

Wizard 164

Chapter 164: Great Ice Ape King! (3)

This meant that the Great Ice Ape King should have the strength of a grand Imight.

Before he figured out the situation, it was better not to be in a hurry to make a move.

After the chief and his team came up, Levi quietly followed behind the chief.

The chief bowed every three steps and every five steps towards the cave where the Great Ice Ape King was.

Finally, at the exit of the cave, in the darkness, Levi saw a pair of dark green eyes that were as big as copper bells.

Then, the owner of the eye slowly walked out of the cave.

A massive creature about two stories tall appeared in front of Levi.

Not to mention in front of mortals like the chief and Professor Bruce.

Even the Wild Dog Knight shivered instinctively in front of such a terrifying beast.

Exaggerated, bulging abdominal muscles, round and powerful arms, and white hair under the frost.

The chief immediately prostrated on the ground and brought the food to the Great Ice Ape King.

The Great Ice Ape King did not enjoy it as usual. Instead, it stared coldly at Levi and the Magic Shark.

In front of these two insignificant people, it felt strangely threatened.

Levi smiled, indicating that he had no ill intentions.

The chief made Levi and his team kneel before the Great Ice Ape King.

How could Levi kneel before a beast? He did not say anything and left the place silently with Magic Shark and Wild Dog Knight.

After the two of them left, the Great Ice Ape King began to enjoy the food.

It expressed its dissatisfaction. It was furious at the chief's casually bringing strangers to its place!

The chief felt bitter in his heart. He did not want to bring strangers here.

But he had given too much.

In the next few days, Levi, the Magic Shark, and Wild Dog disappeared from the chief's sight. He thought the group of foreigners only wanted to see the totem and left after seeing it.

Levi had not left but had been hiding in the surroundings.

"This is the last Ice Ape. To obtain an endless supply of Ice Ape's Blood, I can only capture this Great Ice Ape King alive and not kill it. Otherwise, there won't be enough Ice Ape blood," Levi thought.

If captured alive, he could obtain their blood regularly and receive an endless supply of secret medicine like the three brothers.

Moreover, as a higher-level Ice Ape, the effects of the secret medicine made from the blood of the Great Ice Ape King must have far exceeded that of ordinary Ice Apes.

The Great Ice Ape King was a fierce beast at the level of a grand knight. It would be tough to capture it alive.

For this thing to become a totem of a human tribe meant its intelligence was not low.

Levi had to think about how to capture him alive.

"As long as we can capture it alive, we can slowly use the Heart of Ambition to tame it when we return."

"The strength of the Great Ice Ape King should be its strength. I must weaken its strength first or let the Great Ice Ape King consume the Man-Faced Spider's Kiss to control it. No, forget it; I can't let the poison contaminate its blood." If he wanted to tame a beast of this level, he had to subdue it first.

Defeating the Great Ice Ape King was not a problem, but capturing it alive was much more difficult.

"Oh right, the Book of Kungu has recorded the formula for a type of anesthetic. I can try making it. Although it's for humans, the Great Ice Ape King should be affected by it if I increase the dosage."

Thinking of this, Levi returned to Jackdaw City overnight.

He casually made up some utensils and bought some medicinal herbs.

He was ready to start refining the anesthetic.

This anesthetic was known as the "Sleeping Potion."

It was invented by Kungu and was used when performing surgery on some patients.

With Levi's current level 4 Pharmacy skills, refining anesthetics was a piece of cake.

Not long after, he had refined a hundred portions of medicine.

This dosage should be enough to make the Great Ice Ape King dizzy.

Then, Levi rented a forging shop and forged particular shackles with refined iron and mithril.

In this way, Levi would make a move when the Great Ice Ape King was unconscious. The Magic Shark, with extraordinary power, would temporarily suppress the Great Ice Ape King, and then Levi would shackle the Great Ice Ape King.

"This should be fine."

Carrying the poison and shackles, Levi returned to the iceberg where the Great Ice Ape King was.

To make it easier for him, he chose to act in the wee hours of the morning.

This was the coldest time of the day.

The people of those tribes usually slept in their houses and would not come out.

Although the Great Ice Ape King did not seem afraid of the cold, it must be sleeping.

The Wild Dog Knight and Professor Bruce had returned to Jackdaw City.

Levi waited silently. When it was dawn, he quietly climbed up the iceberg.

Looking at the pitch -black cave, he prepared the Seal of Protection and Dragon Might casting materials. The Seal of Protection could be used to protect himself, and since the Seal of Dragon Might could attack evil spirits with illusory mental bodies, it should also be able to cause a mental impact on the Great Ice Ape King. Even if the effect was not noticeable, it could weaken the Great Ice Ape King's strength as much as possible without killing it. This was the effect that Levi wanted to achieve.

At the same time, black gas surrounded Levi's body. He took out the Lion King's Pride from his Bag of Gluttony.

If his previous plan did not work, Levi would break the legs of the Ice Ape King with his hammer and bring it back by force.

With the Great Ice Ape Kings physique, he could quickly heal it with the sacred medicine he refined.

Magic Shark followed behind Levi and arrived at the cave of the Great Ice Ape King.

However, there was no response from the Advanced Vibrosensory, nor was there any response from Spider Sensing.

"Don't tell me he ran away?" Levi could not help but curse in his heart. As expected, when he went in to take a look, the Great Ice Ape King was gone, and the cave was empty.

This fellow was indeed brilliant. It might have sensed Levi's threat, so it had run away during the night.

However, with the footprints of the Great Ice Ape King, Levi finally found a glimmer of hope. He followed the footprints and hurried through the night. Not long after, Levi followed the footprints and arrived at an ice mountain canyon.

On the outside of this ice mountain canyon, other than the footprints of the Great Ice Ape King, there were also the footprints of another giant beast that looked like the footprints of an elephant.

"Hmm? Why did the Great Ice Ape King come looking for the Armored Mammoth? Aren't they enemies?"

Levi sneaked in and finally found that the Great Ice Ape King was holding a pile of food and enjoying it, facing the armored mammoth.

"Poor Insai tribe. Two beasts played him. These two fellows have become intelligent.."
