

Wizard 166

Chapter 166: Extraordinary Power! (2)

"If you refuse to obey, then I'm sorry. Next, I'll kill you, chop off your heads, peel off your skin, cut off your flesh, pull out your tendons, and pick out your bones..."

Levi was like a demon king, sneering at the two big guys.

Be it the Great Ice Ape King or Armored Mammoth, they were both wild and untamed beasts.

How could they be scared by Levi's casual threat?

Seeing they did not say anything, Levi was not in a hurry.

"Since that's the case, don't regret it."

"Anyway, I have the Wild Heart; I can tame you sooner or later. It is just a matter of time. This place is perfect for cultivation. No one will disturb you."

Levi decided to stay here for the time being. He wanted to use the Wild Heart to tame these two big guys, like how he tamed eagles.

Levi would return home the moment he finished taming them.

This bit of time was worth it to obtain their blood continuously.

Just like that, Levi began to live in seclusion in this uninhabited canyon.

He could have gone home now if not for these two giant beasts.

Levi took out the secret medicine of Ostrich Mountain. After consuming it, he began to cultivate. He had Demon Shark watch over these two big guys so that nothing would happen to them.

In the Month of Flowing Fire of the year 1011 of the Holy Brilliance Calendar, the two words 'Flowing Fire' had nothing to do with the northernmost land still covered in ice and snow.

Levi woke up from his cultivation.

After a month of cultivation, his Ostrich Mountain breathing technique was already at the fourth level.

He had the secret medicine and the accumulation of so many breathing techniques.

This breathing technique was not very difficult to cultivate.

[Ostrich Mountain Breathing Technique: Level 4 (1/20000), Special Effect: Beginner Strength]

However, after reaching level 4 of the Ostrich Mountain Breathing Technique, Levi had used up all the secret medicine he had stored up.

He had also been to Jackdaw City and Snow Capital City, but the black ostrich eggs were out of stock. Although this material was not as precious as Earth Dragon Blood, it was not easy to buy them.

Without secret medicine, the efficiency of practicing the Ostrich Mountain

Breathing Technique would be very low. He continued to practice the Black Snake, Giant Rhinoceros, and Siren Breathing Techniques that he had prepared many secret medicines for, and the Thunder Bird, Swift Dog, and Sandigo Breathing Techniques he had just obtained.

After spending a month together, the Great Ice Ape King and Armored

Mammoth's attitudes towards Levi had improved.

However, he was still quite far away from taming it.

Thankfully, Levi had Wild Heart. If it were anyone else, it would be impossible to tame these naturally powerful and unruly giant beasts unless they were raised from a young age.

Levi was not in a hurry. He continued to endure the pain.

What he lacked the least was time and patience.

Just like that, Levi went from the Month of Flowing Fire to the Month of

Furnance and then to the Month of Wheatfield.

Taming these Dowerful beasts was different from snow eagles.

That kind of ordinary wild beast was easy to tame. However, the two beasts he was currently dealing with were too tricky. Even if one had a Wild Heart, it was a tough job.

In the past two months, the attitude of the two big guys had been improving.

After all, Levi would provide them with abundant food every once in a while. The food provided was also more delicious than those offered by the tribes.

Any problem that could be solved with money was not a problem.

Levi fed them well.

Their spiritual energy, which Levi had injured, had also begun to recover.

Levi also loosened some of their shackles.

He did not dare to let go of them all at once, afraid that these two guys were acting and would run away once he let go.

"Continue to tame them. It won't affect my cultivation anyway."

In the past two months, Levi had already pushed the Swift Dog Breathing

Technique and Thunder Bird Breathing Technique to their limits. When the Siren Breathing Technique reached its limits, he would fuse it with them and use it as a breakthrough point.

The progress bar of the Black Snake Breathing Technique had also increased quite a bit. It was a sure thing that he would advance to level 9 before the end of next year.

The Giant Rhinoceros Breathing Technique was not far from breaking through to the peak of level 8.

Levi might as well continue to gain experience and wait for his Giant Rhinoceros Breathing Technique to reach level 8. Then, he would be able to achieve Transcendent Power. Levi could beat them into submission with his power even if these two big guys did not obey him.

Just like that, Levi went from the Month of Wheatfield to the Month of Harvest.

At the end of the Month of Harvest, Levi came out of his cultivation state.

With the limits of the Giant Rhinoceros Breathing Technique, he could feel that his body had begun to develop rapidly again in the past few months.

He had grown from 1.9 meters to 2 meters.

"D*mn it; I don't want to be so tall and strong."

Levi looked at his bulging muscles and exerted a little strength. His veins bulged, and black gas filled the air. He placed his hands on the ground and wielded more power.

Rumble!

With a loud bang, Levi cut off a large piece of ice and pulled out.

Levi quickly lifted the ice block that weighed several thousand kilograms and threw it out. The ice block was thrown far away and fell to the ground, turning into powder.

This action made the two big guys who were eating stop. They were shocked. They did not expect this human to use such a weak body to accomplish something that only big guys like them could do.

Levi panted slightly. He could lift such a heavy thing with his Top-tier Strength in the past, but now, he could do it much more quickly and even throw it out..
