

## **Wizard 1641**

Chapter 1641: Dragon King Causes Havoc at the Carnival, Golden Dominator Spreads His Fame!

His hands suddenly turned the color of asphalt, and on his fingertips-condensed sharp, pitch-black fingernails that emitted a deadly poisonous glow.

"Ten Sins Poison Fingernails!"

Ten poisonous fingernails, like hidden weapons, swiftly attacked Levi's body, each carrying a different deadly poison.

Once hit, not even a deity could save him.

Levi sensed the danger, and inside him, a golden, shining shield appeared.

It was the advanced Level 6 Divine Weapon, the "Golden Dragon Heavenly Shield."

Seeing this,

Red Eye and the devil masked man were startled.

"Has he resorted to using a Soul Artifact?"

Both of them also possessed Soul Artifacts.

But to avoid being recognized, they did not use them.

Although the Undead Festival had no prohibitions, killing this foreigner would undoubtedly make his organization resent them, leading to inevitable complications later on.

Moreover, they did not believe that the two of them, working together, needed Soul Artifacts to defeat this foreigner.

The ten poison fingernails struck the golden shield with crackling sounds.

The shield, as if struck hard, flew away.

Not only that, two of the fingernails actually pierced the golden shield, corroding small pits into it, showing their sharpness.

Levi's expression slightly changed.

He and his divine weapon shared a bloodline connection.

He could feel that the divine weapon had suffered some damage, but it was not a major problem.

"Indeed, a real Sixth Circle Ordinary Wizard is much tougher to handle than a Cave Wizard."

He did not panic; the golden shield orbited around him, his body clad in golden armor, the entire body shone with gravity waves, turning into streaks of golden lightning that filled the sky, piercing the darkness!

Under such dense attacks of gravity waves, Red Eye failed to dodge in time and had to resort to his own Soul Artifact.

A burst of bloodlight flashed, blocking the dense golden lightning.

But above Red Eye's head floated a Soul Artifact, resembling a beating heart, which kept pulsating.

Seeing this, the wizards at the festival exclaimed,

"This person is indeed a Blood Demon Wizard; that's his Soul Artifact, the 'Heart of the Demon Beast.'"

Many recognized the Blood Demon Wizard's methods.

Then the Red Ghost Mask suddenly disappeared, revealing the pale face beneath.

Levi said with a smile,

"It really is you, Blood Demon Wizard."

Bloodline breathing again and needing the Host God Fruit, who else if not a Blood Demon?

The Heart of the Demon Beast shone brightly, emitting a flowing blood river that expanded more and more, filling the sky in the surrounding area.

From the blood river, numerous blood-colored tentacles reached out toward Levi.

Furthermore, many creatures, similar to the Blood Clan members, emerged en masse from the blood river, covering the sky as they swarmed over.

The Blood Demon frowned and asked,

"Who are you? I don't recognize you among the other sects' primordial souls."

Levi had a thought.

The Water Elemental Power around him transformed into a giant tortoise shell hundreds of meters big, allowing him, amidst the overwhelming blood river and blood hands, to stand unmoving.

"I am just a Nameless nobody."

The Blood Demon Wizard's face showed shock.

"This man is actually of the Dual Cultivation Faction of both Water and Earth Elements... It's over; we've messed with a tough one this time. No wonder he's so fearless despite being freshly advanced to Level 6."

He shouted,

"Deceitful Poison, stop hiding! Use your Soul Artifact and wizard form to quickly slay this man. Today is Undead Festival, what's there to fear?"

Being called out loud, the man behind the Devil Mask cursed,

"Damn Blood Demon!"

He tore off the mask, revealing an aged face.

Behind him, endless poisonous waters condensed into a scene filled with corpses and rampant with pestilential vapors, resembling Hell.

Poisonous snakes, poisonous insects, poisonous waters... all kinds of poisons swirled around as if in a breeding ground for raising Gu.

Primordial Soul Wizard Form: Ten Thousand Poison Hell! [noveℓ.com](http://noveℓ.com)

The Deceitful Poison Wizard's most proud tactic.

He confidently sighed,

"Alas, if it comes to using wizard forms against me, you foreigner, ought to stay here today."

In the distance.

Mistress Cruel exclaimed,

"I never expected even the Deceitful Poison Wizard to be here; it's said that his Primordial Soul Wizard Form, 'Ten Thousand Poison Hell,' ranks 963 on the Wizards Ranking, a powerful wizard form indeed."

Wizard Wildbone said,

"To be ranked under a thousand on the Wizards Ranking while being at Sixth Circle Ordinary Realm, his wizard form must indeed be extraordinary."

Inside the Giant Tavern.

Primordial Soul Wizards also discussed fervently,

"Tsk tsk tsk, the Deceitful Poison Wizard and the Blood Demon Wizard, both of these are Primordial Soul Wizards from the Dragon Bone Mountain Range, I've heard that their last attempt to take down a junior for the Host God Fruit failed..."

"That junior must be no ordinary person, but today's mysterious Sixth-Circle Wizard, who knows what divine figure he is, fighting alone against both Blood Demon and Deceitful Poison and still seems to have the upper hand."

"It's unclear, so far, he hasn't used his wizard form; with such strength, his wizard form must also be on the ranking, right?"

"That's debatable; I know a sturdy lich, his wizard form is among the top ten I've seen, but he's not on the ranking."

"You guys think, who will win, this foreigner or those two?"

"I'm betting on Blood Demon and Deceitful Poison—they were holding back earlier, but now with both Soul Artifacts and wizard forms being used, the foreigner might not hold out."

"I actually think the foreigner will win, those who dual cultivate to primordial soul are not to be underestimated."

"Shall we make a bet?"

"Gladly."

As the onlookers began to place their bets,

The participants surged with killing intent!

Levi thought amusingly,

"I've just come across two revengers from my list, saving me the trouble of searching them out."

From the Deceitful Poison Wizard, the Ten Thousand Poison Hell wizard form bearing down.

Roaring thunder!

As the wizard form passed, the void corroded, the Earth dissolved, turning into black poison waters, the crowd receded further and further back.

Chapter 1642: Dragon King Causes Havoc at the Carnival, Golden Dominator Spreads His Fame!

Using the wizard form and Soul Artifact generally meant the fight was getting serious.

They were curious, what wizard form would the foreigner use?

The Blood Demon knew Levi was exceptional and didn't dare to neglect, in a moment of thought, a huge crimson, hairless bird wizard form appeared.

The hairless bird was extremely ugly, with a bird beak, long neck, and long skinny legs, its overall shape resembled that of a crane.

Primordial Soul Wizard Form: Mournful Blood Crane!

Compared to "Ten Thousand Poison Hell," the "Mournful Blood Crane" wizard form was somewhat lacking and did not make it onto the Wizards Ranking.

The Blood Crane harshly cried out, bringing with it a storm of bloody rain, rushing forward.

Levi was attacked from both sides, the turtle shell illusion on his body shone brightly and started spinning.

He reached out his hand to the sky!

Elemental Magnetic Secret: Heavenly Meteor Shower!

In an instant, high above in the sky, beyond the crystal wall in the Land of Darkness, numerous meteorites were pulled forth.

At first glance, they were mere specks, but upon closer observation, each had a diameter of over ten meters. Propelled at extremely high speeds, the meteorites blazed with fire, their formidable power striking fear!

Boom! Boom! Boom!

The meteor shower fell.

Both wizard forms were caught in it, "Ten Thousand Poison Hell" shone with a black light, its miasma rising, quickly corroding the meteors as it continued advancing towards Levi.

On the other hand, "Mournful Blood Crane," the hairless bird, was pummeled by meteorites into a messy heap, falling to the ground riddled with holes.

This clearly showed that those who made it onto the Wizards Ranking were indeed extraordinary.

Ten Thousand Poison Hell broke through the blockade of meteorites, slamming into Levi's turtle shell.

