

Wizard 1651

Chapter 1651: Exterminating the Lord Nightmare Black Dragon Expansion, Hundred Flowers Birthday Gifts!

As long as he acted with low-key caution and didn't exhibit excessive flamboyance, with his methods, self-preservation was not a concern.

But Levi's ambition did not stop there; he wanted to seize this opportunity to create a new era for knights.

...

Two years later.

Holy Brilliance Calendar 1315, Month of Wheatfield.

Levi was now 325 years old.

Maximum soul, 58 paths.

Unknowingly, it was already the 7th World's First Dragon Tournament, and the Faceless Infant Dragon had won first place once again.

Inside the Ancient Banyan Fairyland.

Mana and Martha, aside from their cultivation, began to play chess.

This was something Levi had taught them, to pass some of the tedious moments.

The Black Lotus Beast had reached level 6, still self-disciplined, practicing diligently every day.

Diya Bo guarded the gate, ensuring that the Ancient Saint plane had not experienced a single foreign invasion to date.

Leon, after devouring the true souls of the Ghost Baby and Big-eyed Monster, had fallen into slumber once again...

Levi estimated that after this little one awoke, he would reach level 6.

He wondered what kind of bizarre abilities he would have then.

Compared to others, Leon really was a winner in life.

Following Levi, there was no need to fight, only to eat and sleep, sleep and eat, and the key was that his strength was continuously growing.

If Phoenix heard about this, it would surely shake its head, "Is there really such a good thing in this world?"

It had lain on sticks and tasted gall for nearly two hundred years to earn its fortune!

During this time.

Levi had been focusing on the Crimson Emperor Dragon Breathing Technique, preparing for his advancement to level 6.

From the case of the Brilliant Golden Dragon Armor, he might have to endure many tribulations such as the Black Whale, Ostrich Mountain, Musk Bull, Frost Giant, Saint Ape, Red Lotus, and more.

The thought was enough to lead to despair.

However, with the potent Crimson Emperor Dragon Breathing Technique, passing safely was not a problem.

Moreover, his defensive dimension had already reached level 6.

With his base attributes laid out thus, passing other breathing techniques' tribulations would only become simpler in the future.

Half a year later.

Holy Brilliance Calendar 1316, the first day of the Month of Beginning.

After concluding the 216th round table meeting, Levi returned to the Emperor's Palace.

Midway, a figure quietly emerged behind him.

His instincts alerted him, and golden light flashed.

However, once he perceived who the visitor was, he laughed and said,

"Flower Knight, aren't you going to rest this late?"

Flower Knight replied,

"Are you always so tense in your own house?"

Levi said,

"Sorry, it's a habit, don't mind it, I'm not guarding against you."

Flower Knight pouted.

"Besides me, who else can appear silently behind you?"

Levi was left speechless.

Flower Knight stopped teasing Levi, and with a serious tone said,

"I'm about to advance to a level five knight, and I'd like your guidance; is that possible?"

Levi was suspicious,

"With your talent, isn't advancing to level five a piece of cake?"

Flower Knight crossed her arms, resigned,

"I just have a slightly better wizarding talent, it doesn't mean my knight talent is good..."

Levi analyzed seriously,

"To become a legendary person in the old era, the knight talent must naturally be top-level."

Flower Knight was at a loss for words.

"Just help me out with a lesson, and when you advance to primordial soul, I'll return the favor."

Levi said,

"No problem, just let me know when you're ready."

Flower Knight smiled,

"Okay, as a reward for your lessons, I'll give you a little something, consider it a birthday gift."

Levi was surprised,

"How do you know my birthday?"

He seemed to remember that he always spent his birthdays alone, without mentioning it to the knights.

It wasn't for the sake of caution; in this world, there were no curses that could kill someone based on their birth date.

He just didn't like to trouble others.

If the knights knew, they would certainly make a big fuss on that day, giving him surprises and such.

Flower Knight's lips curled into a smile,

"So today is your birthday; I didn't know your birthday, I was just giving you an early present."

Levi was speechless.

It turned out he had revealed it himself.

"Thank you."

Flower Knight handed over a small, neatly wrapped gift box to Levi, even "thoughtfully" placing a restriction array on it to prevent Levi from investigating.

She said with a laugh,

"Open it when you get back."

Levi thanked her,

"Thanks... Now that I think about it, after living for hundreds of years, this seems to be the first gift I've ever received."

Flower Knight looked incredulous,

"My commander, how can you be so pitiable? Aren't you the leader of a group? Don't you even have someone to give you a gift? From now on, I'll give them to you. Care for the lonely old commander starts with me."

Levi couldn't help but laugh and cry,

"Don't bother."

Flower Knight muttered,

"It's a bother for me, not for you."

Levi said,

"Then, it doesn't need to be once a year, right? Our lives are incredibly long... once every hundred years seems more reasonable."

Flower Knight thought for a moment and said,

"But I receive gifts once a year; the 24 Flowers send them every year without fail..."

Levi:

"..."

Nighttime.

Stars glittered brilliantly.

Levi and Flower Knight floated beneath the starlight, casually chatting.

Unknowingly, dawn approached, and the first light of the morning glimmered.

Before parting, Levi, mindful of the custom of reciprocity from his previous life, asked,

"Flower Knight, when is your birthday?"

"Guess."

"I won't guess."

Flower Knight laughed out loud,

"You..."

She stood up, her golden curls sparkling in the first rays of the morning sun, reflecting beautifully against her silver-white armor.

"My birthday is... yesterday."

With that, she turned and left,

Leaving Levi behind with an astonished expression, murmuring to himself,

"Off by just one day? Really?"

His immediate thought was that Flower Knight was fooling him, having a bit of fun.

Flower Knight's voice floated back,

"Really!"

Levi laughed,

"Alright, I'll remember it."

...

After returning home,

Levi cautiously opened the gift box Flower Knight had given him.

This time, he did not remotely control any alchemical creatures to do it.

Unlike with Lucy, he trusted his companion of many years.

As he opened it, a melodious tune emerged, like that of a music box.

A ring lay inside, set with an eyeball.

"A sixth-ring Wizard Tool, 'Flower Gaze,' from Flower Knight Elena!"

Chapter 1652: Red Lotus Prison Thirty-six Petals, Crimson Emperor Dragon Fire Refines the Starry Sky!

Ancient Saint Plane.

Emperor's Palace.

Levi looked at the ring and had a sudden realization.

"So, that's why Flower Knight wanted the Big-eyed Monster's materials, to make me a gift... But I haven't heard of Flower Knight making artifacts. Could she have asked someone else to do it?"

His heart was filled with doubts, and he was eager to find Flower Knight and get some answers.

"This Sixth-Ring Magical Artifact seems to be of top-quality workmanship... It's quite precious. If I am to reciprocate, I definitely can't give something cheap. It must be worth at least 100 million Aether Stones."

After studying it, Levi put the ring on his right index finger.

It was a storage ring with a space capacity larger than all the other rings on Levi's hand combined.

Moreover, it was extremely durable and not easily damaged in battle.

Aside from storage, the "Flower Gaze" had the following features.

First, it could cast the "Flower Barrier" spell, whose effect was comparable to that of Flower Knight casting it personally, strong enough to withstand a full-force strike from a Sixth Ring Senior Wizard, almost as powerful as the Wind Disaster Pearl.

Second, it could cast the "Stars Forever" spell, capable of trapping a Sixth Ring Senior Wizard for a moment.

Levi had witnessed the effects of these two spells—they were part of Flower Knight's capabilities.

Finally, the eyeball on the Flower Gaze could project a phantom image of a "Nightmare Cannibal Flower" with roughly Level 6 Early Stage strength that lasted for a minute.

