

Wizard 2071

Chapter 2071: Returning with a full load, Infinite Blade Technique!

"How can the Thunder Marsh Clan be so weak? I've already weakened myself to this extent, yet I'm still suspected by the Spider King."

"It's all my fault for being too strong; I really can't play the part of a weakling, sigh..."

Despite saying this, he continued to disguise himself as a member of the Thunder Marsh Clan, battling against the lightning and the golden prince.

With his hexagonal body quality, the attacks from a high-burst lightning mage like the golden prince became increasingly feeble.

The powerful technique from the golden scepter just now could only be used once in a short time.

The Star-devouring Spider King sensed something was amiss and decided to retreat promptly to minimize losses.

"Retreat! All retreat!"

It commanded its three avatars, including the Level 7 Mid Stage avatar that was pursuing Lord Victor, to retreat swiftly.

The black beast that Levi had severely injured also escaped into the void, disappearing without a trace.

The golden prince also wanted to leave but was surrounded by a thunderous mountain range, unable to shatter the void and escape.

Rumble!

A golden sun with a diameter of ten kilometers rose over the wilderness, its dazzling light making it impossible to look at directly.

The golden prince self-destructed...

Levi saw with his own eyes the phantom of the little spider dissipate into smoke during the self-destruction.

"Smart move, choosing to destroy the avatar rather than letting it fall into someone else's hands?"

The energy shockwave formed a wave of dense Qi like a vast ocean, endless and mighty.

Levi stood amidst it, unmoving like a mountain.

There, a golden scepter floated in the void, shining with brilliant luster.

"Wait, where is the storage item?"

Levi looked around, continually using his perception.

In the end, he discovered, aside from this scepter, there was nothing else.

"Could it have been destroyed by the remnants of the self-destruction?"

Levi carefully inspected once more.

"No... Either it was destroyed, or it was confiscated by that Spider King, leaving only the golden prince to carry the scepter into battle."

Levi inclined toward the latter.

It seems this Spider King is extremely cunning and suspicious, unlike an ordinary giant beast.

"Never mind, I've already profited greatly, no need to desire more; if it's with the Spider King, let it store it for me... Someday, it will all be mine."

"This place also needs to be marked, to come explore later if a Truth Oddity might be born."

He instructed Leon to capture the soul of the golden prince.

Levi collected the golden scepter and then joined up with Victor, hiding near the Thunder Realm.

Throughout, he only used his body and the power of lightning, without revealing any other abilities.

But it seemed that the Spider King hadn't fallen for the trick.

For this, Levi had no other means.

Subsequently, he waited for another half month.

He never saw the giant beast restricted area attack the Thunder Realm.

He didn't waste more time and wandered a while on the seventh floor before returning to the fifth level.

He took those wizard and knight seedlings away, leaving the Dark Ancient Tower.

...

Giant Beast Restricted Area.

In the fog, a massive shadow blotted out the sky, and green light flickered faintly.

After this battle, the Spider King pondered deeply, recalling those combat details.

Then, it communicated with an eight-level powerhouse from the Thunder Marsh Clan.

Finally determining that the Thunder Marsh Clan was likely disguised by a black-armored swordsman.

And another black-armored swordsman was likely another human in disguise.

"Lost another avatar, humans are so despicable and shameless. Luckily, I detonated the avatar in advance, or it would've been captured alive by that human again; just a pity about the Level 8 Exotic Treasure."

Although it couldn't use it, it didn't stop it from collecting treasures.

In its nest, the spoils from wizards it controlled were all piled together.

The useful ones were refined by it, the useless ones were collected.

"Whatever the case, this matter can't be separated from humans in Rune Land, they must be admonished to vent my anger!"

...

Thunder Realm.

In the central holy temple of the Priest Ancestor.

A colossal purple giant, standing two thousand meters tall, sat on a throne with a majestic posture.

Column upon column of magnificent Thunder Pattern Wood supported its grand hall.

The central pillar was more than ten thousand meters high, taller than a mountain.

"Recently, I heard that the Thunder Lake Dominator had an invasion by foreign enemies. Probably the humans mentioned by the Spider King from Rune Land. When did such a powerhouse emerge? Or did foreigners find a special way to linger on the Saint Roland Continent?"

"Wait! The Spider King is extremely cunning; thinking like this, I might fall into its trap. This incident is likely orchestrated by the Spider King itself! Simply to justify its future invasion of the Thunder Realm! Who knows if the loss of its avatars is true or false? If it's true, it must be in a relatively weakened state now. If I were to act, what are the odds of success?"

...

Soon after.

The Rune Land endured a beast siege from the Giant Beast Restricted Area.

Under the leadership of several black beast lords, tens of thousands of black beasts invaded human cities.

The Rune Saints joined forces to repel the black beasts.

The news of the black beast attack reached the other alien races in the Three Realms and Four Lands.

The Flame Country issued a warning to the Giant Beast Restricted Zone:

The Rune Land is a shared colony of the Seven Great Powers. We advise the Spider King to restrain itself, or we will consider dispatching troops to the Giant Beast Restricted Zone.

Similarly, the Merfolk Palace and Feathered People Heavenly Island expressed their dissatisfaction with the unauthorized attack from the Giant Beast Restricted Zone.

The humans on the Saint Roland Continent struggled for survival amidst these powerful alien races.

...

Returning to the Ancient Dragon Continent.

Victor brought back the [Wound-breaking Blade] to Gondor City.

The Level 7 medicinal herb [Flowing Fire Fruit], Earth-Grade Oddity [Red Flame Snake], Level 7 Exotic Treasure [Flame Shield], and that pile of crafting materials from black beasts and mines, including the damaged Seven-Ring Witch Artifact Robe, were all sent over by Victor.

Chapter 2072: Returning with a full load, Infinite Blade Technique!

Once the Holy Infant reaches the seven circles, it can start refining.

Levi has already meticulously planned the future of the Holy Infant.

Besides weapon-making, the most powerful seven-circle alchemy creation from Lemay's alchemy blueprints, the Titan Giant Divine Weapon, also needs to be refined. Once done, it can be used to guard the Ancient Dragon Continent or other important places.

Levi will naturally refine the Thunder God's Heart, as he has already refined the Morning Star-level oddity, Thunder God's Finger, as part of this series. Once refined, his Thunder God Projection and thunder abilities will surely achieve qualitative leaps.

The Golden Scepter is an eighth-level exotic treasure with restrictions from the Letney Family.

So, Levi temporarily stores it within the Ancient Banyan Fairyland, waiting for the opportunity to break the restriction.

This scepter should be the family's bestowed lifesaving ace for the Golden Prince.

