantly became the team's premier healer, arguably the strongest support of the version, without a rival.

Teammates just needed to take a swig of healing to be invigorated and could fight the enemy vigorously for three hundred rounds.

After the knights reached level 5, the first thing Levi had them do was to reforge their divine weapons using level five metals, thoroughly refining them.

Chapter 1624: Three Hundred Years Golden Snake Maximum, Crossing Calamity Blood Tribulation Master!

To test the combat prowess of ordinary knights beyond level 5, he asked the Coral Witch, who was of the fifth-circle ordinary realm, to spar with the Blood Knights and others.

Because it was a friendly spar, both sides certainly couldn't use their full strength, fearing they might hurt their allies.

In the end, apart from the Blood Knight who was of a slightly higher realm and ended in a draw, the other two were clearly at a disadvantage.

Firstly, Ash and the Divine Light Knight had just broken through not long ago and had not yet fully mastered their own power. Whereas the Coral Witch had been an advanced fifth-circle ordinary for decades.

Secondly, the Coral Witch herself was a Child of the Elements, with strength far above the average wizard combat power, truly a genius of the Wizard World.

All in all, losing was quite normal.

For the knights, they were already surprised.

Wizards had always been an unattainable existence for them.

The fifth-circle, as the strongest level below the primordial soul, was even more so.

Yet today, relying on their own methods, they were able to contend with a fifth-circle wizard—it was nothing short of a miracle.

After reviewing the situations of major organizations, Levi did not delay and continued his retreat.

Several months later.

By the Small Stone Pond.

Levi performed the Golden Snake Breathing Technique for the last time, and with the prompt from the proficiency panel, Levi knew.

Golden Snake Breathing Technique, Maximum.

Levi

Golden Snake Breathing Technique: Level 17 (Maximum, Evolvable/Advanceable).

...

"Three hundred years, level 5 maximum, the path of the knight, is about to embrace a new stage."

Levi felt sentimental in his heart, murmuring to himself as he looked at the panel.

By now, his breathing technique, as well as his divine weapon.

Everything, had reached a bottleneck at the fifth-level maximum.

Levi opened the [Evolution] and [Advancement] options.

He found that just as he had originally guessed, the basic potion material recipe was still the same.

However, whether it was evolution or advancement, both indicated:

To ascend to level 6, one will undergo a tremendous metamorphosis.

This metamorphosis will trigger what is known as [Blood Tribulation], to defeat the [Blood Tribulation Master]

What is the Blood Tribulation? It is a trial caused by the bloodline factor within the body, like the Black Lotus Beast.

And the Red Lotus Dragon is the [Blood Tribulation Master] of the Black Lotus Beast.

But unlike the Black Lotus Beast, it only needs to pass the [Red Lotus Tribulation] to successfully advance.

Levi's Golden Snake Breathing Technique, on the other hand, needs to go through the [Black Snake Tribulation] and [Golden Horn Tribulation] to [Advance].

And if it is to [Evolve], additional bloodline factors need to be added.

In other words, Levi's breakthrough this time required him to brave fourfold Tribulations and face four Blood Tribulation Masters!

The Black Snake Tribulation, Golden Horn Tribulation, Turtle Shell Tribulation, Rock King Tribulation.

Furthermore, whether for advancement or evolution, for Levi's self-created bloodline, he also needs to pass through an additional Tribulation.

This Tribulation is known as [Dark Tribulation].

The Land of Darkness is the cradle that nurtures all things in the world.

Planes, life, they all originate from it.

Levi, in such a defying manner, to create a new powerful bloodline.

To reach level 6, he must overcome the Tribulation from the Land of Darkness.

But the panel did not inform what this Tribulation specifically entails.

The unknown is fear, especially when the danger comes from the Land of Darkness.

Even Levi feels somewhat uncertain.

Affected by the Blood Tribulation Master.

A knight facing [Blood Tribulation] can only use the power from that bloodline, including divine weapons, Dharma Idols, divine palaces, and Blood Source Armor. Additionally, combat techniques are also permissible.

It's possible to forcibly use other methods to pass the Tribulation, but it's not beneficial for the growth of the bloodline. It's somewhat akin to a chick needing to break out of its shell on its own.

The Blood Tribulation, in a certain sense, is not punishment but a test, tempering, and reward.

Levi still remembers the relieved expression of the Red Lotus Dragon after being defeated by the Black Lotus Beast.

Of course, the inability to utilize divine weapons and Blood Source Armor from other breathing techniques does not prevent him from benefiting from the six-dimensional attribute enhancements.

Levi's hexagonal physical fitness is substantial.

The [Dark Tribulation] has no requirements; as long as Levi passes it with his own ability.

After understanding all the matters of advancement, Levi began to prepare on two fronts.

First, he decided to reforge the [Golden Dragon Heavenly Shield] shield to make it the strongest quality at level 6 lower-level.

Second, to polish various combat techniques and sword skills to the most potent state at level 6 lower-level.

He had to rely on the strength of the Golden Snake to pass through a full fourfold Tribulation.

Therefore, he had to train all usable methods to Perfection.

...

Cultivation knows no years.

A year later, Levi's [Golden Dragon Heavenly Shield] shield was reforged.

He refined sixth-level Water Element and Earth Elemental Metal into it and incorporated dragon scales obtained from the Swamp Earth Dragon.

After the reforging was complete, the shield's defense was strong enough to resist the standard attacks from Heaven Crystal Dragon Ants for a short while. It should be sufficient to pass the Tribulations.

