

## **Wizard 194**

### Chapter 194: Red Lotus Form! (3)

This was a purely explosive Special Effect that could enhance Levi's attributes in all aspects.

It was an incredibly powerful skill.

Levi had tested it as soon as he obtained it.

After using the Red Lotus Blood, all of his attributes had been significantly enhanced. The increase varied slightly depending on the attribute. For some stronger attributes, such as the main attribute of the Red Lotus Breathing Technique (strength), could be increased by 50%. As for some weaker attributes, such as speed, they only increased by about 10% of the original. Nevertheless, any increase, even if it was only 10%, was already terrifying.

Especially for someone at Levi's level, every 1% increase in attributes represented a significant advancement.

During battles, when all his body's attributes suddenly increased by ten to fifty percent, it was an extraordinary boost.

However, the Red Lotus Blood had its drawbacks.

The strain on the body was considerable. After Levi used it last time, he needed a recovery period of half a month. During this time, Levi's strength was not at its peak.

Thus, the Red Lotus Blood was a skill that came with significant costs. It was a trade-off where Levi inflicted damage on the enemy while his own side suffered a smaller but comparable level of damage.

Levi believed that in the world, there were only a few individuals who could make him use the Red Lotus Blood willingly.

With his current strength, even if the Fist of the Empire came, he would have to kneel before Levi.

In addition to the breathing techniques, Levi's Black Devil Blade had also reached the Maximum of level 2.

Levi-

[Black Devil Blade: level 2 (Maximum, breakthrough available)]

Perhaps due to his limited spiritual power, he was still unable to comprehend the third stage, the evil spirit lingering.

However, the Maximum of level 2 Black Devil Blade was already very effective for him.

He could now condense the black gas into concealed weapons and throw them up to a hundred meters away, almost the same range as an arrow.

But the power of the black gas concealed weapons was formidable. It could tear through armor and penetrate the defense of a grand knight.

"Now, both my close-combat and long-range attacks are much stronger than last year. It's just a shame that there's no worthy opponent. Life is truly as lonely as snow." Levi sighed.

He was indeed powerful, not boastful. His strength was real.

The current Levi, even if all Four Generals of the MO family attacked him together, they wouldn't last more than a few rounds. Levi could defeat them with a single palm, as easily as dealing with children.

Levi had mastered the Golden Ripple Divine Palm to perfection, and he had become increasingly adept at using it. With one strike, he could break his opponent's meridians, shatter their bones, and unleash the force of the ripples, wreaking havoc on their internal organs!

This was an ultimate technique!

A move that could guarantee a kill!

Levi stepped out of the shelter.

"Now that I've mastered the basics of Meditation Art, I can slowly cultivate it

"Next, I still need to gather information about the four great families." "Perhaps the Duke of Montenegro's son might know something."

"After staying at home for so long, it's time to go out and explore."

Levi was now full of confidence. Unknowingly, he had already reached such a high level on the path of becoming a knight that he could stand at the summit, overlooking all others.

"Legendary knight, I'm getting close." "However, I should still remain low-key."

"I don't need to show off in front of the Church."

"To the gods, legendary knights are just slightly bigger ants. Whether it's an ant or a legendary knight, does it make a difference? They can be crushed with a flick of a finger."

Levi knew what was going on.

He packed his belongings. This journey shouldn't take too long.

The main purpose was to settle things with the Montenegro Mountain family and the Silversilk family.

"I heard that the Earl of Silversilk defected to the Tuva Empire. It's a good opportunity for me to revisit the old place. I wonder where that kid from the Fist of the Empire is now." Levi mused.

Not long ago, he had been running in fear from the aftermath of the Fist of the Empire.

But now, he was no longer afraid.

Even without using the power of the seals or the abilities of a wizard, Levi was confident that he could defeat the Fist of the Empire.

This was his confidence in the Golden Ripple Divine Palm that he had created.

In a few years, the Golden Ripple Divine Palm would evolve into the Golden Revolving Divine Palm.

By then, Levi wondered who in the world could withstand his palm strike?

Three days later, Levi left the Black Water Valley.

The battle-damaged versions of the Four Generals of the MO family followed closely behind.

This time, Levi had another goal for this trip, which was to eliminate Magic Shark and the others and replace them with a new batch of living dead.

Other than Specter, Bloody Earl, whether it was the Magic Shark, Demon Mountain, or Demon Hai, were all severely damaged, affecting their combat strength.

Hence, Levi's immediate task was to recruit a fresh batch of living dead.

Currently, Levi's level-7 seals had a total of seven summoning slots.

However, Levi's standards had risen. Ordinary grand knights were no longer appealing to him. After the seven generals were fully formed, only top-notch grand knights would be qualified to join the Demon Army.

This way, he would be able to display his true power in a battle against a top-notch expert.

Otherwise, he would have been sent flying by the Duke of Montenegro's blade, just like that time.

Levi first went to Icewind City.

He met the Earl of Silver Mountain again, disguised as the Golden Warhammer.

"Lord Earl, this is the final transaction. Once this batch of goods is delivered, our deal will be completed," Levi said.

The Earl of Silver Mountain's expression was complex as he gazed at the Golden Warhammer. "Master, you should prepare to seek refuge in the south. I have just received accurate information that the Snow Demon has already appeared in Montenegro Mountain City. The kingdom and the southern nobles have abandoned the northern territory."

'What? It appeared in Montenegro Mountain City already? So fast?' Levi couldn't help but feel surprised.

During this period, everyone had been preoccupied with the civil war, and Levi was focused on cultivating and gaining experience, causing him to completely forget about the Snow Demon.

He had not expected the Snow Demon to appear in Montenegro Mountain City so quickly.

"Yes, the sky in the center of Montenegro Mountain City... It split open, and people witnessed a burst of blue light. Then, blue snowflakes began to fall from the sky. Among the snowflakes, some people transformed into Snow Demons, biting their loved ones to death, consuming their own flesh and blood, and killing their comrades..."

"Master, winter has arrived. The true disaster has arrived.."
