

Wizard 1931

Chapter 1931: Decomposition Technique! The Mystery of Sauron!

Next, on one hand, Levi needs to focus on promoting the Scarlet Dragon to obtain more slots. On the other hand, Levi has to find a way to release some slots.

The Evil Spirit Monarch is easy to handle. After Levi reaches the seven-circle level, he can use the School of Death's Contract Magic to enslave it.

When Levi returns, he plans to replace Isa's Crimson Enslavement with Excalibur.

In plain terms, Levi is simply worried that Isa might accidentally spill the beans about the bad deeds he did previously, affecting his personal image.

However, more than three hundred years have passed, and those times are long gone; Levi himself is not the same as he once was.

This concern, compared to the value of the slots of Crimson Enslavement, is hardly worth mentioning.

Besides, with the binding of the Oath Sword, unless Isa wishes to die, she likely wouldn't spill the beans.

"I am still too kind... Some wizards would just kill and be done with it. Why bother with all this trouble?"

The Mind Flayers and the succubus have already reached the peak level 5, not far from level 6. Levi has grown quite emotionally attached to these two demons. After their promotion to level 6, he plans to install them in the Demon Camp's blood battle as spies.

The trio of witch sisters are tied to the grand cause of Hell, and are temporarily retained as well.

For Levi, having one or two vacant enslavement slots is nearly enough.

A month later, Levi led a large contingent of Snow Elves, carrying the fruits of their journey, and awaited their return. Before leaving, Levi visited the Land of Roman's Fall on the fifth level again and found that the Truth Oddity was still in genesis. He couldn't help but reflect on how difficult the birth of an oddity truly is.

That day, staring at the ancient tower's sky, Levi murmured:

"Andreas, see you in a hundred years... Time is always on my side."

Not because he lived longer.

But because he was quicker than all other beings in this world.

...

Emperor's Palace.

Levi's figure appeared.

"You're back."

Hundred Flowers leaped forward, hugging Levi non-stop, wriggling like a worm.

After warming up.

Levi led the Snow Elves to the Ice Sea Secret Realm.

The Clan Leader was shockingly impressed.

"This truly is a real fairyland."

Martha looked at the group of Snow Elves, her face filled with joy.

"Such cute, chubby white creatures."

Levi said:

"From now on, these Snow Elves will be the indigenous people of the Ice Sea Secret Realm. They are skilled in taking care of Cold Based herbs and transcendent creatures. Martha, please take good care of them; it's a lot of work."

Martha replied:

"No problem."

Thus, the Snow Elves settled in, replacing Levi's various battle groups, embarking on pioneering work, and managing the area.

He came in front of Isa.

"Isa, come with me."

Emperor's Palace.

Levi and Isa sat opposite each other.

In a moment, Levi dismissed Isa's Crimson Enslavement.

Inside Isa, a Red Dragon Mark slowly faded away.

Everything that happened during the centuries of her enslavement surged into her mind like a tide.

She said bitterly:

"Am I going to die?"

Levi shook his head.

"I'm not that kind of person. Next, I need you to swear as I require, and you can live... Of course, if you prefer death, I won't stop you."

Isa replied:

"Master, I am willing to swear."

Levi said:

"A wise choice. If you can reach level 6 within a hundred years, I will allow you to return to the Heaven Horn Tribe and become the Queen of the tribe."

Isa said bitterly:

"I will try my best, to do my humanly duties and leave the rest to fate!"

Her lifespan is longer than that of humans, but also limited. If she couldn't break through to level 6 within a century, then an old age death awaits her.

Such matters are likely to frequently occur in Levi's domain going forward. Level 6 is indeed the first major hurdle on the transcendent path!

Levi encouraged:

"You do your best. As long as you're alive, anything is possible."

He enlisted Isa into the Valkyrie Sword battle group, training together with them.

As for the Level 7 giant elephant, it is subdued by spell restriction and arrays in the Ancient Banyan Fairyland, starting to undergo Levi's "Purification Healing". Just to be safe, Levi still temporarily keeps it under Crimson Enslavement.

Apart from the Level 7 giant elephant, Levi also captured a group of level 4 and level 5 creatures. After purification, these giant beasts start breeding in the Giant Beast Paradise, forming a population that can also be sold for money, an excellent prospect.

The Ten-thousand-year-old Snow Lotus was transplanted to Little Cold Mountain, supervised personally by the Heaven Crystal Dragon Ants. This item is a priceless treasure, and must be carefully guarded.

...

At the edge of the Small Stone Pond.

Gandaph hurried over, his face filled with excitement as he looked at the obedient little elephant in front of his true self.

Levi said:

"This is a top-tier Morning Star Artifact. After you refine it, strive hard to reach the seven-circle level within two hundred years."

Gandaph replied:

"Thank you, my true self. I will definitely work hard and live up to your expectations!"

The Elephant God's Proof is his opportunity.

After Gandaph leaves, the Holy Infant elegantly arrives.

He looked at the huge ice-blue Dragon Tail on the ground, his eyes brimming with joy.

"Level 7 Dragon King Whale's tail material, every part is a treasure. My Frost Sky Seven Feather Fan can reach Perfection."

Levi said:

"Given the size of this Dragon Tail, the materials extracted should be enough to craft some top-grade Protective Wizard Tools. Make four pieces when you have time. If the material is not enough, purchase others to supplement. This Dragon Tooth might be turned into dagger-type Wizard Tools; handle it as you see fit."

The Holy Infant replied:

"No problem."

Four Brilliant Golden Dragon Armors, one for Levi and one for each of his Three Avatars.

As for Hundred Flowers, she has the Level 7 Treasure, Yoggmir Armor, bestowed by the Frost Witch, which is far superior to the Brilliant Golden Dragon Armor.

Chapter 1932: Decomposition Technique! The Mystery of Sauron!

The bloodline essence from the dragon's tail had already been extracted by Levi and placed in the exchange shop of the Dusk Holy Temple, for the knights in need to exchange. There was no particular requirement for the frost-type Dragon Clan in the breathing technique that Levi himself cultivated.

After making the arrangements, Levi took out the treasure he obtained from the Snow Mountain Dragon King.

Setting aside mundane treasures and worthless transcendent items, in the end, it was mainly three items that caught Levi's attention.

The first one was a golden-yellow gauntlet emitting a brilliant light. On its back, there were five slots which, according to the experience of refining fans by the Holy Infant, were to embed energy cores, assisting the gauntlet in charging and unleashing its power. The gauntlet, rugged in design and with protruding spikes that gleamed with a cold light, was definitely a lethal weapon for killing.

After studying it for a while, Levi's face lit up with surprise.

"It's actually a Level 7 Treasure... Doomsday Fist."

Previously, Levi had acquired a number of advanced exotic treasures, but most of them were auxiliary civilization treasures. There were not many directly used for combat. Of course, in terms of value, civilization treasures were still higher.

He frequently used "Annihilation of the Eight Desolations," but it broke because it couldn't keep up with the increase in Levi's strength. Afterwards, other than using his own divine weapons, Levi would fight barehanded.

Now, at last, he had a new exotic treasure.

The Doomsday Fist was not a wizard's treasure but belonged to a level 7 expert from a mid-sized civilization called the Iron Fist Clan.

The Iron Fist Clan was known for their strong physiques, and all members were skilled in physical techniques.

Especially in the art of boxing, where they had reached the pinnacle, having few opponents.

However, they lacked an ultimate expert to secure the clan's fortune.

