

Wizard 1721

Chapter 1721: The Primordial Spirit and wizard forms unite, the nine dragons make their advent for the Emperor's tour!

Hundred Flowers also said with envy:

"I've been a level 6 lower-level for nearly three hundred years, and now I've even branded eight Witch Marks. Defeating the Black Shark is easy, but killing it and capturing its remains... difficult."

Triss said,

"Indeed, this battle managing to kill two Sixth Ring Senior dark wizards was somewhat beyond my expectations. If it weren't for the accident with Levi, those four could have left unscathed even if they couldn't defeat me. Now that the Immersed Ancient Castle has lost two primordial soul wizards, I bet they are regretting deeply."

"Although the Immersed Ancient Castle is a top-level dark wizard organization, the number of primordial souls they have on the surface is only about a dozen."

"Losing two of them can rightly be called a severe blow to their vitality."

"To recover, who knows how many years and months it will take."

Levi said,

"If they haven't left behind the Red Whale Ancestor Witch, they will surely think of ways to seek revenge. Ms., when you travel in the future, pay attention to your safety."

Triss said,

"Don't worry about me, there aren't many in the Endless Sea who have the strength to take me out silently. It's you two who need to be careful. Why don't you both stay at the Witch's Family afterward? With your strength and talent, Levi, I think the witch ancestor would definitely want to take you in."

Levi shook his head and said,

"I have a place in the human realm; I can't leave. Teacher, have you heard of the Ancient Dragon Continent?"

Triss said,

"I have heard of it."

Levi said,

"That's my territory, and Hundred Flowers also stays there permanently."

Triss said,

"If I remember correctly, that should be part of the New World. Isn't it under the supervision of the Wizard Council?"

Levi said,

"Strangely enough, my Ancient Dragon Continent is as usual, and no one from the council has come looking for me."

Upon hearing this, Triss pondered for a moment and then said,

"This is most likely the work of Senior Black Abyss. With the character of those people in the council, it's impossible for them to leave a new continent to someone like you, a loner... If you meet Ms. Lucy, you'll probably understand."

Hundred Flowers said,

"That makes sense. Apart from the Black Abyss Walker, no one else could keep your Ancient Dragon Continent safe."

Levi, thoughtful, said,

"Then I'll look for an opportunity to meet Ms. Lucy and thank Senior Black Abyss."

Before leaving, Triss gave Levi several Sixth Ring potion formulas and said with heartfelt emphasis,

"As a wizard's cultivation improves, one must not neglect Pharmacy. After acquiring the primordial soul, the Three Arts of Wizardry become even more important. Otherwise, always relying on others is not a long-term solution."

Hundred Flowers agreed deeply and said,

"That's true. I didn't learn the Three Arts, and to this day, I can only try to make more friends who are pharmacists and weapon craftsmen.

But now I'm not worried. With Master Fire Dragon for weapon-making, Levi for arrays, and Sister Triss for Pharmacy, as long as I keep you by my side forever."

Triss gave her a look and said,

"You better learn Pharmacy yourself, or you'll never have enough money, no matter how much you earn, just buying medicine every day."

Hundred Flowers laughed and said,

"Once I reach the seven-circle, I'll take Levi as my teacher and study Pharmacy seriously."

Elena and Levi left together.

Triss said with a lonely sigh,

"It's nice, a young couple together, just me alone, solitary and single."

But she and Anya had managed all these years as mother and child alone; she was used to it.

...

Endless Sea.

Somewhere in the Bottomless Abyss.

Bizarre and majestic ancient city structures stood here.

Immersed Ancient Castle.

The Red Whale Ancestor Witch and the Eight-Armed Demon Witch appeared.

From beneath the city came a hoarse and terrifying male voice.

"Graham, where is the Demon Dragon Whip?"

The Red Whale Ancestor Witch hastily bowed his head, speaking in a mix of fear and urgency,

"City Lord, the Demon Dragon Whip is still in Triss's hands."

The Eight-Armed Demon Witch didn't dare remain silent,

suppressing his anger, the City Lord said,

"So, not only did you fail to obtain the Demon Dragon Whip, but Black Shark and Black Ghost are also dead."

Red Whale tried to defend himself,

"My Lord, I have exerted all my efforts. However, we could not have foreseen that a mysterious strong person would emerge, altering the situation unexpectedly.

This person, as we analyzed afterward, is suspected to be the Golden Dominator, who had made a fleeting appearance in the past years.

He is a dual cultivator of body refinement and spell power, mastering multiple sect spells, leading us to underestimate his true capabilities."

Silence fell over the ancient city for a moment.

Then, a figure cloaked in black mist materialized, radiating the overwhelming presence of the eighth-circle level.

"The Golden Dominator? Is this person very formidable?"

The City Lord, who had been in seclusion for many years, had not heard of this individual.

Red Whale hurriedly explained, and the City Lord pondered,

"Interesting, I hadn't expected that the current Wizard World would give birth to such a character. If he doesn't die prematurely, on the side of the righteous wizards, another Grand Wizard will rise."

Seizing the moment, Red Whale quickly added,

"If My Lord is interested in him, I will definitely find a way to capture him and make up for my previous failure."

The City Lord said,

"The matter of the Demon Dragon Whip is not urgent for now, let it remain with Triss; it won't go missing. Given the current power dynamics, it's not convenient for us to make a move now. I shall retrieve it myself after the Blood Battle begins.

You and Glatios must find an opportunity to bring the Golden Dominator to me. With your Seven-Circle powers and Glatios's assistance, dealing with a Sixth-Circle Wizard shouldn't be a problem, right?"

"There's no possibility of failure!" declared Red Whale.

...

On the Ancient Dragon Continent,

After attending the thrilling birthday party of Triss, Levi continued his secluded cultivation in the Ancient Banyan Fairyland.

The spoils of the Black Shark Devourer were quite substantial.

Levi counted over 200 million Aether Stones, which boosted his reserves to a landmark of 1.1 billion.

He recalled the days when he hunted dark wizards for money.

"The familiar feeling has returned."

Now, relying on the Fire Dragon Shop and Gandalf Pharmacy, he could completely cover his normal cultivation expenses.

However, purchasing valuable items at an auction would require dipping into his own savings.

Moreover,

Among the Black Shark's spoils was his Soul Artifact, known as [Black Shark Scissors], of decent quality.

But Levi felt it was not as useful as the crucible from the Deceitful Poison Witch.

After taking inventory, Levi found the Soul Artifacts in his possession included:

Fei Meng Astrolabe, Viper's Kiss, Heart of Demon Beast, Thousand Poison Realm, Sky Sea Blade, Meteor Wand, Sea King Armor, and Black Shark Scissors.

"I'll use the Astrolabe, Thousand Poison Realm, and Heart of Demon Beast for myself, use the Sea King Armor to aid Gandalf in advancing to Purple Scale Armor, and the rest will be refined by the Holy Infant and then sold for money to support the household."

After reaching the primordial soul, wealth was quickly spent, so it was necessary to cut costs and find new sources of income.

The remaining spoils were mostly rank five and level 6 upper-level materials, which were also quite valuable.

Additionally, there were three Ocean Faction primordial soul spells:

[Netherworld Water Prison], [Thousand Merfolk Jumping Water], and [Merfolk Clothing Technique].

Levi had experienced the power of [Thousand Merfolk Jumping Water], which he found only mediocre... he had easily broken it using Golden Gravity.

Of the other two, [Merfolk Clothing Technique] was a general defensive spell.

[Netherworld Water Prison] was excellent, creating an enemy-trapping barrier and then drowning the enemy in black water that could absorb spell power and physical energy, making it worth learning.