It can generate a powerful Thunder Barrier and unleash mighty Thunderbolt Beams.

Even a seven-circle ordinary wizard can perform effects comparable to Seven Rings Perfection.

But due to low cultivation, it cannot fully unleash its power, being effective for only a single strike.
Thus, the Golden Prince only uses it in critical moments.

Both the Golden Scepter and Triss's Demon Dragon Whip are pure combat-type personal exotic treasures.

Only within the Eight Environments can their full power be unleashed.

Overall, they are priceless, impossible to measure with Aether Stone.

In a top-level organization, they are important exotic treasures, likely in limited quantity.

After a final inventory check, Levi discovers the trip to the ancient tower this time, besides all the treasures and resources.

Just the wizard's storage bag alone yielded 600 million Aether Stones.

This shows that Jin's treasure hunting abilities are indeed extraordinary.

Now, Levi's Aether Stone cash reserves have reached 3 billion.

He estimates that even a typical eighth-circle wizard might not have so much cash.

Liquidating the entire assets of a typical high-level wizard organization wouldn't fetch this much.

According to insider information from Gandaph.

Soon, the Wizard Council will establish a new organization called the Blood Battle Store.

This store operates independently of the merit exchange system, where wizards can purchase products with Aether Stones.

Besides selling some official demon materials, the Blood Battle Store will also offer spell models, cultivation resources, heavenly materials, earthly treasures, and even Truth Oddities.

Every century, it will hold a Blood Battle Auction, selling priceless items.

Levi analyzes the establishment of the Blood Battle Store.

He predicts that it may be because the official Aether Stone reserves require replenishment.

Thus, this method is used to gather Aether Stone resources from the populace.

Aether Stones are not only currency but also essential for the operation of many large-scale arrays.

Even if the Wizard Council had prepared many in advance, the hundred-year blood battle will inevitably require timely replenishment.

Being a transcendent civilization, levying a large war tax will only reclaim some money from ordinary wizards.

The primordial soul wizards, who have great status and are quite unruly, cannot be compelled by the Wizard Council.

If internal conflicts occur during the Blood Battle period, it would be detrimental to the war situation.

Thus, using excess resources to reclaim Aether Stones from these primordial leaders seems reasonable.

Levi's 3 billion Aether Stones are prepared for the Blood Battle Auction.

By then, he might acquire some rare treasures seldom seen otherwise.

After some time.

The 500,000 blind boxes purchased from the Hell Nether Market are completely opened.

The final result is a stable performance.

types of primordial soul spells: 2 six-circle and 1 eight-circle.

The six-circle ones need not be mentioned; for Levi, they are of little use.

Only for enriching his and the organization's spell library.

But the eight-circle spell turned out to be "Eight-direction Fierce Sun."

It is the advanced spell following "Seven Suns Falling Domain."

Redeeming it from the Merit Shop would require a full three million merit points.

Nearly equivalent to half the value of a Morning Star-level oddity.

This made Levi pleasantly surprised and saved quite a sum.

Additionally, there were 4 combat techniques.

Namely: "Infinite Blade Technique," "Dragon Whip," "Divine Hammer," "Wandering Snake Nine Changes."

Levi briefly browsed through them.

He found both "Dragon Whip" and "Divine Hammer" to be impressive in name but actually relatively ordinary Level 6 Battle Techniques.

Given his current control over weapons through the "Ten Absolute Extremes."

Practicing such combat techniques only holds significance if of high quality.

The optimization function of the "Extreme Dao Strategy" is mediocre.

"Wandering Snake Nine Changes," however, can rival the combat technique "Warlord Catalog."

Whether in concept or level, it's quite excellent.

Once mastered, the technique allows one to move as nimbly as a serpentine snake, with a transcendent movement and cunning strikes!

Levi believes it might help him perfect the "Ten Evil Martial Arts" and unlock the "Heavenly Snake Dao."

As for the "Infinite Blade Technique," it's exceptional. The clues from the memory blind box reveal.

This was created by the strongest in a medium plane, a Level 7 Expert.

By mastering this technique, the entire body could transform into various weapons.

This is not simple illusion, but truly possessing the power of those weapons.

"Use the body as a furnace, flesh as weapons, blood as fire, bones as coal, and spirit to control Qi... Enter the unfettered Limitless Realm, forge the Limitless Blade based on different battle scenes, enemies, and techniques, achieving maximum damage!"

Levi regards the technique's introduction, feeling it's perfect for someone like him, a close-combat berserker.

"Though created by a Level 7 Expert, its foresight is high, and can be used indefinitely as a combat technique! If integrated with my 'Extreme Dao Strategy,' it's bound to evolve further. The master who created this technique seems akin to those Golden Knights who crafted 'Golden Cross Slash' during the Doomsday Era, limited by time and world. If they were here today, under the Golden Epoch of Nora, they'd surely achieve greater realms!"

Levi reflects deeply.

After summarizing all harvests within this period.

Levi promptly begins practicing "Wandering Snake Nine Changes" and "Infinite Blade Technique."

Days later.

The two combat techniques are gradually learned, recorded in the proficiency panel, followed by systematic cultivation.

On the God-forsaken Continent, Hundred Flowers continues demon-hunting, earning war merit.

On the Demon Slaying List, Harvis remains first with 70 million, surpassing Levi by 20 million.

However, Levi remains unconcerned, having gathered much from the ancient tower that requires time for digestion, allowing others several years' precedence.

After preparing the Scarlet Dragon Advancement Potion, he immediately enters closed cultivation.

Chapter 2073: Thunder God Body!

Midland Continent, Gondor City.

Dawn Tower.

Lord Victor immersed his spiritual force in the spell model before him, meticulously researching its Spell Constitution.

Moments later, he awoke, drenched in sweat.

"This Micro Lysis Technique is truly hard to master."

As Levi's duplication, Levi also wished for all of them to master this ultimate card, just in case.

As for whether they can learn it depends on their abilities.

Opening today's newspaper, Lord Victor's gaze shifted.

[Endless Sea Daily: The Golden Prince is dead, whereabouts unknown, cause of death unknown, the Law Enforcement Department has launched an investigation.]

"From this day forth, another unsolved mystery puzzles the Wizard World. Alas, the Molten Gold Wizard King, losing both his grandson and son..."

Died in the Dark Ancient Tower, even the Blazing Sun God Wizard arrived but couldn't uncover the cause of the Golden Prince's death.

When it opens again after a thousand years, who will still remember the Golden Prince?

The Letney Family's survival remains a mystery.

After all, this millennia is precisely the unprecedented era of major changes within the Wizard World.