Also, because of their strong aggressiveness and danger, they were exterminated by the wizard civilization early on.

This treasure, falling into the hands some wizard, entered the ancient tower, fell there, was obtained by the Snow Mountain Dragon King, and eventually came into Levi's hands at a bargain.

It had two functions:

One,

It stimulated the user's body with a secret skill, temporarily enhancing their explosive power and strength, similar to the "Falling Star Ring," which needs no further explanation.

Two,

Swinging downwards with full power while releasing the energy of one energy core, it can deliver an attack equal to a full-force strike of a level 7 early stage expert. The impact can lift the strata, creating a wide-ranging earthquake wave, truly Groundbreaking!

This is the Iron Fist Clan's profound technique, "Underhook Earth Shattering Fist"!

At level 2, swinging upwards with full power and releasing the energy of two energy cores, it can deliver an attack equal to a full-force strike of a level 7 middle stage expert, producing terrifying shockwaves, blasting enemies away, and tearing the heavens apart.

This is the Iron Fist Clan's profound technique, "Upper Hook Sky-splitting Fist"!

At level 3, by burning blood essence and all energy within the body, one achieves a brief burst of offensive power, unleashing the full energy of five energy cores, to deliver an attack comparable to a strike from a level 7 late-stage expert!

This is the ultimate profound technique of the Iron Fist Clan, "Heaven and Earth Destruction Fist"!

The might of one punch, earth-shaking, annihilating all things, creating a doomsday.

Thus, this treasure is named "Doomsday Fist"!

There are several important conditions for executing "Underhook Earth Shattering Fist," "Upper Hook Sky-splitting Fist," and "Heaven and Earth Destruction Fist."

One, it must be inlaid with energy cores of the seventh level.

It can be natural elemental gems, or artificial energy crystals refined from the material of a level 7 extraordinary creature, or even biological organs such as shell pearls.

For the factions of energy cores, there is also a requirement.

There must be at least one earth element core, to unleash the "Underhook Earth Shattering Fist."

At least two wind-element cores, for unleashing the "Upper Hook Sky-splitting Fist."

The remaining two cores can be of any faction.

Besides.

To execute these three great Iron Fist Clan profound techniques, one must have a sufficiently strong body; otherwise, the intense recoil alone would be enough to shatter the user, a method of killing a thousand enemies at the cost of self-injury.

And if the user themselves does not possess great strength, having only the fists without the ability to bring out their power would be in vain.

"Isn't this tailor-made for me?"

Even setting aside those three profound techniques, just the defensive and strength enhancements the gauntlet provided to Levi would allow him to fight physically without any concerns. An injury like the one inflicted on his palm by Prince Unicorn's horn would never happen again.

Because the gauntlet is made entirely of "Stone of Destruction," a special produce from the world of the Iron Fist Clan. This is a material of the eighth level, and if not for the Iron Fist Clan's inferior crafting skills, the "Doomsday Fist" could have been a Level 8 Exotic Treasure in its own right.

Levi tried putting on the gauntlet.

"This gauntlet may look small, but it weighs millions of pounds, over ten times heavier than my pair of Falling Star Rings combined."

Of course, millions of pounds might seem heavy, but it's actually relatively light. Just any small hill of a hundred meters is at the scale of millions of tons.

But don't forget, this is just a gauntlet. Moreover, it is a transcendent item refined through a special secret technique.

"With this gauntlet, I can fight more comfortably against level 7 early stage experts. There is nothing that can't be killed with one punch, and if there is... then bam bam, two punches for it."

This also has become the treasure with the most powerful offensive force acquired by Levi.

He went to the training ground to give it a try, and indeed it worked well.

"What's regrettable is the lack of energy cores. Level 7 Elemental Energy Gems are rare items, especially since it should include one earth element and two wind elements."

If he could gather five types of energy cores now.

Levi did not know whether, with his strength, he could execute the Iron Fist Clan's most powerful profound technique, "Heaven and Earth Destruction Fist"!

Chapter 1933: Decomposition Technique! The Mystery of Sauron!

If possible, a punch like that would definitely overwhelm the Snow Mountain Dragon King; if not fatal, it would cause grievous injury.

However, techniques like the "Underhook Earth Shattering Fist" and the "Upper Hook Sky-splitting Fist" should be manageable. With his recovery ability and physique, he should have no major issues with the rebounding force.

"Next up, I need to pay more attention to items of earth and wind elemental energy."

The highest energy core that Levi can currently assemble is a Level 7 Frost Energy Core. All he needs is more Frost Dragon Scales to refine into artificial gems with a secret technique. Of course, such energy cores are less practical and not as enduring as natural Elemental Gems.

The second item is a crystal ball that records a spell; inside is a Seven-Circle Primordial Soul Spell.

The "Micro Lysis Technique."

It's worth mentioning that this is a top-grade spell and it also has a corresponding advancement sequence.

Seven Circles·Micro Lysis Technique;

Eight Circles·Small Decomposition Skill;

Nine Circles·Decomposition Technique;

Legendary forbidden spell·Great Disintegration Technique, also known as "Sauron's Great Disintegration Technique", "Great Splitting Technique".

Micro Lysis Technique is unlike the conventional Elementalist School spells, as well as other variant energy Sect spells.

This is a Space Series spell.

Its principle is to completely fragment the concept of "Space" around the target, erasing it thoroughly.

The result is that the person vanishes completely from this world.

The spells at the level of "legendary forbidden spell" are not just Spatial magic but also Temporal magic.

If the target fails to resist the Decomposition Technique's effect, the consequence is that they are completely erased from the concepts of "Time" and "Space".

It is said that Sauron used this method to deal with certain Gods.

The erased Deities, as if they had never existed, vanish from the river of time. To the extent that even their fanatics cannot utter the Divine Name, unaware of what entity they have been worshipping... because, for them, that God has never existed.

Of course, this kind of perverse spell is naturally extremely difficult to cast.

Only seven-circle wizards have the basic qualifications to learn it, and the effect isn't as good as one may imagine.

Firstly, it's exceedingly challenging to learn, impossible for those with low comprehension.

Secondly, the success rate of casting is not high, akin to the "Death Finger"—it's a gamble.

Thirdly, the caster will suffer backlash from "Space"; frequent use might lead to the possibility of "Space Exile". Of course, if one is powerful enough to resist such backlash, it's still a trump card to be used sparingly; even for a Legendary Wizard, unless faced with a life-and-death crisis, they would not easily

resort to it. After all, the "Great Disintegration Technique" also involves facing the Time repercussion, bearing many complex and unimaginable karmic consequences. Throughout history, the only one who seemed to cast this spell with relative ease has been the ancestor of all wizards—Sauron!

Thus, there are mainly two prevailing theories about Sauron's disappearance aside from the notion of complete death.

One, the Exile theory.

Some wizards speculate that Sauron, because of the frequent use of the Great Disintegration Technique, encountered some unimaginable Time-Space backlash, and was eternally exiled within a dimension of Space-Time unknown to wizards, forever lost, unable to return.

Two, the Truth theory.

Other wizards believe that Sauron has completely achieved the spiritualization of his body, becoming what is theoretically a "Knowledge Immortal", an omnipresent, omnipotent, and omniscient "Mr. Truth". Thus, the wizard civilization was able to develop explosively like a technological big bang over the subsequent three hundred thousand years, far outpacing the barbaric ancient times, because Sauron has been steering the world of wizards in inconceivable ways, guiding all of this.

Of course, there are plenty of other theories as well.