Chapter 1722: Chaos erupts in the Land of Darkness, the Emperor Dragon's fierce power is unmatched!

Time flies.

Four years later.

In the year 1400 of the Holy Brilliance Calendar, the Month of Beginning, as the planar convergence deepened, the human realm experienced constant changes.

In the outer sea region, more and more new lands emerged.

Most of these continents were controlled by the Wizard Council.

Some, like the Ancient Dragon Continent, were coveted by significant figures and claimed as their own.

The wizard world would eventually have to return to the human realm, and the significant figures had started to lay out their plans in advance.

According to the observations of the "Eye of Sauron," the size of Nora World had visibly grown since the Great Convergence.

The Endless Sea.

The Star Tower, like a pillar of heaven, towered into the clouds. Various buildings and wizard towers orbited it, like stars surrounding the moon.

As the highest symbol of the Ocean School of Thought, all major administrative and law enforcement departments were concentrated here, working together.

The judicial institutions of the Star Tower were intricately divided, mainly into three parts:

The Law Enforcement Department, the Surveillance Department, and the Wizard Tribunal.

The Law Enforcement Department was responsible for apprehending criminals and gathering evidence, the Surveillance Department for overseeing the Law Enforcement Department and initiating prosecutions, and finally, the Wizard Tribunal centrally adjudicated and sentenced.

On this day,

In the upper levels of the Star Tower,

In the office of the Law Enforcement Department,

The Electric Eel Wizard had his legs propped up on the desk, reviewing documents.

Beside him was a secretary with fifth-circle strength, her figure voluptuous, her face flushed and sweaty in her black silk uniform.

She was slightly breathless, clearly having just gone through some intense work.

The Electric Eel Wizard seemed to remember something and asked,

"By the way, can you check when the wizard tool shop license for the Fire Dragon Shop expires?"

The secretary replied in a delicate voice,

"Sure."

The corner of the Electric Eel Wizard's mouth curved into a smile as he reached out and grabbed the secretary, saying with a laugh,

"You look like you haven't recovered yet."

The secretary coyly snorted and left the office, twisting her waist.

In her heart, she despised having to play along with these powerful figures. It was exhausting.

Despite feeling nothing, she had to pretend she was tired from work.

Soon, with the search results, the secretary smiled and said,

"Lord, the Fire Dragon Shop has ten years left on its license. Should I remind the person in charge to renew it at the relevant department?"

The Electric Eel Wizard waved his hand, signaling the secretary to leave.

In the Wizard World, opening shops for wizard tools, medicines, and various other commercial enterprises had two modes.

One was private stalls in various marketplaces, generally unregulated and overlooked by the Wizard Council.

The other was for large stores, which required a business license. They could operate only after verifying the appropriate qualifications.

The license was not permanent; it expired every hundred years, and a certain amount of Aether Stone had to be paid for renewal.

If a shop or its person-in-charge committed illegal acts, the license could be revoked.

The Electric Eel Wizard muttered,

"The person in charge of business registrations, if I remember correctly, should be the Six-Circle Perfect Wizard from the Hurricane Tower Family, 'Gale Messenger-Kulo.' I might bring some gifts and visit him one of these days..."

He squinted his eyes, deep in thought.

A few years ago, he had seen a recording from the Schubert Family showing the Master Fire Dragon repelling the Green Light Walker.

Currently, resolving the matter of the Master Fire Dragon through assassination seemed difficult.

After all, even mid-stage level 6 alien races were being chased and attacked by him.

Even for himself, he could not confidently claim he would surely defeat the Master Fire Dragon.

To deal with the Master Fire Dragon safely, one would need to hire an assassin with at least seventh-circle strength.

Apart from the terrifying organizations like the Mysterious Organization, which normal seventh-circle wizard would risk doing such dangerous work?

They were high above, why wouldn't they earn money in safer ways?

The Letney Family, being righteous wizards, couldn't personally enter the fray as many primordial soul wizards from their family were serving in the Star Tower.

If they failed to defeat the Master Fire Dragon and it was recorded, then spread widely in the Wizard World, their family's public image would collapse.

Even the significant figures of the Central Realm, considering their own interests, might not necessarily protect the Letney Family.

...

In Azer Continent,

In No.1 Witch City,

The Fire Dragon Shop had become the second-highest grossing wizard tool shop in Zone One of the inner sea region, with sales climbing steadily.

Every so often, the Fire Dragon Shop would hold promotional events, selling at a loss to shout for attention, striving to expand its influence as far as it could across the entire Endless Sea.

With the Endless Sea as a springboard, the shop aimed to leverage the entire Wizard World.

In the exclusive Weapon Refinement room of the Fire Dragon Shop, the Holy Infant was still busy.

Today, the Holy Infant Four Treasures—the Crimson Dragon Ring, Extreme Fire Wheel, Red Infant Sword, and Purgatory Nine Dragon Umbrella—had all become sixth-circle magical artifacts.

Among them, the Purgatory Nine Dragon Umbrella and the Red Infant Secret Sword were top-quality, while the other two were relatively ordinary.

Regarding the Fiery Flame Iron Armor, it was already a level 6 treasure and did not need upgrading.

The upgraded Extreme Fire Wheel, besides possessing the ability of Void Travel, could also, by spinning, release multiple fiery rings to attack enemies, truly an authentic "Wind Fire Wheel."

Over these years, the Holy Infant had significantly improved his weapon-making proficiency.

In his hands appeared an amethyst light sword, precisely the Amethyst Light Sword.

The Holy Infant took a small piece of level 6 purple crystal. Secret swords as wizard tools did not use up much material.

However, their functionality was singular, focusing on attack, with other features relatively lacking.

The only sixth-circle magical artifact the original persona had asked the Holy Infant to refine was this Amethyst Light Sword.

Among the other often-used fifth-circle top-grade wizard tools,

The "Fire Ouroboros" only required its Void Travel feature, and other functions were generally of no great importance. With the original persona's strength, there was no need to spend so many resources and time to upgrade it to a sixth circle.

Chapter 1723: Chaos erupts in the Land of Darkness, the Emperor Dragon's fierce power is unmatched!

"Book of the Undead," I, the Master, plan to personally go to Hell to refine it.

"Gargamel's Book of Seals," I, the Master, have no use for it, so I bestowed it upon Melina, the manager of the Giant Beast Paradise, to facilitate their capture of transcendent creatures for their work.

Moreover, given the knowledge of the Holy Infant on sealing arts, it is difficult to promote it.

Once Levi has studied "Eternal Star Abyss," perhaps he could grasp the knowledge of the sealing arts.

At that time, promoting the "Book of Seals" would be much easier in return.

"Bell of a Thousand Winds," I, the Master, barely use it, no need for promotion, it is now the treasure of the Tower of Dawn's exchange store.

The other fifth-circle top-grade Wizard Tools are each properly arranged with no waste.

Compared to promoting a fifth-circle Wizard Tool to a sixth-circle, it is quicker and more economical to modify someone else's Soul Artifact.

Just to promote his own four Wizard Tools, the Holy Infant has spent over a hundred million in addition to the resources stockpiled by the organization to purchase related materials.

Holy Infant waved his hand.

Thirteen scarlet scales flew out and landed in front of Ah Gu.

"Refine it."

After Ah Gu swallowed them, he spat them out and shook his head.

"Gu gu!"

Holy Infant furrowed his brows.

"It's impossible to refine; the quality of this blood scale is even higher than I imagined."

This blood scale was obtained after I, the Master, defeated the incarnation of the Venerable Blood Scales summoned by the Blood Demon Tower Master.

Back when I was in the fifth-circle realm because I couldn't refine it, I set it aside. Unexpectedly, now that I am in the sixth-circle realm, I still can't refine it.