The turtle shell cracked, bursting into countless splashes of water.

Levi blinked rapidly, pondering his strategy.

First, deal with the Blood Demon, then handle the Deceitful Poison.

Take ten thousand steps back.

If he couldn't win, he could still flee and lure these two to a secluded area, then summon the level 6 from the Ancient Banyan Fairyland to surround.

But he was more eager to use this opportunity to test where the limit of the Golden Brilliance Dragon Breath Technique was!

The Deceitful Poison Wizard sneered:

"You're still lacking compared to my wizard form."

He mercilessly pressed his advantage, and from his mind, another pitch-black crucible flew out.

This was his Soul Artifact.

"Thousand Poison Realm."

Although this Soul Artifact did not make it onto the Soul Artifact Ranking, it was still formidable.

Upon the appearance of the crucible, streams of black fog surged into the sky, covering an area of ten miles with steaming mist.

This fog was no ordinary mist but a poisonous fog.

Any low-level wizards caught in it would instantly perish, becoming a part of the poisonous fog.

As for this, the Deceitful Poison Wizard coldly watched, unconcerned.

These ignorant fools, clearly knowing a primordial soul fight was taking place and yet not fleeing, had only themselves to blame for seeking their own deaths.

In the midst of the poisonous fog, golden gravitational waves around Levi cleared a poison-free area.

"My perception has been severely affected, but that actually oddly complements my 'Nightmare Fog' in its efficacy."

Boom! Boom! Boom!

The Blood Crane flapped its wings, dispersing the poisonous fog.

The Blood Demon stood overhead, casting a spell while cursing:

"Deceitful Poison, are you trying to poison me to death? Do you think you can handle him alone?"

Deceitful Poison laughed:

"Sorry, isn't this situation fine?"

The Blood Demon snorted coldly.

With a thought, he cast his innate spell through the Blood Crane!

From the beak of the Blood Crane, a Crimson Ray sliced through everything, arriving in an instant.

Boom!

Levi's left arm was instantly blown off by the ray.

Ignoring this, he was protected by golden light as he charged towards the Blood Demon. At the same time, his left arm quickly regenerated.

The Snow Demon was taken aback.

"An Undying Body? Quick, Deceitful Poison, use poison!"

Deceitful Poison also realized, Levi was coming after them one by one.

Ten Thousand Poison Hell, multiple poisonous innate spells were cast, transforming into various poisonous substances, moving to strike Levi.

Seeing this, an image of Levi's Primordial Spirit projected outside his mind!

"Time-Riding Six Dragons!"

An Emperor's form, bathed in thunder, emerged back-to-back with him, directly facing the Deceitful Poison Wizard!

The Emperor appeared majestic, extending his palm, drawing a circle in the void, forming a white Tai Chi diagram with Chaotic Power, spinning about.

The poisonous spells struck the diagram, quickly corroding.

Though Levi had advanced the Golden Brilliance Dragon to level 6, his Primordial Spirit was still not at level 6 due to the coordination between wizard and knight. However, it was still significantly stronger than before.

Simultaneously.

The golden shield flew out again, blocking the Deceitful Poison Wizard's spells with the Primordial Spirit.

Seizing the moment, Levi blinked in a "z" pattern through the void, coupled with the "Eagle Divine Scripture," to dodge the Blood Crane's spell attacks.

Levi took a step and landed directly on the head of the Blood Crane.

The Blood Demon Wizard was horrified.

He hadn't expected Levi's Emperor's Wizard form to be able to withstand the attack of the Deceitful Poison Wizard.

A bright light ignited in Levi's eyes.

The world suddenly turned into broad daylight, as if bathed in Holy Light, illuminating everything.

Pupil of Lamp!

Under the daylight, Levi's momentum seemed to increase slightly.

According to Levi's recent research.

This skill had two effects: in daylight, it slightly amplified his own strength; in nighttime, it slightly suppressed the enemy's strength.

Golden gravitational waves transformed into dense chains of Golden Lightning, like thunder, densely striking the Blood Crane.

Levi suddenly expended half of his Golden Brilliance Dragon's energy!

Crack!

The Mournful Blood Crane cried mournfully, torn into pieces by the golden lightning.

The wizard form was broken, reverting back into the Blood Demon.

The "Heart of Demon Beast" in the Blood Demon's chest shone with blood, shooting out.

Bang!

Up close, Levi's Crimson Dragon Slash struck out!

Thunder Half-Moon, Slash!

Beyond level 6, the power of combat techniques ascended another level!

Boom!

The blood light was shattered, the Soul Artifact trembled mournfully.

The Blood Demon Wizard's defensive field collided with Levi's Sword Qi.

Levi took the opportunity to stretch out his palm, golden gravity condensing into a Golden Ray!

Chapter 1643: Dragon King Causes Havoc at the Carnival, Golden Dominator Spreads His Fame!

Whoosh!

The beam shattered the trembling defensive field and slammed into the body of the Blood Demon.

Half of the Blood Demon's body was instantly obliterated.

Endless blood congregated, clearly intending to reform its body.

The Blood Sect was known for their terrifyingly strong self-healing power.

Levi sneered, the power of the Death Ember Dragon spewed forth, covering the Blood Demon.

Its healing speed rapidly slowed.

Seizing the opportunity, Levi thrust his longsword into its brain, stirred vigorously, and the Sword Qi exploded it into a blood fog.

The illusory primordial soul of the Blood Demon Wizard, holding onto the Soul Artifact, fled in a panic but was caught by the golden brilliance of Levi's hand, which shot straight into its soul.

Instantly, the primordial soul crumbled to pieces.

Creation returned to heaven and earth, the Mark of Truth dissipated.

The phenomenon of Wizard Fall occurred.

In the void, a thread of silk caught the confused soul of the Blood Demon, took it away, and disappeared.

Its Soul Artifact, corpse, and others were casually collected by Levi.

He looked towards the Thunder Emperor, who was still entangled with the Deceitful Poison Wizard. Although at a disadvantage, Levi was quite satisfied with the Thunder Emperor's endurance.

He took a step forward, the void disappeared, and when he reappeared, he was behind the Deceitful Poison.

He thrust his longsword toward its back.

The strength of Deceitful Poison Wizard was greater than that of the Blood Demon; a crucible emerged, blocking Levi's approach. At the same time, a strong suction force erupted from it.

"Not good."

Levi was unstable, sucked into the crucible.

The Deceitful Poison Wizard sneered, saying,

"As expected of a foreigner, still unaware of my true methods!"

His Soul Artifact could not only release poisonous fog but also control and contain his enemies, using the poisonous water within to dissolve them.

However, those who had seen this trick were all dead...

Inside the crucible, another realm existed.

Levi found himself in a strange space.

Black Water surged endlessly from the walls around him, sweeping towards him.

He dispersed the Black Water with golden gravity, temporarily avoiding being refined.

"This Soul Artifact is indeed extraordinary, I have to figure out a way to break out, otherwise when my energy is exhausted, I will inevitably be dissolved in the poison water."

Every Primordial Soul Wizard was not to be underestimated, Levi realized today.

Now that he had tested the strength level of the Golden Brilliance Dragon level 6, he should simply surround his enemies next time, no more one-on-one fights.

Levi, already Perfection in the Fifth-Circle as an Array Wizard, even though he could not unravel the magic array inside the Soul Artifact, quickly found a relatively weak spot.

In his hand materialized the Eight Desolate Halberd.

Golden forces infused into it; the Halberd trembled with a buzz.

Levi leaped, the Halberd lancing out from below upwards towards the weak spot!

Warlord Catalog Sixth Layer!

Rising Sun, strike!

Accompanied by the burst of the Great Sun!

The space inside the Soul Artifact vibrated intensely, the magic array patterns shone brightly.