But to get back on point, Miniature Fragmentation Technique is available in the Truth Magic Mirror; the only issue is that Levi does not yet have the authority to exchange for it.

Sauron left behind little knowledge inheritance of sixth-circle and above in the magic mirror.

And most of it, due to being antiquated, holds scarcely more power than the Cave Wizards, having already been supplanted by more advanced versions.

After all, Sauron disappeared not long after the founding of the congress, and the theoretical knowledge has evolved far too much since then.

But there is one collection of spells that has a complete sequence, and that is the Decomposition Technique, aimed straight for the Legendary level!

Even now, after three hundred thousand years, the Decomposition Technique has not changed; it remains exactly as Sauron designed it.

Within the Ancient Tower Scepter, a power projection of the Decomposition Technique left behind by Sauron is sealed; however, unless Levi encounters an event that could threaten the safety of the ancient tower, he as an enforcer does not possess the authority to utilize it.

It can be said.

The "Decomposition Technique" is the Wizard's "nuclear weapon" against the Heavenly Father.

If other means fail to work against Gods, then they resort to "Sauron's Great Disintegration Technique", forcefully erasing them from space-time!

Therefore, after Levi becomes a seven-circle wizard, he must learn the "Miniature Fragmentation Technique" at all costs.

By doing so, he would possess three sequences of Legendary spells.

The Lightning Faction's "Thunder God", the Burning Faction's "Emon's Eternal Blazing Sun", and the Time-Space Faction's "Sauron's Great Disintegration Technique"!

The last item holds much intrigue.

In Levi's palm appeared a section of a thick root, radiating a vibrant, multicolored treasure-like glow.

"Pandora's Root, or should it be called the Original Root."

This root, compared to what he had previously received from Mistress Rose, was many times thicker.

Levi surmised this must have been obtained by the Snow Mountain Dragon King from killing a Level 7 Dark Elf Mistress.

If the Original Root is stimulated by a secret technique, it can be made to grow, eventually sprouting into a Pandora's sapling. In several hundred thousand years, it may grow into a towering tree like that of the Witch's Family.

Chapter 1934: Decomposition Technique! The Mystery of Sauron!

However, Levi already has Mana.

"With this root, Mana's strength can also improve further."

Mana is currently too weak, and although she has a long lifespan and can slowly become stronger, continuing like this is not ideal, so Levi plans to give her a helping hand.

The Morning Star-level oddity "Cold King's Eye", this time's "Doomsday Fist", "Micro Lysis Technique", and "Pandora's Root", are the four most important gains from the "Snow Mountain Dragon King Treasure".

As for the rest, no need to mention.

"However, that Old Dragon King's Fate Coins have not been fully exploded yet, I'll collect them in the next century, hoping that in this century, it can yield even more. Andreas, my good brother!"

Then.

There were the 100,000 blind boxes, after opening, they altogether contributed 3 level 6 alien race combat techniques, 1 primordial soul spell, and 1 array knowledge.

After scanning the combat techniques, Levi handed them over to the Dusk Holy Temple for handling; the excellent combat techniques he is currently learning are already sufficient, and there is no need to learn new ones for the time being, unless they are particularly excellent. He also didn't study the primordial soul spell because of its average quality.

The only gain was that array knowledge.

"Divine Fall Star Killing Array".

What shocked Levi was that this was not a sixth-circle array... it was a seventh-circle array.

This array requires refining "Star-Destroying God Nails" as array items. Each one must possess the quality of a Seven-Ring Witch Artifact.

The array is divided into two versions.

Firstly, refine 7 "Star-Destroying God Nails" to form the "Divine Fall Sky Star Seven Kill Array", with which a Seven-Ring ordinary wizard can battle a Senior Seventh Ring.

Secondly, refine 13 nails to form the "God Fallen Heavenly Star Thirteen Kill Array", even a Seven-Ring ordinary wizard can wield this array to stand against Seven Rings Perfection!

Of course, the difficulty in refining this array is not something ordinary Seven-Ring Formations can compare with, just the array items that rival Seven-Ring Witch Artifacts alone need 13 pieces, one can imagine, who can afford that?

Levi's expression brightened.

"This kind of array, with slight modifications, can be used to form a Sword Array, and its power will only be greater. It can be called the 'Heavenly Star Sword Formation'. 'Divine Fall' is too much of an exaggeration, a seventh-circle array does not warrant the title of God Slaying. At the very least, one must possess a nine-ring array to qualify for such a name."

After Lord Victor advances to the seventh circle, he can cooperate with the Holy Infant to begin refining the Heavenly Star Sword Formation.

The first level, refine seven swords, the secret sword materials, Levi has already prepared. He spreads his hands out, not more or less, exactly 13 blood scale flakes floating in the void.

These were the scales of a Blood Clan strongman from the first time the ancient tower was opened, which he got from the Blood Demon Tower Master, who seemed to call himself Venerable Blood Scales. Levi later checked the information and, surprisingly, this person was a level 8 being. These scales, now that he is with Sixth Rank Cultivation, are hard for him to refine; after advancing to the seventh circle, it should be about right.

In Levi's view, the blood scales are completely prepared for the "Heavenly Star Sword Formation".

After taking stock of the gains and handling some trivial matters, Levi made an inspection of the major organizations and then began his seclusion.

He obtained quite a few Soul Stones from Hell, and if he can refine them, he can boost his spiritual force to over 5000 points in one fell swoop.

Of course, because he has just increased his spiritual force by more than two hundred points sharply through the White Emperor Holy Sword, he needs to digest for a while, and advance step by step.

...

Three years later.

Nora year 120.

Midland Continent.

Gondor City.

In the secret room, Gandaph was shirtless, his body-refining runes covering him like intricate scales.

Streams of pitch-black blood oozed from his pores, falling to the ground and forming a layer of filth.

After an unknown length of time, Gandaph opened his eyes, a divine light piercing the heavens.

In his mind, there was an image of a figure with an elephant's head and a human body, sitting cross-legged like Buddha, with a halo shining behind, full of divinity.

"This is the true rebirth! I never realized my body had so many imperfections and deficiencies!"

Just now, Gandaph had refined the Elephant God's Proof.

Now possessing the Elephant King Body, he had achieved some form of life ascension. Even if his spiritual force was exhausted, his spell power depleted, and all body-refining runes extinguished, his physical body alone was enough to shake a Sixth-Circle Wizard.

After all, his initial form was made up of a constantly growing cluster of poisonous insects, and he later refined the body-refining sacred relic, the Power God Fruit, achieving his first evolution. This second evolution allowed Gandaph to transcend the human category and become a truly unique species.

The Elephant God Body also granted him an outstanding body-refining talent. He could clearly feel that the speed of his meditation, the construction of body-refining runes, and the casting of spells had all significantly improved.

"From now on, I won't be left behind by Ace, hehehe."

As for Elephant God Power, he had tested it on Midland Continent's native elephant transcendent creatures and found it very effective. Those below the sixth-circle could be directly controlled by him for combat; those above required subduing before they could be controlled by divine power.

He joked:

"I am Dragon God, and I am Elephant God; I might as well establish an Elephant God Temple."

In addition.

Because the Elephant God's Proof is an Earth-type Truth Oddity, it also bestowed Gandaph with a special earth element talent called Elephant King's Heart. This meant his future cultivation of Earth-type body tempering techniques would be twice as effective with half the effort.