This Venerable Blood Scales seems to be of a level 8 or higher existence.

Having no choice, the Holy Infant had to settle for other level 6 materials instead.

"After refining the Amethyst Light Sword, there's also Gandaph's Wizard Tool and the orders from a few Sixth-Circle Wizards..."

Life in this world,

Busy, busy, busy!

...

Ancient Dragon Continent.

Emperor's Palace.

Upon ascending to "primordial soul," Levi felt much less urgency.

Nowadays, life is a bit more leisurely than before becoming a "primordial soul."

Just like Hundred Flowers, Triss, and the others, he too, set aside one day every month.

Either to sleep, read, or enjoy nature.

A balance of work and rest is the true path.

If too tense, it's hard to sustain.

Of course, over these four years, he hasn't slackened in his cultivation.

Without meditation supplementary potions, four years of meditation increased his spiritual force by about 30 points.

This made Levi realize that post-"primordial soul," advancing bravely and making significant progress is indeed as difficult as ascending to heaven,

With his talent and the proficiency panel that rewarded effort proportionally.

On average, he could only increase about 8 points of spiritual force per year and it would take at least three hundred years to reach Sixth Circle Perfection.

For others, it would undeniably be even harder.

No wonder even Hundred Flowers, a three-century-old "primordial soul," is now nearly six hundred years old and still at Sixth Ring Senior without reaching Perfection.

Post-"primordial soul," each step forward is a major challenge.

Of course, Levi hasn't yet used any meditation supplementary potions.

If he had consistent and stable support from potions, he should be able to ensure an increase of about 10 points each year.

Moreover, if he could acquire rare items like Soul Stones and Truth Oddities, it would also help boost his spirit.

"Speaking of which, the batch of Soul Artifacts previously seized can also enhance a bit."

Thinking like this, Levi felt it wasn't so difficult any longer...

This year's last day is Hundred Flowers' 600th birthday.

These four years, Levi naturally didn't dare to idle.

He personally took to the field to refine Wizard Tools for Hundred Flowers.

Now the embryonic form is already complete, lacking only one material to finish.

That material is the level 6 "Water Element Dragon Eye."

He doesn't have this item, and even after inquiring in the Wizard World, he has yet to acquire it.

"It's time to start hunting the black beast, aiming to finish the ring before Hundred Flowers' birthday... If not possible, then I will request to postpone for a while from Hundred Flowers, waiting to give her a grand gift on her 666th birthday, which also has a nice symbolic meaning."

From what Levi observes of Hundred Flowers' usual demeanor, she seems not very concerned about whether or not he can give her a gift.

But Levi, being a man of his word, naturally cannot forget.

Moreover, even if Levi is straightforward, he knows women often say one thing but mean another.

...

Three days later.

Levi harvested the mature Nine-leaf Blood Flowers from the medicinal garden.

This hunt for the black beast isn't just to prepare a gift for Hundred Flowers.

It's also to provide food for the two gluttons, Ah Long and Dragon Ant.

At the same time, if he could see an appropriate Dragon King Whale, he could use a Crimson Contract to tame it and then slowly purify it for his own Bloodline Essence refinement.

Cultivation after the sixth-circle wizard is challenging, and knight's isn't any easier.

His cultivation of the Bloodline Breathing Technique has hit a bottleneck except with the Crimson Emperor Dragon and the Scarlet Dragon.

If waiting for Dragon Palace members to ascend, it would take an eternity.

Therefore, it's better to find a way to attract more "Dragon talents" to see the light and join the Dragon Palace.

After successfully controlling Diya Bo, Levi made him contract an Elemental Spirit Contract with him.

This way, he has freed another Crimson Contract slot.

With a total of 3 empty slots, he's set to make a good harvest.

Once the spy from Schubert's family completes his mission, another slot will be freed.

The Land of Darkness, immensely dangerous.

Chapter 1724: Battle erupts in the Land of Darkness, the ferocity of the Emperor Dragon unmatched!

These are the planes drawn here by Nora.

Some are very close to Nora, others farther away, with no discernible pattern.

These planes vanish upon approaching Nora's surface like moths to a flame, becoming part of it.

On his shoulder, the form of Little Leon appeared, holding a light disk in his chubby hand.

"Master, the memory fragments of the Black Witch have been recorded."

Levi put them away for the time being, to inspect later.

He petted Leon and said,

"Next, you can have a big feast."

After reaching level 6, Leon's appetite had skyrocketed.

Rank 5 souls were mere snacks now, while level 6 was the main course.

After devouring a level 6 soul, he no longer needed much time to digest it.

Levi couldn't imagine how many level 6 souls this fellow would need to consume to advance to level 7.

Leon said,

"Master, I want to fight alongside you."

Levi replied,

"Alright, but don't stray too far from me."

Leon nodded obediently.

Black beasts generally didn't appear near the Land of Darkness around Nora, as this area was regularly cleared by the Wizard Council, making it a relatively safe zone.

Levi rode on the slightly battered Fei Meng Astrolabe, transforming into a streak of light as he traveled through the Darkness.

Even a broken astrolabe was much faster than his body flying across.

The Land of Darkness was boundless, and Levi couldn't always use the Crimson Dimension to travel—that would be too draining and interfere with regular cultivation.

The Six-Ring Protection Array of the astrolabe was still intact.

With the barrier switched on, Levi could sit inside and cultivate while traveling, quite safely.

...

Three months later.

When Levi looked back, he could still see Nora, though it seemed much smaller.

"I wonder how far I've flown. According to Hundred Flowers, even from the Panda World, one can see the light that belongs to Nora."

It was Levi's first journey away from Nora, and on the whole, he found it quite novel.

Along the way, occasional black beasts attacked him, all of which were killed by Leon as food for Long.

During the trip, they also encountered a Level 6 Early Stage black beast lord.

Interested in testing Leon's strength, Levi let him handle it alone.

After a tough battle, Leon, through his own efforts, enjoyed his first meal of a level 6 soul on this trip.

For now, Leon's strength lay mainly in confronting souls, true souls, and the like. In other aspects, his combat power was fairly standard.

During the journey, Levi didn't come across any other wizard travelers.

In the infinite Darkness, solitude was the main theme.

Levi was alright with it; he had grown accustomed to solitude long ago.

He suddenly thought of Hundred Flowers with her lively and cheerful disposition, traveling through planes for nearly a century—poor girl.

Most of the time, Leon lay atop the astrolabe, sleeping.

Levi muttered,

"Right now, the speed of the astrolabe is still too slow. On the way back, I'll try to see how effective the Sky Dragon Breathing Technique 'Traveling the Void' is."

Traveling the Void.

According to the skill description, it was designed for long-distance plane travel.

Days later.

A fragment of a shattered plane floated in the Void, emanating an intermittent sense of danger.

Levi knew that there was a high probability of a black beast lord being in this area.

Generally speaking, where there was a lord, there was a black beast colony.

"This will do. Plus, with plane remnants as cover, my movements are more concealed, making it harder to be spotted by passing travelers."

Levi added Aether Stones to the astrolabe, switched on acceleration and concealment, and vanished without a trace.

In the Land of Darkness, distances that seemed close could still require some time to travel.

The next day.

Levi stowed away the Fei Meng Astrolabe and landed on a large plane remnant about a thousand kilometers in diameter.

Black beasts liked to hibernate on meteorites or plane remnants.

Levi took out a handful of Nine-leaf Blood Datura, crushing them into a powdery substance.

"Wind, come forth!"

In the Land of Darkness, home to many planes, there was also wind elemental power, known as "Boundless Wind," coming from the Void and returning to it.

