

Wizard 167

Chapter 167: Extraordinary Power! (2)

This was the change brought about by Transcendent Power.

Levi opened his proficiency panel.

[Giant Rhinoceros Breathing Technique: Level 8 (Maximum), Special Effect:

Transcendent Power]

[Transcendent Power: Your power has already exceeded the maximum of mortals. You truly possess the strength of nine bulls and two tigers in the literal sense.]

Levi could feel the power filling his limbs and bones.

The power was so great that he was intoxicated.

He stretched his body and walked with imposing steps to the front of the two big guys.

"Now, have you thought it through?" Levi asked.

After more than three months of taming, it should be about time.

"If you've thought it through, I'll let you go."

Then, the Great Ice Ape King was the first to nod its head, like a chick pecking at rice.

Armored Mammoth also used its nose to show its submission.

Only then did Levi untie the shackles on the two big guys?

Levi would not hesitate to kill them if they still chose to escape and attack him.

However, it was clear that Levi's three months of taming had succeeded.

After being released, these two big guys stretched their muscles and bones slightly before lying on the ground to show their submission.

"Very good. Come home with me now."

Levi loosened his fist and jumped onto the back of Armored Mammoth. He then started to head back in the direction he came from.

The Wild Dog Knight did not see Levi for a long time. He left a message to Levi in the Shining Tavern, saying that he had already returned to the Emerald Kingdom.

Returning to the Emerald Kingdom from the Evernight Kingdom was relatively easy. Riding on Armored Mammoth, Levi returned home.

He had been out for too long this time, so he did not know how the territory was doing.

He missed his little shelter.

In the Month of Northern Wind of the year 1011 of the Holy Brilliance Calendar, Levi took various remote paths and returned to his Black Water Valley. After all, Armored Mammoth and the Great Ice Ape King were too shocking.

He had never heard of anyone taming such a ferocious beast.

Levi temporarily placed the two of them in the Montenegro Mountain Range.

The space in the castle was a little too challenging to keep them.

Moreover, that would scare the servants and soldiers inside to death.

Now that the two of them had been completely tamed by Levi, they would not run away. They also treated Li Wei as their master.

Levi sent a few trustworthy and courageous soldiers to care for these two big guys.

He named the Great Ice Ape King “Hapes” and the Armored Mammoth

“Hendry.”

In this way, the “Hen-Ha Two Generals” were formed.

Under Levi’s sugar-coated bullets, Hapes quickly fell.

It realized that following Levi was much more comfortable than being a totem in the Insai tribe. It did not have to worry about food and drink.

Hendry fell in love with this place.

The lack of food previously made wild beasts like them become intelligent and learn to cheat.

Now, he was living where he could eat as he pleased. Wasn't that beautiful?

Therefore, Levi took advantage of Habes being in a good mood.

Levi took out a basin of Frost Ape Blood.

A basin of Frost Ape Blood secret medicine should be enough for Levi to use for a week.

A week later, with Habes' physique and Levi's nutrition supplements, Levi could continue drawing blood without affecting it.

"Perfect."

Levi was in a good mood. He had finally solved the problem of cultivating the Giant Breathing Technique.

Now, only the Vortex Beast Breathing Technique was left.

After returning to the shelter, Levi began cultivating the Giant Breathing Technique.

At the same time, he also ordered different people to go to Icewind City and other cities to purchase black ostrich eggs in large quantities to be used to concoct the secret medicine of the Ostrich Mountain Breathing Mountain.

In the coming days, the Black Snake Breathing Technique, the Ostrich Mountain Breathing Technique, and the Giant Breathing Technique would all be Levi's focus.

Of course, the collection of shallow breathing techniques continued.

After all, if he wanted to evolve the cultivation technique to legendary quality in the future, he would need many shallow breathing techniques.

After returning to the country, Levi learned about the Royal Coalition Army's Northern Expedition outcomes.

The good news was that the alliance army had broken through Montenegro Mountain City.

The bad news was that the Duke of Montenegro was not in Montenegro Mountain City.

Other than a bunch of ignorant civilians, the Duke of Montenegro was nowhere to be seen.

Some people said that the Duke of Montenegro had fled with his family's wealth when he saw that victory was hopeless.

No matter what, the Royal Coalition Army had taken over Montenegro Mountain City.

"Where did the Duke of Montenegro go?"

"With his personality, he definitely wouldn't run away." "There's a high chance that he's plotting something big."

Levi did not care about this.

Anyway, it had nothing to do with him.

It would be fine if the Duke of Montenegro did not die too soon.

After all, his Black Snake Breathing Technique would reach level 9 next year.

At that time, he should be able to seek revenge from the Duke of Montenegro.

Levi had been waiting for this day for far too long.

He wanted to trample on the dignity of the Duke of Montenegro and crush him to death.

Not long after, the Duke of Montenegro appeared in the southern Tulip Hill.

He had personally brought a large army with him. Together with the Earl of Silversilk and the Earl of Blood, the Montenegro Mountain Army had conquered half of the entire southern territory.

Hearing that the Duke of Montenegro was still alive, Levi could not help but breathe a sigh of relief.

The tragedy of the Wild Boar Knight could no longer be repeated.

He had to send him to hell personally.

Of course, there were also the two rascals beside him.

As for the territory itself, Levi did not care much about it.

After obtaining Duke Bluefeather's wealth, money was not a problem for Levi.

The territory was a money-making tool, so whether they had it did not matter.

On the contrary, many troublesome things would follow if they took over the territory.

Before becoming a wizard, it was good to be able to live in a small place like Black Water Valley.

Time flew.

The war was still not over, which was good for Levi.

Outside the battlefield, Levi calmed down and focused on his cultivation.

In the first month of the year 1012 of the Holy Brilliance Calendar, with the help of secret medicine, the Giant Breathing Technique quickly reached level

4..