Gandaph's spiritual force also increased by 80 points in one go. Although it's not comparable to his primordial soul's Bright Moon Artifact, it's second to none among the Morning Star-level.

Today, Gandaph's spiritual force level has reached 3300 points, swiftly catching up with Holy Infant. Advancing to the seventh-circle within two hundred years was still hopeful.

The most absurd part is.

This refinement gave birth to a special spiritual creature as well.

It was as if all the possible features had exploded out at once.

Gandaph guessed that this might be because it was his first time refining an oddity, and he was still within the "newbie protection period" mentioned by his primordial soul; it might not be the same next time.

With just a thought.

A white giant elephant, almost filling the secret room, materialized beneath Gandaph.

This spiritual creature, which Gandaph called:

"White Elephant!"

White Elephant is a pure combat spirit item, immensely strong, groundbreaking, capable of fighting with a Sixth-Circle Wizard. Besides, it can also serve as a mount, and it's quite fast at running.

Days later.

Gandaph developed a new trick, which was "Fusion."

With just a thought, White Elephant transformed into a beam of light and entered his body.

His body began to grow massively, swelling up, becoming like the true Elephant God, towering and imposing. On his body appeared a white battle armor, layered atop the Radiant King Armor. Behind the Elephant God, a shadow of the ancient god with a thousand arms emerged.

"This is my strongest form, the White Elephant Ancient God!"

Chapter 1935: Legendary Appearance!

White Elephant Ancient God.

Under this form, Gandalf's Strength and defensive capabilities once again greatly increased.

The Ancient God Body at Sixth Ring Senior level, the protective force field of Divine Light Protection, the top-grade Wizard Tool, Radiant King Armor, combined with the newly birthed Elephant King Armor after Fusion, and the Snow Iron Dragon Armor that the Holy Infant will forge in the future,

With these five layers of defense, even against a seven-circle wizard's attack, they should be capable of holding out for a while, ensuring survival is not an issue.

"I must keep up the hard work. Having acquired such a remarkable oddity, it would be embarrassing if I were to advance to seven-circle significantly later than Ace."

Resolved, Gandalf further compressed unnecessary leisure time, immersing himself wholeheartedly in cultivation.

...

Thirty years pass in the blink of an eye.

Nora 150th year.

During these thirty years.

The most sensational news among the commonfolk of the Midland Continent was undoubtedly the establishment of Dawn Tower by Dawn Divine Sword Victor in Gondor City.

Upon the establishment of Dawn Tower, figures like Laplace from Sorren Holy Tower and Soraya, alongside other primordial soul-level powerhouses, came to convey their congratulations and blessings.

Dawn Tower primarily imparts the knowledge of Secret Sword Flow spells and arrays. Its recruitment threshold and tuition fees are comparatively higher than other high-level wizard organizations.

Yet, applicants flocked in endlessly, although only one in ten managed to pass the interviews.

Over thirty years.

Dawn Tower adhered to a high-quality-driven growth strategy, steadily expanding.

Relying on Victor's tremendous popularity, it gradually became a wizard organization on par with Fire Dragon Shop and Gandalf Pharmacy.

Just like this.

Levi's three avatars set up roots in Gondor City.

With the three avatars supporting each other, they used this stronghold as a springboard to gradually spread their influence across the Midland Continent and the Wizard World.

In thirty years, the Holy Infant's Weapon Refinement skill has reached its peak within the six environments realm.

After the fall of the Fire God's Hammer, he became the undisputed number one in Gondor City.

Utilizing Snow Mountain Dragon King Scales with a Level 7 base, in conjunction with rare materials such as amethyst, he forged four top-grade items of the Snow Iron Dragon Armor, ensuring that at least one self-activating Wizard Tool is at hand for everyone. If the future brings secret sword assassinations from the Council of Ten Thousand Clans or other enemies, the likelihood of survival greatly increases.

In addition, he used the chains of Prince Unicorn, amethyst, White Dwarf Gold, and other rare materials to refine a top-quality Wizard Tool for Gandalf.

Named the Vajra King Bracelet, its effects are similar to the original Falling Star Ring, taking Gandalf's strength to new heights.

Gandalf's Purple Crystal Wand has also undergone upgrades, enabling Gandalf to wield it like a club to teach and practice its language.

The Holy Infant's own Extreme Fire Wheel, newly refined using the seventh-level Void Treasure Pearl, significantly increased its escape capabilities, achieving a terrifying Void Travel distance of four thousand miles in one breath, only slightly inferior to Levi's "Horse Carriage." While still not on par with the real Void Spirit Clan, it surpasses the ordinary seven-circle wizard.

Furthermore, the Holy Infant also crafted a top-grade secret sword exclusively for Victor, named the Star Sword. Its cost and quality even surpass Levi's Amethyst Light Sword by a margin.

As such, one true form and three avatars each possess several top-grade Wizard Tools, displaying formidable might. The Holy Infant himself reaches a ridiculous count of six top-grade items. As a family, they wield financial power to exert overwhelming strikes.

However, throughout these years, the Council of Ten Thousand Clans seems to have laid low, rarely active in the Wizard World, and assassination attempts have decreased. Even the Holy Infant, who is mocked for his physique, safely passed the thirty years without assassination attempts, which Gandalf found astounding. Certainly, everybody welcomed the peaceful opportunity for growth.

Regrettably, tranquility is likely only superficial. The Council of Ten Thousand Clans waits for the right moment, and that is for the Blood Battle.

Over the years, the gloom of the Blood Battle has thickened in the sky of the Wizard World.

The most tangible sign is that, in recent years, fully armed and well-trained wizard battle groups can often be seen descending from the sub-dimensional portals into the human realm.

They are stationed on the Mortal Continent and the New World, setting up defensive perimeters. At key locations, they deploy vast protective arrays, creating an atmosphere charged with the tension of an impending storm.

One year later.

Nora 151st year.

The Supreme Council announces.

As per tradition of past Blood Battles, the [Blood Battle Command Center] will once again be established, and will remain until the conclusion of the Blood Battle.

This organization does not exist in normal times but is temporarily established for each Blood Battle.

The director of the Blood Battle Command Center is held by Frost Witch Gullwig.

The deputy directors are held by "Thousand Mountains Immortal Alexander" and "Thunder Lady Luniya."

Frost Witch, the absolute leader of the Frost School, is also the only legendary witch with immense popularity in the Wizard World. Despite a narrow defeat in the Grand Council Chairman election to the veteran Edmund, it didn't affect her popularity at all.

According to public information released by the congress, her Legendary Profession is known as the True Ancestor of Frost, her Demiplane is known as the Eternal Zero Realm, and her legendary salute is "Cold Frost Witch, the only one in zero-dimensional space."

Thousand Mountains Immortal, one of the two legends of the Earth School of Thought, participated in the Five Sector Expedition against the Four Evil Gods of Chaos, just like the Frost Witch.

His Legendary Profession is the Lord of Thousand Mountains, his Demiplane is the Palmed Middle Earth, thought to be a shrunken version of the Midland Continent, and his legendary salute is "King seated upon the mountains, a sage of great virtue bearing all."

Thunder Lady, one of the legends of the Lightning School of Thought, possesses immense strength. Her Legendary Profession is the Lord of Thunder Realm, her Demiplane is the Infinite Thunder Realm, and her legendary salute is "Maiden chasing lightning, the eternally undying bolt of electric light." Rarely seen in public, she lives in her own Thunder Realm, resting upon her unique oddity, the Thunder God Throne, enwreathed by divine lightning, a relic from a god of the astral world.