The weak spot's array patterns and thousands of nodes instantly vanished.

Crack.

A large hole was revealed.

Levi swiftly escaped through it.

Outside.

Deceitful Poison, using "Ten Thousand Poison Hell," had shattered the aura of the Emperor; he sneered,

"Enter my 'Thousand Poison Realm,' and see how long you can hold out."

The Sixth-Circle Wizards who died under this crucible were not few.

Inside the Giant Tavern.

The wizards waging bets sighed,

"Ai, really thought he was strong after killing the Blood Demon... Never imagined, he'd still be captured by the Deceitful Poison."

"It can't be helped, Deceitful Poison has remarkable form, and his Soul Artifact isn't something the Blood Demon could match, even I must be cautious handling him. That man, unaware of Deceitful Poison's tricks, got refined within, nearly certain death,—this bet, wait..."

Before finishing speaking, he saw a crack appearing on the crucible in front of Deceitful Poison, a beam of golden light shooting out!

In the next instant, a hand covered in golden light struck Deceitful Poison's chest.

Bang!

Deceitful Poison's protective force field lit up, blocking the strike but the immense force still sent him flying.

"Not good, my Soul Artifact!"

Deceitful Poison's spirit was sapped.

Clearly, as much as the Soul Artifact was his strength, it was also his downfall.

He hadn't expected that Levi was an Array Master and possessed rare treasures and powerful combat techniques that could break open his Soul Artifact.

Now with the Soul Artifact damaged, he knew he could no longer fight.

Even if he killed his opponent, the cost was too great, not worth it.

With this thought, he retracted his Soul Artifact, tore open the void with his wizard form, and stepped into it, disappearing.

Seeing this, Levi's golden gravity tore through the void, chasing after him.

Mistress Cruel exclaimed,

"This foreigner is formidable, with his own power, killed the Blood Demon and chased down the Deceitful Poison, he's almost as strong as our master."

Wizard Wildbone exclaimed,

"To cultivate body refining to this extent, he is no ordinary person, and moreover, he's a dual cultivator, surely from one of the top organizations of the four major traditional schools."

Elsewhere.

In the deserted wilderness.

In the void.

Deceitful Poison Wizard appeared, his expression grave.

"Damn, I have to spend a lot of money to repair the Soul Artifact again."

For a mere Divine Fruit, the Blood Demon lost its life and he also suffered great losses.

What a terribly unlucky day.

He continued on his way, planning to find a safe place first.

Ahead in the void, a beam of silver light broke through.

A majestic Heavenly Horse pulled a Silver Chariot racing forward.

Levi stood on the Chariot, like a Golden Warhammer God!

He waved his hand, a spatial rift opened wide, and from it emerged two figures, one blue, one black.

The Ice Crystal Dragon Ant and the Black Lotus Beast!

The Dragon Ant shed blue light, striking the once more fleeing Deceitful Poison out of the void.

The Black Lotus Beast's heart thundered.

Domain unfolded—Black Lotus Destruction!

Boom boom boom!

Countless destructive Black Lotuses engulfed Deceitful Poison Wizard whose proud wizard form reemerged.

Ten Thousand Poison Hell collided with the Black Lotus Domain!

Boom boom boom!

Chapter 1644: Dragon King Causes Havoc at the Carnival, Golden Dominator Spreads His Fame!

Hell dissolved, the Black Lotus shattered.

Levi's Eight Desolate Halberd swept down!

Paired with the blue light of the Dragon Ant, his wizard form, was utterly crushed!

The Deceitful Poison was against three and grimly realized his disadvantage.

He hastily pleaded for mercy, saying,

"You can't kill me."

Levi's halberd came swinging down, laughing,

"Isn't today without any taboos?"

The Deceitful Poison was left speechless.

He cast his innate spells while bringing out his already damaged Soul Artifact.

The Dragon Ant lunged forward, clamped onto the Soul Artifact, and promptly made a break for it.

It seemed to always have a special fondness for others' equipment.

The Black Lotus Beast's breath shot out, and along with Levi's spear light, they struck at the Deceitful Poison.

In the end, the Deceitful Poison's protective force field shattered, and he perished, his path ending.

Leon was like a vacuum cleaner robot, appearing at the right moment, collecting souls, and efficiently at that.

Levi, seeing no one around, quickly gathered the spoils of battle and swiftly travelled through the Void to leave.

Who knows how much later.

The group of wizards from the tavern frowned and gathered here, their expressions grave.

"The Deceitful Poison is dead..."

"That foreigner is no ordinary man. A bet's a bet, five million Aether Stones, hand them over everyone."

...

Dragon Bone Mountain Range.

Demon Ghost Tower.

As a high-level wizard organization, the steeple had four primordial soul wizards.

One of them was a Sixth Ring Senior, the True Tower Master, and the other three, Sixth Circle Ordinary wizards, were Deputy Tower Masters.

The True Tower Master, the Gluttonous Ghost·Loronoa, was said to nurture an extremely fearsome Undead lord named the Ghost of Starvation.

This Undead could devour everything in sight and had once record of swallowing a Sixth Circle Wizard whole, killing him.

"Master, it's terrible, a Deputy Tower Master has fallen!"

"What? Which Deputy Tower Master?"

"It's Lord Blood Demon. He went to the Undead Festival and was killed by a foreigner from another school in broad daylight."

"This Blood Demon has truly lost face for our Demon Ghost Tower!"

The Demon Ghost Tower Master stood alone in front of the wizard tower's window.

"Although Blood Demon was good for nothing and caused more troubles than not, after all, he was my own brother. If I, the Gluttonous Ghost, don't avenge him, I'll be a laughing stock."

Undead Festival, where nothing was forbidden.

With Blood Demon gone, the officials wouldn't get involved.

What's more, Blood Demon had struck first, witnessed by many.

So, revenge could only rely on oneself.

A month later.

The Sixth Circle battle that took place at the Undead Festival was widely spread.

The mysterious body-refining wizard from another School, single-handedly, boldly fought Blood Demon and Deceitful Poison, shocking everyone.

After many factions investigated to no avail, this mysterious person was dubbed:

"The Golden Dominator."

It was said that his primordial soul wizard form was like an emperor, full of dominance, and his body seemed as if molded from gold, hence the name.

For a time, in the Realm of Hell, the Golden Dominator's fame was unrivaled.

...

A month later.

Levi took another trip around the Endless Sea and met with Triss to catch up, ensuring no one was following him before returning to the Ancient Saint plane.

Even though life after level 6 didn't require as much caution as before, he couldn't cast aside the virtues of being prudent.

Imperial Palace.

Levi laid out the spoils of the two before him, not rushing to inventory them, but first checking the latest news from the School of Death.

[Shocking! A mysterious person causes a stir at the Undead Festival, primordial soul wizard perishes!]

[Exclusive! Who is the Golden Dominator? Understand after reading this article!]

[Debunked! The Ocean Abyss Alliance states the Golden Dominator is not one of their members.]

[Official! The congress states they will not intervene in matters of the Undead Festival, where life and death are not debated, respecting the traditions of the School of Death!]

After skimming through them, Levi breathed a sigh of relief.

These newspapers, purely sensationalistic, he had thought his identity had been exposed.

To prevent any accidents, he didn't use any of the skills or rare treasures he acquired from the Dark Ancient Tower in front of anyone.

"It looks like killing at the Undead Festival really is no problem."

Levi's only worry was an investigation by the congress itself. Now he could rest easy.

"This battle, all things considered, my Golden Brilliance Dragon Breath Technique performed very well. Just entering level 6, I was able to contend with two Sixth Circle Ordinary wizards, with Deceitful Poison being among the old and strong contenders."

Although it was by ganging up that he killed the Deceitful Poison, that was because Levi wanted to save time and make a swift departure.

Otherwise, he felt he could outlast the Deceitful Poison Wizard by endurance.