The shield can now be called a "Half-step Sixth-level Divine Weapon," waiting for Levi to advance before it can also ascend to a Level 6 Divine Weapon, just like a wizard's Soul Artifact.

Compared to polishing divine weapons, mastering combat techniques required considerable time.

Levi's main combat techniques now included the "Heavenly Dragon Sword Codex," the Three Great Barbarian King Battle Techniques, and "Cold Ice Breath."

In order to advance to level 6 as soon as possible, besides continuing to Condense the Maximum soul, Levi slowed down his practice of the Rune Language and other breathing techniques.

Day and night, like an everlasting robot, he practiced the combat techniques once, twice, ten million times.

Now, there was only one thought in Levi's mind.

Level 6!

...

In the blink of an eye.

Another four years passed.

In the year 1295 of the Holy Brilliance Calendar, the Month of Beginning, Levi was 305 years old.

Chapter 1625: Three Hundred Years Golden Snake Maximum, Crossing Calamity Blood Tribulation Master!

The World's First Dragon Tournament had already reached its fifth edition.

Black Lotus Beast was no longer competing, and the Bloodsucking Demon Dragon narrowly clinched first place.

There was no helping it, the Faceless Infant Dragon, who took second place, used incredibly tricky methods that were hard to anticipate.

At this rate, its top position was bound to be lost sooner or later.

Having witnessed its elder sibling, Black Lotus Beast, advance, it became even more self-disciplined and strove toward level 6.

Having solidified its level 6 realm, Black Lotus Beast had developed abilities like "Black Lotus Domain" and "Black Lotus Breath," significantly boosting its strength.

Twilight Cavalry.

The Black Knight had stepped into the fifth-level realm, becoming the second rank five knight in the Midland division.

The Black Knight's Blood Source Armor, named "Frenzy Blood Armor," immensely boosted his strength, defense, and other basic attributes.

On the other hand, the Black Knight also mastered a skill called "Bloodbath Frenzy." Under the influence of rage, each enemy he killed temporarily increased his strength by about one-tenth, stackable up to ten times, ultimately doubling his strength for a brief period.

This was another divine skill comparable to the "Illusion Shadow Clone" of the Thousand Illusion Knight; even Levi found it impressive.

With this ability, the Black Knight, upon barely reaching the fifth level, managed to slay an ordinary fifth-circle dark wizard in Midland, quickly rising to become a strong new hero in this version.

Thus, the 18 Twilight Cavalry now had four level five knights, their combat power skyrocketing.

The resources Levi had previously brought back were now exhausted, and they started using the reserves from the Nine Cities Alliance.

At the Tower of Dawn, the progress of the disciples and their teacher was equally evident.

The Deputy Tower Master, the Herman couple, now possessed strength comparable to late-stage level 5. When working together, they could even rival a perfected fifth-circle wizard.

Led by Herman, the tower began to gradually select alchemical geniuses to develop the path of the Mechanical School.

Herman's idea was to eventually transform the current School of Alchemy within the tower in the future, aiming to usher everyone into a more advanced... era of mechanical transformation.

At that time, the artistic style of the Ancient Saint plane might diverge somewhat from that of the Wizard World.

Traditional alchemy is still in the Cyberpunk era, while the Ancient Saint plane has already begun adopting Cyberpunk!

As they say, what era is this to still be stuck in traditional alchemy?

Of course, mechanical transformation would inevitably require a tremendously long time to develop and could not produce immediate effects.

Friends from the Gray Tower, like Winnie and Leah, had already advanced to third-circle wizards with a lifespan of five hundred.

Marlene, under Levi's special care, had also perfected the third-circle and was preparing to ass breakthrough to the fourth-circle.

The Holy Infant's two major female assistants, Mia, had solidified her fifth-circle senior realm, and her cultivation was steadily improving.

Miraya, after refining a portion of the Abyss Crystal Core, had suddenly broken through to the middle stage level 5 realm, and she could advance further once she had refined it all.

After reaching the late-stage level 5, Levi once again sent out the level 6 Heart-stealer to search for clues about sixth-level Heart-stealers.

Inside Ancient Banyan Fairyland.

With the sweeping tide of self-discipline, the members of Dragon Palace saw rapid progress.

Shrimp Soldiers and Crab Generals reached the middle stage of level 5.

The Faceless Infant Dragon advanced to peak level 5, becoming the top contender for the first place in the next Dragon Tournament.

Eight Heavenly Dragon Prison.

Phoenix finally reaped the rewards of its hardship. It refined a series of Fire Element Crystal Cores and stepped into the middle stage of level 5, now even sprinting toward the late-stage level 5.

It had also refined a trace of divine fire from the Church of Eternity's sacred relics.

With so many trump cards, its future prospects of becoming a sixth-level Fire Element Lord like Diya Bo were quite promising.

The entire Ancient Saint plane was thriving.

But in the Mortal World, the situation was becoming increasingly tense.

Such peaceful times might not last much longer.

The calm before the storm was the most deadly.

Levi himself was at the back mountain of the Emperor's Palace, silently practicing his combat techniques.

He held a large halberd, sweat pouring like rain.

After countless practices, his "Warlord Catalog" had reached the Perfection realm of sixth-layer.

"Rising Sun" had reached a mastery level.

Levi

Warlord Catalog: sixth-level (Maximum), Special Effects: Uncontainable Fury, Brave Man is Fearless...
Rising Sun.

...