Days later, Lord Victor began his retreat to refine the Wound-breaking Blade.

Fire Dragon Shop.

The Holy Infant received a big package bestowed from his true self.

First was the Level 7 Exotic Treasure Flame Shield, which he examined thoroughly, completely forged from Red Flame Star Gold.

After the Holy Infant refined it, a little red shield rapidly rotated around him.

"Sufficient to withstand the spell attacks from a Seven-Circle Senior Wizard, a wonderful treasure. Paired with my Snow Iron Dragon Armor, Purgatory Nine Dragon Umbrella, protection is significantly enhanced."

Soon, the Holy Infant also refined the Red Flame Snake.

Though merely an Earth oddity, it is birthed by Roman, holding commemorative value.

Conveniently enough, after refining, the Holy Infant was pleasantly surprised to find it birthed a special spiritual creature.

Extending his hand, a small red flame snake appeared hovering in his palm.

With a thought, the red flame snake stirred the fire elemental power between heaven and earth, its form began to expand.

Eventually, it transformed into a giant red flame snake hundreds of meters long.

"Being another combat spirit item, though incomparable to the Snow King and Lion King, it's still better than nothing. From now on, you'll be called Roman."

Thus, Roman achieved a certain rebirth.

Flesh turned to Long's Golden Fertilizer, soul into Leon's delicacy, memory became Levi's collection, and the Truth Oddity birthed from it became the Holy Infant's companion spirit item.

Even after death, its light and warmth continue to accompany the Holy Infant onward.

Touching and heroic!

The Holy Infant took out the Flowing Fire Fruit, consuming it, the pulp turned into flames, pouring down his throat.

He felt a powerful warm flow, beginning to enhance his primordial soul.

"Indeed, a three-thousand-year Holy Fruit, the effect on cultivation enhancement surpasses even the Morning Star Artifact."

Of course, the function of the Morning Star Artifact is more versatile.

In terms of value, it's still incomparable to the Morning Star Artifact.

Half a year later, the Flowing Fire Fruit's potency was refined and absorbed by the Holy Infant.

He opened the Klein Crystal Ball.

[Spiritual Force: 4855/5060]

"With one breath, enhanced over a hundred spiritual forces, too powerful, if consumed by an ordinary primordial soul wizard, it'd save decades of hard cultivation...Moreover, my Ice and Fire Holy Body also seemed to strengthen a bit."

The Holy Infant could feel his talent had slightly improved again.

With his current level, he could still continue to enhance, visible is the fruit's remarkable quality.

The Holy Infant harbored gratitude:

"Given such a precious treasure from my true self, I must rapidly advance to the Seven Circle, beginning the forging of the seven-circle witch artifact as soon as possible."

He now only needed 4 Witch Marks and over a hundred spiritual points to advance.

Within a hundred years, it can surely be completed.

...

Two years later.

Nora 320 years.

106th year of the Blood Battle.

Flame Mountain World, subordinate Federation Plane of the Nora Plane.

Here as well, demons invaded.

Flame Mountain World is an important mineral resource site.

The military hasn't abandoned here but dispatched battle groups to hold firmly, hunt demons.

Outside Flame Mountain City, a figure in a red robe, emitting a Seven-Circle aura, came to this place, visage unclear.

It was the Fiery Flame Servant·Gorwin.

As he looked at the reward board announcement on the city wall, his gaze trembled unrestrainedly.

"This Levi already ranks top ten on the Level 8 Demon Slaughter List, how is this possible."

He, rare Three Flames Talent, after retreat cultivation for a period, just managed to become a Seven-Circle Senior.

However, with such power, even dreaming of entering the top ten on the Demon Slaughter List, it'd only rank at most in the top fifty.

Of course, he was merely estimating, had not registered on the Demon Slaughter List, fearful of being identified by Levi.

Over two hundred years.

That Levi progressed from Sixth-Circle Wizard, realizing a counter-attack exceeding himself, now far ahead.

As for him, only hides in the remoteness of Flame Mountain World, watching Levi become the rising star of the Wizard World, celebrated by many.

"If not for him, my destiny would not be so turbulent."

Yet, revenge seems even more impossible.

Without the family's support, how could he avenge?

Fiery Flame Servant's lost soul-like figure vanished into the wilderness.

He planned to heed his father's words, quietly cultivating in this remote place, live out his life.

Should Flame Mountain World fall, he'd head to even further locations.

Nonetheless, with his Seven-Circle Senior strength, Three Flames Talent, and the wizard tower bestowed by the family.

As long as he doesn't act recklessly, advancing to the eighth-circle isn't difficult.

Even the Grand Wizard isn't out of reach.

As for Levi, if the boy were to perish in the Blood Battle, that would be ideal.

Chapter 2074: Thunder God Body!

If this child rises against all odds and becomes a Grand Wizard, or even legendary.

Then it has nothing to do with me.

In the vast universe, there will be no further intersection between him and Levi.

...

Ancient Dragon Continent.

In a desolate wilderness, full of scars.

Levi stood alone in the void, with Victor by his side, guarding him.

In the sky, the disaster brought by the Dark Tribulation gradually faded away.

His Scarlet Dragon Breathing Technique had successfully advanced to the nineteenth rank, achieving the seventh level standard!

Within his cells, the fourth Speed Divine Palace suddenly emerged, complementing the other divine palaces.

"Victor, you can return now."

After Levi spoke, Victor turned and left.

After refining the Wound-breaking Blade, Victor's spiritual force increased by 30 points.

As Levi expected, he gained the ability of Rust Poison.

Even when unable to kill an enemy with one strike, he could let them taste the power of the Tetanus Blade.

Levi then opened the proficiency panel.

Levi

Scarlet Dragon Breathing Technique: Nineteenth Rank (1/10,000,000), Special Effect: Red Dragon Body-Legendary (Level 7 Early Stage). Bloodline Dharma Idol: Scarlet Ruler; Blood Source Armor: Crimson Dragon Armor; Exclusive Weapon: Scarlet Shadow (Level 7); Bloodline Divine Patterns: 0/45.

...

"As expected, the Scarlet Dragon Breathing Technique only has 45 divine patterns."

With this Scarlet Dragon advancement, besides gaining the basic speed attributes of Level 7.

The other enhancements are not as good as the previous Crimson Emperor Dragon, Golden Brilliance Dragon, and Sky King Dragon.

After all, it's just an advancement of a legendary-level breathing technique, Levi didn't have high expectations.

To him, the most important aspect of the Scarlet Dragon is the Crimson Enslavement.

This is a true divine skill.

Without Crimson Enslavement, many tasks that could be easily accomplished would become complicated.