The Nightmare Cannibal Flower could create a powerful "Nightmare Illusion" and craft "Flower Demon Traps," proving to be formidable.

Under normal circumstances.

A Fifth-Circle Wizard would not be able to use a Sixth-Ring Magical Artifact because the consumption was too great, and they could not bear it.

But Levi's spiritual force and spell power far exceeded those of an ordinary Fifth-Circle Perfection.

So he tried, and now he could just manage to use this "Flower Gaze" ring.

It could only be said that using it might leave him drained.

But as a trump card, it was quite impressive.

Fumbling with the ring, Levi's mind wandered in thought.

The next day.

Levi went to Flower Hall.

Flower Knight pushed open the door, her eyes bleary with sleep.

Uncommonly, she wore a robe, her blond hair draped over her shoulders.

Unlike Levi, Flower Knight had a fixed sleeping schedule every month.

On that day, she would be like a corporate drone from Levi's previous world, not thinking about cultivation and other troublesome matters. She would just sleep, read leisurely, or have a tea party with her good sister Triss.

"Commander, what wind brings you here?"

Flower Knight stretched and yawned as she spoke.

Levi fell silent for a moment before saying,

"I... I also want to prepare a birthday gift for you, but a year might not be enough time. Your gift was too precious."

Flower Knight smiled and said,

"You look so worried. Can't think of what gift to give me? You're not feeling pressured because I gave you a gift, are you?"

Flower Knight looked at Levi, finding it hard to associate him with the creature inside the ancient tower whose presence was incredibly imposing.

She continued,

"Think of my gift to you yesterday as a small token from our members to you, their commander. That should make it feel a lot lighter.

After all, the value of a gift isn't what's important, and no one can always give expensive gifts.

Sometimes my girls give me some food I liked when I was a mortal, a weapon, or a beautiful wildflower I've never seen; I can smile sincerely, gaining precious emotional value."

Levi nodded.

"Thank you, I think I understand a bit more. I've come step by step, never daring to slack in my cultivation, often overlooking some of the things around me."

Flower Knight laughed,

"You're doing well. Otherwise, how could you have achieved what you have today? You must have some special opportunities that gave you your current strength, but not everyone with those opportunities could reach your level."

As their conversation went on, they ran out of topics and silence fell awkwardly.

Levi quickly said,

"By the way, aren't you about to reach rank five? Let me tell you about some things to pay attention to. These are insights I've gained from my own experience and from other members.'

Flower Knight smiled,

"Welcome!"

...

After the lesson with Flower Knight, Levi returned silently to the Emperor's Palace.

"I hope everything goes well."

He couldn't help touching the "Flower Gaze" ring.

In the days to come, aside from his cultivation, Levi planned to ask the 24 Flowers about Flower Knight's preferences.

Of course, he wouldn't do the asking himself.

He found Mia and shared his request with her. Mia said she would handle it.

Days later,

Inside Flower Hall.

Flower Knight was sitting across from Sakura Witch and Violet Witch, her eyes curving with hidden smiles.

"Why is Mia asking you these questions?"

Sakura Witch said,

"Lord, I... we don't know. Could it be that Master Fire Dragon is interested in you? So we didn't know if we should tell her."

Because Levi was in seclusion most of the time, they usually treated Mia as the Holy Infant's messenger.

Flower Knight spoke with a chuckle,

"Just tell her. There's no harm."

Violet hesitated,

"Lord, is that really alright?"

Flower Knight said,

"I know what I'm doing; just cooperate with her."

After the girls left, Flower Knight remained at home alone, seemingly in a good mood.

"Quick to apply new knowledge, I see."

...

Half a year later.

Small Stone Pond.

Levi opened his eyes and accessed the proficiency panel.

Levi

Crimson Emperor Dragon Breathing Technique: level 17 (Maximum)...

...

"Phew, another breathing technique has reached its maximum, and it's the Crimson Emperor Dragon, the most powerful one for me."

Chapter 1653: Red Lotus Prison Thirty-six Petals, Crimson Emperor Dragon Fire Refines the Starry Sky!

The advancement secret medicine for the Crimson Emperor Dragon had long been prepared by Levi.

He did not delay, and after notifying Hundred Flowers and the Knights, he sequestered himself once more.

This retreat was still located in the outer sea region of the Ancient Saint plane.

Time hurried along.

Four years later,

In the year 1320 of the Holy Brilliance Calendar, Month of Grass,

At the conclusion of the 220th round table meeting, the Knights rejoiced with great news.

Flower Knight and Silver Dragon Knight, one after the other, had broken through to the fifth level.

The name of Flower Knight's Blood Source Armor was "Flower Fairy Armor."

As the name suggests, the various abilities of this armor were closely related to flora,

It had two functions.

The first, to enhance the defense and physique of the Flower Knight. Most importantly, wearing the Flower Fairy Armor allowed Hundred Flowers to absorb a special "Breath of Plants" from the surrounding flowers and trees, which she used to heal her wounds.

The second, through different applications of blood qi, the Flower Fairy Armor could transform into various "Flower Scale Armors," each type of flower granting distinct abilities, similar to her originally

created Flower Language spells. For instance, with the "Cactus Flower Scale Armor," Hundred Flowers could release sharp blood qi spikes. With the "Man-Eating Flower Scale Armor," she could form a blood qi cage to imprison and corrode her enemies. So far, she had developed only these two "Flower Scale Armors," both of considerable power and comparable to unique Fifth-Ring spells.

The Flower Knight's "Floral Divine Palace" could establish a "Flower Domain."

Within the domain, various flowers could impose different positive or negative effects on allies or enemies.

The effects were not very strong individually, but there were many varieties, affecting not only the knight's six attributes but also a wizard's spiritual force.

There were even some quirky and fun minor effects.

The name of Silver Dragon Knight's Blood Source Armor was "Silver Battle Armor," which boasted exceptional endurance.

Moreover, it had two special functions:

First, once wearing the armor, the Silver Dragon Knight could release an exotic thunder called "Silver Lightning," which was more potent than a normal Fifth-Ring lightning spell and not far inferior to the Letney Family's "Golden Lightning."

Second, the arm area of the Silver Battle Armor could launch the Bloodline Divine Weapon to strike at great distances.

Kelvin's Bloodline Divine Weapon was "Silver Mountain's Honor," a silver spear.

This attack had excellent penetration power and a long range, which he called "Silver Rainbow Piercing the Sun."

A hint of cold light arrived first, followed by the spear thrusting forth like a dragon.

Before the enemy could react, they would be pierced through by his spear.

And with the Blood Source Armor, no matter where the spear was, it could easily return to his side.

It was akin to an altered form of "Sky-Dominating Spear Technique."

The other members of the Knights also made great strides.

Relying on prolonged training and battles in the Nightmare World,

Their abilities, both individually and as a team, surpassed ordinary wizards.

Their coordination was on par with wizard battle groups.

Combined with the Dragon King Order and the prestige of the 18 Twilight Cavalry, their strength was incomparable to the past.

Unconsciously,

The Knights had been pioneering the Nightmare World for over fifty years.

Now, they had largely stabilized the territory of the Nightmare Black Dragon, and remnants in other territories had also been eradicated.

Next, relying on the Knights and the Nightmare Creatures Army, they would defend their territory.

Using this as a platform, they continuously expanded in the Nightmare World, gradually becoming a dominant force capable of contesting with the true powerhouses of central lands.

The Dawn Wizard Tower had also been established for nearly ninety years.

Over these years, the progress of teachers and students within the tower was rapid,

Especially Vice Tower Master Herman, who fully utilized the advantages of the Mechanical School, enhancing the efficiency of the wizard tower's operations and reducing unnecessary manpower waste.