It was now noon when the Sun Aura reached its peak.

Levi stepped forward, holding the large halberd, lifting a Great Sun ray of light from below.

Boom!

Sunrise Eastward Slash!

With Levi's aura rising, within a three-mile radius centered on him, the rock layer cracked into irregular stones that rose into the air as if called by the forces of nature!

Rumble!

The might of a single strike was terrifying!

The Great Sun's light made the Void continuously tremble, spreading cracks.

It seemed like it could shatter any moment, yet it was just shy of breaking completely.

"Without using the Primordial Spirit Form, merely relying on my own physical conditioning and Golden Snake Breathing Technique, reaching this step is already my limit."

Holy Brilliance Calendar 1299, Month of Vitality.

Other combat techniques had also been brought by Levi to the peak of the lower sixth level.

Levi, on a secluded spot of an Overseas Lonely Island in the Ancient Saint plane, set up an array.

Taking several days, he adjusted his status to its peak.

He then refined the Evolution Potion with the Blood Refinement Technique.

"Level 6, here I come!"

As the potion entered his body, the vast Golden Snake blood qi began to surge.

Not only that, the bloodline crystals of the "Black Water Dragon Turtle" and "Swamp Rock Dragon" exuded black and yellow energies.

These two forces were absorbed into the Golden Snake Divine Palace.

Within the divine palace, the Golden Snake Seed wrapped around a pillar, avidly sucking in these two unfamiliar powers.

With the mingling of different bloodlines, that long-lost sense of conflict once again emerged in Levi's mind.

Chapter 1626: Three Hundred Years Golden Snake Maximum, Crossing Calamity Blood Tribulation Master!

Between different bloodlines, conflicts are inevitable.

Levi was well aware of this fact.

In the past, relying on the proficiency panel, he successfully resolved these conflicts and fused them together.

Now, he had even given birth to something magical, the primordial soul.

He could see the primordial soul in his mind emitting a soft glow, soothing the powers of these different bloodlines one by one.

Afterward, the Golden Snake Seed was able to absorb these bloodline factors smoothly.

As time passed, the bloodline factors from the Turtle-Backed Dragon and the Rock King Dragon caused new changes in the Golden Snake Seed.

The golden light on its scales became richer, and its body was more robust compared to its previous snake form.

Layers of thick scale armor, akin to rocks, began to appear, resembling a knight clad in heavy armor.

Upon closer inspection, one would find that each scale seemed like a turtle shell.

The bloodline factors from the Rock King Dragon and Turtle-Backed Dragon gradually transformed the Golden Snake Seed, allowing it to evolve.

Levi did not know how long this process would take.

During the painful metamorphosis, he gradually fell asleep, like a true giant dragon.

...

One year later.

Holy Brilliance Calendar 1300, Month of Beginning.

The 200th round table meeting was convened by the Blood Knight.

Because the meeting was held on-site and the situation was urgent, all 18 Twilight Cavalry were present.

The Blood Knight said solemnly,

"This meeting is quite urgent, the commander is in seclusion, so I will preside."

The other knights sensed an unusual atmosphere.

Usually, meetings would be postponed if the commander was in seclusion.

The lack of delay this time must mean something significant had happened.

The Blood Knight said,

"Our intelligence department in the human realm has learned that the Black Dragon Empire has fully declared war on the Seven Kingdoms Continent. The Earth General and the Fire General themselves are leading the first to the thirteenth legions, spreading the war across the entire continent, causing severe damage to the seven major churches."

The Black Knight said,

"It appears this war has escalated to the level of primordial souls..."

The Golden Lion Knight said,

"Indeed, the Black Dragon Empire can no longer wait, seeking to quickly eliminate the Church and gain the upper hand in the Seven Kingdoms Continent."

The Blood Knight said,

"The Wind General and the Water General, leading the other Black Dragon armies, have begun to sweep operations against other alien forces in the human realm. Their goal appears to be to invade the world behind these alien races and use it as the main base for the Black Dragon Empire."

The Forsaken Land of the God was no place for humans, the Black Dragon Empire, having accumulated strength until now, could no longer bear it and had to take risky military actions.

The Fire Dragon Knight said,

"I wonder when the commander will end his seclusion?"

The Blood Knight said,

"The commander's seclusion is of utmost importance, and he should not be disturbed. Given the Black Dragon Army's repeated attacks recently, our coordinates are likely exposed. This time, with the full mobilization of the Black Dragon Army, the Ancient Saint plane might not be spared. Everyone should prepare themselves, we can't let the commander worry about everything, and he can't always save the day. We need to rely on ourselves to deal with the enemy!"

The Flower Knight solemnly said,

"If a level six enemy invades, leave it to me, I am now permanently stationed in the Ancient Saint plane and can battle at any moment."

The Blood Knight expressed his gratitude,

"Thank you, Flower Knight."

The Flower Knight inwardly sighed.

Today's meeting, Levi had already anticipated prior to his seclusion when he and Flower had a private discussion about the matter.

Levi had somehow acquired a Level 6 Fire Element Lord, claiming it was also a staff member of the Ancient Saint plane.

Flower didn't know about Levi's trip to the Dragon Ruins Mysterious Realm and assumed he had brought it from the Dark Ancient Tower.

Regardless, having a capable Level 6 ally greatly relieved the pressure on Flower's side.

As for Mana, Martha, and other level 6 individuals, in order to hide his Dragon Abomination identity, Levi did not openly reveal them.