After reaching Level 7, the number of Crimson Enslavements increased to ten.

Currently, Levi occupies eight, leaving two slots unused for the time being.

The Scarlet Blood Prison, a battlefield "blood-sucking" domain skill, now has a diameter of 10 kilometers.

Comparatively, it's less than the 12 kilometers of Golden Brilliance Dragon and 15 kilometers of Crimson Emperor Dragon.

These are the differences in the quality of breathing techniques.

The effects of skills like Crimson Rot have also advanced further, reaching the seventh level standard.

What surprised Levi was the number of hosts for the assassination divine skill, Crimson Parasite.

It increased from one to two people.

This means, in the future, he can simultaneously parasitize two people and launch an attack at the same time.

"With the advancement of Scarlet Dragon, only the Nightmare Dragon and Death Ember Dragon remain."

Both these dimensional breathing techniques have recently reached their maximum level and are also awaiting advancement materials.

Currently, the Nightmare Dragon is also at the peak realm, not far from the maximum level.

Levi has mobilized his subordinates in the Black Dragon Territory to search for clues on the seventh-level Nightmare Dragon Clan.

Overall, these two breathing techniques are primarily functional.

Even if they can't reach Level 7 for now, the impact isn't very significant.

As long as the Crimson Emperor Dragon and Golden Brilliance Dragon keep up with the realm, enabling Levi to have overwhelming power and defense, he will remain invincible. The other breathing techniques primarily enhance his margin for error, making him more perfect and flawless.

In the coming days,

Levi stabilized the Scarlet Dragon realm while cultivating the Infinite Blade Technique and Wandering Snake Nine Changes.

The proficiency levels of both combat techniques soared rapidly.

A year later,

Levi quickly reached the fifth level in Wandering Snake Nine Changes.

The progress was unstoppable, with no bottlenecks.

It's just that, as his level increased, the cultivation speed began to slow down.

Given his current realm, reaching the ninth level maximum doesn't seem to take long.

The progress in Infinite Blade Technique was slower, but it also reached the fourth level standard.

This cultivation, Level 7, is the maximum limit.

By then, it can be integrated into the Extreme Dao Strategy, becoming a part of it.

After consolidating the Scarlet Dragon realm, Levi began to earnestly refine the Thunder God's Heart.

This is a Bright Moon Artifact, refining it will inevitably take some time.

He noticed that Hundred Flowers had already unknowingly entered the 72nd position on the Demon Slaying List.

"That woman is quite diligent."

Hundred Flowers politely declined Levi's support, which made Levi feel somewhat gratified.

Who doesn't admire independent and strong women?

Levi also read in the newspapers about the death announcement of the Golden Prince.

The Wizard World was puzzled.

What kind of deity silently took this seven-circle wizard away and, after a few years, killed him?

There are currently various rumors.

To be honest, Levi is also curious about what led the Golden Prince to appear in the ancient tower.

But shortly after he returned, Leon started hibernating.

He can only wait for Leon to advance to Level 7 to check the memory disc for answers.

Speaking of Leon, this kid seems to progress without any bottlenecks.

Levi is increasingly convinced that he is the "Nether Emperor" spoken of by the minotaur trio.

...

Endless Sea.

Letney Family.

An atmosphere of mourning.

Everyone looked at the portrait of the Golden Prince, feeling as if he was still present in sound and manner.

"Lord Molten Gold Wizard King, please restrain your grief."

The visiting primordial soul wizards whispered consolations.

Molten Gold Wizard King's gaze was calm, showing no sign of sorrow or joy.

He had many sons, but the Golden Prince was the most excellent.

The so-called "prince" means "the favored child of heaven."

He bestowed him the name "Golden" hoping he could shine for the Golden Lightning family.

Chapter 2075: Thunder God Body!

In the future, become your own successor.

And now, the golden prince, also distances himself with the Electric Eel Wizard.

An elderly man with golden hair, exuding the aura of Eight Ring Perfection, descends.

This is the contemporary family head of the Letney Family, Flowing Gold Ancestor Witch Butreao.

"Molten Gold, it's all in the past."

This strong figure spoke lightly.

The Molten Gold Wizard King said:

"I understand, I just want to know, who is targeting me, Molten Gold. If they dislike me, they can cause me trouble directly, instead of constantly targeting my descendants with no limits."

The Flowing Gold Ancestor Witch said:

"The family will help you investigate this matter, but be prepared; there might not be an answer."

The Molten Gold Wizard King suddenly laughed and said:

"Perhaps, soon, the answer will come by itself."

He believes that the one who killed the golden prince and conspired against the Electric Eel Wizard is the same person.

Only that person, and the force they represent, have the strength to quietly take away the golden prince.

Therefore, according to their pattern, the next plan of the culprit is likely to be against himself.

The murder of the golden prince and the Electric Eel Wizard is merely a warning from the culprit.

The Molten Gold Wizard King's heart was cold, with a nameless murderous intent burning in his chest.

"I'm waiting for you!"

...

Three years later.

Nora Year 323.

The 109th year of the Blood Battle.

years remain until the next opening of the Dragon Ruins Mysterious Realm.

Ancient Banyan Fairyland.

Above Levi's head, boundless thunderclouds gathered.

Behind him, the Thunder God Illusion from the Thunder God's Finger appeared.

In the thunderclouds, the sound of gurgling water was heard.

The elemental power of the thunder, dense enough to form a slurry, descended from the sky, falling onto the head of the Thunder God Illusion.

The Thunder God Illusion opened its mouth, greedily absorbing the power within like a whale swallowing the sea.

The illusion grew more solid, initially just a finger.

Now, even the entire chest and upper body began to solidify.

A heart composed of purple lightning emanated life force, trembling and roaring like an engine!

Buzz buzz buzz!

As the heart pulsated, a drumbeat like muffled thunder spread in all directions, endlessly!

For hundreds of miles, thousands of miles, tens of thousands of miles...

Until the entire Ancient Banyan Fairyland heard this unending drumbeat.

The Thunder God Projection behind Levi continued to expand.

A hundred meters, three hundred meters, five hundred meters, a thousand meters, until two thousand meters before slowing down.

The mountain-like Thunder God Illusion stood between heaven and earth.

Clouds floated above its head, mountain winds brushed past its waist, Dragons circled around it.

"Such terrifying aura."

"Feels like just a finger could obliterate me."

"Lord Dragon King has grown stronger again."

"Praise the Dragon King!"

Mana flew over, her mind shaken by the majestic Thunder God Illusion.

"Good fellow, almost as tall as me, it seems Levi obtained quite a bit in the Ancient Banyan Fairyland."

