

Wizard 170

Chapter 170: Level 9 Black Snake! (3)

Levi looked at the introduction of the Special Effect and could not help but smile bitterly.

"As expected, there's still no way to escape the curse?"

"If I want to become stronger, I must be inhumane?"

"A level 9 Black Snake only has black scales in the form of gas. From the looks of it, a level 10 Black Snake should have black scales in liquid form. A level 11 black snake should have the strongest black scales in the form of a solid. Why does it feel like the breathing technique is returning to its ancestor? Step by step, I'm getting closer to those legendary monsters..."

Levi pondered.

If there was no upper limit to the breathing technique, would he become...Black Snake with a Candle?

The Holy Snake of Salvation surrounded the world and illuminated all directions.

Levi was a man who wanted to become a wizard.

Why did it feel like he was running on the road to becoming a monster?

Levi did not know whether to laugh or cry.

He started to think. If the limit of the Black Snake Breathing Technique were to allow him to possess the scales of the Black Snake, then he would be able to use the Black Snake Breathing Technique.

Would the other breathing technique be the same?

He had many breathing techniques, but they still gave him an inhuman characteristic.

After the Siren Breathing Technique reached the limit of level 9, would he grow eight legs?

After the Man-Faced Spider's breathing technique reached the peak of level 9, would his entire body be covered in spider hair?

There was also the Giant breathing technique, the Blood Whale Breathing Technique...

As more breathing techniques reached their limits, would he eventually become a monster that did not look like anything?

"Whatever. As long as I can pursue power, everything is worth it."

Levi cleared his mind. He firmly believed that strength was the most important thing. For this reason, it was fine for him to become a bit inhuman.

This was not a monster but an ultimate creature!

It was a perfect form that was constantly evolving as life became stronger!

"The Black Snake Breathing Technique requires 7 points to break its limit.

Among the breathing techniques I had obtained from the Earl of Silver Mountain, a defensive breathing technique can be cultivated to the limit of level 4. I can cultivate it together during this period. However, I'm still lacking in defensive breathing techniques..."

"I'll take it slow. With the Black Snake Breathing Technique at the peak of level

9 and the other breathing techniques, my strength is no longer inferior to the Fist of the Empire. I should be the strongest grand knight below the legendary level, even better than ordinary top-notch grand knights."

"Next, it's time to settle the accounts."

"With my current strength, I can take revenge on the Duke of Montenegro."

Besides the Black Snake Breathing Technique, Levi's other main breathing techniques had also improved.

The Siren breathing technique was not far from breaking through to level 8, and Levi would soon be able to master Transcendent Speed.

The Giant Breathing Technique was also about to reach level 6. The effects of the secret medicine made from the blood of the Great Ice Ape King were far better. This allowed Levi to practice the Giant Breathing Technique much faster than he had imagined.

The only thing that was progressing slowly was the Vortex Beast Breathing Technique. Since it was no secret medicine, this breathing technique was still at level 4 after a long time.

The level 4 Vortex Beast Breathing Technique gave birth to the effect of strengthening Levi's body's recovery ability, disease resistance, poison resistance, and self-healing ability.

Unfortunately, the quality of the Special Effects was too low, and the effect was not too apparent to Levi. He was a top-tier grand knight. Hence this little bonus was not much.

After reaching the Advanced Waves, the Golden Cross Slash's cultivation was prolonged even with the proficiency panel.

If he did not have the proficiency panel, Levi might not have been able to reach the Advanced Waves realm even after he died.

"The next step is to break through the limits of the Black Snake Breathing Technique while improving the other types of breathing techniques to level 8 and above. I'll strive to obtain more Transcendent attributes. Although I've mastered Black Scale, Transcendent Power, Transcendent Endurance, and the Transcendent Speed I'm about to master, that's not enough. I still have

Transcendent Physique, Transcendent Perception, and so on, left."

Levi tidied up the shelter and used the Bag of Gluttony to pack everything he needed to bring.

"I must be fully prepared to seek revenge from the Duke of Montenegro. He is mysterious and powerful, so I can't be arrogant."

"The Book of Kungu that I obtained previously recorded the materials for the Sacred Blood Potion for healing. I've also prepared all of them. I can refine some to save my life."

Although the Sacred Blood Potion materials were expensive and difficult to obtain, money meant one could do whatever they wanted.

Levi did not lack money.

With his mighty financial power, he had already gathered the materials for the Sacred Blood Potion during this period.

Now, it was time to refine it.

Levi stayed in the shelter for a few days, quietly and patiently refining potions.

He had refined a total of 20 Sacred Blood Potions. The cost of these potions alone was a few thousand gold coins.

The Sacred Blood Potion could heal injuries quickly.

He could use the Sacred Blood Potion to speed up healing his wounds if injured.

After that, Levi refined and replenished several Man-Faced Spider series poisons.

After this refinement, Levi's proficiency in making potions increased by quite a bit. Only by constantly refining new brews could his proficiency continue to grow. In the future, if he had the time and energy, regardless of whether the potions in the Book of Kungu were helpful to Levi, he would refine some to push his skills to the limit.

Levi was currently in the shelter, preparing for his journey.

He was like an assassin sharpening his weapon before carrying out a hunting mission, polishing his equipment step by step.

He reforged Frostmourn into a pure Mithril sword. The material came from the Mithril chest. Under the meticulous polishing of his craftsman, a silver sword that shone with silver light appeared out of nowhere.

Ten years to sharpen a sword, but the frost blade had never been tested!

Levi had been forging this sword for ten years.

Levi had been preparing for this revenge operation for ten years.

When the sword was drawn, it would kill.

He thought, "That rascal Montenegro Mountain, I am Baron Black Snake..

Prepare to die!"