Chapter 1936: Legendary Appearance!

Aside from these three legendary ministers, the Blood Battle Command Center also has dozens of high-level Grand Wizards, including the mysterious backer of Levi from the shadows, Black Abyss Walker, listed among them. The lists of eighth-circle and seventh-circle wizards have also been made public.

Following the announcement of the lists, the giants who once stayed behind the scenes, seated high upon Cloud Summit, rarely seen by the public, began to gradually unveil their mystery.

The Blood Battle Command Center announced that a grand speech would soon be held on the Mortal Continent, at which time the three legendary ministers, along with the high-ranking Grand Wizards, will all descend in their true forms to the human realm.

This move is mainly to promote the latest version of the Blood Battle Bill and prepare all wizards for the imminent war.

The Wizard World is abuzz with countless wizards eagerly anticipating the day of the speech, desperately wanting to witness the elegance of the Legendary Wizards.

Let alone ordinary wizards, most primordial soul wizards would never have the chance to see the Legendary Wizards in the flesh in their lifetimes, at most catching a glimpse on the news.

Midland Continent

Upon hearing this news, Gandaph, Ace, and Lord Victor who were gathering at the Fire Dragon Shop were also excited.

Gandaph said:

"Legendary, shall we go have a look?"

Ace said:

"No need, what's there to see."

Lord Victor nodded.

"My spiritual force is about to reach 5000 points. Next, I'm going into seclusion to refine it to Perfection, then I will devote myself to learning primordial soul spells, while also preparing the promotion potion, getting ready for the breakthrough to the seven-circle."

Gandaph looked at Lord Victor with envy. The disparity between them was huge, despite being born of the same father, from birth Lord Victor was out of reach for Gandaph.

He patted Lord Victor on the shoulder.

"Work hard and advance to the seven-circle as soon as possible. Have you got any leads on the breakthrough potion yet?"

Lord Victor said:

"Not yet, but I have already arranged for people to inquire about auction information worldwide."

The Holy Infant seriously said:

"For the Seven-Circle Breakthrough Potion, you should prepare at least 1 billion Aether Stones, otherwise, you can forget about the auction."

Gandaph joked:

"The three of us, with our current strength, united we could slay the seven-circle without the need for avatars. It's a pity that in recent years, the Council of Ten Thousand Clans no longer offers up any heads. Ace, why don't you lure a few fish out? We could make a fortune from that."

Ace laughed and said:

"Old thing, I think you are better suited."

As the three avatars were chatting.

Within Ancient Banyan Fairyland, Levi also opened his profound eyes, coming out of the meditation state, and exhaled deeply.

"Just by opening and closing these eyes, over thirty years have passed; there is no concept of years in cultivation."

He placed his hand on the Klein Crystal Ball.

[Spiritual Force: 5400/6029]

[Spell Power: 2.7 million]

In thirty years, he had increased his spiritual force by over five hundred points. The greatest contributor to this were the Soul Stones acquired from Hell.

His spell power had reached as much as 2.7 million.

He then opened his proficiency panel.

The three primordial soul spells—Holy Light Barrier, Mountain Ranges, Earth Splitting Sky Star—had all been trained to the Fifteenth Order Limit, reaching their endpoint.

Skills such as Crow Banquet, Shifting Shadow technique, and Wind King Cloak were all at level 14, striving to reach level 15.

In comparison, it was more difficult to practice School of Death's Death Finger, Death One Strike, and the Astrology Magic Destiny Coin. There was still some distance from reaching level 15.

All things considered, the 13 primordial soul spells he currently mastered were all genuinely at the sixth-circle standard, with only the fine-tuning left.

Having digested the current spells, Levi could continue to learn new spells.

He now deeply felt that imprinting more Witch Marks indeed requires patience, and the amount of time needed is so extensive that ordinary primordial soul wizards simply cannot withstand it, because they cannot afford the loss of lifespan.

Luckily, Levi was not lacking in lifespan. He was just 575 years old. Recently, he had just cultivated the Moon Rune to level 7, increasing his lifespan by 60%. Just talking about wizard lifespan, it was at least 3200 years, and with the knight's blessing, he estimated that five or six thousand years wouldn't be a problem.

He could have spent an extra hundred or two hundred years on the Infinite Primordial Soul back then and imprinted more Witch Marks with a little more time. However, the number of Witch Marks shouldn't be too many, as there is a limit placed by the upper limit of spiritual force and insufficient internal memory. Levi estimated recently that his upper limit should be 27 Witch Marks. Assuming he imprints 27 Witch Marks each at the sixth-circle, seven-circle, and eighth-circle, that would total 81 Witch Marks.

Levi was very sensitive to the number 81 because when he had advanced to the Infinite Primordial Soul, it was by condensing 81 Witch Marks.

Over the years, through Gandaph's connections and his own, as well as Leon's Memory Discs, Levi obtained quite a few primordial soul spells, and after careful selection, he decided to learn 4 new spells.

Earth King's Blood, Destruction Melt Flow, Holy Flame Giant, Shining Eye.

Earth King's Blood, a Life Faction spell to some extent it's also an Earth Faction spell, can draw the force of life from the earth and channel it into a designated target to heal wounds. That's right, it's a healer's skill. Although Levi possesses the power of the Death Ember Dragon, the range is too small, mainly for self-preservation. This spell is mainly used for treating allies in large-scale wars.

Destruction Melt Flow belongs to both the flame and metal Dual Faction Magic. It unleashes a widespread metal flame flow for destructive attacks, and when the metal solidifies, enemies become sealed within, turned into statues.

Holy Flame Giant, belonging to Light and flame Dual Faction Magic, gathers both types of energy to summon a Holy Flame Giant, delivering attacks of both attributes, very powerful, capable of smashing demons with each punch.

Chapter 1937: Legendary Appearance!

"Shining Eye," Bright Faction, conjures an eyeball radiating endless Holy Light, which disintegrates the Darkness wherever it gazes.

These four spells are all powerful magics used exclusively by the military battle groups, especially those two Dual Faction Magic spells, which are not commonly learned. They require the collective power of a battle group to be activated.

However, Levi is unruffled; as the Aether Dominance, he can learn anything.

Clearly, these spells were prepared specifically for the upcoming Blood Battle by Levi, especially those of the Bright Faction, targeting demons.

Today's Ancient Dragon Continent is an official cooperative test zone. Levi got quite a deal purchasing a good number of spells from the military.

These are just a part of what he acquired. Of course, this transaction was bound by a confidentiality agreement and limited to his own and his subordinates' use.

Ordinary wizards wishing to learn such spells have only one path: to join the army, entering the battle group. Through this method, the scale of the Wizard Council's battle group continues to expand.

Beyond the path of the wizard, the Knight Breathing Techniques have also developed significantly.

The Scarlet Dragon Breathing Technique, upon reaching the Level 6 Late Stage, enhances all aspects of one's abilities, with the "Scarlet Blood Prison" having a diameter of 7 kilometers.

As for the Brilliant Golden Dragon and the Crimson Emperor Dragon, they are not far from reaching the Level 6 Peak.

Levi is also beginning to prepare materials for the Knight Promotion in advance.

In terms of combat techniques:

He has completely mastered the eighth level "Fight Against Heaven and Earth" of the "Warlord Catalog," and the same goes for the eighth level "Roc's Mighty Sweep Across the Skies" of the "Eagle Divine Scripture."

Compared to thirty years ago, his strength has undergone another significant transformation.