He didn't know that Flower had guessed his disguise as a Dragon Abomination, and he continued to pretend, not laying his cards on the table while Flower still played along.

After the meeting.

The Ancient Saint plane entered a pre-war alert state.

The knights, fur clan, Lizardmen, and other battle groups were training combat arrays and combination strikes in addition to their cultivation.

The Holy Infant tirelessly refined new "Dragon King Orders" and distributed them to newly-promoted level 3 members.

The wizard battle group of the Tower of Dawn wasn't yet ready for large-scale warfare, only the teachers and higher-ups could fight.

However, in a joint effort to protect their homeland from the invasions of the Black Dragon Empire, everyone from the fifth-circle wizards to the apprentices became busy.

Regardless of whether the Black Dragon Empire would invade or not, being prepared and anticipating future threats was necessary.

...

A year later.

Holy Brilliance Calendar 1301, Month of Grass.

Endless Sea.

Inner sea region, Zone One.

Azer Continent.

No.1 Witch City.

That day, news spread throughout the city.

"The City Lord, Surging Wave Wizard, is suspected to have fallen, and the congress is investigating this matter."

With no Sixth-Circle Wizard suppressing things, undercurrents stirred in No.1 Witch City, a gathering place for nomadic wizards.

Fire Dragon Shop.

The Holy Infant, who happened to be inspecting the area, showed a slight change in expression.

"This Surging Wave Wizard is suddenly gone; it's quite suspicious."

The Surging Wave Wizard was one of the backers of the Fire Dragon Shop.

Now that he had fallen, the shop was definitely affected.

However, the shop still had the Flower Witch as its honorary store manager, which should be enough to deter those who lurked in the shadows.

The Fire Dragon Shop had always conducted its business discreetly without causing trouble or expanding aggressively.

Thus far, the three major families hadn't suppressed it.

Moreover, after hearing that Elena was the store manager, they even attempted to form a good relationship with the Fire Dragon Shop.

After pondering for a long time, the Holy Infant decided to temporarily close the shop for a few years until the situation stabilized before resuming business.

Six months later.

One of the three major families, the Schubert Family, announced it was officially entering the Wizard Tool industry.

...

Witch's Family.

Triss looked at the communication device.

She had something she wanted Levi to do recently, and the reward was a Mind Flayer Brain.

But after sending the message, Levi had yet to respond.

"He's probably in seclusion again, this guy..."

...

A year later.

Holy Brilliance Calendar 1302, Month of Northern Wind.

Ancient Saint plane.

Overseas Lonely Island, a congregation of winds and clouds.

High in the sky, a black scale giant serpent spanning hundreds of meters coiled, holding a Bright Candle in its mouth, lighting up all directions, its golden eyes gazing toward the island.

A figure clad in golden armor, surrounded by a shield, holding a purple great halberd, stood in the void.

The halberd was forged by Levi using amethyst, an ordinary cold weapon.

It was just made of a special material, neither a Wizard Tool nor a rare treasure.

His aura was impressive, his eyes flickering with divine light, looking at the giant serpent.

The giant serpent was the Clan Emblem of their Black Snake Family: Black Snake with a Candle.
novel.com

When mythical legends transcend into reality, and celestial giants descend from the skies.

The once frail mortal lord could now calmly face it.

Levi felt endlessly emotional with boundless bravado.

"Come forth!"

Chapter 1627: Level Six Shocked the World

Ancient Saint plane.

Overseas Lonely Island.

After three years of closed-door cultivation, the Golden Snake Seed within Levi had undergone earth-shattering changes.

In the divine palace at his heart, there was only a golden dragon egg, its surface covered with dragon scales like molten gold.

There were four distinctly different patterns on the surface of the dragon egg.

They were the Black Snake, the Rock King Dragon, the Turtle-Backed Dragon, and the Golden Horn Beast.

The four giant beasts connected head to tail, encircling each other.

To completely fuse them together, a critical step was required.

That was to shatter the four Blood Tribulation Masters and obliterate the Dark Tribulation.

In the end,
the new bloodline created by Levi would officially descend upon the world.

In the sky, the Black Snake encircled.

It measured hundreds of meters in length, its aura nearing level 6.

Yet, over these six years of metamorphosis, Levi's own cultivation had also reached the brink of level 6. He just needed to defeat these Tribulation Masters to solidify his cultivation.

If he failed, at best he would fall back to the fifth level; at worst, he would be dead and his path destroyed.

It would be ideal to vanquish enemies solely using bloodline techniques and combat skills.

If his life were in danger, then he would resort to using rare treasures, or the wizard's methods for assistance.

In any case, staying alive was the top priority; obtaining the highest "rating" from the Blood Tribulation Masters was secondary.

In the sky.

At the moment when Levi incited the Blood Tribulation,

the Black Snake, akin to a Divine Dragon, encircled the Sky Dome.

Levi responded unchangingly to the myriad changes, with shield circling his body and the Purple Crystal Halberd ready to strike.

As the Black Snake coiled, the Bright Candle in its mouth suddenly extinguished.

The Candle Snake.

Once the candle was out... darkness fell.

In an instant, a chilling sense of darkness swept over.

Inside Levi, the power of the Golden Snake roiled, transforming into a ten thousand zhang golden light, resisting the darkness.

After an indeterminate amount of time, seeing that this move was ineffective, the Black Snake's Bright Candle relit.

Waves of Black Water swirled around it, forming a vast black swamp.

The swamp descended from the sky, pouring down.

Splash!

In the distance.

Within the sea.