"Persevere, and once the Crimson Emperor Dragon reaches level 6, my strength will grow even stronger."

Soon.

Levi finished tallying the spoils of this journey.

As for the Host God Fruit, it was rightfully obtained.

From the Blood Demon Wizard's side, he acquired a Soul Artifact, a hundred million Aether Stones, several Blood Sect spells, and plenty of materials, four Fifth-Circle Wizard Tools, including one top-grade piece.

Levi couldn't help but curse.

"This Blood Demon, carrying a hundred million Aether Stones to the auction, clearly had no intention of lawful purchase, but harbored thoughts of murder and robbery. Truly despicable, my killing him was ridding the people of a scourge!"

As for the other items, there was no need to mention, they were not valuable. The only Sixth-Ring Magical Artifact Blood Demon had was his Soul Artifact.

An item resembling a heart.

From the information outside, this Soul Artifact was known as the "Heart of Demon Beast," and within it flowed a "Blood River."

The Blood River's power was average, but it could indeed bind Blood Clan members within it, turning them into "River Spirits."

The more River Spirits collected, the stronger the Blood River's power grows, and the stronger this Soul Artifact becomes.

"This item is quite rare; generally, Blood Clan members are hard to bind after all, as they can commit suicide to return to the city and reincarnate."

Levi put away the item for now, planning to collect some Blood Clan members in the human realm to test it out in the future.

Chapter 1645: Dragon King Causes Havoc at the Carnival, Golden Dominator Spreads His Fame!

"This Soul Artifact," once his primordial soul had reached that level, "needs to be refined again. Having the Blood Demon tracking mark removed and changing its appearance, it can serve as my ordinary Wizard Tool."

Having witnessed one primordial soul wizard after another getting injured due to damaged Soul Artifacts, Levi knew that the Soul Artifact he wanted must be indestructible; otherwise, it would become a liability to him.

The spoils of war from the Deceitful Poison Wizard were far better than those from the Blood Demon.

He had 180 million Aether Stones on him, plus one Soul Artifact, one Sixth-Ring Magical Artifact, several Fifth-Circle Wizard Tools, and other medicines, materials, and spell knowledge were not worth mentioning.

Moreover, the Deceitful Poison Wizard was also a pharmacist, with numerous potion formulas from the fifth circle, and even the sixth.

In this way,

Levi had spent 250 million Aether Stones at the Undead Festival.

Yet, he had netted 280 million in return, now owning a fortune of 480 million!

"Ah, to venture out and to return with an extra thirty million... However, such opportunities are indeed rare."

On Levi's little vengeance notebook, only that Black Pattern and the Painful Banshee remained.

The former hadn't actually taken any direct action against him.

The latter was the same; moreover, she was a member of a top-level organization—a lich, an immortal to be killed no more.

"Well, let fate decide... If we never meet again, so much the better; but if we do, perhaps we can exchange a move or two."

The Deceitful Poison Wizard's Soul Artifact, known as the "Thousand Poison Realm," left Levi feeling a lingering sense of trepidation.

Without his knowledge of arrays, he would have certainly endured a great deal of hardship.

This Large Crucible served as his battle Wizard Tool and the container used to refine medicines or poisons.

Its main functions for battle were twofold:

One, to release a wide range of poisonous fog that interferes with Perception. The poisonous fog could continuously erode the enemy's defensive field, making it difficult to guard against. Fortunately, Levi had mastered Golden Gravity and could easily disperse the fog.

Two, it could capture enemies and subject them to the "Poison Realm," utilizing the stored Poisonous Water within to erode and dissolve the enemies, melting even their primordial souls—a truly formidable power.

"This Wizard Tool is really good; after some repairs and modifications to its shape, it can be used as my main Wizard Tool."

Another Sixth-Circle Wizard Tool was a Crooked Beak Mask, looking similar to the Bird of Death's Voice mask of the human realm.

Wearing it could insulate against the corrosion of poison gas up to the Sixth Ring Level. Although not often used, it could save a life in a critical moment; Levi decided to keep it.

This object had no name, so Levi decided to call it simply the "Anti-Poison Mask."

The other small spoils of war needed no further mention.

"Now that I have the Host God Fruit, I can proceed with the transformation of the Holy Infant."

...

Time flies.

One year later.

In the year 1305 of the Holy Brilliance Calendar, during the Month of Harvest, Levi was 315 years old.

Using the idea of creating a Shadow Avatar, he had rebuilt his body.

Now,

A red-headed young man with handsome features sat cross-legged in front of Levi.

As he opened his eyes, they seemed more spirited than before.

Levi asked,

"Ace, how are you feeling now?"

The Holy Infant replied,

"Very well, it's like being reborn. Thank you, my source."

Levi and the Holy Infant faced each other, carefully perceiving.

"The strong link is still there, but the Holy Infant has more independence, no longer just an echo of myself... Moreover, should the Holy Infant die, he should be able to be reborn inside me again, although previously it only required a year of pregnancy to be reborn, now it would likely need ten years. All in all, it's not a big problem, for so far, the Holy Infant hasn't died once."

After checking the Holy Infant's condition, Levi said,

"Focus on Condensing the soul to the maximum."

It would be best if the Holy Infant could shatter the internal force crystals to achieve 49 paths of the "Maximum Primordial Soul." If not, then it would have to consume the Cry of the Cicada.

As for letting the Holy Infant follow his own "Infinite Primordial Soul" path, unless Levi now stormed the Golden Sacred Realm, it was not very practical.

Simply gathering enough spiritual force to reach his upper limit had already exhausted him.

The Holy Infant nodded.

"Understood."

He began his secret training with the "Cry of the Cicada".

As for Alexandra and Elsie, under the day and night guidance of the Holy Infant, the two had already grasped the basics of the Flying Secret Sword Technique. The master could show the way, but cultivation was up to the individual.

The two women had now returned to the dragon descendant priory to make a dash for their Ninth Talent while also preparing to advance their primordial souls.

Before leaving, a confident Alexandra claimed she would advance her primordial soul before the Holy Infant.

With her kind of background, a favored daughter of the heavens, she was likely to follow the path of shattering the internal force crystals, but it would probably be a different approach from the "Maximum Soul".

Half a year later.

Good news came from the Holy Infant; he had successfully condensed his first Maximum Soul.

To enter the threshold was itself a good thing.

It indicated Levi's modification had been a success.

...

Five years later.

In the year 1310 of the Holy Brilliance Calendar, Month of Northern Wind, there were 21 years left until the ancient tower opened.

Five years ago, the sixth World's First Dragon Tournament was successfully held.

The peak level 5 Faceless Infant Dragon had successfully defeated the Bloodsucking Demon Dragon, his second brother.

The second brother was seriously hurt; he declared that he would temporarily retire from competition for the next century and began his secret training in earnest to follow in his elder brother's footsteps and advance to a primordial soul.

As a result, the two long-standing overlords of the Dragon Dao Conference had retreated one by one.

This gave other dragons a chance to vie for the top three treasures.

Over the past years, the Holy Infant had basically not interfered with the affairs of the Tower of Dawn, as there were now many talented individuals within his territory, and he only needed to oversee the overall situation.

The Fire Dragon Shop also took this opportunity to close temporarily.

The Holy Infant was digesting previous orders while crafting talismans.

All other time was devoted to condensing the Maximum Soul.

He had quickly condensed 7 Maximum Souls; this speed was quite good.

Levi estimated that the Holy Infant might even achieve primordial soul before him.

The Holy Infant needed only 49, compared to Levi's 81—a much less difficult task, as the greater challenge came later on.

If the Holy Infant was playing on hard mode, Levi was on hell mode.

Levi himself had condensed his 55th soul, with only 26 left to reach Perfection.

Unknowingly, he was now 320 years old.

Over these years.