Levi knew that the Tower Master must have had his own significant opportunities in the Myriad Machine Plane.

He was also eager to see how far the Tower Master could go eventually.

Compared to walking the path alone to the end, he hoped to have some companions by his side.

On the side of the Ancient Dragon Empire, development was equally swift.

Wing, Feathers, and Cang—the three Ancient Kings of the older generation—had advanced to the middle stage of level 5.

Additionally, the number of Ancient Saints in the Ancient Dragon Empire had reached over one hundred.

Just among level 5 experts, there were nine!

Levi's Lizardman Battle Group, Knights, had undergone earth-shattering changes compared to when he first returned to the Wizard World.

Recently,

The commander of the Fur Knights, the White Wolf Girl Algerta, successfully advanced to level 5.

As Levi had guessed, the girl realized that her peak would be at the peak of level 5 with her Frost Wolf Breathing Technique.

She didn't need to undergo the Blood Tribulation Master's test to reach the realm once held by the Silver Frost Wolf.

Now, she was a pioneer herself.

In the future, to reach level 6, she would need to fuse new bloodlines and forge her own path.

Through experiments on Algerta,

Levi found that shallow breathing techniques allowed for faster cultivation,

But also had a lower ceiling, suitable for training a quickly formed battle group.

This gave him a bold idea.

In his early years, he had collected a rare non-bloodline speed-typed breathing technique, called the "Siren Breathing Technique."

This cultivation method was somewhat superior to the "Frost Wolf Breathing Technique."

Its bloodline overlord, the "Eight-legged Sea Demon," was probably a sixth-level creature like the Man-Faced Spider.

He planned to find a group of mortals with decent combat skill talent in the human realm, to form a small-scale, rapidly trained Sea Demon Knight Order as sacrificial soldiers.

Chapter 1654: Red Lotus Prison Thirty-six Petals, Crimson Emperor Dragon Fire Refines the Starry Sky!

They all cultivated the "Siren Breathing Technique" and didn't need to worry about resources, which were all provided by the organization.

Whenever there was a war or the organization demanded, they would risk their lives for the organization.

The secret medicines they cultivated were all top level.

And Levi knew where they came from.

The Fourth Layer of the Dark Ancient Tower.

Back when he was searching for resource points, he discovered a terrifying sixth-level lord from afar in a forbidden zone.

A Siren!

If he could capture it, given its strength and size, it should be able to sustain a small elite death squad.

If in the future, he could find more Sirens, engage in large-scale breeding, and nurture them... he could even build an Sea Demon Knight Corps.

They didn't need to evolve, they only had to practice combat techniques and the "Siren Breathing Technique." As soon as they reached rank four, rank five, they would be of use.

Naturally, it would be even better if they could, by chance, advance to rank six.

more years and the Dark Ancient Tower would open again.

With Levi's current strength, dealing with Sirens wasn't a problem.

...

Month of Winter.

The outer sea region of the Ancient Saint plane.

On an isolated island.

Levi opened his eyes.

The Red Emperor Dragon Advanced Potion within his body had been completely assimilated.

At the same time, his soul had reached 60 paths.

After adjusting himself to his peak state, Levi held the Crimson Dragon Slash and looked up at the sky.

Far away, the Saint Ape Knight, Black Knight, Flower Knight, and others eagerly awaited.

He wanted the Saint Ape and Black Knight to witness the future Blood Tribulation Master and get an early understanding of the considerations for advancing to the sixth level.

As for Flower Knight, she said she was there to protect him and nothing could stop her.

The Black Knight said with envy,

"Our commander just had a breakthrough not long ago, and now he's broken through again. He's truly inhuman!"

The Saint Ape Knight expressed with emotion,

"The commander is different from us. We only cultivate a single-dimensional attribute, but he has always embraced diversity and inclusiveness. His difficulty is multiples of my own. I hope his passage through the Blood Tribulation goes smoothly."

Flower Knight said,

"One must be no ordinary person to become our commander... You needn't worry about him."

She said not to worry, but her heart was actually more anxious than anyone else's.

Through Levi, she had also come to know some of the knowledge regarding the advancement to the sixth level.

She knew the Tribulation that Levi would face was extraordinary.

Even the Land of Darkness, that nurtured all life, would descend its trials.

One could imagine the difficulty.

...

Above the isolated island.

The wind and clouds gathered, and the fire elemental power surged from a ten-mile radius.

In addition, there were other elemental powers, but they seemed insignificant in front of the fire element.

The Ostrich Mountain Bird, capable of stepping on Earth and shattering mountains with its strong black feet.

The Frost Giant, whose ice-cold presence reached the heavens and whose arms could support the sky.

The Musk Bull, mountain-like and rage-filled to the skies.

The Giant Whale, like an isolated island floating in the Void, carrying a nation, boundless and vast.

...

All those Mythical Creatures, the Blood Tribulation Masters in Levi's bloodline, now emerged one by one.

He silently stood up.

"Let's begin!"

He gripped the Crimson Dragon Slash, one sword strike, then another.

The Sword Qi, tearing through the Void, engulfed all the Blood Tribulation Masters. If one strike wasn't sufficient, he would strike twice.

For the current him, these Blood Tribulation Masters were indeed not to be feared.

Even if he could only use the Crimson Emperor Dragon Breathing Technique, paired with his multi-dimensional attributes, he already formed an overwhelming advantage.

Like a game, in the face of absolute values, everything else was irrelevant.

Eventually, these giant beasts all vanished into smoke, annihilated by Levi.

Of course, for those creatures like the "Saint Ape" and "Musk Bull."

Levi intentionally delayed some time to facilitate Emperor Mu and the others learning.

In the distance.

The Black Knight was flabbergasted,

"Can't be, right? So many Blood Tribulation Masters were resolved that quickly?"

Emperor Mu was equally dumbfounded,

"Too strong, the commander is too strong, unimaginably powerful!"

Flower Knight's brow furrowed, detecting that things weren't so simple,

"Don't be too happy too soon; the real Great Tribulation hasn't arrived yet."

Sure enough.

In the sky, the swirling fire elements formed clouds, constituting the Blood Tribulation Master Levi dreaded the most for his tribulation.

The Red Lotus Dragon!

With a wingspan of five hundred meters, it was like a cloud hanging from the heavens.

Its aura was seemingly even stronger than the Black Lotus Beast's.

It looked towards Levi, with a gaze full of satisfaction, admiration, and even a hint of surprise, reverence!

This moment.

Across boundless space-time.

Levi and what was likely an extinct Mythical Creature, faced each other.

The Bloodline Path was bondage, yet also the passing of a torch.

The Red Lotus Dragon flapped its wings, and the terrifying Solar Wind swept forth.

Boom!

Within a radius of over ten miles, the surface of the sea evaporated, left empty, exposing the scorched soil of Purgatory below.

Not only that.

In the sky, countless Crackling Flames fell like a dazzling flurry, too brilliant to look at directly.

The Red Lotus Domain descended!

Like a crimson chariot, the Red Lotus Dragon rode the hot winds, sweeping across the battlefield towards Levi!

Levi laughed heartily towards the heavens,

"Let me experience the might of a real Mythical Creature!"

Boom, boom, boom!

He stepped forward, shattering the Void, creating ripples.

The Sun Aura descended!

He swung out the Crimson Dragon Slash, its unmatched, vast Sword Qi sweeping over everything!

Above the sea, a tireless Red Sun rose.

Before this Red Sun, even the Red Lotus Dragon seemed diminutive!

Boom!

The fierce collision shattered the Red Lotus Dragon's scales, tearing a massive gash.