Some winds were so powerful that even primordial soul wizards had to avoid them.

According to academic research, the Wind Disaster, one of the three disasters of the Endless Sea, might originate from the Land of Darkness.

With a wave of his sleeve, a wild wind carried the powdery substance bearing anomalies into the path of the Boundless Wind, the scent spreading throughout the Land of Darkness.

"Next, it's just a matter of waiting patiently, hoping for a good harvest."

...

Time passed.

In the blink of an eye, it was over one.

Particles of the Nine-leaf Blood Datura powder permeated this dark ruin.

"Roar!"

A dual-headed, four-winged giant tiger emerged from a corner of one of the plane remnants, its strength close to peak level 5.

A group of giant rats as large as elephants emerged from their hiding places.

Their greedy red eyes fixed on the source of the scent.

Scenes like this unfolded on a large scale in this area.

As time went on, the scent carried further by the Boundless Wind attracted more and more black beasts.

Inside one unremarkable plane remnant was a green palace.

Within the palace,

A powerful alien in a green robe opened his eyes.

Green electric snakes writhed around him, eerily, with even his hair being green.

This person was the Green Light Walker who, years before, had set out to assassinate the Master Fire Dragon.

A Level 6 Mid Stage alien, a "walker" of the Council of Ten Thousand Clans.

He roamed the Land of Darkness near Nora, always ready to penetrate Nora and assassinate enemies.

His brow furrowed as he muttered to himself,

"What's going on? Why have these black beasts suddenly become agitated?"

This place was his refuge, and he knew it better than anyone else.

Chapter 1725: Chaos erupts in the Land of Darkness, the Emperor Dragon's fierce power is unmatched!

This phenomenon was somewhat abnormal.

"Could it be that an enforcer from the Wizard Council has come to capture me? Impossible, I've already shaken off the pursuit."

Unable to figure it out, he transformed into a streak of green lightning, hiding within the body of one of the black beasts that looked like an old rat, intending to investigate further.

Several days later.

The Green Light Walker came to the edge of a plane remnant that had a diameter of a thousand miles.

All that met the eye were low-level black beasts of various kinds, covering the mountains and fields.

In the center of the remnants.

At the peak of the mountain.

A figure with his upper body bare, holding a giant halberd, was like a meat grinder, slicing every black beast that surged towards him in two.

Above his head floated a blood-red medicinal herb that emitted a strange fragrance.

Seeing this, the Green Light Walker understood.

"This person is actually luring and hunting black beasts in the Land of Darkness. He's really bold; if he attracts a powerful black beast lord, it would be no different than seeking death."

Even for a strong Level 6 Mid Stage warrior like the Green Light Walker, he would still avoid black beasts in the Land of Darkness.

There were simply too many of these creatures; they could never be killed off.

And their entire bodies were filled with the corrosive power of Darkness; killing them wasn't worth much. Of course, the bigwigs of the Council of Ten Thousand Clans had already started creating standardized Wizard Tools and rare treasures from the materials of black beasts for their members to use.

However, long-term use would still adversely affect one's mind and will.

Members of relatively high status like the Green Light Walker disdained their use.

"This person must be a body-refining wizard from the Wizard World. He seems strangely familiar to me."

After quietly capturing an image, he came to a quiet place and chanted an incantation.

In the Void, the figure of an ancient snake with many sounds appeared.

"What do you want?"

The Snake Envoy had an unfriendly expression.

The last time the Green Light Walker had failed to assassinate Master Fire Dragon, it made him start to question his life.

What kind of subordinates had the organization arranged for him?

How did this group achieve a record of complete losses?

They couldn't kill Master Fire Dragon, nor could they kill Gandaph. Now, both men had ascended to their primordial souls. Killing them would be much more difficult.

As a result, after consideration, the organization had temporarily given up on making a move against these two.

Everything would wait until the years of great turmoil after the Blood Battle began before settling scores!

The Green Light Walker showed the Snake Envoy the image.

The Snake Envoy's expression changed, saying,

"This man is the Golden Dominator. Where did you encounter him? With your strength, you might not be his match; do not act rashly and throw your life away for nothing."

The Green Light Walker said,

"No wonder he is the renowned Golden Dominator, the wizard who made Victor self-destruct his Demon Body to escape. He's now hunting black beasts in my usual territory and hasn't discovered my presence yet."

Hearing this,

The Snake Envoy pondered and said,

"Hunting black beasts? It seems he's using Nine-leaf Blood Datura, which is extremely precious and a specialty of the Purple Crystal World. How did he get it?"

The Green Light Walker said,

"I'm not sure... Lord, is the Golden Dominator on the organization's reward list? What are the rewards for killing him?"

The Snake Envoy said,

"The organization has just listed this person on the 'Kill List'; by submitting his head, you can receive a Level 7 Treasure bestowed by the organization."

The Green Light Walker's heart stirred.

"The head of the Golden Dominator is actually worth a Level 7 Treasure; even the organization's standardized treasures are incredibly impressive."

The Council of Ten Thousand Clans has two lists: the 'Killing List' and the 'Kill List.'

Each list is divided into different levels.

The 'Killing List' generally includes those who have a significant impact on the Council of Ten Thousand Clans or those who could quickly rise and become threats, like Master Fire Dragon, for example.

At Master Fire Dragon's Five-Ring Period, killing him would reward one with a Sixth-level Treasure.

Now that he has reached six circles, killing him would yield a Level 7 Treasure and the exceptional appointment of an 'emissary' position, with corresponding privileges.

This was a rich reward for the 'walkers.'

The rewards for the Kill List are secondary.

Seeing the Green Light Walker somewhat tempted, the Snake Envoy said,

"What, are you thinking of making a move?"

The Green Light Walker then shared his plan with the Snake Envoy.

Upon hearing it, the Snake Envoy laughed and said,

"That's also a plan, but still, be very careful."

The Snake Envoy's projection dispersed.

Above, terrifying roars of beasts echoed.

The Green Light Walker looked up; this was a giant elephant towering like a mountain, hundreds of meters tall, covered in heavy metallic armor with sharp spikes.

"Golden Armored Giant Elephant, a formidable being among the early Level 6, with immense power and impervious to sword and spear; this fellow has also arrived."

Being a regular resident of the area, the Green Light Walker was well familiar with it.

Golden Armored Giant Elephant.

Even he preferred not to provoke it.

It was a rare metal-based lifeform, with nearly no weaknesses.

"Just the Golden Armored Giant Elephant alone isn't enough to deal with the Golden Dominator. In that case, I'll bring you another... big surprise."

The Green Light Walker revealed a cruel smile. While roaming this region, he had seen a Level 6 Mid Stage sub-dragon, named the Snake King Dragon.

It was a mile long and coiled on a floating mountain in the Void, preying on unlucky passersby.

He had fought with the Snake King Dragon once and had fled, defeated.

"Tsk, tsk, tsk, Golden Dominator, I hope you'll appreciate this big gift I have for you!"

...

On the plane remnants.

More and more black beasts gathered.

With a wave of his hand, Levi commanded a thousand members of the Black Shadow Army to emerge. Like pitiless killing machines, they harvested the lives of the black beasts.

Chapter 1726: Chaos erupts in the Land of Darkness, the Emperor Dragon's fierce power is unmatched!

It's worth mentioning Levi's "Shadow Dragon Group" talent.

After reaching the sixth-circle, his upper limit had reached three thousand!

Now was a great opportunity to replenish his forces.

Three thousand from the Black Shadow Army, even though they were all level 4,

formed a combat array that was astonishingly powerful.

Not to mention, there were plenty of elite level 5 shadows within it.