The Thunder God Illusion had its eyes closed, its lightning flickering non-stop.

This lasted for seven days and nights.

The Thunder God Illusion gradually shrank, finally equalizing with Levi.

Moreover, its face began to resemble Levi's.

Within the illusion, from the solid heart's ends, purple veins began extending like branches, continually branching out, until tiny capillaries spread throughout the body, stopping only then.

"The power of thunder, reshaping the body!"

The Thunder God Illusion stepped forward, entirely overlapping with Levi.

On Levi's skin, countless lightning runes flickered, his eyes like the Thunder World.

In his mind, the primordial soul showed a faint purple hue, with electric light dancing on its surface.

"A Thunder God's Heart almost completely transformed me, truly a Bright Moon Artifact!"

"This Thunder God's Heart should be the most critical part of the Thunder God Series, hence its extraordinary effect. Other Thunder God Series Artifacts might merely be Morning Star-level."

This pattern was found by Levi while refining the Cold King's series artifacts.

The Cold King's Eye is Morning Star-level, whereas the Cold King's Finger is just Sky-level.

It's like the human body; the importance of a finger surely can't be compared to an eye.

After three years, Levi finally completely refined this Bright Moon Artifact.

He extended his fingertips, with arcs jumping beautifully.

With every breath, the power of thunder surged forth, turbulent, blinding.

Seeing the surrounding crowd, Levi laughed and said:

"It's nothing, just a minor breakthrough, you all disperse."

Mana whispered to herself while heading home:

"Minor breakthrough... still his familiar style."

Levi adjusted his breath alone, placing his hand on the Klein Crystal Ball.

[Spiritual Force: 8520/13079]

[Spell Power: 8.52 million]

"Spiritual force increased by 160 points compared to before refining the Artifact, though not as much as the 200 points from the White Emperor Holy Sword, still strong enough. Saved me about twenty years of arduous cultivation, unthinkable for other Primordial Soul Wizards."

Levi introspected his mind.

After refining the Thunder God's Heart, the primordial soul's color changed slightly compared to before.

It emanated a shining amethyst light, like a real Thunder God.

This artifact transformed him on a deeper level.

Opening the proficiency panel.

Levi

Aether Meditation Art (Seven-circle): Level 15 (1/800,000), Special Effect: Thunder God Body (Remnant)...

...

The previous Thunder Talent, Thunder Right Hand, from the Aether Meditation Art.

Has already been replaced, becoming a new talent, Thunder God Body (Remnant).

Chapter 2076: Thunder God Body!

"After fusing with a higher sequence of artifacts, the previous low-grade talent will be absorbed and evolve towards a complete talent. If I can refine all the artifacts of the Thor's Sequence, then I will possess a true Thor's Body."

In a certain way, this is similar to the evolution process of the Holy Infant's [Ice and Fire Holy Body].

"The complete Thor's Body talent, though not recorded in the [Illustrated Guide of Strange Items], must surpass the supreme talent of the Thunder Wizard. With such talent, cultivating the lightning faction spells will progress by leaps and bounds!"

Currently, Levi has only collected the [Thunder God's Heart] and [Thunder God's Finger].

It is known that, just as recorded in the [Illustrated Guide of Strange Items], under the Thor's Sequence, there are also [Thunder God's Eye], [Thunder God's Feet], [Thunder God's Breath], [Thunder God's Drum], and a series of other artifacts.

Among these artifacts, the worst quality is Morning Star-level, while the best, like the [Thunder God's Drum], is a Bright Moon-level artifact, similar to the [Thunder God's Heart].

Outside the Illustrated Guide of Strange Items, it's unknown if there are still higher-ranked Glorious Sun-Grade artifacts in the undiscovered Thor's Sequence artifacts!

Since this sequence can be given the name [Thunder God], there should be Glorious Sun-Grade artifacts.

He believes that the Thor's Sequence artifacts should have formed from the fallen demigod-level powerful beings of the lightning faction.

The sequences that the Holy Infant refines like the [Flame King] and [Cold King], or the [Wind King] sequence that Gandaph refines, are somewhat inferior to my [Thor's] sequence. These sequences, at their weakest, are only Sky-Grade oddities, and at their strongest, should be Morning Star-level.

Levi exchanged for the [Hand of the Winter Emperor] to further enhance the Holy Infant's Ice and Fire Body, while also achieving yin and yang balance, and stability of ice and fire.

Besides the birth of the [Thor's Body], this artifact further transformed Levi's [Thunder God Projection]. Once released, it can form a terrifying projection 2000 meters tall, with an aura that surpasses the manifestation of the majority of Seven-Circle Senior Wizards.

With a wave of the hand, he can mobilize the power of thunder elements within a radius of thirty miles, a feat only achievable by senior seven-circle wizards; as for the actual combat capability, it still needs testing.

Levi named the new [Thunder God Illusion], [Thunder God Generation 2], after fusing it with the [Primordial Spirit], making the combat power of the [Thunder Emperor] simply off the charts.

In addition,

the biggest function of the [Thunder God's Heart] was the birth of the companion spirit.

In the Divine Ring Tower in his mind, Jin and ABiao huddled in a corner, trembling with fear.

In the central area, a creature with the upper body of a human and the lower body like a snake lay dormant.

The human body part had an indistinct face, but antlers could vaguely be seen, and its eyes emitted a destructive aura.

On its abdomen, a complex and mysterious array formed a pattern of war drums.

Its arms were thick, as if they could tear the sky apart.

While on the snake body, it was densely covered with purple scales, sharp and distinct, with bone spikes protruding from its back.

The snake tail also had barbs like a scorpion's tail, standing erect like a lightning rod.

Such an appearance clearly seems formidable.

Jin and ABiao, these two with the combat capability of a five, dared not approach.

And this, is the companion spirit of the [Thunder God's Heart].

Considering it's not an animal spirit, Levi didn't use perfunctory names like ACat or ADog.

Instead, similar to the Sun Face from before, it was named [Si Lei], meaning "master of thunder."

Si Lei, undoubtedly, is an absolute combat spirit.

Levi could feel the terrifying energy within it capable of destroying everything.

He suspected that even seven-circle senior wizards couldn't beat his companion spirit...

"At this rate, in the future battles, I won't even have to do anything. A bunch of various summoned creatures and projections can just crush the enemies." f

Levi couldn't help but make a quip.

After several years of incubation, Levi finally digested a large portion of the massive gains from the previous period.

He is only more than four hundred points away from the mental force required for a seven-circle senior wizard, which is 9000 points.

Within fifty years, he can advance to seven-circle senior.