Rumors about the Golden Dominator had gradually died down. His fame had long since passed, as he was just a Sixth Circle Wizard; insignificant in the grand scheme of the wizard civilization.

Post level 6, the Golden Brilliance Dragon Breath Technique became much slower to cultivate compared to level 5.

One reason was the difficulty that came with higher realms, and another was a lack of secret medicine matched to his strength level.

In response, Levi could only accelerate the cultivation of his sub-dragons on the one hand, and on the other, keep close watch on the growth of the Nine-leaf Blood Datura.

His power was now in place; as soon as the Blood Thura was ready, he could begin capturing black beast lords of sub-dragon kind.

Now, the Ancient Saint plane had initially realized mass production of the Saint Fruit, and Purification Elixir was no longer a problem for Levi.

The Land of Darkness was a Blue Ocean Shelter for Levi.

Among the black beasts, there must also be level 6 sub-dragons.

If Levi could capture them, he could, like Diya Bo, gradually eliminate the power of darkness within them through treatments with the Purification Elixir.

Of course, this consumed a substantial amount of Purification Elixir, so it could only be used on black beasts of significant value.

"The Crimson Emperor Dragon Breathing Technique is also nearing its maximum; the Advancement Potion is prepared, just waiting for the advancement."

In a moment of thought, Levi's consciousness entered the Nightmare World.

Chapter 1646: Annihilation of the Lord Nightmare Black Dragon expansion, Hundred Flowers Birthday Gift!

Nightmare World.

Black Dragon Territory.

Within the territory, the Nightmare Mother Trees, that were damaged during the battle with the Man-Faced Spider, had all returned to normal.

Levi also tried to feed the Flesh and Blood Trees with Golden Fertilizer, but it was of no use at all.

To some extent, the Nightmare Mother Trees are not plants but rather organs of the Nightmare World that nurture all living things.

Those occasionally writhing Flesh and Blood Mountains aren't real mountain ranges either.

Everything in the Nightmare World is bizarre and peculiar.

Within the territory.

The Faceless Infant Dragon, which had won the first place prize, circled around happily upon seeing Levi's return.

Levi rewarded it with some Nightmare Crystals as a treat and said with a smile,

"Keep up the good work and strive to advance to level 6 as soon as possible. Then, you can be dispatched to conquer and expand new lands."

After reaching level 6, the Faceless Infant Dragon would also have the qualifications to become a lord.

Moreover, by that time, once Levi's Nightmare Dragon Breathing Technique gets upgraded, it would be eligible for level 6 Secret Medicine.

The Faceless Infant Dragon replied excitedly,

"Sure, Lord Dragon King, I will strive to advance within a hundred years! Hehehe, I'll give my second brother a surprise then."

Now, within the Dragon Palace, hierarchy and seniority were determined by strength.

The Black Lotus Beast, the eldest brother.

The Bloodsucking Demon Dragon, the second brother.

The Faceless Infant Dragon, the third sister.

The Thunderstorm Wolf Dragon, the youngest brother.

Even the weakest among them are at the late-stage level 5, the real "organization bosses."

On the wilderness.

After nearly fifty years of pioneering, the Eighteen Riders had opened up territory outside of their own and established a training camp.

by the bonfire.

The 18 Twilight Cavalry, including the Flower Knight, gathered together.

Having advanced to level 6, Levi's strength was now assured.

He wanted to slightly expand the territory of the Black Dragon Territory.

He called the Eighteen Riders today to plan against some of the lords in the vicinity.

After so many years of development, the knights' capabilities had undergone earth-shattering changes.

The Blood Knight had already reached the middle stage of level 5, still the leading figure.

The older generation of knights had all reached the fifth level realm.

The Golden Lion Knight's Blood Source Armor, named Fierce Lion Armor, greatly enhances strength upon manifestation and has also gained a skill called Lion King's Fury.

Lion King's Fury, similar to Levi's Dragon's Might or the combat technique Domineering and Independent,

can produce a powerful invisible aura of attack, instilling fear in enemies as if they're facing the king of all beasts.

And the Golden Lion Divine Palace can summon a pack of fierce lion apparitions to launch a fierce attack on the enemies, quite powerful in its effect.

The Saint Ape Knight's Blood Source Armor, called Ape King Armor, significantly boosts strength and also enables the use of a skill called Ape King Battle Energy.

According to Emperor Mu's description, this skill is similar to the Black Knight's Bath Blood Battle.

Bath Blood Battle builds up momentum through killing enemies, stacking an aura called Killing Aura to amplify their own strength.

Whereas Ape King Battle Energy accumulates Fighting Spirit through combat, able to build up to nine levels.

After reaching nine levels, they enter a brief state of Battle Saint Ape, where all of Emperor Mu's attributes are enhanced by a third, and the strength attribute by half.

Compared to the Black Knight's all-in on strength, Emperor Mu seems to have a more balanced spread of points, each with its strengths and weaknesses.

Emperor Mu's Holy Ape Divine Palace, on the other hand, doesn't have any special powerful functions – it is extremely sturdy and can be used to smash like a brick for miracles.

Even a Fifth-Circle Wizard could be accidentally killed by this brick.

The last to advance, the Goddess Knight, has Blood Source Armor called Superdimensional Light Armor.

This Blood Source Armor is quite interesting.

Upon manifestation, the Goddess Knight's speed and response capability are doubled for a short time.

Moreover, after accelerating with the Superdimensional Light Armor, she can enter the Aurora Dimension.

Currently, this Aurora Dimension, similar to Levi's Scarlet Dark Dimension, seems to be an exclusive VIP fast lane created by the Legendary Creature, the Aurora Bird.

It's obviously more advanced than entering the Shadow Dimension.

In addition, the Superdimensional Light Armor can emit an extremely cold aurora ray attack on enemies, quite formidable in power.

Lastly, combined with the Aurora Divine Palace, it can banish enemies in the Aurora Dimension, trapping them momentarily,

or send them farther away in an instant.

Through such means, the Goddess Knight's survival ability has greatly improved.

The Knights now truly have the appearance of a high-end elite organization. Each person has several special skills.

Middle Generation Knights are currently honing at level 4, with the Flower Knight having made the most progress.

Possibly stimulated by Levi's level 6 knight techniques,

she has become even more diligent in her cultivation on the path of knights.

Paired with her Sixth Circle resources, it's naturally impossible for her cultivation to be slow.

Even the weakest, the Thousand Illusion Knight, has successfully advanced to the middle stage of level 4.

Worth mentioning is that the two hundred-year-old Steel Dragon Knight, Andrew, has also successfully advanced to the Four-Ring Wizard Realm. Moreover, he has advanced with full mastery of a third-circle talent.

He has set for himself the goal of attaining at least eight talents before advancing to primordial soul. Therefore, during the fourth-circle period, he definitely needs to learn three talents.

Although this pace is much slower compared to the geniuses in top wizard organizations,

steady and gradual progress is also beneficial.

In terms of heritage, the Ancient Saint plane is far behind the top wizard organizations.

For them, even losing sixty years of gains from the fifth level of the ancient tower is merely a small loss.

Chapter 1647: Annihilation of the Lord Nightmare Black Dragon expansion, Hundred Flowers Birthday Gift!

But the Knights had been established for just two hundred and ninety years, and to achieve such success was already a satisfactory result.

Among the new generation,

the Fire Dragon Knight had successfully advanced to level 4.

Others were fast approaching the pinnacle of level 3, while some were still in the late stage of level 3.

The name of the Fire Dragon Knight's Dharma Idol was straightforward and simple,

"Fiery Flame Dragon."

As a lower-tier version of the Red Lotus Dragon, this Dharma Idol could greatly enhance its strength.

Moreover, through the Dharma Idol, it could imitate the Fiery Fire Dragon's breath of flames. The power was decent, comparable to the fourth-circle combustion spell "Sun Splitting Transformation."