In fact, if Levi used "Red Emperor Domain" or "Fire Dragon Tribulation" to kill the black beasts, he would achieve the highest efficiency.

But doing so would reduce the black beasts to ash, completely wasting their corpses.

Therefore, he chose to use cold weapons, attacking flesh-to-flesh, killing the black beasts while simultaneously honing his combat skills.

Currently, among the Barbarian King battle techniques he had learned,

he had cultivated the "Lion King Battle Technique" to the Perfection realm, achieving a level that even its creator could not surpass in his lifetime.

He was only short of reaching the seventh floor for the "Warlord Catalog" and "Eagle Divine Scripture."

He had long been struggling to comprehend the "Sacrifice Oneself for Righteousness" from the "Warlord Catalog," always falling just a bit short.

The "Roc Ascends to the Ninth Heaven" from the "Eagle Divine Scripture," however, was close to breaking through.

"Roar!"

Suddenly, with a thunderous roar like that of an elephant,

Levi's spirit was jolted.

"The Black Beast Lord has arrived!"

In the distance, a streak of golden light, like a meteor, rushed forward!

Boom!

Along its path, all black beasts were turned to dust!

The ground shook and the void trembled.

The golden light dissipated, revealing a mountainous giant elephant before him.

Its ferocious gaze fixed on Levi, its trunk spat out a beam.

A Sword Qi, condensed from the power of metal element, burst forth, crossing dozens of miles to reach Levi.

Levi ordered the Black Shadow Army to slaughter the low-level black beasts.

He himself soared into the sky, shattering the Sword Qi with a golden palm strike, and chuckled,

"Do black beasts practice the Flying Secret Sword Flow these days?"

A fine white line appeared on his palm, and fresh blood seeped out.

"Not bad power, I'll take that skin of yours!"

Bang!

Levi stepped into the void, the air roared, and he grasped his trident, instantly arriving in front of the Golden Armored Giant Elephant.

Boom!

The elephant's trunk, like a nine-section whip, collided with Levi's trident!

The shockwave spread, causing slight movements in the plane remnants underfoot.

The trunk, spewing blood, was cut off a section.

Only then did the Golden Armored Giant Elephant realize the strength of its opponent.

It roared, its trunk spinning up.

The power of golden element within a ten-mile radius was sucked into its trunk.

Bang!

Bang!

Bang!

A series of golden Sword Qi, like a fierce storm, attacked relentlessly, impossible to evade.

Levi swung his trident in a circle.

Golden Dragon Soaring Sky!

He smashed the sword energies, moving against the current, his whole being like a Shaolin Copper Man!

Boom!

His fist collided with the elephant's trunk!

The bones inside the trunk shattered inch by inch, directly smashed into the elephant's forehead by Levi.

His trident slashed horizontally, Red Emperor Dragon Domain unfolded, the elephant's runes flashed, and immense power burst forth.

The aura of the moon was drawn into his body.

Thunder Half-Moon, slash!

In the darkness of the Land of Darkness, Levi felt the power of this Thunder Half-Moon seemed stronger than in the plane!

Crack!

After one strike with the trident, half of the Golden Armored Giant Elephant's head was chopped off.

At the critical moment, it protected its vital parts with its large ears, like shields.

Just as Levi was about to press his attack, a sudden sense of danger alerted him.

Boom!

Golden Rock Armor layered his body, Turtle Shell Barrier emerged!

A fierce green lightning bolt suddenly struck from the void!

Two layers of defense barely blocked the lightning.

The remaining shockwaves blasted Levi into the mountain, causing rocks to tremble and dust to fly.

"Hiss!"

Accompanied by a hoarse roar, a super giant snake, a kilometer in length, came through the air.

It smelled the scent and headed straight for Levi.

Boom!

From within the mountain, a golden bright figure emerged. Levi looked solemnly at the kilometer-long snake.

"Snake King Dragon?"

Snake King Dragon.

An extremely powerful earth element sub-dragon species, because its bloodline originated from one of the top Legendary creatures, the "Snake Emperor Dragon."

This Snake King Dragon before him had already reached the mid-stage of level 6, Levi felt its aura was even stronger than that of the Heaven Crystal Dragon Ant.

"It's perfect for a contract, my Golden Brilliance Dragon Breath Technique's secret medicine solution is halfway achieved."

Seeing Levi, the Snake Emperor Dragon stopped chasing the Green Light Walker and broke through the air towards him.

At the same time, the injured Golden Armored Giant Elephant also attacked again, fury filling the sky.

Two immensely powerful black beast lords, one of them at the mid-stage of level 6, were formidable opponents that even a six-ring veteran wizard would flee from on sight.

The Snake King Dragon's long tail swept across, aiming at Levi, crushing mountains and barriers in its path like a demolishing force.

Levi swung his trident, shattering the Snake King Dragon's rock armor, revealing the scales underneath, slightly injuring it.

"Such strong defense."

Boom, boom!

He, like a human-shaped ferocious beast, wrapped his trident with golden gravity, cutting through the air!

A battle between one man and two beasts, earth-shattering, those low-level black beasts that entered the battlefield were directly shattered.

In the distance.

A giant rat's eyes shone green.

The Green Light Walker thought in shock,

"This Golden Dominator is stronger than I expected."

He hesitated for a moment, then decided to strike.

Otherwise, once the Golden Dominator dealt with the Snake King Dragon and the Golden Armored Giant Elephant, it would be difficult for him to kill the opponent.

Boom!

A gorgeous green lightning bolt tore through the darkness, striking directly at Levi's back.

"Die!"

The Green Light Walker sneered.

Now, the Golden Dominator, surrounded and besieged by him and the Snake King Dragon—both mid-stage level 6 powerhouses—along with the Golden Armored Giant Elephant.

Chapter 1727: Chaos erupts in the Land of Darkness, the Emperor Dragon's fierce power is unmatched!

This battle, it could only succeed.

Otherwise, if he escaped and was alerted, trying to kill him again would become even more difficult.

The Wind Disaster Pearl instantly appeared.

Undying Wind Armor surrounded!

Boom!

The Wind Armor trembled and then shattered, and the Green Thunder also vanished without a trace.

The Green Light Walker said,

"What a rare treasure, I'll take it! Green Thunder Bomb!"

With a sweep of his hands, round upon round of Green Thunder, like artillery shells, rained down from the sky, covering the sun and overwhelming the battlefield with an all-out assault!

Boom!

The green light illuminated the Land of Darkness.

The next moment.

A swath of nine-colored Divine Light expanded infinitely, pushing away the green light and illuminating heaven and earth.

Within the light, a pair of giant dragon wings that shaded the sun and nine swaying Dragon Heads with unparalleled majesty appeared!

The Nine-headed Emperor Dragon, a shocking arrival!

The Emperor Dragon's wings swept away the Snake King Dragon and the Golden Armored Giant Elephant.

Behind it, stood an emperor's ghostly figure radiant in amethyst light, holding the Emperor's Sword and standing upon the Chariot.

Levi chuckled and said,

"I wonder why this Green Thunder seemed so familiar... It turns out it was you."

This person.

Was none other than the assassin from the Mysterious Organization who initially attacked the Holy Infant.

It seemed he himself had now caught the attention of the Mysterious Organization's people, even being tracked to the Land of Darkness. He'd have to be cautious on future plane travels.

Actually, it was he who had ventured into someone else's home...

The Green Light Walker, seeing such an overwhelming wizard form, froze.

He wasn't a wizard, but he frequently dealt with wizard masters and had even killed a primordial soul wizard.

What kind of wizard form hadn't he seen?

Such a wizard form that emitted anomalies... he truly had never seen!