He doesn't need the Giant Whale King; a typical Level 7 Early Stage opponent probably can't match his normalized state now.

"It's time to come out of closed cultivation. It's been thirty years. I wonder where that Fiery Flame Servant has gone..."

Levi muttered to himself.

Over the years, he had been trying to track down this person's whereabouts.

However, it was like the individual had evaporated from the human realm; nobody knew anything.

"No way, right? A seven-circle wizard? Could he be afraid of my revenge and gone into hiding?"

Levi frowned slightly; if that were the case, he indeed had no way to find him.

The world is vast; looking for someone in hiding is like searching for a needle in a haystack.

Ancient Banyan Fairyland.

It's been quieter than before because Mana has entered closed cultivation.

Upon acquiring Pandora's Root, she fell into a deep slumber, unable to be awakened.

Flaming Mountain.

Seeing Levi coming out of closed cultivation, the Black Lotus Beast rejoiced and said:

"Lord Dragon King, I've reached Level 6 Middle Stage!"

Levi showed an approving expression.

"Good job, in less than three hundred years, you've advanced from the Early Stage to the Middle Stage. Keep it up."

His praise wasn't sarcastic; for the Dragon Clan, this speed was quite fast.

This also meant that the effects of his Crimson Emperor Dragon's secret medicine were getting even better.

"By the way, how is everyone doing now?"

The Black Lotus Beast, being the second in command of the Dragon Palace, managed the Dragon Clan while Levi was in closed cultivation.

The Black Lotus Beast said:

"The Snake King Dragon broke through to Level 6 Late Stage a while ago and is currently the strongest in the Dragon Palace. Not long ago, it even ventured into the Nightmare World and slew a roaming Nightmare Lord, reaping significant rewards. The Wild Electric Dragon Eel has also advanced to the Level 6 Middle Stage. Oh, and the Thunderstorm Wolf Dragon has been promoted to level 6; it seems there's something they need to discuss with you. The Dragon Turtle is close to reaching the late-stage level 5, the three brothers are pushing towards the peak level 5. Overall, everyone has made noticeable progress, and the targets you set initially have all been met. The Dragon Dao Conference has been held for the 38th time, and over these years, the three brothers have won the most championships."

Levi nodded, quite satisfied.

Dragon advancement is slow; it cannot be compared to that of wizards, much less to his own. With factors like the Dragon Scale Fruit, Spring of Immortality, and Ancient Banyan Fairyland, the growth rate of the Dragon Palace members is, in fact, far surpassing that of wild dragons.

Levi said:

"Continue your efforts. The Dragon Palace members don't need to participate in the upcoming Blood Battle, so focus on breakthroughs and pioneering the Nightmare World, coordinate with the battle groups, and protect our territory. The Black Dragon Territory will be looked after by our Dragon Palace. Confident?"

The Black Lotus Beast replied excitedly:

"Confident! Lord, are we going to seize new territories next?"

Levi responded:

"Not in a hurry for now. Currently, the two Overlords are in the midst of a great war, and we might be drawn into it at any moment. It's better to stay low-key for the time being. Once the outcome of the war is decided, we can then make further plans."

Over the years, the Black Dragon Territory has not been peaceful, with people from Seven Sins City causing trouble, especially that General of Gluttony.

However, with Triss stationed there, along with a bunch of level six experts under his command, the territory was successfully defended.

With the comprehensive strength of the Black Dragon Territory, unless the strongest City Lord or the peak General, Arrogance, personally visits, they can rest easy.

As for the Blood Rain Overlord, there has been no word yet, but Levi is prepared to be called upon at any moment.

He reviewed the rare plants; all were thriving.

Especially Dreamy Cloud Swamp, blanketed with Saint Fruit, continuously producing batches of Purification Elixir.

The Iron Tree has grown ten meters tall, a great achievement in four hundred years, considering it naturally takes a thousand. However, blooming seems eons away. To bloom once in ten thousand years... that is the life span of a Legendary Wizard...

Fire Dates, Death Soul Dates, Ten-thousand-year-old Snow Lotus, Fire Dragon Fruit, Fluorescent Illusion Tree, Nine-leaf Blood Datura... all were under specialized care, rare treasures seldom seen outside.

Shortly after, the Thunderstorm Wolf Dragon arrived. Having ascended to level 6, its stride was sprightly, exuding success.

Levi said:

"Well done, reaching level 6. I heard you have something to discuss with me?"

Chapter 1938: Legendary Appearance!

Thunderstorm Wolf Dragon said:

"Lord, can I continue with my blood test treatment?"

Levi was stunned.

This dragon is addicted to having its blood drawn? A masochist, huh?

But it's understandable, we can't just keep plucking the Wild Electric Dragon Eel endlessly, it needs time to recover.

"Yes, you can."

After drawing blood, Thunderstorm Wolf Dragon said earnestly:

"Lord, I'll take my leave now, please summon me for anything."

This Thunderstorm Wolf Dragon sure knows how to curry favor.

The next day.

Ancient Dragon Continent.

From within a volcano, billowing smoke arose, accompanied by a resounding phoenix cry, a magnificent figure flew out!

With a wingspan of over three hundred meters, trailing flames for tens of miles, it truly looked extraordinary, like a divine bird descending to the world!

Passing knights exclaimed.

"Is that the Undying Bird?"

"No, this is Fire Phoenix·Phoenix, supposedly the commander's most important pet from before, looking at it now, it has advanced to level 6, ah, just a single pet of the commander is countless times stronger than us."

Feeling inwardly proud upon hearing others compliment its appearance, Phoenix circled around the Ancient Dragon Continent.

Suddenly.

In front of Phoenix, a black-armored figure appeared, it was Levi.

"Now that you're level 6, go to the Tower of Dawn and become a Guardian."

This guy did well, he didn't waste those Fire Element Crystal Cores I gave him.

Levi could feel that after reaching level 6, Phoenix clearly had a stronger aura than an ordinary level 6 Elemental Lord, and faintly, there was an indescribable divinity, and even some semblance to a phoenix from his past life, probably because of the divine fire it refined from the Church of Eternity.

This guy's future might go further than Levi had imagined.

Phoenix expressed in human speech:

"Alright!"

The joy of advancing to level 6 had almost made it forget its real name, Flame Avenger Anvada has long become a thing of the past.

That day.

The Tower of Dawn welcomed its own exclusive Guardian.

Levi had the array wizards devise an energy conversion array; from now on, using Phoenix as the energy core, they could provide flames suitable for low-level wizards' weapon refinement. This arrangement should not affect it much and would also save a lot of fuel. Cutting down on unnecessary expenses like Aether Stone for the organization.

As for Diya Bo, who had reached level 6 mid-stage, Levi arranged for him to go to the Twilight Temple to assist the knights in refining their own Bloodline Divine Weapons.

Giant Beast Paradise.

All the ordinary giant elephants that Levi brought out from the ancient tower had been completely purified, and the beast tamers from the School of Spiritualism had already started taming and breeding them.

Melina respectfully said upon seeing Levi's inspection:

"Lord, you've come out of seclusion."

Levi smiled and said:

"Giant Beast Paradise is developing well, you've worked hard over the years."

Touched by Levi's gratitude, Melina earnestly replied:

"It wasn't hard work, it's all thanks to your help that I was able to advance to the fifth circle, and now I am even a fifth-circle senior wizard. If my father were still alive, he would be so happy."

Levi said:

"I've been in talks with the congress recently, planning to lease the New World discovered near our continent not long ago as an exclusive base for Giant Beast Paradise."

