

Wizard 207

Chapter 207: Full Moon Night, Feast of Blood! (1)

Levi cultivated for the next few days while reading the monster manual he had just obtained.

Franken was a celebrity in the wizard world.

He came from the Life School of Thought, and his primary skills were Monster Studies, Mutation Studies, Bloodline Studies, and Transformation Studies.

Especially in Monster Studies, Franken wizards were highly famous, also known as “Monster Franken.”

This was because he had personally created many famous man-made monsters.

"Stan" was one of them. It was a stitched monster with infinite strength. The primary material used to make it was the corpse of a grand knight. Of course, it would be better if there was the corpse of a Giant, but the Giant was more complex to provoke than the grand knight.

Stan was much stronger than a grand knight.

This was because he was a monster stitched together by a wizard. Not only did he combine the powerful physical attributes of a grand knight, but he also had some spell abilities. He was the best choice for many wizards to guard their homes.

Some poor souls who accidentally entered the wizard's residence would usually end up miserable after meeting Stan.

Because of Stan's fame, Franken was also famous.

His work was regarded as a model by many monster lovers.

This included the creator of the Pot of Equal Value.

Therefore, when he created this Pot of Equal Value, he also placed a monster manual inside.

There were not many monsters in the monster manual, but they were all classic monsters.

Among them were the classic legendary monsters such as "Blood Clan," "Werewolf," "Ghoul," "Vampiric Bird," "Deer Head Spirit," and "Chicken Snake."

Levi read with great interest.

In this world, Blood Clan members were still relatively robust.

The Blood Clan was divided into two types, the Primary Blood Clan and the Secondary Blood Clan.

The original Blood Clan was the first generation from another plane. They were mighty, and usually, only official wizards could handle them.

However, the original Blood Clan members were scarce because they had come from the last ancient plane intersection. After that, there was no replenishment in numbers. The original Blood Clan members could not reproduce. They were all products of the "Blood River Will."

The Blood River Will should be a master of the Multidimensional Plane, similar to the Blue Frost Lord of the Blue Frost Plane. He was at least a demigod.

As time passed, the first batch of native Blood Clan who came in with the plane convergence gradually died of old age or unnatural deaths. As a result, the number of native Blood Clan members worldwide was scarce.

Even if there were, they slept in tombs deep in the mountains or remote ancient castles.

The original Blood Clan members had a long lifespan. They could survive for thousands of years while in deep sleep. To humans, this was almost equivalent to immortality.

Therefore, in the classification of wizards, the Blood Clan, Giants, and elves were famous for their longevity.

As for the Secondary Blood Clan, they were the servants of the native Blood Clan members who had been transformed using ancient rituals.

This was what most people called the “Blood Clan.”

These Blood Clan members were afraid of sunlight. They hid in the crowd and drank human blood in the dark.

Of course, some Secondary Blood Clan members possessed strong willpower and moral sense. They were blood-sucking livestock, but such people were relatively rare.

To the Blood Clan members, human blood was like delicious milk tea, while livestock blood was like spoiled milk that was difficult to swallow.

"The Secondary Blood Clan members should be causing trouble in my territory. The strength of the Secondary Blood Clan members is generally at the level of a grand knight. Some of the stronger ones might have the level of a top-notch grand knight or even a legendary knight," Levi muttered.

During this period, he sent people to the territories of other nobles to investigate. He found similar murders had also occurred in different regions over the years.

It was not because he came to the City of the Flowers that he became like this.

This meant that these people, who seemed to be from the Blood Clan, were not targeting him.

This was their way of living since ancient times.

It was just that he was more meticulous in his public security investigation.

That was why he found this clue.

The battle would be over if it were any other lord or ordinary person who died.

Due to widespread famine and war, they would not care about people dying daily.

These lives were not enough to attract the attention of those lords.

As long as these potential dangers did not threaten the lord's rule, no one would care about them.

Levi did not know if he should make a move against the Blood Clan.

According to Franken, the Blood Clan was more united.

Because they were small groups, they often emphasized internal unity. Only in this way could they survive in the cruel human society.

"Forget it; let's not bother about it for now. Let's let it go as long as it's not too frequent. I'm about to become a wizard, so let's not complicate things," Levi thought.

He was not afraid of the Secondary Blood Clan members. He was worried about the Primary Blood Clan, which only an official wizard could handle.

Levi estimated that if he relied on the power of a knight, he would need to be at least a legendary knight to deal with them.

"The Blood Clan members are born with extraordinary strength, speed, physique, and powerful recovery abilities. They even have spell abilities, which are much more powerful than a grand knight."

"However, Blood Clan members are more afraid of fire. My Flame Seal will be a sharp weapon against them. The black gas can also deal with them," Levi thought. Although he did not plan to take the initiative to attack, he had to be wary of others. If these Blood Clan members noticed him, he would not hesitate to attack..