Now, with no choice but to proceed, his body swelled immensely, turning into a green giant made of lightning, pounding his chest like war drums, sending out waves of Green Thunder.

Just then,

From afar, two more black beast lords flew towards them, clearly also attracted by Levi's Nine-leaf Blood Thura.

One was a red flame giant mink resembling a ferret, two hundred meters long, radiating intense heat with eyes shooting flame rays, also targeting Levi.

The other, was a blue lobster nearly three hundred meters in length, possessed four spotlight-like eyes and wore an impenetrable shell.

Its head looked more like a giant dragon than that of a crustacean.

Levi was startled.

Another sub-dragon!

The Four-eyed Shrimp Dragon.

Don't be deceived by its shrimp-like appearance; it really was a sub-dragon, entirely different from the Giant Lobster Pixar he had captured in the Dark Ancient Tower.

"Excellent, the water-element and earth-element sub-dragons are all here, not a wasted trip!"

The Nine-headed Emperor Dragon, dragging the emperor, charged towards the Green Giant!

Boom!

The Green Giant was instantly blown away, vomiting green blood, yet he didn't panic and instead burst into laughter,

"Today you are essentially wing-clipped, four black beast lords, among them, two sub-dragons, heaven aids me, hahaha!"

After level 6, even for a genius, facing multiple adversaries was extremely difficult. Now with him included, five level 6 were laying siege to the Golden Dominator. The advantage was clearly on their side;

All he needed was to hold off the Golden Dominator, while those black beast lords enticed here would tear it to pieces. This was a classic case of playing with fire!

Levi internally criticized with calm,

"Di Di Fighting Skill!"

Space tore open.

Fairyland descended!

A host of powerful level 6 appeared.

Heaven Crystal Dragon Ant, Bloodsucking Demon Dragon, Black Lotus Beast!

They all emerged!

Mana and Martha Levi won't be a problem, it's not necessary.

The proud smile of the Green Light Walker froze instantly, and he exclaimed in horror,

"How...how is this possible? Wait, this Black Lotus Beast, looks familiar... Could it be the one from the Dark Ancient Tower?"

At first, he wasn't sure if this Black Lotus Beast came from the ancient tower.

But seeing the Bloodsucking Demon Dragon, which also appeared from the ancient tower,

Instantly, fear started to consume him, and he thought of a possibility.

"You...you are the Three-Headed Dragon Abomination!"

Levi smirked crookedly,

"You found out... Now die!"

Without needing instructions from Levi, the Level 6 Mid Stage Heaven Crystal Dragon Ant went straight for the Snake King Dragon.

Its battle spirit was overwhelming, born to fight the Dragon Clan!

The Black Lotus Beast targeted the Golden Armored Giant Elephant, and with its strength, dealing with an injured giant elephant was not a problem.

The Bloodsucking Demon Dragon spread its wings, and blood-red lightning chains flew out, battling fiercely against the Red Flame Giant Mink.

The white head of the Nine-headed Emperor Dragon roared towards the sky, thundering loudly!

On Earth, several mountain peaks rose from the ground, transforming into four Mountain Spirit Weapons of different shapes!

Two spirit weapons surrounded the Four-eyed Shrimp Dragon, while the other two assisted the Heaven Crystal Dragon Ant in taking down the Snake King Dragon.

These two sub-dragons, Levi intended to spare them for a contract.

In an instant,

Levi completely intercepted those four black beast lords.

He himself was meticulously battling the Green Light Walker.

The latter was dumbfounded.

"This..."

This damn thing still hitting a hammer, thinking it was fighting a lone wolf, but ended up poking a wolf pack.

Previously in the Wizard World, Levi was not convenient to use these generals, fearing revealing his identity.

Now in the Land of Darkness, he had no such fears. If they could fight as a group, there was no point in battling alone! [nøvel.com](http://novel.com)

At that moment,

The Emperor Dragon bit onto the limbs of the Green Giant, its neck tightly coiling around, rendering it immobile.

The emperor, holding a longsword, wildly hacked away!

In the special form fused with the primordial soul and wizard forms, it was utterly unreasonable—one wizard form equaling two uses.

From the moment Levi got serious,

The Green Light Walker, a Level 6 Mid Stage powerhouse, from start to finish, got suppressed without any power to fight back.

The Holy Infant, although talented and strong, was obviously far inferior to the original.

The Green Light Walker struggled desperately, his body exploding with Green Thunder, wanting to perish together with the Nine-headed Emperor Dragon.

But then, a white Chaos Shield appeared in the emperor's hand!

Duang!

The shield crushed the lightning, directly smashing it into the Green Giant's face, green blood splattering everywhere.

Torrents of fire dragons erupted, engulfing the Green Giant.

After the blaze, the body surface of the Green Giant turned into char, and the feeble voice of the Green Light Walker coldly chuckled:

"Killing me, so what? This Pan-Plane Great Tribulation, the Wizard World will also accompany me in death!"

Levi's palm, filled with the power of the Scarlet Dragon, surged into the Green Light Walker's body, attempting to contract him to extract some information about the Mysterious Organization.

A strong resistance fought against the power of the Scarlet Dragon.

"Let's die together!"

Thousands of green lights burst from the inside of the Green Giant, boom!

A shocking explosion swept across a ten-mile radius, utterly blasting all black beasts into nothingness.

A terrifying pit appeared on the ground, with Green Thunder clinging to it, gradually extinguishing.

As the dust settled,

The scarred yet unyielding Nine-headed Emperor Dragon stood in the pit.

Inside the emperor's body, Levi was unharmed.

The bewildered soul of the Green Light Walker attempted to escape towards the void but got entangled by a thread of silk.

Leon packaged the soul of the Green Light Walker, and Levi said,

"After returning, record this person's memory fragments onto a disc, I need to review them."

Chapter 1728: Entering the astral world, Traveling the Void, Celebrating the Growth of the Dragon King!

These years.

The Mysterious Organization had repeatedly attempted to assassinate the Holy Infant and Gandaph, and Levi had reached the limits of his patience.

He might not be able to shake its foundation or play chess with the true powers behind the scenes. But he had to find a way to cause them trouble, to make them suffer.

Now that he had advanced to the primordial soul, within this Multidimensional Plane, he had the power to protect himself; there was no need to overly constrain himself.

In the future, as long as his strength permitted, he would take revenge without delay.

Otherwise, the regrets of the Wild Boar Knight might play out once again.

After dealing with the Green Light Walker, Levi looked towards the other battlefields.

The Black Lotus Beast had already twisted off the head of the Golden Armored Giant Elephant.

But on its mountain-like body, there were also hideous traces of Sword Qi cuts, exposing flesh and bone.

The ferocity of the Golden Armored Giant Elephant was evident.

There was no need to capture the giant elephant alive; killing it was enough. The Black Lotus Beast, having dealt with the giant elephant, was still eager for more and wanted to take on the Snake King Dragon, but Levi stopped it.

"You go back to the Ancient Banyan Fairyland to heal."

The power of the Death Ember Dragon emerged, healing the external injuries of the Black Lotus Beast, stopping the bleeding.

The Black Lotus Beast felt a warmth in its heart.

"Thank you, Lord Dragon King, for your concern!"

One might ask,

what kind of organization leader, like Levi, would personally stop bleeding and heal injuries for their members?

Seeing the Black Lotus Beast return home,

Levi murmured in his heart.

"From now on, it's better to keep the sub-dragons from participating in battle; it always feels somewhat heartbreaking."

The most intense battle, without doubt, was between the Snake King Dragon and the Dragon Ant.

The Snake King Dragon, immensely strong and covered in heavy stone armor, could even summon meteorites, earthquakes, and mountain collapses—attacks resembling natural disasters, like a world-ending giant beast!