Melina's face lit up with joy.

"That would be wonderful, the cultivation of giant beasts indeed requires vast territories and resources."

Times are different now.

Ever since the Ancient Dragon Continent became the test zone, thanks to pioneers like the Black Abyss Walker and Frost Witch, the congress has been treating the Ancient Dragon Continent quite well.

With the increasing population and organizations on the Ancient Dragon Continent, it's getting a bit crowded, so he wanted to relocate Giant Beast Paradise to the nearby New World.

At that time, there will be a specialized Frontier Battle Group and array wizards, among others, participating in the development.

The lease is cheap, only 1 billion Aether Stone for a hundred years, which is basically like giving it to Levi for nothing. Otherwise, how could Levi afford to rent it?

Levi then visited the Tower of Dawn and found that everyone was actively preparing for the Blood Battle, and the corresponding courses had already been arranged.

The Tower Master's Hive Fortress, an integrated cluster of mechanical creatures for both reconnaissance and attack, was also smoothly entering combat. On his way there, he sensed several invisible reconnaissance mechanical creatures patrolling busily high in the sky.

Now, the development of the Mechanical School and financial issues at the Tower Master's side no longer require Levi's concern. Just recently, under the direction of the congress, the School of Alchemy's headquarters, the Alchemy Hall, and the Tower of Dawn entered into strategic cooperation. The School of Alchemy provided the funds, sent specialized talents over to Herman to study the basics of mechanical knowledge.

In fact.

The School of Alchemy has always been researching the Mechanical Dao, often sending specific wizards to the Myriad Machine Plane to search for heritage and learn from it. However, lacking the core heritage of the Machine Sage, their development has been rather slow.

Overall, while maintaining the Tower of Dawn's advantageous position, providing some technical support in exchange for a large amount of money and resources is indeed a win-win situation. Now, the authorities have even granted the Tower of Dawn the qualification of "[Mechanical School Research Pilot Institution]".

With enough funds, the Tower Master's research also proceeded smoothly, after all, he himself was a genius in this field.

After over three hundred years of development, the Tower of Dawn is no longer what it once was.

The Sixth-Circle Wizards include the Tower Master, Anya, Sorrett, and Stella.

Besides them, there are others who are already at Fifth-Circle Perfection and planning to advance.

Among them, the most outstanding is Aya, a wizard of Fifth-Circle Perfection with nine Shadow Talents. This made Levi reflect that he always subconsciously thought of Aya as a little girl, but in reality, she was nearly four hundred years old...

Chapter 1939: Legendary Appearance!

Another Thunder Wizard, Sta, who was brought out two hundred years ago, is now a Perfection-level four-ringed wizard with six talents. Being a favored disciple of Sorrett, Sta has grown rapidly.

Even Little Toby, now eighty years old... is also a Third-Circle Wizard and is dual-faction. He has now been taken to the Fire Dragon Shop to further study weapon-making knowledge under the guidance of the Holy Infant.

The other veteran members, such as Coral Witch, Ice Phoenix, and others, have also achieved Fifth-Circle Perfection, but whether they can advance to the sixth-circle will depend on their own fortunes.

The old friends from Gray Tower, under Levi's special care, like Marlene, Winnie, Leah, and others, have also reached the fifth-circle, at least, and can enjoy a lifespan of a thousand years. As for the sixth-circle, Levi is helpless to assist; with their talents, reaching the sixth-circle is almost impossible. However, Ms. Marlene has already accepted this; if not for Levi, she would have been bones in a tomb by now. Being

able to witness a few hundred more years of the world and meet her teacher Herman once more, she has no regrets in life.

When Levi arrived at Dusk Holy Temple, the knights were sparring with Amazon Female Warriors.

He watched with interest.

Upon noticing the commander's arrival, everyone exclaimed in unison:

"Welcome, commander!"

Levi said:

"You all have worked hard these years."

He hadn't participated in a round table meeting for a long time due to his retreat. So, he called a temporary meeting to assess the current situation. All battle group leaders, including Eighteen Apostle Groups, Three Kings Team, Song of the Sirens, Doomsday Valkyrie, and Giant Soldier Roar, arrived.

Among the 18 Twilight Cavalry, after the Blood Knight's promotion to level six a hundred years later, Ash Knight, Divine Light Knight, and Black Knight have all become level six experts in succession, truly becoming formidable figures in their own rights. The remaining older generation of knights who haven't been promoted are also peak level 5, not too far behind.

The middle generation has all reached Late Stage.

Steel Dragon Knight is still a Fifth-Circle Perfection Wizard, now striving for Perfection in nine talents. In the near future, another Sixth-Circle Wizard will rise.

Levi also noticed that a familiar figure from among the new generation knights was missing.

Snapping Turtle Knight.

It turns out that within these thirty years, a holy temple member soared to prominence, reaching late-stage level 5, surpassing Snapping Turtle Knight who had been stuck in the Mid Stage for a long time, and also taking over the battle group.

This newcomer is called the Jade Elephant Knight, with quite remarkable talent and born with divine power, although not as exaggerated as the Fire Dragon Knight. Coupled with the Giant Elephant Secret Medicine brought by Levi, his cultivation progressed rapidly, outpacing Snapping Turtle. This put increased pressure on the other new generation knights who had not yet reached the late-stage level 5. Of course, the Fire Dragon Knight, a freak already at peak level 5, was not included.

Snapping Turtle Knight returned to a regular position and continued to work hard, hoping to one day return to the ranks of the Eighteen Riders.

The Warlord of the Barbarian Ancestor battle group, White Wolf Girl, has broken through to level six and can transform into a gigantic white wolf. In her transformation, with the silver moon hanging high, she is both beautiful and dashing. Every time she pioneers in the Nightmare World, she is a beautiful sight to behold.

Levi, looking at the members full of zeal, said:

"According to current intelligence, a Blood Battle may come within a hundred years. I hope that in this century, our organization can give birth to more level six experts. I also hope that everyone will hone their actual combat abilities in the Nightmare World, and show off the style of Ancient Dragon Continent and our battle group in the Blood Battle! Tell me loudly, are you ready?"

Waves of voices surged in response.

"Giant Soldier Roar is ready!"

"Blood Mission is ready!"

Levi said loudly:

"Good, everyone is spirited!"

He is now also brimming with the desire to engage in battle.

As the saying goes, train soldiers for a thousand days, and use them for a moment. The Ancient Dragon Continent has been lying dormant for hundreds of years and has produced so many native level 5 and 6

experts, with an even larger base of middle and low-level combat power. Besides top experts and heritage, it is already not inferior to those down-and-out top wizard organizations.

As long as the top echelons of Wizard World can hold on, he has the confidence to lead Ancient Dragon Continent through this catastrophe!

He believes in Legendary Wizards and believes in Sauron!

...

Speech Day.

Many wizards from the human realm and sub-dimensional portal came to see the three legendary figures. Levi didn't go but watched the live broadcast at home.

He saw those three towering figures, like Gods, hard to look at directly.

One of them, with an oval face, long, shiny purple hair, and a high bosom, arms crossed over her chest, seated high upon the Thunder God Throne, a long, beautiful white leg extending from beneath her purple split wizard robe—undoubtedly the Lady of Thunder. Her presence was too overwhelming, just like a Lady Thunder God; even watching the projection, Levi felt breathless, exclaiming at her terrifying aura.