Chapter 1655: Red Lotus Prison Thirty-six Petals, Crimson Emperor Dragon Forges the Starry Sky!

Levi shouted:

"Evolution is the trend of the world, and I will make you lose convincingly!"

He suddenly burst forth, his fleshly fists colliding with the body of the Red Lotus Dragon.

Boom!

Boom!

Boom!

The dual wings of the Red Lotus Dragon were like blades, slicing through everything, its tail like a whip, continuously breaking the air, its dragon claws reaching out, shattering everything!

It did not know combat techniques, yet every move seemed naturally perfect, harmonizing with heaven and earth.

Levi's fist turned into a warhammer, his arms into iron rods.

"Roar!"

Levi's body erupted with a terrifying aura, red ripples shaking the void.

Behind him, the majestic Crimson Emperor Dragon Dharma Idol that commanded all beings congealed!

He wore the Crimson Emperor Dragon Armor, holding up Heaven with his hands, standing on the void!

At the heart of the dragon armor, thirty-six Red Lotus petals slowly bloomed, continuously flickering, making the plane tremble.

After reaching level 6, the Crimson Emperor Dragon Armor had Advance from thirty-two petals to thirty-six!

And moreover, it no longer required the direct consumption of a unit of energy.

A kilometer-wide Red Lotus Purgatory encapsulated the sky with red clouds, descending like the day of destruction.

Rumble!

The Red Lotus Purgatory exploded!

The domain of the Red Lotus Dragon was torn apart.

Its majestic body was blasted into a bloody mess, turning into cloud of flames, slowly dissipating.

Its trial ended swiftly. It came in haste and left in haste.

Levi's heavy breathing was like a giant dragon, exhaling boundless fierce flames.

He quickly recovered his strength, meditated to regulate his breathing, waiting for the arrival of the Dark Tribulation.

"Considering such a defiant existence as the Crimson Emperor Dragon, the Dark Tribulation must surely be terrifying."

Levi murmured to himself.

In the distance,

The Black Knight and Emperor Mu were both boiling with excitement, looking at the remnants of the flame clouds in the sky, utterly astounded.

Emperor Mu sighed:

"This is the true Red Lotus Dragon... I always thought our Holy Ape Family was the natural foe of the Red Lotus family, but now I realize, it was just that the Red Lotus family hadn't brought out the true maximum strength of the Red Lotus Dragon."

Hundred Flowers said:

"The majesty of a Mythical Creature is too powerful... but next, there's another tribulation to pass before one can truly stabilize their realm."

The next moment.

Accompanied by the tearing of the sky.

From the outer layer of the Plane Crystal Wall, endless cold seeped from the Land of Darkness.

In an instant, a hundred miles radius of the sea surface turned into solid ice.

Levi muttered:

"Extreme Cold Tribulation?"

Not only that, Levi noticed a streak of blue light rushing towards him.

Above it was a tumultuous sea, fractured plates, and the illusory Plane Crystal Walls.

A sense of destruction and death pervaded.

"Using a Water World Fragment directly against me, huh?"

This Land of Darkness truly regarded him highly.

This fractured plane seemed to be about twenty kilometers in diameter, with an irregular shape.

Compared to the meteorite that ended the age of dinosaurs, it was truly a case of a small witch seeing a great sorcerer.

It rapidly crossed the Land of Darkness, trailing a long blue tail flame behind, which were the scattered water streams... just being pulled by the Elemental Magnetism emanating from the plane.

Because of the absolute suppression by the Red Lotus Dragon, thus the attribute of the Crimson Emperor Dragon was purely of fire.

And the things that counter fire were one, water, two, ice, and three, earth.

Well, well.

This Land of Darkness brought everything that could counter fire.

This was outright targeting!

Extreme deep cold struck, and even Levi's body felt the bone-chilling cold.

He casually threw out a Wizard Tool, which quickly froze and cracked, showing how formidable it was.

Levi exhaled a breath of scorching air and sighed:

"Well then, let me show you the might of the Crimson Emperor Dragon!"

He suddenly stomped the ground and rose, the hundred miles of ice instantly cracking.

Boom!

A streak of red light, like a rocket, soared into the night.

From the fragmented plane, the escaping water turned into countless ice columns, ice arrows, rushing towards him like secret swords under tremendous acceleration!

Boom! Boom! Boom!

The air was filled with explosive sounds.

Earth elements gathered, Golden Gravity pulled, and tens of thousands of meteorites formed a Star Ring, transforming into grinding discs, rotating above him.

The grinding disc was quickly smashed by the ice columns, and the remaining dense attacks all landed on him.

His Elemental Magnetism burst forth, weakening the impact.

Bang!

Endless ice columns assaulted him, and from a distance, it seemed to transform into a white icy river waterfall stretching from heaven to earth, wildly pouring onto the sea surface.

The cold air rolled in, sweeping across.

In the distance, Emperor Mu asked:

"Commander should be alright, right?... This cosmic calamity is truly unimaginable."

Hundred Flowers looked solemn.

This tribulation seemed more terrifying than the last one.

The previous Black Beast Tribulation and the Meteorite Tribulation felt negligible to her, easily obliterated.

But this "Plane Tribulation," soon to collide with the Ancient Saint Plane,

Even she, having been promoted to a Sixth Ring Senior for over a hundred years, felt a bit of pressure and had to treat it seriously.

Hundred Flowers whispered in her heart:

"If Levi can overcome this tribulation, relying on knight techniques, he might be able to exchange a few moves with a Sixth Ring Senior Wizard... The gift of the ring I gave him seems somewhat superfluous now; just how much strength is this guy hiding?"

Rumble!

On the distant battlefield.

Levi, tiny as an ant, continuously washed and frozen under the ice river waterfall.

The sea surface cracked layer by layer, and he was directly bombed into the underground by the ice river.

And the real Great Tribulation was the imminent collision of the shattered Water World. novel.com

Would this streak of red flames be extinguished?

Levi's expression was ferocious.

The Wind Disaster Pearl emerged, and the Wind Spirit Shelter formed.

Relying on the protection of this rare treasure, Levi gained a moment's respite.

His body now, full of scars and bloody mess.

Chapter 1656: Red Lotus Prison Thirty-six Petals, Crimson Emperor Dragon Fire Refines the Starry Sky!

The frozen wound was actually preventing his self-healing!

His heart area projected the image of the Crimson Emperor Divine Palace, enveloping him!

Under the high temperature, all the ice thawed completely!

Levi endured the intense pain as his body healed rapidly.

Level 6 Crimson Emperor Dragon Flames enveloped him, transforming into countless crimson streamers, fluttering in the wind like the Armillary Sash, all winding towards the Water World!

"Ice isn't frightening, I must destroy this shattered Water World to prevent it from colliding with the Ancient Saint plane!"

He closed his eyes, feeling the changes brought about by the ascension of the Crimson Emperor Dragon.

The next moment.

His level 6 aura exploded, he grasped the now level 6 Crimson Dragon Slash, surrounded by the Golden Dragon Heavenly Shield, and charged into the ice river waterfall.

A stroke of red light, unstoppable.

Shattering the waterfall layer by layer, he fought from the ocean's depths to the Nine Heavens!

Until Levi reached the crystal wall, he looked toward the Land of Darkness and fearlessly flew out.

His entire defensive capability activated, his mind's Primordial Spirit Projection took form, brandishing the Eight Desolate Halberd as the Thunder Emperor.

Golden Divine Palace fired off, its suppressive force slowing the Water World's speed.

Soon after, the divine palace shattered.

Elementary Magnetic Field energy burst forth, desperately trying to attract the Plane Fragment.

At the same time.

In Levi's palm, the grand golden gravity formed countless lightning bolts, covering the Plane Fragment.