A group of sea Lizardmen trembled with worship as they watched the giant snake in the sky from afar.

Levi, gazing at the pitch-black swamp, murmured,

"Golden Dragon Heavenly Shield!"

The golden shields encircling him transformed into a trail of light, growing with the wind.

The shield eventually expanded to cover several miles around.

Thunderous booms!

The erosion-filled black swamp was blocked by the divine weapon.

Levi rose to the heavens, the Brilliant Golden Dragon Armor trembled with a buzz, and a surging blood qi poured into him, swelling his form large enough to resemble the Heavenly Earth Transformation.

He propped up the golden shield, burst upward against the flow, and the swamp buckled and dispersed.

Boom!

The massive body of the Black Snake lay across the golden shield.

Levi felt as though he was shouldering Mount Tai.

The golden shield spun, flinging the Black Snake away.

"Go!"

Levi hurled the golden shield like a flying sword, striking the Black Snake in midair. The hitherto unbreakable scales suddenly cracked, spilling black blood.

Roaring in rage, the Black Snake plunged into the vast ocean.

Like a violent flood dragon stirring up the seas, it caused a ten-mile radius of the sea to churn in its wake.

Fortunate was it that Levi had chosen such a desolate place for his Tribulation, otherwise innocents would have been caught in the crossfire.

In the end.

The entire sea, under the ferocious might of the Black Snake, coalesced into a water tornado and surged towards Levi.

Not only that, but the Bright Candle in the Black Snake's mouth burned fiercely.

Streams of ominous black flames descended from the sky, dense and numerous.

Fire and water assaulted him!

Levi remained undaunted, like a nimble hawk, sweeping across the tempestuous sea.

He dodged the flames with his movement skills and faced the black water by stepping forward and swinging his halberd!

The Star Aura entered his body, turning into dazzling light!

Traceless Star Stepping, Slash!

The black swamp was cleaved apart, exposing the Black Snake lurking behind.

Like a hawk pouncing on a rabbit, like a lion crashing into an elephant, his halberd pierced through!

With the clash of metal, the halberd shattered the Black Scale, stabbing into its flesh.

The Black Snake shrieked in agony.

Levi gripped the halberd and dashed across its body, rending the scales it prided upon.

The giant snake gutted, turned into a pool of black water, and dissipated into nothingness.

The Black Snake Tribulation had been broken!

Overall, the first tribulation was simpler than Levi had anticipated.

But he was given no time to breathe, as the second Blood Tribulation Master, the Golden Horn Beast, had already descended!

In the sky.

Vaguely, a earthy-yellow spherical plane appeared, reminiscent of a planet from a previous life.

Upon the planet, a dragon beast slumbered, with the earth elemental power forging its golden scales for it.

The Golden Horn Beast!

Levi felt that the strength of the Golden Horn Beast was significantly greater than that of the Black Snake he had just faced.

It looked at Levi with indifferent dragon eyes and flapped its wings, tearing apart the planet's crust.

Roar!

"Golden Star Collapse!"

Along with a heaven-shaking dragon roar, the Golden Horn Beast turned into a golden star and charged.

Its mountainous body sent Levi flying along with his golden shield.

Levi was blasted away in the air, plummeting toward the sea surface.

He cracked a smile.

"Bring it!"

Bang!

With a sudden stomp, Levi transformed into a golden streak of light. Having just overcome the Black Snake Tribulation, he could feel his level 6 aura stabilizing slightly.

He wielded the ordinary Purple Crystal Halberd, slicing through the void.

Bang!

Purple spear light slashed at the Golden Horn Beast, which countered with its horn as a lance, colliding fiercely!

The shockwave spread out in all directions across the sea surface.

The Golden Horn Beast and Levi each took a step back.

Levi might seem insignificant, but his physical ability was bolstered by the six-dimensional breathing technique.

His basic attributes were terrifyingly high.

Thus, he could shake the Golden Horn Beast with a human body.

Chapter 1628: Level Six Shocked the World

The Golden Horn Beast's gaze was sharp; once again, it flew towards Levi, its earth elemental power forming hills one after another.

Boom!

It hurled a mountain peak towards him.

Levi, whirling his Eight-Armed Demon Emperor, went bam bam bam, shattering the peak.

However, his weapon, forged from a Level 5 Peak Purple Crystal, seemed somewhat insufficient now.

After shattering another mountain, the Demon Emperor developed a crack.

Levi simply threw it away.

Laughing heartily, his fists shimmering gold, he shattered all incoming peaks with his bare hands!

He leapt high, turning his palm into a sword, and with the unmatched Moon Aura, he struck down!

Boom!

Thunder Half-Moon, slash!

The arc of the Half-Moon flickered with lightning!

Though lacking the Demon Emperor, the Thunder Half-Moon, though not fully powerful, was more terrifying with Levi's higher realm, delivering a casual blow that surpassed his own full-powered ones of the past.

Crackling!

The Golden Horn Beast, as if struck by lightning, plummeted suddenly.

It roared upwards, its horn on the forehead accumulating golden energy.

Seeing this, Levi, adorned in Brilliant Golden Dragon Armor, also gathered energy in the horn at the headgear.

Boom!

Boom!

Two ultimate flashes of golden light collided mid-air.

A little sun rose above the ocean surface!

The two forces clashed, indistinguishable in victory.

The Golden Horn Beast, seeing this, swept its wings backward, soared swiftly upwards, its sturdy dragon claws reaching for Levi.