During the years when Levi would often retreat for intervals of three to five years, the knights were growing rapidly.

Seeing Levi emerge from his seclusion, everyone was thrilled.

They knew the commander was about to lead them on a significant endeavor today.

Flower Knight smiled and said,

"Commander, we are ready and waiting for you."

Flower Knight was full of curiosity about the Nightmare World.

Levi said,

"According to the information, there are mainly three neighbors around our Black Dragon Territory, namely the King of Thousand Eyes from Dreadtree Territory, the Big-eyed Monster from Youji Territory, and the Ghost Baby Lord from Soul Returning Territory."

The King of Thousand Eyes was originally a giant tree, similar to Mana, not a divine tree sapling, but also extraordinary. Its territory was the closest to the Black Dragon Territory.

The King of Thousand Eyes, often in slumber and uninterested in domination, had not disturbed the Black Dragon Territory for years.

Its strength was unfathomable, very likely close to the Level 6 Late Stage Realm. Levi was not intending to provoke it for the time being.

Furthermore, given his current shallow foundation, and the King of Thousand Eyes' long lifespan and relatively gentle nature, it was a potential ally to be courted.

The Ghost Baby Lord of the Soul Returning Territory was probably much stronger than the Man-Faced Spider and might even have advanced to the Level 6 Middle Stage. Its territory was twice the size of the Black Dragon Territory.

Over the years, its Ghost Baby Army had also frequently harassed the Black Dragon Territory or clashed with Levi's people in the wastelands.

The last lord, the Big-eyed Monster, had piqued the interest of the Flower Knight, thus it was included on the hit list.

Over the next three days.

Levi left the Faceless Infant Dragon and other creatures with half of the forces to guard the home.

The grand Nightmare Army, led by the 18 Twilight Cavalry, headed to the front lines for a lightning strike on the Soul Returning Territory, then seizing the Big Eye Territory.

...

Several days later.

Outside the Soul Returning Territory.

Ten airships arrived across the sky.

The Nightmare World was vast indeed.

To facilitate the army's march, Levi had specifically purchased ten medium-sized airships from the Wizard World.

In fact, if he had Sky Fire Fortress and Ancient Shell Palace, it would have been even more convenient.

But those two rare treasures, one had not yet been deciphered, and the other was facing an energy crisis, thus making them unusable; besides, there was the risk of exposing Levi's alter ego.

In terms of flight speed, the airships were actually faster than the fortresses, just weaker in physical defense and carrying capacity.

As for Levi's Ancient Banyan Fairyland, he had tried before, but the Nightmare duplication could not replicate the Ancient Banyan Fairyland, therefore he could not utilize it.

To open the Ancient Banyan Fairyland in the Nightmare World, it would presumably require his Body to personally come here, but that carried significant risks.

The army's expedition naturally alarmed the Ghost Baby Lord inside the Soul Returning Territory.

In the Void, a small figure resembling a doll emerged.

It had a big head, its body covered with stitches, and in some places, the seams had burst open, revealing the red cotton stuffing inside.

This was the Ghost Baby Lord.

Its appearance was similar to the ghost baby "Chucky" from a past lifetime, but a thousand times more terrifying and sinister.

This creature was the stuff of nightmares for many beings of the Multidimensional Plane.

The Ghost Baby looked around at the airships, revealing a chilling smile.

"Black Dragon Lord, you come to me today, crossing the Flesh and Blood Mountains; do you wish to declare war on me?"

Levi said coldly,

"You have repeatedly trespassed on my territory; today is time to settle the score."

The Ghost Baby laughed eerily,

"Gaga, then come."

Behind the Ghost Baby, tens of thousands of nightmare creatures appeared, with more than ten of them being level 5 and above.

In comparison, on Levi's side, there were only seven level 5 experts in the Knights.

However, Levi held an absolute advantage in terms of level 6 experts.

Troop against troop, general against general.

The armies collided fiercely, scattering Nightmare Crystals across the ground.

"Kill!"

The Blood Knight planted the Twilight Knights' banner into the ground, and behind him emerged a majestic giant eagle Dharma Idol.

The banner depicted a knight's sword, a shield, and a knight clad in Heavy Armor.

Behind the knight was a setting sun, symbolizing the dusk that brings an end to enemies!

The Divine Light Knight, clad in ice-blue Superdimensional Light Armor and wielding the Evernight Spear, moved through the battlefield, occasionally shooting out a beam of polar light.

"Roar!"

The mane of the Golden Lion Knight fluttered as the Fierce Lion Armor materialized; in his divine palace, hundreds of lion phantoms charged into the fray.

The Black Knight fought a Bath Blood Battle, his killing aura soaring as he swept through the enemies, buffed and unmatched!

Wherever the Ash Knight passed, all life withered, turning to Ash.

"Roar!"

Emperor Mu wielded the Ruyi Divine Stick, now a hundred meters long. His muscular, rounded arms swung it, sending a level 5 ghost baby creature flying.

The Divine Light Knight stayed at the edge of the battlefield, always monitoring the situation. Whoever faltered, he would assist.

The level 5 knights cooperated with each other, while the level 4 and level 3 knights found suitable opponents.

Against these Nightmare foot soldiers, they relished in the slaughter.

The Ghost Baby Lord watched this scene in shock.

"In such a short period, to develop a barren borderland to this extent, this Black Dragon Lord is not simple... Could it be that he has had some opportunity on the material plane?"

Chapter 1648: Annihilation of the Lord Nightmare Black Dragon Expansion, Hundred Flowers Birthday Gift!

In the lord's territory, the power of the Nightmare Lord was even stronger.

The Ghost Baby was already at Level 6 Middle Stage, so it didn't pay much attention to the Black Dragon Lord, who was only at Level 6 Early Stage.

What it was wary of was the golden-haired female swordsman beside the Black Dragon Lord, clad in armor, wielding a shark-tooth shaped sword.

Her aura was not weaker than his own, also at Level 6 Middle Stage.

By now, the armies had already engaged in battle, but the leaders of both sides weren't in a rush to move.

Levi and the Flower Knight had thought that the Ghost Baby would rush out of its territory in uncontrollable fury to fight them.

Unexpectedly, the Ghost Baby could keep its cool. It crooked its finger and cackled,

"Come here."

Levi and Flower Knight looked at each other.

The Flower Knight licked her lips and stretched her limbs, saying,  
"Commander, let us head over."

Levi laughed,

"Since that's the case, let's cut our way in!"

The Flower Knight patted Levi's shoulder and said with satisfaction,

"Commander, the day has finally come when I can fight side by side with you."

Levi laughed self-deprecatingly,

"Yeah, no need to wave a flag and shout from behind you anymore."

The Flower Knight laughed heartily.

With a wave of her hand, a long-lasting Flower Barrier surrounded her.

This barrier had always been used to protect Levi.

But she knew that the current Levi no longer needed her protection.

Golden Scales appeared around Levi's body as he burst with stunning presence, the Golden Dragon Heavenly Shield circled around him.

Bathed in golden light, the Sword of Victory appeared in his hand, as if an emperor had descended.

For this battle, Levi had already taken it out in advance from the Golden Light Cave.

As Flower Knight looked at the glittering Levi, she laughed,

"Commander, have you heard of the Golden Dominator?"

Levi laughed helplessly,

"That's me."

The Flower Knight smiled sweetly.

"It's my honor to fight alongside the Legendary Golden Dominator."

She leaped forward, her Sixth Ring Senior aura bursting forth.

Levi was stunned,

"Flower Knight has grown stronger... Yes, she's been at the Sixth Ring Senior level for a hundred years, and now she is probably not far from Sixth Circle Perfection. After all, she is a ferocious person who reached the primordial soul stage at three hundred years old."

He stepped on golden light as ripples spread in the Void.

An incredibly strong aura burst forth, a domineering presence brewing above his head!