Thousands of crimson streamers formed by the Crimson Emperor Dragon Flames bound the fragment!

The Emperor's Essence in his hands launched the Chaos Sword Energy!

Under the dual power of the Sword Qi and golden gravity.

The plane suddenly cracked in the middle, its momentum significantly slowing.

Levi, shining brilliantly and colliding with the Destroying Heaven and Earth fragment, finally collided!

"Red Emperor Dragon Transformation!"

Accompanied by a thunderous dragon roar, the entire Land of Darkness was lit up by a fireball resembling the Little Sun.

A majestic giant dragon with an air of endless imperial authority appeared!

Its body covered in crimson scales, with a wingspan of six hundred meters, muscles taut and fierce, the flames around it bending to its will!

The pinnacle of strength, the Flame Dragon of World Annihilation!

The crimson dragon opened its jaws wide and roared!

A Crimson Emperor Breath hundreds of meters thick burst forth.

At the same time, the dragon dug its claws into the center of the fragment, spreading its wings wide!

"Red Emperor Domain!"

Centered on the Crimson Emperor Dragon, within a radius of several miles, the Void birthed endless flames that devoured the fragment.

Water may conquer fire, but fire too can conquer water!

Under the Red Emperor Domain, Levi felt infinite power flowing into him, making him feel as though he could... shatter a star with a single punch!

"Explode for me!"

The Crimson Dragon exploded with power!

A tremendous surge of strength flowed into its wings!

The flames moved upstream, completely enveloping the Plane Fragment!

The Crimson Emperor Dragon roared towards the heavens, standing tall. Now, the fragment had become a "Fire World"!

And the dragon was its king!

The dragon refined the stars, dissipating the darkness!

The residual force from the fragment carried the Crimson Emperor Dragon as it continued to fall, and the fireball's size diminished.

Boom!

The fireball exploded on the ocean's surface, sending shockwaves sweeping across!

Flower Knight waved her hand, blocking the remnants for Black Knight and the others.

She looked gravely at the center of the explosion.

The Void itself was collapsing, a myriad of chaotic currents swirling.

Levi, in his Crimson Emperor Dragon Form, scales blasted apart, blood flowing freely.

The water that had been evacuated by the explosion slowly returned but was immediately evaporated by the scorching giant dragon.

An irregular water-blue crystal, the size of a human head, floated in the Void. [nøvel.com](https://www.novel.com)

The Crimson Emperor Dragon caught its breath, and its wounds gradually healed.

Levi transformed back to human form.

He looked at the extraordinary crystal.

From it, he sensed a familiar force of Space.

A power only a level six expert could comprehend.

"This... could this be the Legendary 'Starfall Remains'?"

Levi secured the object, planning to consult with Mana when he had a moment.

With all his might, the huge fragment had been eroded away, leaving behind only this small crystal.

Such was the might of the Crimson Emperor Dragon!

After a long time, no other ordeals descended.

At the same time, Levi felt that his Red Emperor Dragon Realm had completely stabilized.

He looked toward the concerned crowd in the distance and transmitted his voice:

"The tribulation is complete."

Everyone hurried over.

Hundred Flowers even used Void Travel to arrive beside Levi, handing him a blue medicine.

"A Six-Ring healing potion, drink it."

Levi couldn't help but say,

"This must cost quite a bit of money..."

Hundred Flowers huffed and said,

"Just drink if I tell you to, it's not your money that's being spent."

Levi took the medicine with a wry smile.

The Six-Ring potion was indeed extraordinary.

As if rejuvenating both body and mind, the potion swept away Levi's fatigue.

Once again, Levi was full of energy, lively as a dragon.

Under the influence of the Death Ember Dragon, those internal and external injuries were trivial.

Based on Levi's experience as a pharmacist, such a medicine would be extremely expensive.

Even a Sixth-Circle Wizard would not consume it unless in a life-and-death crisis.

"Done for, my debt just keeps growing, when will I ever clear it."

Levi pondered in his heart.

Hundred Flowers smiled sweetly and said:

"Congratulations, your strength has increased yet again... although I've grown tired of saying this."

The other knights who had followed quickly thanked him:

"Thank you, commander, for allowing us to witness the tribulation, it was profoundly beneficial!"

Levi said with a smile:

"Alright, everyone get back to your duties, I hope you will reach this stage one day too."

He and Hundred Flowers left first, traveling through the Void.

Emperor Mu said with meaningful laughter:

"Black Knight, do you think the commander and Hundred Flowers have something going on?"

Black Knight said,

"Do they? What kind of something?"

Emperor Mu sighed and said,

"Never mind, you brute, you wouldn't understand. You should, like me, find a partner, and then you will understand."

Chapter 1657: Thirty-six Petals of the Red Lotus Prison, the Crimson Emperor Dragon Refines the Starry Sky!

...

After thanking the Flower Knight once more, Levi parted with him and returned to the Emperor's Palace.

He opened the proficiency panel.

Levi

Crimson Emperor Dragon Breathing Technique: eighteenth-tier (1/5,000,000), Special Effect: Red Emperor Dragon Body·??? (Level 6 Early Stage); Bloodline Dharma Idol: Heaven Burning Crimson Emperor; Blood Source Armor: Crimson Emperor Dragon Armor. Exclusive Weapon: Crimson Dragon Slash (Level 6)

...

Frowning, Levi said,

"Hmm? Why are there question marks after the Red Emperor Dragon Body? Is it because my current knowledge isn't enough to display Super God level information?"

[Red Emperor Dragon Body·???

1. You possess the ultimate strength of a Crimson Emperor Dragon.
2. You have an extremely excellent fire element affinity talent.
3. You have mastered [Sun's Wind], allowing you to create terrifying sun storms, burning everything to ashes.

4. You have comprehended a [Red Emperor Domain] with a diameter of seven kilometers, filled with an endless supply of Crimson Emperor Dragon Flames. Once the domain is deployed, your power attribute increases by 500%, with all other attributes increasing by 100%.

5. You exert double the Dragon's Might suppression effect on all Fire Dragon Clans under heaven!

6. You can briefly transform into a Crimson Emperor Dragon...]

After reading, Levi's expression was one of shock.

"What a domineering Crimson Emperor Dragon, with a 500% increase in basic strength attribute, it's totally against the heavens!"

And not only that.

The Crimson Emperor Dragon even exerts stronger Dragon's Might suppression on all fire dragons.

As for the power of the sun storm, there's no need to say more — it annihilates anything in its path, whether gods or Buddhas.

After getting excited.

Levi then spent the next year solidifying his Red Emperor Dragon Realm.

Besides that, he focused on condensing the soul to the maximum.

The practice of other breathing techniques was left to naturally progress.

Following Level 6 as a Crimson Emperor Dragon, "strength could break all techniques."

He now had the confidence to punch through the Deceitful Poison Wizard's protective force field with a single blow.

This is the power of the Crimson Emperor Dragon!

No fancy skills, just the pursuit of two extremes!

The Pinnacle of Strength and the ultimate mastery of fire!

Due to the Level 6 Black Lotus Beast, Levi now believed he could catch up to and even surpass the Brilliant Golden Dragon in his cultivation speed.

As for that blue crystal, it was indeed the [Starfall Remains].

Mana had already begun arranging a space passage from the Ancient Saint plane to the Ice Sea Secret Realm.

Upon completion, members of the Ancient Saint plane could enter and explore, pioneering new territories.

When Mana found out that the Starfall Remains had been "deliberately presented" by the Land of Darkness, she no longer dared to tell Levi how rare and precious some things were in front of him...

Meanwhile.

The Holy Infant and Gandaph also entered an all-out cultivation sprint.

They put aside other affairs for the time being.