"Once Leon wakes up, we can return to the God-forsaken Continent to hunt demons, going all out to earn 100 million war merits and secure the [Hand of the Winter Emperor]."

He opened the Demon Slaying List.

Having not competed for some time, his rank dropped from 9th to 10th.

However, it's not a big deal; as long as it's not 1st, the basic ranking rewards for the top ten are the same.

war merits in a year, and only 500,000 in 100 years.

These rewards are mainly symbolic and naturally despised by those who can reach the top ten.

The real main rewards are the "season settlement rewards" after the blood battle ends.

At that time, the Wizard Council begins to confer merits and rewards.

If Levi can maintain his position in the top ten, the rewards will surely be generous.

After entering the top 70, Hundred Flowers' progress slowed down.

Levi kept reminding her that safety comes first.

So she advanced steadily, avoiding carrying out very dangerous missions.

The Gondor Three Heroes, all in seclusion, also experienced a steady ranking decline over the years.

But so far, they are all still in the top 100.

Link, on the other hand, is advancing swiftly, to Levi's surprise.

"This guy, could he also be a reincarnated legendary wizard?"

The talent of the secret sword + the talent of the Energy Sect undoubtedly makes Levi think.

Furthermore, being able to figure out the sword array and the path of the array by himself is also genius.

...

A year later.

Nora 324, Blood Battle Year 110.

Ancient Banyan Fairyland, Black Soul Demon Tower.

Chapter 2077: Thunder God Body!

There was movement from Leon's retreat.

Levi smiled with joy.

"The little guy is finally reaching Level 7."

He entered the dead Qi-filled world of the Demonic Tower.

A tiny golden figure stood in the void, with endless tribulation clouds overhead.

Within the tribulation clouds were terrifying evil spirits formed from countless grudges, fierce spirits!

Levi pondered:

"Why is Leon like me, needing to undergo tribulation to ascend to Level 7?"

Unable to comprehend, Levi could only attribute it to Leon's defiance against the heavens.

"The souls mercilessly devoured by Leon always haunt him during each ascension, affecting his tribulation. It seems relying on consumption cultivation also comes at a cost."

The golden figure was quickly submerged in the ocean of evil spirits.

"Die!"

"Return to nothingness with us!"

"Heh heh heh!"

Countless murmurs echoed in the Black Soul Demon Tower.

Golden light erupted in thousands of rays, and there appeared a golden beetle, crowned by a golden sun, soaring through the sky!

Under the golden light, those grudges and evil spirits vanished into smoke.

Then they turned into mysterious powers, surging into the beetle's body.

This beetle was not large, about a meter in diameter.

After the tribulation, it seemed to feel sleepy, falling from the void to sleep soundly on the ground.

Beneath the beetle's shell was the body and face of a small boy, somewhat plump with baby fat.

"Leon is becoming more human, with insect traits further receding."

Levi picked Leon up and left the area.

A month later.

Leon finally woke up.

It opened its golden shell, fluttered its wings, and flew around Levi.

"So hungry, so hungry, so hungry!"

Levi immediately gave Leon all the cans it had stored, including the golden prince's.

After the advancement, Leon's appetite became insatiable.

The previously stored advanced canned goods were quickly consumed.

Only then did Leon sit contentedly on the ground, patting its belly.

In the next moment, it extended its hand, and discs of memory began to appear.

For its Level 7 self, the speed of recording discs was even faster.

After browsing them, Levi found that the completeness of the memories in the discs had also improved.

Some memories locked under ordinary restrictions were accessible to him.

Except for very confidential memories, everything was in view.

This included memories of some primordial soul spells.

In the future, primordial soul spells could practically be obtained for free.

Leon suddenly said:

"Master, I found something interesting."

Leon took out Roman's disc.

Levi had already finished looking through the contents of this disc and found no value in it.

A colorful crack opened on Leon's forehead.

Roman's disc transformed into a beam of light, flooding into the crack.

Simultaneously, Leon spat out a plume of gray smoke.

This smoke was filled with negative, resentful energy, much like the grudges evil spirits Leon had encountered during the tribulation.

Within the smoke, Roman's disc slowly rotated, melting away with each turn.

In the void, fire elemental power flowed in, merging with the smoke.

The next moment, a red flame evil spirit emerged, emitting a terrifying wail, exuding the aura of the sixth-circle.

Its face was distorted, faintly resembling Roman.

Levi's expression was one of surprise and joy.

"You can use Roman's memory in the disc to create such creatures?"

Leon boasted:

"Yes, whatever the creature's level in life was, it will be that same level when I create it, although because the memories themselves are incomplete, the abilities are also not complete, and its strength won't match its former life. Moreover, once the disc is fully burned, the creature will disappear, so it's only temporary. However, it should be enough to last through a battle."

Levi applauded:

"Amazing."

Leon had exploited the souls of enemies to the extreme.

Even when their divine souls were destroyed, leaving only memory discs, they had to be reanimated to fight.

This meant Leon could play an important role in Levi's battles from now on.

Not to mention, Levi had slain a dozen Level 7 existences.

All of these could be controlled by Leon to participate in battles.

As for those of the sixth-level and fifth-level, they were innumerable.

Levi asked:

"Leon, how many of these evil spirits can you control at most now?"

Leon contemplated seriously.

"Master, I feel that creatures like Roman's evil spirit can be easily managed up to twenty, but for something like the golden prince, maybe four or five, and for anything below a level five, I... I can't count that high."

Levi laughed heartily.

"That's enough, more than enough!"

Leon's ability could turn the tide in critical moments, reversing the course of a battle.

Besides this, Leon's web-casting ability had also become even more formidable. If caught, even a seven-circle wizard would have difficulty freeing themselves.

Its golden shell now surpassed the hardness of the mid-Level 7 Famine Slaughterer's shell.

It could withstand direct spells from a Seven-Circle Senior Wizard, a truly defiance of the heavens.

Leon was no longer just a simple follower.

It could also engage in battle, facing powerful foes alongside Levi.

After watching the memory discs, Levi also learned about the golden prince's "rise and fall" disappearance story.

He couldn't help but exclaim in delight.

"Encountering a Level 9 Wind Disaster Stratum and a mirage, encountering just one would make an ordinary person go buy a lottery ticket, but this person encountered both directly; my luck pales in comparison."

"The most incredible thing is that this person actually picked up a pure-blooded Dragon Clan's corpse for free in the Land of Darkness and found an ancient wizard ruin..."

Chapter 2078: Thunder God Body!

"As it stands, the materials of the pure-blooded Dragon Clan, along with the Wind Dust Dragon, and even the wizard relic, are all in the core area of the Giant Beast Restricted Area. To obtain them, one must face the level 8 Spider King head-on."