The domain of the Sword of Victory shone across the battlefield.

Under this influence, Levi's Nightmare Army and the Knights felt their bodies brimming with strength.

"Hahaha!"

Emperor Mu, akin to a raging ape, was covered with layers of Ape King Battle Energy, all nine layers!

The Battle Energy, Ninth Rank!

Transformation, Battle Saint Ape!

Boom!

Emperor Mu roared to the sky as his Ape King Battle Armor merged with him, becoming a hundred-meter-tall Golden Raging Bull, as mighty as a mountain range!

The giant ape, with a hundred-meter-long iron rod, swept through thousands of troops, and a rank five Ghost Baby was smashed to death on the spot!

On the other side.

The Black Knight's killing intent also stacked to its limit, transforming into a crimson Raging Bull, trampling across the battlefield, boosting the morale of his soldiers.

Surrounding the Blood Knight, spirit eagles swirled, stirring gusts of wind, as he single-handedly fought against two rank five Ghost Babies.

The Golden Lion Knight, with his mane fluttering, roared proudly across the battlefield like a lion.

The 18 Twilight Cavalry, each displaying their special skills as the Eight Immortals crossing the sea.

Of course, there were some knights who had already claimed their "lunchboxes" and returned to the city to be reborn.

By the time they hurried back here, the situation would have cooled down.

After Levi's aura peaked,

He slashed down with the Sword of Victory!

The Warlord Catalog, Domineering and Independent!

An invisible shockwave swept across miles of battlefield.

Upon promotion to Level 6, the power of all combat techniques had qualitatively improved!

Merely his aura alone killed hundreds of Nightmare Creatures.

Seeing this, the Ghost Baby Lord stretched its hands, turning them into ten razor-sharp ghost claws.

It cackled as it tore through the Void, slashing towards Levi.

Bang!

The Ghost Baby was incredibly fast, striking Levi before he could counter with a technique.

The golden aura that enveloped him was shredded by the ghost claws, with sparks flying where the Golden Scales collided with the ghost claws.

The golden shield swirled around, blocking the Ghost Baby's next wave of attacks.

Levi was knocked back, looking down at the ghastly wound on his chest.

The Golden Scales had actually been torn, flesh ripped apart, blood flowing freely.

This Ghost Baby, indeed at Level 6 Middle Stage, was tough to handle.

With the lord's enhancement, it was Levi's strongest opponent so far.

"Flower Language: Beauty's Captive!"

The Ghost Baby, pursuing its advantage, tried to attack Levi again but was suppressed by a giant violet flower, unable to move.

Flower Knight asked,

"Are you okay? This guy's speed is terrifying, almost impossible to defend against."

Levi replied,

"It's just a flesh wound, Flower Knight be careful."

His wound quickly healed.

Meanwhile, with the gathering of water elemental power, a sturdy and heavy turtle shell formed around Levi.

"I need to go all out now, this Ghost Baby is trickier than I expected."

While Flower Knight had the Ghost Baby under control, behind Levi, the primordial spirit of Time-Riding Six Dragons appeared, with thunder rending the sky and cascading down!

Thunder Emperor's arrival!

"War King's Record: Thunderbolt Half Moon!"

The Sword of Victory cleaved like Mount Hua Splitting Force, the Void filled with rampant lightning, an unmatched half-moon arc of light slashing at the Ghost Baby.

The Ghost Baby fought with its claws, sparks everywhere; its head suddenly swelled like a hot air balloon.

"Huff!"

It blew out a breath, and thousands of sharp blades shot out.

Crackling and snapping!

The turtle shell blocked the majority of the attack, the rest deflected by the golden shield and Golden Scales.

"Flower Language: Eternal Star!"

Flower Knight didn't use an offensive move but instead kept applying control to the Ghost Baby.

In fact, if she really went all out, even if the Ghost Baby was in its territory, with her wizard forms and Wizard Tools, she could thrash it.

But Flower Knight was cunning.

She knew that now was not the time for her to usurp the spotlight.

Chapter 1649: Exterminate the Lord Nightmare Black Dragon Expansion, Hundred Flowers Presents Birthday Gifts!

Otherwise, where would Levi, as a commander, put his face?

After all, there were other knights on the battlefield.

So, she had been creating opportunities for Levi.

Levi soon understood Hundred Flowers' intention.

Having such a thoughtful team member was truly his blessing.

Behind him, the Emperor's Essence held the Crimson Dragon Slash, unleashing a Chaos Sword Energy that annihilated everything.

The Ghost Baby was surrounded by a dim glow, resisting the wave of attacks.

Levi's Sword of Victory pointed to the sky, turning the golden gravity wave into a spiderweb of lightning chains.

Boom!

As Levi's ace skill after reaching level 6, this move had proven reliable time and again.

The Ghost Baby tore through Hundred Flowers' barrier but got enveloped by the electric net!

Crackling!

Intense pain made the Ghost Baby howl.

"I'm going to kill you both, you damned couple!"

It waved its sharp claws and disappeared in a flash, reappearing in front of Levi.

Knowing Hundred Flowers was a tough opponent, it didn't dare confront her directly.

Levi defended with his golden shield, then was sent flying.

The Chaos Shield emerged, blocking the wave of attacks.

At the same time,

A dazzling Star Ring appeared from the void, entangling the Ghost Baby.

From a distance, Hundred Flowers watched with a smile, saying,

"Chop it quickly."

She had used the Soul Artifact, "Star Ring," a famous treasure on the Soul Artifact Ranking, incomparable to the Soul Artifacts of Blood Demon or Deceitful Poison.

Combined with her Sixth Ring Senior Cultivation, the Ghost Baby was extremely frustrated.

Around Levi, earth elemental power gathered into a Meteorite Star Ring, drawn by the Elemental Magnetism and turned into a grinding disc that further suppressed the Ghost Baby!

His left hand transformed the golden gravity into a beam, shooting into the Ghost Baby.

His right hand wielding the shark-tooth-shaped sword, in a Rising Sun motion, snapped off the Ghost Baby's sharp claws, stabbing into its body.

The Sword Qi burst forth, the Ghost Baby's ragged body scattered into down, floating in the air.

Its mocking laughter still lingered, clearly not yet dead.

As expected.

In the void, the shredded body of the Ghost Baby reformed.

The next moment,

The phantom of a gigantic tree reached from earth to sky, sealing off the space.

Hundred Flowers made another move.

Primordial Soul Wizard Form, Hundred Flowers and Thousand Trees!

Seizing the opportunity, Levi channeled all his golden gravity into his right palm and launched it with a roar!

Crackling!

Lightning tore through the skies, submerging the Ghost Baby. The Emperor's phantom's Chaos Sword Energy crisscrossed, giving no respite to the Ghost Baby.

Under the combined efforts of Levi and Hundred Flowers,

The body of the Ghost Baby was completely annihilated.

"Hiyo, hiyo!"

Leon shouted out loudly,

Using a three-layer thick net to wrap up the true soul of the Ghost Baby.

The current Leon, not far from level 6, had a much-enhanced strength.

Dealing with a mid-stage level 6 spirit was no trouble for him.

At this point,

The Ghost Baby was dead!

However, Levi knew that as long as the fear of such creatures in the Multidimensional Plane persisted,

In the distant future, in some part of the Nightmare World, it might once again take form.

But by then, it would be a brand new Ghost Baby, without the memories of this lifetime.

Hundred Flowers flew over, smiling,

"Congratulations, commander, for slaying a mid-stage level 6 powerhouse."

Levi replied helplessly,

"Sigh, Hundred Flowers, stop teasing me. You were controlling it all along... If I couldn't take it down, I wouldn't deserve to be the commander!"

Hundred Flowers chuckled.

"I don't care, you're the one who killed it."

While the two joked around, on another part of the battlefield, the entire Knights had been annihilated...