After their seclusion, the assassination attempts by the mysterious organization naturally came to an end.

As for Levi's true form, in the Wizard World, he remained a Nameless nobody.

Apart from family and close friends, no one knew of his existence, making it all the more worry-free.

...

Four years later.

In the year 1325 of the Holy Brilliance Calendar, the Month of Flowers, there were only six years left until the opening of the Dark Ancient Tower.

In the human realm.

The Black Dragon Empire's army had struck, capturing several small planes.

In contrast, the Ancient Saint plane remained peaceful with time passing quietly.

Occasionally, some unlucky ones would stray into "Taoyuan."

They were punched out by God Nick and Diya Bo — one little friend after another, struck dead.

The seven kingdoms had become a thing of the past, leaving only the Church to occupy their respective dojos.

The Church always managed to pull out Sealing Sacred Objects to save the day whenever Levi thought they were done for.

It's true — a camel, even when skinny, is bigger than a horse. Surviving since the Antiquity Age, they certainly had some tricks up their sleeves.

Furthermore, Levi had never given up searching for the seals of the Duncan family of monster hunters.

With his current strength, he actually looked down upon those special effects.

But a collector's obsession is just like that, lacking one out of three is too uncomfortable.

Over beyond the Endless Sea.

Triss had been in closed-door cultivation for twelve years, which was quite normal for a primordial soul wizard.

Especially when breaking through a major realm, it could take decades, even hundreds of years.

As for Ms. Lucy, Levi had never contacted her.

Little news had also come from the dragon descendant sisters; if they intended to shatter the internal force crystals, they surely needed to put in more effort than others.

Ever since that birthday when he received a gift from the Hundred Flowers, aside from cultivation, Levi's heart had started to harbor some other things, taking up a place alongside them.

...

On the Azer Continent.

The address to the Fire Dragon Hut had long been replaced by Schubert's House.

The Schubert Family had become the leading weapon-making, array dragon head enterprise in Inner Ring District 1.

On this day.

The manager of Schubert's House, a fifth-circle wizard named Allison, was lying on a rocking chair, eyes closed, enjoying a massage from the maids.

When he opened his eyes, he suddenly found that the maids had silently collapsed to the floor, unconscious.

A large hand held him down, and without allowing any objection, a stream of crimson mystical power was injected into his body.

Allison said,

"Lord."

The towering figure was none other than Levi, who had quietly entered the shop.

Throughout the years, he had never given up searching for clues about the enemies who killed the Holy Infant.

After following leads from the Mysterious Organization to no avail, he turned his attention to the Schubert Family.

From the death of the Surging Wave Wizard to the series of events that followed, the beneficiaries, besides the Mysterious Organization, could only be the Schubert Family.

In this world, there couldn't be so many coincidences; behind it all, there had to be a hidden hand pushing events forward.

Next, Levi interrogated him.

This person didn't know if the family had sent someone to assassinate the Holy Infant.

But he had seen the Clan Leader meeting with a big shot from the Star Sea region.

This person was well-known in the Endless Sea.

The Molten Gold Wizard King!

The Minister of Justice of the Tower of Stars, the Righteous Sword! One of the Four Great Witch Kings of the Letney Family.

Right, this old chap had once bullied the Flower Knight, Levi remembered it very clearly!

The Schubert Family had actually changed into the Letney Family's puppet long ago.

They had to offer quite a number of wizard tools, arrays, and Aether Stones to them every year.

Letney Family wizards could purchase wizard tools from the store at a complete fifty percent discount.

Levi didn't kill this person right away; he let him continue to be the manager as his own chess piece infiltrated within the Schubert Family.

After getting all this done, he quietly left to continue his cultivation in the human realm.

"The Endless Sea, which was supposed to be the most righteous of places, has become a breeding ground for sin and corruption..."

From Sorrett, Levi knew how many dirty deeds the Thunder Dragon Family had done to fulfill the tasks given by the Letney Family.

He had no intention of wiping out the darkness; he just wanted to deal with those who were hostile toward the Holy Infant.

The way to make money from wizard tools, he couldn't possibly give it up.

...

In the Mortal World.

At sea.

Levi was on his way.

Suddenly, intense fluctuations from a battle ahead caught his attention; it seemed to be of a sixth-circle level.

With the belief that less trouble is better than more, Levi was about to leave, but then he noticed a familiar figure.

It was a chubby bearman girl surrounded by gurgling stream water, playing a flute, and battling a Cave Wizard.

It was Ann.

There were also three young bearman, appearing quite young, controlling rocks, flames, clouds, and their strength was not weaker than Ann's.

In the middle of the battlefield, a group of elderly bearman, dressed in simple clothing, were guarding these four youngsters at the center.

In the Sixth-Circle Battlefield.

A level 6 bearman moved with such control that rivers seemed to flow with his gestures, roaming through the six emptinesses.

His grand and imposing maneuvers were directed at the three sixth-circle Cave Wizards besieging him.

Levi's heart changed.

"Aren't these bearman from the Panda Plane? How did they get to Nora... Could it be, the plane convergence has also affected the Panda Plane?"

Chapter 1658: Reviving the Panda Qi Sect, one dragon awakens and all things are reborn!

Human realm.

Outer sea region.

The battle was extremely fierce.

The path of the Energy Sect was vast and profound.

Saint Emperor Zhou had advanced to the Shattering Void realm over a hundred years ago and his strength was considerable. But facing three enemies alone was simply too much for him to handle.

Not long before, he had felt a violent tremor coming from the Panda Empire, shaking the earth and mountains as if it were the end of days.

Then he discovered a spatial gateway that had appeared in the remote regions of the empire.

It wasn't long before a group of Cave Wizards charged in, burning, killing, and looting, committing every imaginable atrocity.

The Saint Emperor personally led a team to deal with these people and passed through the spatial gateway to investigate the situation in the outer sea region of the human realm.

After that, they were quickly surrounded by an even more turbulent army of Cave Wizards.

Considering this was the Wizard World, Zhou, with no options left, could only seek help from the esteemed Elena, whom he knew; but it seemed that Elena was in seclusion and had not yet responded to his message.

The battlefield situation changed in the blink of an eye.

Ann, Hong, Li, Chen.

Known as the "Four Sons of Qi Sect," they were the four with the strongest Qi Sect Talent of their generation.

After more than a hundred years of cultivation, the four were all close to the universal standard of level 5 peak state.

Each of them could fight against many alone, and when cooperating as a team, they were unrivaled below level 6.

Alas, the number of Cave Wizards was far greater than them.

Their Black Dragon Army was well-trained and resolute in killing, further employing the art of combat arrays.

And this army of the Panda Empire was merely a civilian self-defense team called upon by the Saint Emperor, including any master like "Master Ma" and "Master Ye" from all over.

This was already after the Saint Emperor had trained them for a long time in anticipation of the great convergence of planes.

After all, the Panda Clan had long lived in paradise, amicable with others, not fond of conflict, and lacked militarized strategies even more.

Faced with wizard civilization, even the backward civilization from the Antiquity Age, they were still subjected to asymmetric warfare...

The innate spells of the Cave Wizards bombarded wildly, and the power of their arrays reached to the heavens and through the earth.

The people of the Panda Clan exhausted themselves protecting the safety of the Four Sons of Qi Sect.

Cang Mountain, Clear Spring, Flowing Cloud, Blazing Fire... Various anomalies appeared between heaven and earth.

Levi silently observed the battle; at this point, the Panda Clan indeed seemed miraculous.

With their ability to comprehend Qi through their hearts, they could use the surrounding elements' power within a small range, making each one of them fairly elite.

But their numbers were crushed by the Cave Wizards, so the battlefield situation was still not in their favor.