Levi dove downwards, employing the Lion King Battle Technique from his arsenal of combat skills, most suitable for close combat.

Sixth Layer, Lion King Supremacy!

He transformed into an exceptional fierce lion, a golden blood qi pulsating behind him turning into his mane.

Boom, boom!

Levi's fists and the Golden Horn Beast's dragon claws battled fiercely in mid-air.

Man and beast fought in the most primitive manner.

At this moment, Levi's potent basic six dimensions came notably into play.

His strength, endurance, physique, and speed attributes gradually took the upper hand.

With each punch, several of the Golden Horn Beast's scales cracked.

They fought from the sky to the ocean, from the ocean depths to the point of obscurity, the sun and moon ceasing to light, even the Plane Crystal Wall seemed about to be worn out...

The Blood Tribulation differed from the wizard's three calamities and four disasters.

Wizard's tribulations required merely surviving through a fixed duration.

Levi's Blood Tribulation required defeating the Blood Tribulation Master, otherwise, the tribulation would persist.

Half a day later.

Levi's flesh alternately wounded and healed.

But the Golden Horn Beast, its scales all cracked, flesh blurred, no longer held its former impressiveness.

"Continue!"

Levi, with an unending strength, transformed once again into the Undying God of War, rushing back to the attack!

Unbeknownst to when, a delicate figure arrived from the distant void.

It was Flower Knight.

She gazed towards the battleground and murmured,

"He's started already? Is this the tribulation necessary for knight promotion to level 6?"

Recognizing the Golden Horn Beast, Flower Knight knew it to be among the most paramount existences in Legendary Creatures.

"You will succeed."

She silently blessed Levi, quietly observing the battle to learn from the experience.

On the battlefield.

Levi plunged his hands into the heart of the Golden Horn Beast, crushing it, turning it into thousands of golden lights that dissipated.

Golden Horn Tribulation, broken!

At that moment, Levi felt his aura increase slightly, getting closer to a true level 6, more complete!

Just when Flower Knight thought everything was about to end.

On the battlefield.

Accompanied by a dull roar, the power of the water element began to surge.

A beast, resembling both dragon and turtle, emerged in the sky.

It possessed the head of a giant dragon, but its body was covered with frightening turtle scales, its broad back more turtle-like in appearance.

It was the Turtle-Backed Dragon, another kind of Legendary Creature.

Known for possessing the strongest defense among level 9.

This resulted in its speed appearing utterly not on par with a level 6 creature.

It leisurely meandered across the sky, seemingly unthreatening.

After consecutively defeating two Blood Tribulation Masters, Levi was slightly out of breath.

"The Golden Horn Beast is still too strong."

He flashed to the front of the Turtle-Backed Dragon, clenched his fist, and smashed it towards it.

Unexpectedly, the Turtle-Backed Dragon retracted its head into its shell, dodging the punch.

Currents circled around its body, enveloping it.

Levi, struck dumb.

This Turtle-Backed Dragon truly posed no danger... the problem was, it hid within its shell, and breaking through might take a while.

Seeing the Turtle-Backed Dragon unmoving, he tore apart its water current defense with his hands, exposing a relatively weaker abdomen.

"Thunder Half-Moon!"

Accompanied by the fading of thunder, Levi punched downwards.

The next moment, his expression changed.

A massive force of recoil emanated from the Turtle-Backed Dragon.

Levi grunted, spitting blood, and was sent flying like a cannonball.

A deep dent appeared in his chest, several bones broken.

Flower Knight, witnessing Levi's distress, worried immensely.

"Levi, are you okay?"

At this moment, Levi, focused on his tribulation, noticed Flower Knight's presence.

He smiled slightly, signaling no harm, silently returned to the battlefield, his wounds rapidly healing.

"It turns out this turtle shell has its own damage-reflecting armor... No wonder this creature is so composed. To hit or not to hit."

Levi pondered for a moment and then said to himself,

"Let's see which is stronger now: your shell or my Golden Ray."

Levi stood in the void, the golden light beginning to accumulate once more.

Barely level 6, with his strength, he wouldn't be drained from just one shot.

Sensing danger.

The Turtle-Backed Dragon's giant dragon head suddenly emerged from the shell, spouting a water cannon, attempting a sneak attack on Levi.

Golden Ray penetrated the water cannon, striking the Turtle-Backed Dragon.

Chapter 1629: Level Six Shocked the World

Sizzle!

Like a laser cutting through everything!

The Turtle-Backed Dragon's heavy defenses were directly sliced open by a gap.

Clearly, the turtle shell could only reflect physical attacks; it was powerless to reflect spell abilities like the Golden Ray.

Upon seeing this, Levi, like a humanoid tyrannosaurus, aimed for the wound with his fists and pounded away.

Despite the force of the recoil, Levi's physique was strong enough to withstand it.

Half a day later.

The Turtle-Backed Dragon was silently hammered to pieces by Levi.

In the end,

accompanied by countless meteorites falling from the Sky Dome,
a dragon draped in Rock Armor descended majestically from the heavens.

In an instant,

Levi felt the surrounding magnetic force field begin to invert.

His body uncontrollably fell, and with a boom, he crashed onto the island!

The Rock King Dragon made its entrance, pinning Levi to the ground.

The powerful Elementary Magnetism attracted more meteorites, piling them around Levi and burying him!

The Rock King Dragon hovered high in the sky, coldly watching all this unfold.

It seemed to want to see how Levi would break the situation.

In the world around, a roar was heard.