The cause was a few peak rank five generals under the command of the Ghost Baby.

Levi had no choice but to personally intervene, annihilating these minions.

Half a day later,

The Black Dragon Territory achieved a complete victory.

Without their lord, the remaining monsters gradually began to collapse and dissipate. f

Levi transformed into a giant black dragon with a wingspan over a hundred meters.

It patrolled the territory, erasing the tracking marks of the Ghost Baby with its own Nightmare Dragon Mark.

Not until Realm Mountain displayed that this area was under Black Dragon Territory,

Did Levi, his face pale, revert to human form.

"Nine Infant, wait here for the return of the Knights, and together clear the remnants and secure this place."

Afterward,

Levi rested for a moment before he and Hundred Flowers hurried to the location of the Big-eyed Monster.

Three days later.

Accompanied by the collapse of an eye with a diameter of several hundred meters, a black eyeball fell to the ground.

Hundred Flowers asked,

"Commander, may I claim this?"

Levi responded,

"You killed it, so it's rightfully yours."

Having dealt with two major threats, the future development of the Black Dragon Territory would be smoother.

Relying on these three territories, one day Levi was bound to become a lord of the Nightmare World.

If capable, incidentally annihilate the Blood Rain Overlord and avenge the Ash Dragon!

After the battle.

Levi instructed his subordinates to clean up the Nightmare Crystals and other low-level materials.

After giving the Big-eyed Monster materials to Hundred Flowers, he kept the materials from the Ghost Baby.

Those blades of the Ghost Baby, characterized by a potent penetrating power and a "tearing" trait,

Once he reached the Sixth Ring, combined with a sixth-level purple amethyst and the seventh-level blood scales acquired in the ancient tower, could be refined into a secret sword for the Golden Dragon Break.

He planned to use this indestructible secret sword as his future Soul Artifact.

A month later.

The Black Dragon Territory completely took over "Youji Territory" and "Soul Returning Territory."

With this, the three territories merged, all under Levi's control.

This quadrupled the area of the Nightmare Mother Trees' forest in the Black Dragon Territory!

Meaning, the production capacity of the Nightmare Army was fully enhanced.

With that, the area on the fringe of the Nightmare World was left with only the "Dreadtree Territory."

It is said that beyond the Dreadtree Territory lies the Chaotic Wilderness, even a level 6 existence would need to fly for months to cross it.

Chapter 1650: Exterminate the Lord Nightmare Black Dragon Expansion, Hundred Flowers Presents Birthday Gifts!

Passing through the wilderness, one could truly come into contact with the flourishing lands of the Nightmare World.

But Levi's current strength was not yet enough to claim kingship over there.

He needed to first secure the territories he had conquered and develop them gradually.

It was possible for roaming Nightmare Lords to appear in the wilderness as well.

These landless beings longed for a domain of their own.

After obtaining materials from the Big-eyed Monster, Baihua remained in her wizard tower all day, researching and studying something unknown to others.

...

Three years later.

In the year 1313 of the Holy Brilliance Calendar, during the Month of Flowers.

After mastering the sixth level of the Golden Brilliance Dragon Breath Technique, Levi slowed his cultivation pace, shifting focus to other breathing techniques.

His maximum soul now comprised 57 strands.

Overall, he managed to sustain a pace of one strand every two years.

This was the result of many efforts and extensive research.

Otherwise, under normal circumstances, one strand every three or four years would already be quite an achievement.

For others, it might take a decade to condense a single strand.

Condensing the soul to the maximum was a true test of willpower.

Levi, though modest, felt confident about his willpower.

There probably were not many people as self-disciplined as him in the Wizard World.

The Holy Infant was also making good progress; thus far, maintaining the rate of one strand a year.

Last year, Alexandra and Elsie happily informed the Holy Infant that they had fully mastered the Ninth Talent.

Once they had perfected it, they would be ready to cultivate their primordial souls.

The Holy Infant was, indeed, a competent mentor.

Over in the Midland Continent, Gandaph continued to struggle with the body-refining technique, estimating that it might take several more decades before achieving perfection and integration.

Moreover, Levi had already passed on the Inner Power Crystal Shattering Method to Gandaph for him to cultivate in his spare time.

If possible, he suggested opting for internal energy crystal shattering, as it would be more beneficial for future growth.

Given Gandaph's top-level body-refining talent, there should be no problem.

With this, the original body pursued the Infinite Primordial Soul path, while the duplication followed the Maximum Primordial Soul path, to the satisfaction of both.

Some time ago.

Triss also messaged Levi, informing him that she was entering seclusion.

It could last as short as ten years or as long as several decades.

This retreat was solely to achieve seven-circle wizardry.

Triss entrusted Levi, in the event he encountered problems in the future: one option was to seek help from Elena, the other from Ms. Lucy.

Thinking of Ms. Lucy gave Levi one particular feeling.

Unfathomable depth.

He always felt she could see through some of his inner thoughts and secrets.

Although she did not seem to harbor any ill intentions, Levi, ever cautious and careful, still felt uneasy about meeting her.

Also last year.

Aya, now 113 years old, had successfully advanced to the Four-Ring Wizard Realm, also excelling by perfecting three talents during her progression.

This caused Levi a bit of emotion; the little girl he had once taken in at the ancient tower had now become a centenarian...

"Time spares no one."

The cultivation progress of the Holy Infant's two secretaries was impressive as well; they were both heading for the late-stage level 5 realm.

These years.

The state of affairs in the Mortal World had become chaotic.

However, to Levi's surprise, the Black Dragon Army had successively captured several small and medium planes, yet they hadn't approached his own Ancient Saint plane.

He had actually wanted to use these low-level wizard skirmishes to train his now power-enhanced Knights.

The Mysterious Organization that had previously attempted to assassinate the Holy Infant had committed several acts in the Wizard World.

Their assassination targets were, without exception, standouts from the ancient tower.

The investigation results of the Wizard Council had also been announced.

The mysterious organization did not belong within the Wizard World, including its subordinate Plane Confederation.

Instead, it was an emergent criminal grouping lurking in the Land of Darkness.

The organization was highly secretive and implicated broad connections, possibly colluding with the internal high ranks of the Wizard World.

The congress was currently undergoing a massive internal investigation.

Preliminary inquiries suggested the organization seemed to be formed by a combination of fallen rulers of the Multidimensional Plane and Dark Pirates, among various malicious forces.

Its purpose was to take advantage of the period of great plane convergences.

On one hand, they aimed to raid the Wizard World's resources through guerilla tactics.

On the other hand, they sought to weaken the Wizard World's power by killing off its geniuses.

Among this group of plane sovereigns, many former wizards who, in pursuit of "Eternal Life," had strayed from the path of wizardry created by Sauron, were likely involved.

It was worth mentioning that the organization was likely being guarded by level-10 existences.

Therefore, possessing formidable anti-reconnaissance and anti-astrology capabilities.

The congress called upon all major schools to unite and launched an indefinite bounty on the Mysterious Organization.

Anyone who killed a member of the organization, or provided information on them, would receive a substantial reward.

Levi fell into contemplation.

He hadn't expected the Mysterious Organization to have such formidable roots, backed by level-10 existences...

He had previously wondered whether all wizards could resist the temptation of the Plane Sovereign's path to eternal life.

It turned out that he had indeed overthought it; many wizards had chosen this path.

This was a difference in beliefs and a personal choice, with nothing to blame.

However, causing trouble in the Wizard World was where they went wrong.

"The great plane convergence attracts all manner of spirits and demons to Nora, each hoping to carve out their share. The following age will undoubtedly be one of chaos. Gods, sovereigns, the Abyss, alien races... Numerous powerful entities will emerge, vying for control of Nora. Should we survive this calamity, the wizard civilization will surely become stronger. Until then, the best course is to grow as strong as possible."

A level-6 wizard like him had already secured a place in the coming grand era.