Just a single level 8 Thunder Element was already too much for Levi to handle.

And needless to say, the level 8 Spider King, the overlord of the Three Realms and Four Lands.

However, Levi was in no rush. After all, in the ancient tower, no one was there to compete with him.

These heaven-defying opportunities would eventually be his.

Gazing at the news about the Golden Prince's funeral, Levi's heart remained unruffled.

With the death of the Golden Prince, he lost interest in the Letney Family as well.

From what he knew, ever since the death of the Electric Eel Wizard, this family seemed to begin its decline from a period of prosperity.

According to him, the talented witch from the Roger banquet from that family.

Lightning Nun Karpna also fell in the subsequent blood battle.

In merely a few centuries, this family had already lost three talented primordial soul wizards.

Such a blow was devastating.

Because these people were initially hopeful to become the future pillars of the family, even to produce a Ninth-Circle Wizard.

It seemed that without Levi taking action, the Letney Family, the giant ship he once feared immensely, had started to go downhill.

"There are no families that remain prosperous forever. After long years, all will become insignificant. Moreover, Letney Family has been domineering across the Endless Sea. Without a tiger in the mountain, the monkey claims the throne. Who knows how many enemies they've made? Eventually, they'll face backlash."

Some days later.

Hundred Flowers returned from the God-forsaken Continent.

"Levi, I, Qi Sect, have shattered the Void!"

Hundred Flowers excitedly demonstrated her abilities after reaching level 6 in the Qi Sect.

With a gentle sword strike, a blazing phoenix appeared, its cry clear and crisp, and the flames dyed half the sky red.

Levi happily said:

"Congratulations."

With this, Hundred Flowers had only the Knight left to achieve level 6 in all professions.

She truly was remarkable.

Other primordial soul wizards typically only took an auxiliary job among the three arts of wizardry.

She directly took on the Knight, Qi Sect, and Wizard, mastering three transcendent professions.

Levi pondered in his heart.

"Knight, Qi Sect, Wizard, somewhat akin to the three paths of energy and spirit from the past life. If Hundred Flowers could truly reach level 9 in all three paths, perhaps her own legendary path could emerge... However, the path of Qi Sect to level 9 has always been difficult... Throughout history, many geniuses of the Panda Clan never reached level 9; only the founding ancestor did."

If Levi could advance to legendary status in the future, with his help, he might be able to make Hundred Flowers a Grand Wizard and a level 9 Knight, but getting her to level 9 in Qi Sect, even Levi was uncertain.

"The key to the path of Qi Sect lies with Lord Victor and Link. One has a spirit embryo aptitude, the other possesses Golden Spear Iron Heart, so their achievements will certainly not be low. Especially Lord Victor, if he could manage level 9 success, maybe I could take this opportunity to comprehend the mysteries of Qi Sect level 9."

Forgetting everything else for a while.

Long-separated lovers reunite with passion, the drought ends with sweet rain.

After several days of passion with Hundred Flowers, Levi said:

"Next, I need you to guard the Ancient Dragon Continent. By the way, how long do you think you'll need to become a senior Seventh-Circle?"

Hundred Flowers replied:

"Probably within a century. I have already mastered all three paths of seven-circle primordial soul spells and only need to hone them to Perfection. After refining the Amber Dragon, my meditation efficiency has improved significantly."

Levi said:

"Got it. From now on, this corpse demon is yours."

He handed over the control of the Giant Whale King to Hundred Flowers.

For him, with the Si Lei and other summoning means, the Giant Whale King was no longer essential.

Keeping it in the Ancient Dragon Continent could also protect Hundred Flowers and their organization.

The Struggle of the Trapped Beast rare treasure had also been returned to Hundred Flowers long ago.

Once he had the ability to repair rare treasures in the future, he'd fully restore it for Hundred Flowers.

...

God-forsaken Continent.

After years apart, Levi set foot on this main battlefield again.

Recently, Lord Victor had gathered enough 5 million war merits to exchange for a Morning Star-level oddity.

Compared to the Holy Infant and Gandaph, he was fortunate, getting the Metallic Faction oddity, the Silver Cloak, in one shot, like a soul hit.

Regrettably, it wasn't a Sequence Artifact.

But for Lord Victor, it was still quite satisfactory, aiding in post-Seventh-Circle cultivation.

With the Mirror of Light surfacing in his right eye, Levi tracked the traces of demons like a hound, disappearing into the horizon.

Soon after.

He arrived at a battlefield long finished, then his gaze narrowed, frowning.

"Dragon Knight Wizard Group?"

He saw a group of low-level Flame Demons devouring the body of Yabek.

This person was the commander of the Wizard Group and had met Levi a few times.

This battle group was under the command of Laplace.

Evidently, Levi had some favorable impressions of this group.

Following the demonic aura, the Hermit Rune flickered as he continued searching, arriving at a battlefield.

The Laplace Wizard, with blood-red eyes, had an enormous phantom of a giant clad in armor behind him, besieged by three looming figures of demonic aura.

The giant was his wizard form, Rock King Majesty, utterly shattered.

For Laplace, who was a senior Seventh-Circle with top-tier talent, to be forced into such a state, the enemies had to be brutal.

The enemies were two mid-level 7 Flame Demons and one mid-level 7 Stone Statue Demon, or Gargoyle.

The Gargoyle was incredibly fast, with high magic resistance, enduring Laplace's attacks and diverting his firepower, allowing the Flame Demons to unleash their frenzied assault.

Even if Laplace was powerful, being besieged by three of the same realm, he was clearly struggling.

All around, there was a spectating Demon Army, which formed a military formation, enclosing Laplace.

At the center of the formation, a black giant, exuding mid-level 7 presence, standing three thousand meters tall, was gnawing on the flesh of some unknown giant beast while watching the slaughter.

The giant's forehead bore bull-like horns, its body covered with ancient scales, exuding overwhelming Dragon's Might, as black flames surged into the sky, distorting the surrounding space.

"This is a demonized Dragon Descendant Giant... Such vast vitality, such a powerful body."

Levi had seen many dragon descendant wizards before.

But a Dragon Descendant Giant, it was his first time seeing one.

The fusion of two universally acknowledged powerful creatures, a giant dragon and a giant, now demonized.

With these three layers of buffs, the strength of that massive figure was apparent.

Compared to it, the so-called Thunder Giant Descendants, the Thunder Marsh Clan, lagged far behind.

"If only I could make this big fellow into a corpse demon, how wonderful would that be."