The newly elevated Dragon Ant was indeed no match for it.

Fortunately, with the aid of two Mountain Spirit Weapons, they were now suppressing the Snake King Dragon, crushing its heavy armor and biting towards its most vulnerable spot.

The Snake King Dragon, unwilling to show weakness, was huge; a sway of its tail could blast the Dragon Ant away.

The Spirit Weapons, covered in cracks, clearly couldn't hold on much longer.

Levi, intending to train the Dragon Ant, did not lend a hand to help.

He turned and headed towards the battlefield of the Four-eyed Shrimp Dragon, where the two Spiritual Weapons were in a deadlock with this creature, neither side able to gain the upper hand.

Levi stepped forward, arriving with a force like mountains shaking the ground, landing on the head of the Four-eyed Shrimp Dragon.

His fists, as big as sandbags, fell with a surrounding aura of golden light and swirling red flames.

Against such Earth-type mixed-blood dragon clans, no need for words—just cripple them directly and use Crimson Enslavement; ordinary Dragon’s Might couldn’t subdue them.

Bang!

Bang!

Bang!

Three earth-shattering impacts echoed across the Land of Darkness.

The two Spiritual Weapons aided Levi in pinning down the Four-eyed Lobster, pressing it to the ground.

Levi, like Wu Song fighting the tiger, turned his fists into blurs, striking directly at the brain of the lobster.

Crack.

Unknowingly,

the hard shell on the head of the Four-eyed Shrimp Dragon was smashed by Levi, juice splattering everywhere.

For such a high-level transcendent dragon clan, such a severe injury wasn't deadly!

The struggle of the Four-eyed Shrimp Dragon grew weaker.

Seizing this opportunity, Levi injected the power of the Scarlet Dragon into its body.

Unlike with the Green Light Walker, this time he easily contracted it, with thoughts of brutal submission flooding into Levi's mind.

Levi waved his hand, and the two Mountain Spirit Weapons went to assist the Bloodsucking Demon Dragon in subduing the Red Flame Giant Mink.

"Although this Red Flame Giant Mink isn't from the pure-blooded Dragon Clan, its fur is extremely suitable for refining Sixth-level Fire Divine Talismans... I wonder if the fur can grow back after being skinned?"

Levi decided to conduct an experiment.

He would subdue the Red Flame Giant Mink, then periodically take small patches of fur, letting the Holy Infant craft Sixth-level Fire Dragon Tribulation God Talismans.

If it could grow back in the future, then the Holy Infant, when crafting level 6 divine talismans in the future, would have an endless supply of material—like harvesting leeks without end.

Divine Talismans rely on numbers to win, and the material consumption is tremendous.

The Divine Talisman Dao is most lacking in high-quality talisman crafting materials, especially those above level 6.

Mink Skin is the best material for crafting talismans, followed by other skins like wolf and rat.

So, occupying a Crimson Enslavement slot with the giant mink is not a waste.

Once he successfully purifies the Snake King Dragon and Four-eyed Shrimp Dragon, he can free up two contract slots.

Besides, after purifying the Red Flame Giant Mink, it could also be tamed.

These black beasts are just temporarily occupying contract slots.

With the two Spiritual Weapons assisting, the Bloodsucking Demon Dragon was overjoyed. It quickly let the Spiritual Weapons go forward to block damage, while it itself kept stealthily using the Lightning Whip.

Finally, the Red Flame Giant Mink, panting heavily, lay on the ground, unable to rise again.

Levi took this opportunity to contract it. With this, only the massive Snake King Dragon remained uncaught.

Cracks covered its body, penetrating to the marrow, causing excruciating pain, but the ferocious creature showed no fear.

Two more Spiritual Weapons joined the battlefield, and together with the Dragon Ant, they effortlessly subdued the invincible Snake King Dragon.

The dragon's head weakly fell to the ground, completely devoid of strength. Levi easily contracted it.

Looking around, the diameter of this thousand-mile plane was riddled with holes.

Mountains had collapsed, and ravines crisscrossed; such was the power of a level 6 battle.

Levi sent the newly contracted three giant beasts into the Ancient Banyan Fairyland.

Among the members of the Dragon Palace, it caused a huge uproar.

Especially the Snake King Dragon, a kilometer long; even now, barely alive and lying there, its ferocity deterred everyone from approaching.

"Sss... such a huge, thick snake!"

"This isn't just a snake; it's from the Dragon Clan, only it looks like a snake."

"So powerful, such an entity has been subdued by Lord Dragon King."

Chapter 1729: Entering the astral world, Traveling the Void, Celebrating the Growth of the Dragon King!

"The Ant General himself took the field to handle it, a mighty General indeed!"

And then there's the Four-eyed Shrimp Dragon, peculiar in appearance but still part of the Dragon Clan, drawing gasps of wonder from Mana and the others.

However, on the head of this shrimp dragon, clearly, there are four eye sockets, but only three eyes. The remaining one, missing without a trace...

Finally, the Red Flame Giant Mink, after arriving at the Ancient Banyan Fairyland, shrank in size and turned into a normal little mink.

It scampered onto Mana's back in a flash, assuming a docile appearance with its eyes rolling around.

After the Crimson Enslavement temporarily suppressed its violence, it seemed even smarter.

Mana exclaimed,

"What a cute little guy, it's a pity he's been corrupted by darkness... Can Levi purify him?"

She caressed the glossy fur of the Red Flame Mink, unable to let go.

Levi smiled and said,

"No problem."

For now, the Holy Infant has yet to reach the Sixth Level of Talisman Making, so let's allow this fellow to enjoy himself for a while.

After settling the three new members, Levi returned to the Land of Darkness to continue hunting black beasts.

In his hand appeared a blue bead, and Levi smiled,

"An eye of a sub-dragon of water-element in hand... Speaking of which, I wonder if the shrimp dragon's eye can grow back, if so, it would be a fine chive. But let's leave it be, I, Levi, am not such a villain after all."

Levi's main purpose of this trip had been accomplished.

Aside from the variable of the Green Light Walker, everything else went smoothly, and it could be said that all his wishes came true.

It's unknown if it's the effect of the Lovers Rune.

After hunting black beasts in this place for three more days, until their scent dispersed and the black beasts no longer surged forward, Levi was fully satisfied.

After these days of slaughter and practice, Levi's "Eagle Divine Scripture" had also entered the seventh floor realm of "Roc Ascends to the Ninth Heaven."

With a single leap, he shot up into the air like a streak of blue light, soaring straight into the Nine Heavens and disappearing from sight.

Accompanied by a sky-piercing, stone-shattering eagle's cry, a dazzling Sword Qi from beyond the Nine Heavens, slashed across heaven and earth!

Boom!

The glorious might shattered the Darkness!

On the broken remnants of the plane, a Sword Qi ravine that stretched for twenty miles was plowed, bottomless to the eye!

Levi emerged from the Void, marveling,

"Quite the power, this move retreats in order to advance, launching a surprise attack from the Void, unstoppable."

Now, the only concern troubling Levi was the "Sacrifice Oneself for Righteousness" move from the "Warlord Catalog."

Levi cleared the battlefield and started his journey back home.

"Now that I have experimented with the Fei Meng Astrolabe on my way here, let's try 'Traveling the Void' on my return."

Within Levi, the Sky Dragon Seed shone brightly, and streams of Wind Thunder Power snaked and vanished throughout his body.

Around Levi, a strange defensive field began to form.

Boom!

He transformed, turning into a sacred Sky Dragon with a dragon's body and eagle's claws, adorned with pure white feathers.

The Sky Dragon flapped its wings and transformed into a bolt of white lightning, diving into the Void.