Another, with a majestic appearance and a composed demeanor, as immovable as mountains, with white hair and a white robe, holding a scepter, surrounded by the phantoms of a thousand mountains—this is the Thousand Mountains Immortal, a typical image of a powerful wizard.

At the center, the one he had already met once and who had treated him well, Lady Gullwig, whose beauty and otherworldly demeanor made her the center of the universe where she stood.

"True Ancestor of Frost, Lord of Thousand Mountains, Lord of Thunder Realm, every Legendary Wizard must have their own Legendary Profession. I wonder what my Legendary Profession will be? It's truly exciting."

Levi couldn't help but wonder.

The speeches of the three Legendary Wizards were passionate and inspiring, bringing the tension and excitement of the eve of war to a peak.

Having seen the power of Legendary Wizards firsthand, the lower-ranking wizards felt much reassured.

Chapter 1940: Legendary Appearance!

Blood Battle Command Center mentioned that the Abyss would not only invade the Wizard World; their invasion is indiscriminate, so it's only a segment of their forces that comes to Nora.

This blood battle, as long as we unite and cooperate, the Wizard World will inevitably pull through.

...

Endless Sea.

A certain island.

A terrifying aura surged skyward.

The figure of the Golden Prince emerged, feeling the power of the seventh-circle, muttering to himself:

"Seventh-circle now, some people must pay the price for the death of my son."

Over these years.

The Law Enforcement Department has already closed the case of the Electric Eel Wizard, and the Molten Gold Wizard King has gradually moved on from this matter, no longer obsessed with finding the murderer; however, as the biological father of the Electric Eel Wizard, the Golden Prince was not content.

"Lord Victor, Fire Dragon Ace, although I have no evidence, you two are the most suspicious of causing my son's death. This matter must not be left unsettled."

As Lord Victor's fame soared, the Golden Prince noticed that Victor's sword style, when he killed the Void Spirit Clan and the similar sword that killed the Electric Eel and the Schubert Family's primordial soul, were somewhat similar.

Moreover, Victor and Ace are friends, and considering the relationship between the Fire Dragon Shop and the Schubert Family, it indeed seemed possible.

Additionally, after his interrogation, the Schubert Family Master even said.

The Electric Eel Wizard had once attempted to deal with Ace, but failed.

Therefore, the death of the Electric Eel was most likely due to Ace enlisting Victor to act, naturally with the motive of revenge.

And Victor, with his strong talent and connections, therefore had a powerful backing, hiding this matter for him.

Of course, he had no evidence, and it might be a false accusation against those two. So he wanted to capture them and use the soul-searching spell to find the evidence.

Previously, with only the strength of Sixth Circle Perfection, he had no courage to act. After all, Victor had even used a secret sword to kill a Level 7 Void Spirit Clan, although with the assistance of a wizard battle group, but his Sixth Circle Perfect Cultivation was genuine. Venturing recklessly would be a death wish.

Thus, besides his own advancement, over these years, he had also been seeking power outside his family, trying to capture Victor and the Holy Infant without exposing his family, and now preparations were almost ready.

"Just wait, once the Blood Battle begins, I will personally use my methods to clear this up!"

...

Midland Continent.

At an auction site.

The host smiled and said:

"This 'Level 7 Earth Element Core,' 400 million Aether Stone, does anyone else want to bid? If not, it will be owned by Master Fire Dragon."

After a moment of silence, no one bid.

Although it was a Level 7 Earth Element Core, it was, after all, just a material.

With 400 million Aether Stone, buying a Sixth-Ring Top-Grade Wizard Tool would even leave some surplus.

Other than wealthy individuals like Master Fire Dragon, which Sixth-Circle Wizard present could afford it? Even Seventh-Circle Wizards would feel the pinch; they would rather invest in cultivation resources or save money to refine and upgrade their Soul Artifacts.

In the end.

Ace successfully acquired the Earth Element Crystal Core and headed back home, personally delivering the item into the hands of his master.

Levi said:

"Good work, next keep an eye out for wind-element cores, by the way, do you have any funds left?"

The Holy Infant said:

"I have, I just held a private auction recently and sold all the practice pieces I've accumulated over the years, and there's still some money left."

Levi was very pleased.

Ace was indeed a frugal and excellent duplication.

The Level 7 Earth Element Core obtained from the Elemental Lord of Earth contained extremely dense energy, not inferior to the Elemental Gem of the same level, perhaps even better.

Levi embedded it in the 'Doomsday Fist,' his lips curling up.

"Now that everything is ready, it's time to go to the Nightmare World and take back what belongs to us."

...

Nightmare World.

Black Dragon Territory.

Below Triss Wizard Tower.

Levi smiled and said:

"My lady, I've come to visit you."

The window of the wizard tower opened, and Triss looked down with a smile brimming on her face.

"It's been thirty years since we last met. Aren't you about to reach the seven-circle? Don't be afraid to hit me with the news, I can handle it."

Levi smiled helplessly:

"How can it be so soon? It's still a long way off."

At the tea table.

Triss said:

"That General of Gluttony came to our territory again recently, devoured several battle groups, and now everyone is unable to commence clearing new territories. As a seven-circle, it's a bit difficult for me to kill her."

Levi said:

"Lady, rest assured, I came here specifically to solve this issue."

Triss asked:

"Is your Giant Whale King Corpse Demon repaired?"

Levi shook his head.

"No, we do not need a Level 7 Corpse Demon; just the two of us combined can handle it."

Seeing Levi so confident, Triss sighed:

"You really are a freak, I'm even suspicious that I can't beat you now."

Levi laughed loudly.

"How could that be possible, let's go, we can't delay any longer."

For this trip, he did not bring Hundred Flowers with him but only borrowed the rare treasure "Struggle of the Trapped Beast."

Not long ago, Hundred Flowers reached the Maximum of sixth-circle in spiritual force, and twelve Witch Marks were branded on her as well.

Levi had recently come out of seclusion, and she also underwent a long seclusion, hoping to refine her primordial soul spell to Perfection before the Blood Battle began, preparing for the advance to the seventh-circle. Looking back suddenly, Hundred Flowers was also nearly eight hundred years old, having stayed at the six environments for five hundred years; she should advance too.

...

Gluttony Territory.

Below Seven Sins City, the land of the General of Gluttony.

A woman as large as a mountain sprawled on the ground, voraciously enjoying delicacies while listening to her subordinates' report.

"General of Gluttony, I've heard that Arrogance General has been severely injured on the frontline battlefield recently and returned to his territory to recover in seclusion."

The General of Gluttony devoured massive amounts of food, her crimson tongue licking the corners of her mouth.

She sneered inwardly.

"Heaven helps me, in this Seven Sins City, aside from the City Lord and Arrogance, I fear no one else. The City Lord has been summoned away by the Tyrant of Horror to participate in a high-level battle; his life and death uncertain. Now, I am the strongest in Seven Sins City!"

Clap clap clap!

The General of Gluttony stood up, happily slapping her belly.

She planned to visit the Arrogance Territory to check on that woman's condition. If she is really severely injured, she wouldn't mind devouring Arrogance, using her as nourishment to advance to the mid-stage of Level 7. Once she reaches the mid-stage, she'll go to the Black Dragon Territory and devour that woman Triss and the Black Dragon Lord!

She had barely left the Gluttony Territory when suddenly, a terrifying aura descended from the sky, a gigantic Colosseum enveloping the area.

Triss pulled the Demon Dragon Whip from her slender waist, casually striking it against her palm.

"Fat woman, prepare to die."