Ann and the other three masters of Qi Sect Talent were quickly besieged.

Upon seeing this, Levi left a message for Hundred Flowers and then vanished into the Void.

On the battlefield,

Ann's expression was tense as he received a telepathic message from the Saint Emperor.

"Ann, you four use the Combined Attack Four Symbols Absolute Skill and lead the others to break through, to escape the encirclement... I will find a way to shake these people off and come find you."

Upon hearing this, a gloomy expression came over Ann.

The Panda Clan was still too weak.

The Four Sons of the Qi Sect were of one mind, with perfect coordination.

Behind them, the phantom images of four holy beasts emerged.

Spiritfire Sparrow, Mountain Turtle, Cloud Tiger, Dragon of Clear Spring!

This scene reminded Levi of the Four Symbols Sect from his previous life.

But clearly, this world's Four Symbols were different from those of his past life.

It was merely a clever coincidence.

Vermillion Bird, Xuan Turtle, White Tiger, Azure Dragon, four great anomalous giant beasts roared to the skies, causing the "Four Heavenly Qi" within several miles to surge violently.

Boom!

"The Four Symbols unite, Mixed Element opens the world!"

Four-colored Divine Light pierced the heavens and the earth.

The encircling group of Five-Ring Earth Cave Wizards all employed different means to avoid it!

"Interesting, the absolute skills of these four sects can actually merge into one, with a charm similar to my Ninth Talent," Levi mused as he concealed himself in the Void, not in a hurry to make a move.

Rescuing at the last moment is an art.

Only when the rescue comes in the most critical moment does it leave a deeper impression and create an indelible memory in the rescued.

Just as the Four Sons of Qi Sect thought they were about to break out of the encirclement,

a fifth-circle wizard threw out a spell scroll.

Boom!

"I was thinking of taking some prisoners back to experiment on... Nevermind, just kill them to make specimens for study."

The transcendent techniques of these bearman indeed had some merit, but before a Six-Circle Spell, they were all futile.

Six-Circle Magic-Snowflakes Floating.

The north wind howled, endless white snow blanketed everything, vast and boundless, extreme cold descended, sealing everything.

Around the Four Sons of the Qi Sect, various anomalies surrounded them, resisting the cold.

A small green snake emerged from Ann's chest.

It was the alien snake species, the Azure Sky Snake, that could naturally travel through the Void.

It seemed to be trying to break through the Void sealed by the Six-Circle Spell to take Ann away.

Ann said,

"Green, retreat first. We four have our own methods and won't die so easily!"

Below the Frost.

An elder bearman, along with his Lightning Whip, was frozen solid, swept by the cold wind into dust.

Below level 6, all were ants.

"Master Ma!"

Hong's eyes nearly split with anger.

Even the highly respected Master Ma, proficient in the Lightning Five Whip, had been killed. A sense of despair spread among the bearman clan.

Saint Emperor Zhou saw the Six-Circle Spell Scroll and his face changed dramatically. He wanted to save others but was blocked.

"You can't even take care of yourself, and yet you worry about those ants."

The Six-Circle Cave Wizards sneered.

They were all Army Commanders under the command of the Water General and had successfully taken down several alien worlds.

Compared to other alien races, these bearman of the Panda World seemed somewhat special.

Thus, upon discovering their existence, the General immediately dispatched three level 6 Wizards to ensure a foolproof conquest of this world.

At that moment,

a figure in a White Robe emerged from the Void.

He casually waved his hand, and the power of the water elements formed small turtle shells that enveloped all the bearman within the realm of falling snow.

Chapter 1659: Reviving the Panda Qi Sect, one dragon awakens and all things are reborn!

His body shone with golden light, and golden gravity traction flung the turtle shells away.

Golden meteor showers burst forth from the battlefield and landed far away on the ocean surface.

A group of Fifth-Circle Wizards looked on in shock. Who was this?

They had never seen this person before.

One of the commanders said,

"We are wizards of the Black Dragon Empire's army, and we kindly ask that this elder not meddle in unnecessary matters and endanger himself."

"Over there are also three commanders with the strength of a primordial soul. Do you think you can escape their pursuit?"

These words, spoken gravely, clearly carried a warning.

Meanwhile, safely away from the battlefield, sheltered by the turtle shells, the Four Sons of the Qi Sect felt relieved yet mostly confused.

Hong asked,

"Do any of you recognize this elder?"

The other bear people shook their heads, clearly having never seen Levi.

Even Ann had only seen Levi in his Dragon Monster Form.

After reaching level 6, Levi's breathing technique had returned to its original state, no longer needing to exhibit various dragon features to exert his strength.

Thus, the Dragon Monster Form was a thing of the past.

If he decided to stir up trouble in the future, he would not use the Dragon Monster Form, but rather the true... Dragon Form, and he could then pin the blame on the Dragon Clan.

At the center of the battlefield,

In the biting cold, a White Robe Wizard stood desolately alone.

He snapped his fingers, and one by one, fierce flames appeared from the void.

A single spark can start a prairie fire.

Millions of red flames suddenly expanded, forming a Red Flame Domain with a diameter of no less than seven kilometers.

Feeling the sudden surge in power and the attributes of other dimensions, Levi's heart roared like an engine, and he grinned.

"This feeling, it's awesome!"

Under the "Red Emperor Domain," he felt that even the Flower Knight, who had been promoted to the sixth circle for over two hundred years, was worth challenging, let alone these incomparably weaker opponents.

The Black Dragon Army also posed a threat to the Ancient Saint plane.

Thus, it seemed only natural to seize this opportunity to eliminate some of their combat strength.

He threw a punch, and infinite flames followed the wind of his fist, forming a vast torrent that surged toward the sky.

In the presence of such vast flames, the Six-Ring Frost Magic immediately paled in comparison.

Snowflakes melted, coldness faded, and the sky cleared.

Levi exhaled a hot breath, with tiny sparks scattering.

The surrounding wizards of the army, now gasping in shock, found it hard to believe.

"This... With one punch, he broke our Six-Circle Spell Scroll. His strength, among the commanders, is also top-notch; probably only a general can firmly suppress him."

"Don't panic. Form a combat array; we just need to delay him for a moment and wait for the three commanders to arrive."

Being a well-trained wizard legion, they quickly began their counterattack. Beams of light soared into the sky, lighting up nodes of the combat arrays.

Seeing this, Levi raised his hand and meteorites fell from the sky.

Primordial Magnetic Domain!

Waves of chaotic Elemental Magnetism shook the wizards trying to form the combat array to pieces.

The combat array broke without being attacked.

Not only that, a sudden suction force emerged centered around Levi.

Magnetic inversion!

A group of wizards involuntarily flew towards Levi, then disappeared into the endless flames of the Red Emperor Domain.

Seeing Levi, like the Fire God, the Black Dragon Army panicked.

Now, with Levi at the sixth level of both Golden Snake and Crimson Emperor Dragon, his strength was far beyond their imagination.

Boom, boom, boom!

In an instant, he threw hundreds of punches, the fist wind forming scorching "Sun's Wind."

Where the hot wind passed, seawater evaporated, the seabed charred, and not a blade of grass survived.

This was truly a Calamity-level Ability!

It was also Levi's greatest area of attack.

After a few rounds, Levi remained unscathed, while of those wizards from the warband, few were still alive.

Spurred by fear, they defied military orders and retreated.

The Black Dragon Empire's military laws were strict—those who disobeyed orders might be executed... but staying here meant certain death!

Levi strolled leisurely, and beams of golden gravity transformed into rays, taking away each fleeing individual.

A roar came,

"To bully a rank five with level six, truly shameless!"

Two ugliest-looking Sixth-Circle Wizards then attacked from both sides.