"Rising Sun!"

The piled-up meteorites exploded.

Under the pressure of the magnetic force field, Levi rose against the odds, like an undying Sun!

At that moment, he became light itself!

Boom!

An uppercut hit the Rock King Dragon's jaw hard.

Crack.

Its indestructible Rock Armor was shattered, and the force of the punch continued unabated, breaking its jawbone.

Levi sent the Rock King Dragon flying uncontrollably into the air.

Levi moved incredibly fast, quickly positioning himself above the Rock King Dragon.

His veins burst forth, and his muscles exploded with sheer strength as he delivered a roundhouse kick!

The Rock King Dragon plummeted once again.

Levi fought more fiercely, and the Rock King Dragon gradually adapted to Levi's rhythm of attack.

Suddenly, a terracotta-colored glow emanated from its body, combined with Elemental Magnetism, trapping Levi in a quagmire.

The roles were reversed.

Under the relentless attack of the Rock King Dragon's claws and tail, Levi was at a disadvantage.

He was tossed and struck repeatedly, his Golden Armor shattered and he was badly injured.

Having endured three calamities in one breath, the fourth was indeed exhausting.

Moreover, from the beginning to the end, he had only used Golden Snake Techniques and combat techniques.

Other Bloodline, divine weapons, and divine palaces were not utilized at all.

For the sake of Evolution,

he had to succeed!

Levi, like a terrifying monster, brandished his twisted and deformed golden shield, blocking the Rock King Dragon's fatal attacks.

He headbutted the Rock King Dragon, his horn from the Brilliant Golden Dragon Armor piercing its body and fiercely jabbing inside.

The Rock King Dragon's scale armor was torn open, Levi's claws inserted, attacking wildly.

The Rock King Dragon roared in pain, trying to shake Levi off.

Levi clung to it like a relentless parasite, supported by his strong willpower.

Until the Rock King Dragon, unknowingly, was torn apart bit by bit by Levi's bare hands, and its blood splattered across the sky.

All four Blood Tribulation Masters were defeated!

At this time, Levi could feel four forces reshaping the golden egg within his body.

The pattern on the egg started to change, four dragons merging together.

Along with the sound of the eggshell cracking, all the patterns instantly converged into a giant dragon shining with golden light.

The overall shape of the giant dragon was similar to the Golden Horn Beast, yet it was more slender.

Its scales gleamed with a rough beauty, and its forehead's horn grew thicker, resembling a rhinoceros horn.

Around it, countless meteorites orbited, forming a Star Ring.

The armor on its back, thick and heavy like a turtle shell,

in the end,

the eggshell broke open.

A new Bloodline Seed emerged, identical to the pattern of the dragon on the eggshell, just slightly less mature.

The giant dragon towered within the divine palace, exuding a noble Golden Legend aura as well as the supreme majesty of an emperor.

Levi had long awaited this day, and the name of the new breathing technique had already been contemplated.

"Golden Brilliance Dragon Breath Technique"!

It would be a powerful Breath Technique second only to the Crimson Emperor Dragon, a truly Mythical level existence.

At this moment,

Levi could almost completely master the level six power of the Golden Brilliance Dragon.

He waved his hand, and within a radius of ten miles, countless earth elemental forces converged into meteorites that encircled him, buzzing and trembling.

Indeed, like a true Sixth-Circle Wizard, he could leverage the Bloodline to manipulate the elemental powers between heaven and earth.

In the center of the Meteorite Star Ring, Levi stood as unyielding as Jupiter.

He circled his fingers, and the meteorites, drawn by the Elemental Magnetism he mastered, began to spin.

Then he raised his hand.

In his palm, a dense golden light began to gather strength.

"I can even fire Golden Rays from my palm."

In another thought,

the entire ocean began to surge, the water elemental power steaming up.

It formed a gargantuan shield hundreds of meters in diameter around him.

"A sixth-level defense barrier spell from the Turtle-Backed Dragon."

Powerful!

Unprecedentedly powerful!

It was right to have the Golden Snake Breathing Technique follow the Evolution Route, and to refrain from using other means was also correct!

In the distance,

the Flower Knight shouted:

"Levi, have you completed your Tribulation?"

The Flower Knight's chest heaved, her face calm, but her heart was not.

The recent scene of Levi defeating the Turtle-Backed Dragon and the Rock King Dragon was still vivid in her mind.

She realized that she did not know the commander she had known for over a hundred years as well as she thought.

This man, he was far stronger than she had ever imagined!

Levi smiled and said,

"There is one more ordeal."

The Flower Knight nodded and did not disturb Levi further.

In her view, the trials Levi had just undergone

were more difficult than a wizard's customary three calamities and four disasters combined.

After all, wizards can prepare a plethora of Wizard Tools.

But Levi, other than divine weapons, relied solely on the Power of the Body for defense.

Chapter 1630: Level Six Shocked the World

This was no different from streaking during a tribulation.

While the Dark Tribulation had not yet arrived,

Levi sat cross-legged on the ground, quickly drinking medicine to rest.

At the same time, he took the Eight Desolate Halberd out of his storage ring as the Wind Disaster Pearl rotated in his mind.

The Dark Tribulation allowed the use of any means at his disposal, not limited to knights.

The Blood Tribulation that had just passed was a test from the lords within his bloodline against Levi.

What followed was a test from the supreme will of the Land of Darkness, where all things were nurtured.

This tribulation could not be aided by other level 6 knights.

Otherwise, Levi would have definitely brought the Flower Knight over.

