

Wizard 193

Chapter 193: Red Lotus Form! (2)

Of course, he had only just stepped into the realm of a low-level wizard.

He was still a low-level wizard apprentice who hadn't even mastered a single Zero-Ring Cantrip.

Levi—

[Deep Sea Meditation Art: Level 1 (1/1000)]

"No matter what, I can now call myself Wizard Levi in the future," Levi thought with delight.

After spending thirteen years in this world, he had finally set foot on the path of becoming a wizard. It was a promising beginning.

Levi summoned Tuten.

"Now that I have mastered Meditation Art and become a low-level wizard apprentice, do you have any spell models for cantrips? Give me around eight to ten," Levi requested.

Tuten shook his head with a bitter smile. "A low-level wizard apprentice can only master up to three Zero-Ring Cantrips, and unfortunately, I don't have any spell models here. In general, spell models can only be obtained in the Realm of the Unbelievers, and you would need to visit each school and pay a price for them, an equivalent exchange."

"Spell models are the core patents of each school and are not randomly shared. It's also rare for them to appear in the human world. For now, focus on cultivating the Meditation Art and strengthening your spiritual power. You can delve into spells later once you have laid a solid foundation." Tuten advised.

"What? No spell models at all?" Levi furrowed his brows.

Tuten shrugged. "None at all, I'm afraid."

"Since there are no spell models available, I'll concentrate on mastering the Meditation Art and hurry to find the Realm of the Unbelievers." Levi sighed inwardly.

Over the past year, aside from breaking through in the Meditation Art, Levi had made significant progress in his other skills as well.

Levi—

[Black Snake Breathing Technique: Level 9 (Maximum, breakthrough available.

Current progress: 1/7). Special Effect: Black Scale (Gas)]

[Blood Whale Breathing Technique: Level 8 (Maximum). Special Effect:

Transcendent Endurance]

[Giant Rhinoceros Breathing Technique: Level 8 (Maximum, breakthrough available). Special Effect: Transcendent Power]

[Siren Breathing Technique: Level 8 (Maximum, breakthrough available). Special Effect: Transcendent Speed, Bone Shrinking Transformation]

[Giant Breathing Technique: Level 8 (145/100000). Special Effect:

Transcendent Power]"

[Ostrich Mountain Breathing Technique: Level 7 (23367/50000). Special Effect:

Top-tier Strength]

[Blood Beast Breathing Technique: Level 7 (1245/50000). Special Effect: Top-tier Speed]

[Thunder Wolf Breathing Technique: Level 7 (Maximum, breakthrough available). Special Effect: Top-tier Speed]

[Red Lotus Breathing Technique: Level 7 (288/50000). Special Effect: Top-tier Strength, Red Lotus Blood]

[Elephant Turtle Breathing Technique: Level 7 (467/50000). Special Effect:

Top-tier Defense]

[Vortex Beast Breathing Technique: Level 3 (3567/10000)

With the assistance of the Great Ice Ape King's blood, the Giant Breathing Technique successfully broke through to the eighth level, giving birth to a new Transcendent Power.

Given some time, this breathing technique would reach its maximum potential. Levi wanted to see what changes would occur once the Giant Breathing Technique reached its Maximum.

As for the Thunder Wolf Breathing Technique, it was a level 7 speed-oriented breathing technique that Levi had already practiced to its limit.

Cultivating this third -rate breathing technique of excellent quality posed no difficulty for him.

Initially, Levi planned to use the Thunder Wolf Breathing Technique to surpass the limits of the Siren Breathing Technique.

However, after obtaining the better Blood Beast Breathing Technique, which could be cultivated to the ninth level, he decided to hold onto it and use it to surpass the limits of the Blood Beast Breathing Technique.

The speed of the blood beasts was much stronger than that of the siren, similar to the Pale Shadow's breathing technique.

It's just that the Earl of Blood, as a practitioner, wasn't very skilled and didn't fully demonstrate the power of the blood beasts.

However, this could be Levi's main speed-oriented breathing technique in the future.

In addition, the Elephant Turtle, Ostrich Mountain, and Red Lotus Breathing Techniques had all been cultivated to level 7.

Before the seventh level, the proficiency required for a breakthrough wasn't much, and for the current Levi, cultivation was progressing quickly.

Once the Elephant Turtle Breathing Technique reached the limit of the ninth level, he could merge it with the Black Snake Breathing Technique and help the Black Snake break through its limit, charging toward the peak of the tenth level.

Although the defense provided by the gaseous Black Scale was very strong, it was still far inferior to the liquid Black Scale.

With the Black Snake Breathing Technique at the peak of the tenth level, Levi would be able to face powerful opponents like the Duke of Montenegro with greater confidence.

And when the Black Snake Breathing Technique reached the peak of the eleventh level, it would likely reach the legendary level.

At that time, the Black Gas could transform into solid Black Scales, making Levi akin to a real invulnerable Black Snake, covered in impenetrable scales.

Among these breathing techniques, the Red Lotus Breathing Technique was the only one that was more unique and special.

This breathing technique had a new special effect after the fourth level, Red Lotus Blood.

"Red Lotus Blood: You can burn and heat your blood for a short period, thereby gaining all-around enhancement of your physical qualities, including strength, explosiveness, speed, endurance, defense, and perception. This special effect cannot be upgraded, but it will slightly improve with the advancement of your realm. After using the Red Lotus Blood, there will be a recovery period during which it cannot be used again. Otherwise, it may cause a decline in cultivation or even more severe life-threatening damage to the body's foundation!"

This Red Lotus Blood was similar to the Siren Breathing Technique's "Bone Shrinking Transformation" and the Man-Faced Spider Breathing Technique's "Spider Sensing". They were all extremely rare second special effects.

Most breathing techniques, such as the Black Snake, had only one special effect. The higher the quality, the higher the upper limit of the Special Effect.

Breathing techniques with a second Special Effect were something that could only be found by chance.

Levi had learned so many breathing techniques, but he had only come across three with a second special effect.

The second special effect could not be leveled up. It could only slightly improve with the increase in the realm.

But there was no doubt.

Red Lotus Blood was an extremely powerful special effect..