Seeing the changes here, reluctantly leaving one to contain the Holy Emperor, everyone else came to deal with Levi.

Levi laughed,

"A Six-Circle Spell Scroll is also a sixth-circle method, isn't it? What's the point of talking about these things on the battlefield?"

He swung his arms, simultaneously throwing punches.

Crimson Emperor Dragon Flames wrapped around his fists, shooting out and transforming into two fire dragons hundreds of meters in diameter that devoured everything.

Boom!

Boom!

Two suns rose over the ocean, flames sweeping across, hot air waves rolling, steaming the sea.

After the explosion,

The two Sixth-Circle Wizards appeared disheveled, with several burn marks.

At a crucial moment, their defensive fields and Soul Artifacts barely blocked what seemed like a casual strike from Levi.

"This... This man might be at Sixth Circle Perfection! We cannot stand against him; we need to retreat quickly and let a general take over!"

"That's correct."

After just one exchange, they already wanted to retreat, completely losing their previous confidence.

He was too strong!

This man gave them a feeling of irresistible power from within, flawless!

Both cloaked in their talent-induced spell force fields, they fled in different directions.

Levi was stunned.

"They gave up without even fighting? How can this be? Don't run!"

In a moment of thought,

A projection of his Primordial Spirit appeared in his mind.

The Thunder Emperor took decisive steps, wielding the Crimson Dragon Slash, and slashed with his sword!

Frost Ice Sword Domain-Sixth Layer!

After these years of cultivation, Levi's "Cold Ice Breath" was just one step away from the seventh layer's "Frost Barrier."

Chapter 1660: Reviving the Panda Qi Sect, one dragon awakens and all things are reborn!

With his current Level 6 strength, he was fully capable of mastering the seventh floor. He had only fallen behind in perfecting his combat techniques because he was busy with his breathing technique and pushing his soul to its limits.

Splash!

Billions of ice crystal particles swirled around the void, forcing out a Sixth-Circle Wizard who was trying to escape.

This was another use for the Ice Sword Domain that Levi had discovered.

It was similar to the luminescent tentacles of Dragon Ants, capable of disrupting Void Travel.

Seeing this, the wizard didn't dare continue the fight. He extended his hand, and a huge bubble emerged, enveloping the emperor.

On the emperor, the white Chaos Sword Energy was like a laser, piercing through the bubble.

Boom!

The bubble burst!

The explosion left the emperor's body trembling and slightly disoriented.

Even as a Cave Wizard, those beyond the sixth circle were not to be underestimated. Facing a powerful enemy, one could not afford carelessness.

Seizing this opportunity, the Cave Wizard tore open the void again, clearly attempting to flee.

Just then.

The emperor's essence's fingertips shone brightly as infinite spell power crazily poured into the "Flower Gaze" ring.

"Flower Language·Eternal Star!"

Billions of purple and white Star Flowers fell from the sky, completely sealing the heavens and earth!

This was a Wizard Tool created by the Flower Knight, who had asked someone to refine a Sixth-Ring high-grade wizard tool core, solidifying his innate spell. Its power was as if deployed by Hundred Flowers herself.

Now, the Cave Wizard was utterly out of options.

He realized in terror that no matter how hard he tried, he couldn't tear through the void. This was a suppression of strength.

The emperor, seeing this, burst forward.

Chaos Sword Energy swept across, tearing open the defensive field around the Cave Wizard.

Primordial Soul Witch Form·Sea Wolf!

A two-hundred-meter-long blue giant wolf emerged, blocking the Chaos Sword Energy.

The wizard sneered:

"Tear him apart!"

Since he couldn't escape, he decided on a battle to the death. As a primordial soul wizard, his dignity demanded nothing less.

A crescent-shaped Soul Artifact, along with the giant wolf, swirled and danced through the air, its killing intent fierce.

The emperor yanked downwards, and a white giant shield, as large as the South Heavenly Gate, appeared.

The crackling noises rang out.

The Soul Artifact collided with the Chaos Shield, sparking fires, cracking the shield, and the Soul Artifact was clearly also suffering.

Using the giant shield for cover, the emperor charged at the giant wolf.

The giant wolf spewed out an endless stream of water, binding the emperor. Innate spells surfaced one after the other, bombarding wildly as if they cost nothing.

This left the distant wizard panting heavily, sweating profusely.

With the giant shield shattered, the emperor's body wavered. He roared furiously, and a golden shield burst forth, striking the giant wolf's face.

Duang!

With a dull thud, the giant wolf's skull cracked, spell power began leaking, and the wizard form showed cracks.

Seeing this, the emperor held the shield in his left hand to block the bites, while his right hand's shark-tooth-shaped sword plunged into the giant wolf's belly, abruptly raising it up, the Great Sun bursting forth, like the Rising Sun!

The giant wolf was torn apart, disemboweled, and dissipated into nothingness.

Relying on the power of the divine weapon, the emperor's essence, not yet fully Level 6, brutally tore apart the Sixth-Circle Wizard's wizard form.

The crescent-shaped Soul Artifact flew through the air, the dense water elemental power forming into a kilometer-long blue blade light!

The emperor's shark-tooth-shaped sword swept horizontally!

Thunder Half Moon Slash!

The Chaos Sword Energy knocked away the crescent-shaped Soul Artifact.

Simultaneously, the emperor's finger pointed.

Chaos Forbidden Ruins!

The wizard immediately realized that his innate spell had weakened in power...

"He actually restricted my water elemental power? What kind of technique is this?"

Boom!

The hapless Cave Wizard was struck down by the Chaos Sword Energy, turned to dust, and his primordial soul dispersed...

On the other side.

The second Sixth-Circle Wizard was already being pummeled by Levi using a pair of "Flame Fists," defenseless.

Despite his innate spells, primordial soul wizard form, Soul Artifacts, and other techniques.

Levi's ordinary punch, paired with a golden light defensive field around his body, could counter each one.

Now, with the Soul Artifact shattered, spiritual force collapsed, wizard form disbanded, he was also completely drained.

Levi's fiery palm struck him down, and his primordial soul was crushed in his grip.

Under the laws of heaven and earth, the souls of these two Sixth-Circle Wizards gradually lost their luster in Levi's eyes, disappearing and heading to the Underworld.

"Pity, Leon is still asleep..."

Levi collected the spoils of war.

His habit was to let Leon also completely devour the souls, denying the enemies any chance of reincarnation.

In reality, after reincarnation, it was already a new lifeform, possibly a human or even a pig...

The Multidimensional Plane has its own set of operational rules.

If not for using Leon as a "bug," Levi wouldn't dare to easily upset this balance.

He looked around; on the battlefield, the dead Cave Wizards lay scattered, and the survivors had fled, leaving it desolate.

On the other side, a Level 6 Bearman had also killed a Cave Wizard.

He took a deep breath, calmed his state, and smiled:

"Thank you for your help. May I ask your esteemed name? We, the Panda Clan, are always grateful."

Levi smiled:

"You might not recognize me, but I've heard about you from a friend named Elena, who is also on her way here now."

Hearing this, the Holy Emperor was surprised, then his expression brightened.

"Indeed, someone as good as Miss Elena would only know other good people."

Levi sighed, the Panda Clan's perception was still somewhat naive.

In the Wizard World, there were no real good people to speak of.

He certainly couldn't bear the title of a good person either.

The Four Sons of the Qi Sect led other members of the Panda Clan, rushing over.

Levi said:

"We should not stay here long; let's find another place to have a detailed discussion."

The Holy Emperor nodded.

He looked behind him; a fully formed spatial passageway had abruptly appeared there.

"Ah, my homeland has already been discovered by those wizards."