As the seconds ticked by, Levi was highly tense, resting with his eyes closed.

The Flower Knight couldn't help but be concerned for Levi.

She had never seen this method of undergoing tribulation before.

After some time,

the Flower Knight looked up at the sky dome, and Levi also opened his eyes at the same time.

Suddenly, the crystal wall of the Ancient Saint plane automatically cracked open, revealing the darkness outside.

Levi noticed that countless flame meteors were falling from the Land of Darkness at an astonishing speed.

"Meteor Tribulation, huh?"

He muttered to himself, not getting up, and pointed with his hand.

The Meteorite Star Ring surrounding him soared swiftly upward.

Countless meteorites collided with the dense swarm of flame meteors in the sky.

Boom! Boom! Boom!

Explosions thundered continuously, turning into dazzling fireworks, causing the Ancient Saint plane to tremble.

Finally, the Meteorite Star Ring around Levi was exhausted. The flame meteors also vanished.

But Levi's sense of crisis did not disappear; the Dark Tribulation was not over yet.

A giant meteor with a diameter of about three miles sped toward him at high velocity.

If it hit directly, even a Sixth Circle Ordinary Wizard would be severely injured.

Levi raised his hand, and a giant turtle shell phantom floated up, colliding with the meteorite.

Boom!

Cracks appeared on the turtle shell, and the meteorite was also breaking apart.

In the end, both were annihilated.

Subsequently, accompanied by roars, countless black beasts of various forms—numbering in the tens of thousands—squeezed through the cracks in the crystal wall.

The sky was obscured by the horde of beasts, blocking out the sun.

Among the beasts, there was one that was three hundred meters in length, resembling an octopus but with hundreds of tentacles.

This was a level 6 black beast lord.

Levi was not alarmed, but rather overjoyed.

"Black beasts delivering themselves to me? Is this the black beast tribulation? Bring it on!"

He grasped the Eight Desolate Halberd and soared into the sky, plunging into the black beast swarm.

The Flower Knight looked on anxiously; she didn't know if Levi still had the strength left after such a protracted battle.

With so many black beasts forming a tide, plus a black beast lord,

an ordinary Sixth-Circle Wizard wouldn't dare get caught in the middle.

Would a level 6 knight be able to withstand it?

Sadly, she was powerless to help in such a situation.

Elsewhere.

Levi, holding the halberd, charged into the black beast swarm.

There were no shortage of rank five black beast leaders within the horde.

When Levi was at rank five, he killed them like slaughtering dogs.

Now at level 6, it went without saying.

He swung his halberd with ease, cutting down two rank five black beasts with one strike, their bodies falling.

At the same time.

The sea beneath Levi was trembling, and the surrounding void was also shaking.

He held out his left hand, and the elemental magnetic forces of this realm were disrupted by him.

Magnetic fields reversed!

A large group of black beasts floating in the air was suddenly pulled by the powerful gravity originating from the Ancient Saint plane!

Boom!

Those low-level black beasts fell in droves, ripped to pieces by the elemental magnetic forces.

The control over magnetism from the Rock King Dragon was a divine skill for decimating foes on a large scale.

The rank five black beasts were thrown into disarray by the magnetic field.

In Levi's hand, the Crimson Dragon Slash materialized, and he unleashed a strike!

Ice crystal particles accompanied the Sword Qi, forming an Ice Sword Domain around Levi.

Levi's sword skill realm hadn't improved since before,

but with his level 6 cultivation, this strike was far more powerful than before!

The Ice Crystal Star Ring swept up countless black beasts, grinding them to death like a millstone, turning them into scraps.

Time was unknowable.

On the sea surface, a layer of black beast corpses was floating.

Looking at the sky, apart from the black beast lord, there were no more... living creatures!

The octopus-like black beast, seeing that its underlings were useless, roared in anger and entered the battle itself.

Thousands upon thousands of bloody tentacles emerged from the void, attacking Levi.

The Ice Sword Domain was torn apart by the tentacles.

In an instant, Levi was submerged by endless tentacles.

The Flower Knight's heart skipped a beat.

"Has he exhausted his strength? What should I do, should I step in to help?"

Levi's battle line in this tribulation had been drawn out too long, already lasting a day. An ordinary wizard would have run out of spiritual force by now.

Boom! Boom! Boom!

The fleshly mountain trembled!

Golden light shot forth, one beam, two beams... thousands upon thousands of beams!

With an angry roar, a golden dragon that seemed as though it had been carved from gold, with sinewy muscles and a sleek, proportionate figure, emitting a brilliant and majestic aura, burst forth!

The Flower Knight was shocked.

"Is this... transformation into a dragon? After reaching Knight Level 6, can one temporarily revert to an ancestral form, altering one's shape?"

The dragon had a wingspan of about five hundred meters. Counting the tail, its length was three hundred meters, with rolling golden blood qi encircling it, morphing into Golden Armor!

"Roar!"

The giant dragon flapped its wings, shattering the sea surface and rising into the sky.

It opened its massive maw, brewing golden brilliance within its throat.

Boom!

The Golden Brilliance Breath burst forth, obliterating everything in its path.

The black beast lord had densely packed bloody tentacles booming around it, wrapping itself into a grotesque moon of flesh.

The golden light, however, was unstoppable, smashing through layer after layer of tentacles, dissolving them.

Bang!

The golden light emerged from the other side of the black beast lord, leaving behind a wound—a golden channel that was difficult to heal.