When Levi opened his eyes again, he found himself in an endless, endless sea of stars.

According to the panel's description of "Traveling the Void,"

The power of the Sky Dragon would take Levi to a place called the "Sea of Ruins," from where he could travel through the Multidimensional Plane swiftly.

Some powerful beings from the Multidimensional Plane used this method.

Before Levi, a map emerged, seeming to come from the power of Maya, the legendary divine bird.

It is said that Maya, this legendary bird of legend, travels through planes all its life, never ceasing, never touching the ground.

It has probably visited more places than the Legendary Wizard.

On the sandy map before Levi, there were thousands of points like stars.

There was also a constantly moving green light, representing his own coordinates.

He sent his thoughts into the largest of the light points.

Boom!

In an instant, his consciousness arrived at a familiar place. .c

Endless Sea, Midland Continent, human realm... Majestic sights flashed by like a slideshow.

Levi could hardly believe his thoughts,

"Nora... It's actually Nora, this map, it's a map of the Sauron Plane. No, it might even be bigger than the Sauron Plane!"

Because Levi also saw several planes whose sizes were not much smaller than Nora's.

Among them, one shone with golden light.

His consciousness entered it.

Boom!

When he opened his eyes.

He seemed to see a super giant tree spanning the stardust, comparable to the Dark Ancient Tower in size.

Its trunk and leaves appeared to be made of gold, dazzlingly Divine Light shining so brightly it was hard to look at directly!

He quickly withdrew his consciousness, knowing where this was.

"The Golden Sacred Realm... the homeland of the Golden Absolutes Race."

In the Ancient Banyan Fairyland, one of the Golden Absolutes Race was imprisoned.

Levi had also subdued it with the Crimson Enslavement but did not get much useful information.

These beings born from the Golden Holy Tree act with a burning loyalty to the Sacred Tree and are bound by strong restrictions, making it difficult to obtain information.

Therefore, Levi continued to keep it detained in the fairyland, to be dealt with later.

He had not expected that the Golden Sacred Realm would be on this map.

Next, he saw a medium-sized purple light point, which was probably the Purple Crystal World.

Many of the large planes that Levi knew of could be found on this map, and all of them could be reached through "Traveling the Void."

The further the distance, the longer it would take. Ultimately, his current realm was not high enough to travel swiftly.

"Never mind the Golden Sacred Realm, even the Purple Crystal World is not a place I can currently step into. If I went there, I would most likely be discovered by the Amethyst Saint and crushed with a flick of their finger—a fearsome individual who can fight Gods without falling."

Chapter 1730: Entering the astral world, Traveling the Void, the Dragon King's Birthday Growth!

From the size of the world, one can preliminarily discern the number of powerhouses within.

For instance, the Golden Sacred Realm appears larger than Nora as it currently stands.

Of course, this is because many places in Nora are folded into sub-dimensional portals.

If all the sub-dimensional portals were fully restored, Nora's volume could increase countless times.

"Let's go home. In the future, when time permits, we can Travel the Void and visit some mid to small-sized planes not too far away, collect some resources, fight some monsters—it'll be fun."

In the Sea of Ruins.

Levi curiously surveyed this magical place.

Three days later.

While sailing through the Sea of Ruins, Levi suddenly felt a vast shadow gliding across the sky.

An overwhelming presence descended, like the Sun itself.

He looked up and witnessed a scene he would never forget.

A stretch of black land, too lengthy to be fully encompassed by his gaze, passed overhead.

A resonant Whale Song echoed through the Sea of Ruins, lonely and majestic.

On either side of the landmass, two smaller continents flapped, stirring up endless waves of the Sea of Ruins into the clouds.

Only after the landmass had drifted far away did Levi realize, this was not any landmass at all... it was a Giant Whale.

On its back, he faintly saw a thriving nation, with cities laid out like stars in a sky.

Levi was profoundly moved.

"This... this is the Swimming Dark Whale, the Clan Emblem of the duke's family! Such a Legendary Creature is here, but wait, what place is this Sea of Ruins that harbors such beings?"

Legend had it that the Swimming Dark Whale was gentle and posed no significant danger if not provoked.

But an encounter with such a creature could inadvertently crush Levi, leaving him without recourse.

"It must simply be passing by."

Plucking up his courage, Levi continued to Travel the Void in the Sea of Ruins for another two days with no danger befalling him.

During this time, he also saw some creatures of considerable strength, possibly Level 7 or Level 8, roaming the area.

These creatures did not disturb one another. It was as if they were in the same world, yet existing in separate dimensions.

This gave Levi a measure of comfort. Based on his observations and analysis.

The Multidimensional Plane must have several unique beings like the "Swimming Dark Whale" and "Maya," all with the ability to traverse the Sea of Ruins on inter-plane journeys. Some powerful wizards might be capable of this as well.

The Sea of Ruins seemed to mirror the entire Multidimensional Plane.

Traveling through here was like crossing the stars, shrinking the distance between planes. [nøvel.com](http://novel.com)

Each traveler through the Sea of Ruins possessed their own exclusive dimension.

These diverse voyagers could see each other but not physically interact.

Of course, it wasn't out of the question that a powerful being could break this barrier and attack.

All in all, traveling the Sea of Ruins did come with certain risks.

On the tenth day,

Levi had a thought, and the sand tray materialized.

The green dot representing him had almost touched the white dot representing Nora.

"The thrilling journey is finally coming to an end... For short-distance travel, I'll stick to the Fei Meng Astrolabe in the future. My heart can't take much more of this. Of course, the ability to Travel the Void is quite useful for saving my life at crucial moments. It's obviously much faster than entering the Ashen World."

Levi pondered the utility of this ability.

He had Traveled the Void in the Sea of Ruins for ten days. On the sand tray, it was merely a finger's width... He gauged the distance from Nora to the Golden Sacred Realm and despaired.

"It's too far. With my current strength, even if I travel continuously through the Sea of Ruins until I die of old age, I might never reach the Golden Sacred Realm..."

At this moment, Levi gained a new appreciation for the vastness of the Multidimensional Plane.

Of course, once he advanced further with the Sky Dragon Breathing Technique, his Traveling speed should become much quicker.

For now, Levi's ability to journey through planes via the Sea of Ruins was ten times faster than using the astrolabe to travel through the Land of Darkness.

Just before leaving the Sea of Ruins, Levi's eyes narrowed.

Far ahead, at an indeterminate distance, he saw an ashen-white skull like a small asteroid.

It had six eye sockets and ridged forehead, but beyond that, it wasn't much different from an ordinary human skull.

On the skull, Levi saw numerous gnaw marks.

"The owner of this skull has died, yet it still exudes a terrifying aura... it feels stronger than the Swimming Dark Whale; could it have been a Mythical Creature, or perhaps... a God?"

A skull as solid as a star, yet now scarred and riddled with insect bites.

What kind of terrifying existence could be in the Sea of Ruins?

Bearing his questions,

Levi left the state of Traveling the Void and in an instant, returned to the Land of Darkness. His mood remained unsettled for a long time.

During his ten-day journey through the Sea of Ruins, he had seen too many previously unimaginable things and powerful beings.

"The Sea of Ruins is most likely related to the astral world."

Only the main Spirit World, formed by the beliefs and spirits of all living beings, could boast such a majestic and potent existence.

And only the astral world could be reflected through the Multidimensional Plane.

This allowed the Heavenly Father to establish places of worship in different regions of the Multidimensional Plane.

After flying for a while, Levi entered Nora and returned to the Ancient Dragon Continent. There was more than half a year remaining, more than enough time for him to craft the gift for Hundred Flowers.

...

In the Land of Darkness.
