

Wizard 203

Chapter 203: Return of the King! (3)

"Of course, it's true. My father is a Black Snake Knight," Levi said. "I see. I thought Baron Black Snake had forgotten about this city.."

An old man sighed.

"Welcome home, Baron Black Snake!"

"Welcome home, Earl!"

The people who understood the situation had already begun to welcome him.

To them, it did not matter who became the lord. As long as he could feed them, he was a good lord.

"Go home, all of you. It's okay."

Levi waved his hand and dismissed the crowd.

Next, he wanted to see what the kingdom's attitude was.

He had severely injured the Seven Godly Swords! What would the kingdom do next?

No matter what, Levi had his residents of Black Water Valley enter Flower City.

Since there was no place to stay for the time being, they could only remain in Flower Castle for the time being. Anyvway, Flower Castle was massive.

When the Earl of Blood occupied the castle, it was renamed Bloody Castle. Now that Levi was back, he had to change it back.

Levi changed his name to Black Snake Castle to publicize his sovereignty.

"Now, only Storm City is left. I've already made my stance clear. If the kingdom is kind, they should return Storm City to me."

Levi stayed in Black Snake Castle and stood atop the castle, waiting for the kingdom's response.

Now that he had captured a bunch of Red Willow Divine Sword's soldiers, it would depend on the attitude of the kingdom and the Duke of Red Willow's family.

Entering Flower City, Levi did not alarm too many people.

Everything was still the same as before, and the people's lives remained the same.

After some rest, Levi held a speech on the first day of the year 1015 of the Holy

Brilliance Calendar.

He held a speech in Flower City to announce the return of the Black Snake Family.

After returning to Flower City, Levi waited for the kingdom's people to arrive.

While waiting, he cultivated.

Although the progress of Meditation Art was slow, his breathing technique was improving very quickly.

There would be a breakthrough in a breathing technique every once in a while.

With a sufficient supply of secret medicine, the Vortex Beast Breathing Technique, a stubborn technique, was quickly pushed to the limit by Levi.

This breathing technique belonged to the third-rate category and was of excellent quality. It was not difficult to cultivate, but Levi did not have any secret medicine previously, so he had put it aside and did not cultivate it.

[Vortex Beast Breathing Technique: Level 7 (Maximum, breakthrough available, current progress 1/5), Special Effect: Top-tier Physique.

The Vortex Beast Breathing Technique was at its limit at level 7. It was indeed the most trashy breathing technique of excellent quality.

"It's a pity that physique-type breathing techniques are relatively rare. So far, other than the Vortex Beast, I've only found a basic physique-type breathing technique. "

Levi looked at the new special effect.

[Top-tier Physique: Your body's resistance to diseases, viruses, and toxins is abnormally strong. Your self-healing ability is also extraordinary.]

Levi lightly cut his arm with his dagger.

He wanted to test how robust the self-healing ability of Top-tier Physique was.

Fresh blood flowed out of the wound.

To a grand knight, this was just a tiny wound.

The blood on Levi's wound began to thicken and scab in just a few minutes without using bandages or potions.

Levi only felt a slight pain. His Transcendent Endurance made him highly resistant to pain.

Using a knife to cut his own body was similar to an ordinary person being cut by a corn leaf.

"What a powerful self-healing ability!" Levi exclaimed in his heart.

"This is only Top-tier Physique. If it's a Transcendent Physique, it should be even more powerful. It seems that I have to find more breathing techniques related to physiques. At the very least, I must raise this special effect to the

Transcendent level. This will be of even greater help to me!"

Overall, the bonus of Top-tier Physique to Levi was still small.

With Levi's current strength as a top-tier grand knight, even without this particular effect, it would not take long for him to recover from those superficial wounds.

Hence, Levi was looking forward to the Transcendence Physique even more.

Besides the significant breakthrough in the Vortex Beast Breathing Technique, the Ostrich Mountain Breathing Technique had also reached level 8, giving Levi the "Transcendent Power" Special Effect.

There are three special effects on him, including "Transcendent Power."

They came from the Giant Rhinoceros Breathing Technique, the Giant Breathing Technique, and the Ostrich Mountain Breathing Technique.

Levi intended to use these breathing techniques to break through the limits of the Red Lotus Breathing Technique, which was at the peak of level 10. Of course, the specifics would depend on the actual situation.

A low-quality strength-based breathing technique like the Giant Rhinoceros Breathing Technique was enough to break the limit.

As for the giant, he would temporarily keep the first-rate breathing technique of excellent quality like the Ostrich Mountain Breathing Technique.

Other than that, the different breathing techniques were not far from level 8.

However, level 8 to level 9 required 100,000 proficiency points.

Even with Levi's current cultivation speed, it would not be easy for him to reach level 9. He could only take it step by step.

On the other hand, the third level of the Black Devil Blade, the evil spirit lingering, still had no progress.

Levi estimated it would be difficult to achieve with his low-level wizard apprentice's spiritual power. Perhaps only middle-level wizard apprentices could master the evil spirit.

Levi's current spiritual power was already far higher than that of an ordinary grand knight. Although he was only a low-level wizard apprentice, he had his specialties.

The first-level Deep Sea Meditation Art had already made his spiritual power extraordinary.

It was just that there was no quantitative standard at the moment, so there was no way to show it.

The benefits of increasing one's spiritual power were huge.

Levi's spirit was much better than before, and his senses were sharper.

Coupled with the Advanced Vibrosensing Special Effect, everything within thirty meters was Levi's absolute domain.

Within this range, he was an existence that controlled everything!

Levi did not know when he would be able to enter the wizard world, so he was constantly paying attention to the changes in the fire paper.

At the same time, in the capital, the news that Baron Black Snake had returned to Tulip Hill finally reached the royal palace. The young king listened to the messenger's report and thought deeply..