In his mind, the human-faced snake God special spiritual creature, Si Lei, opened its mesmerizing eyes, startling Jin and Biao.

Si Lei patted its belly, and the dull war drum sounds echoed in Levi's mind.

A Lightning Spear, exuding destructive energy, materialized in its hand.

Levi knew his companion special spiritual creature was now ready.

Chapter 2079: Primordial Spirit Advancement!

The dragon descendant giant is named Astate.

Its subordinates are accustomed to referring to it as "Dragon Blood Giant," "Slaughter Reveler," and "Beast Fighting Arena Master."

Its father is the lord of the 67th layer of the Abyss, Fallen Dark Giant Beast·Phoebus.

Phoebus's true form is a "Dark Dragon," a powerful complete pure-blood dragon clan.

To pursue immortal life, it pledged allegiance to the Angry Lord of the 478th layer of the Abyss, Coschechi, and was granted a level 9 "Abyss Heart," gaining the attention of the Abyss Will and becoming an Abyss Lord.

Later, Phoebus combined with a level 9 giant who also served the Angry Lord, giving birth to Astate.

This level 9 giant is the lord of the 69th layer of the Abyss, Mother of Copper Giants, Motanas.

Even in the ancient times of giants, level 9 giants were extremely rare, often the mistress or clan leader of a tribe, especially in the modern era where giants decline.

These two demigod-level powerhouses put all their efforts into giving birth to such an Astate.

Astate did not disappoint its parents, becoming a level 7 middle-stage powerhouse at the young age of four thousand.

It is just one step away from the late stage of Level 7.

Pure-blood dragon clan and the Mother of Giants are both genuine longevity species.

The offspring they bore are also longevity species.

Four thousand years is indeed young for a dragon descendant giant.

Under normal circumstances, dragons do not care for their offspring.

Neither Levi's second brother nor Elsie has seen their unworthy father.

Only a few exceptions exist, such as Alexandra's father.

Because he lives long-term in the Wizard World, bound to human society, he slightly cares for Alexandra.

Astate's father is also an exception.

With the care of its parents and the favor of the Angry Lord, Astate has also consumed a level 9 Abyss Heart.

This time in the blood battle, the whole family of three accompanies the Angry Lord to battle.

Astate watched as its enemies were toyed with in despair, its gaze perverse and crazed.

This Laplace is the elite of the Wizard World.

The Dragon Knight Wizard Group he leads causes the Burning Expeditionary Army considerable trouble.

Today, Astate personally led its army to ambush the Dragon Knight Wizard Group.

With little effort, this wizard battle group was annihilated.

Laplace watched as Yabek and numerous subordinates were killed and devoured by demons.

The aura of despair and anger pervaded the land.

And this is exactly what Astate wanted.

On the battlefield.

Laplace's wizard form fought three enemies at once, with a golden treasure armor floating around him.

This "Mountain Armor" is an eighth-level protective treasure from his father.

When fully activated, it can withstand a strike from an eighth-circle wizard.

However, in a prolonged battle like this, the power of the treasure is waning.

The enemies' multiple attacks left him defenseless.

The "Rock King Majesty" wizard form was already shattered and unsustainable.

Laplace fought in a frenzy, casting innate spells that transformed into mountains and meteorites, hurling them at the enemies.

With the collaboration of the gargoyle and two Flame Demon Lords, these attacks were all neutralized.

Exhausted both physically and mentally, Laplace forced himself to calm down.

He knew he had to find a way to escape, or he would fall here today.

Witnessing the brutal death of the battle group subordinates he had been with day and night, he was somewhat losing his reason.

But looking around, there was an army of demons, with demonic aura forming smoke signals and creating a demon net that imprisoned the world.

This was an elite battle group of demons, with some shallow understanding of military formation paths.

Laplace attempted various ways to break out, but each was suppressed by the three demon lords.

The dragon descendant giant watched confidently.

"What? Now you know fear?"

Astate teased with a laugh.

"Human wizards, you consider yourselves supreme, the rulers of all, but did you ever think you'd be so pathetic today?"

"Damned genius wizard, you can't even beat my three subordinates, I'm so disappointed."

"What a pity. I heard there's a species called the Amethyst Race on the Sauron Plane, known as the Strongest Tribe. I wonder if they could withstand a punch from me, Astate?"

Since debuting, Astate has rarely encountered any match in the same realm.

Even level 7 late-stage Flame Demons dare not oppose it.

Laplace, fighting back, pondered escape methods.

Suddenly, a voice echoed in Laplace's mind.

"Mr. Laplace, to what extent can that treasure of yours withstand an attack?"

A startle coursed through Laplace's heart as he nonchalantly sensed his surroundings but detected no one.

But he knew the voice belonged to Levi.

"Even though I'm exhausted now, it should withstand a full-power strike from a Level 7 Perfect Wizard without issue."

Levi's voice sounded again.

"Then protect yourself well, my move covers a wide area, I'm afraid of accidentally hurting you."

Laplace transmitted:

"I understand."

He felt an internal shock.

It was unimaginable that Levi was hiding near the battlefield without anyone, including the dragon descendant giant posing significant threat, noticing.

The next moment, a purple light streaked through the air, shooting at the dragon descendant giant in the center of the military formation!

Boom!

The light was too fast for Astate to react.

Bang!

Accompanied by a crisp impact sound.

The amethyst light was deflected, and before Astate appeared, an ancient scale giant shield materialized automatically to protect its master.

Chapter 2080: Primordial Spirit Advancement!

At this moment, the Dragon Descendant Giant finally realized there was an enemy attack.

If not for the rare treasure granted by its father, it would have been heavily injured, even if not dead.

Although this rare treasure was crudely made, lacking in any skill.

Its material, however, was crafted from the Heart Protecting Scale, shed by the father before advancing to a Level 9 Complete Body from a Level 8 Peak.

This is the hardest part of most Dragon Clan members.

With such a defiant treasure for protection, it can practically fear no sneak attacks from Secret Sword Flow Wizards.

This kind of wizard assassination technique has been one of the main ways to cause sudden deaths among Lord-level Demons over the past century.

On the other side, Levi was also somewhat surprised.

"What level treasure is this? It could actually block my attack?"

Even with the blessing of the Sword Spirit, it seems insufficient.

"Good, it appears this Dragon Descendant Giant has a rather high status, it cannot be spared today!"

Levi withdrew the Amethyst Light Sword, his figure flickering, appearing on the battlefield.

"Si Lei!"

In his mind, the spirit creature with a human face and snake body holding a Thunder Spear shot straight into the sky!

It devoured and absorbed, drinking heartily the elemental power of the thunder within a 30-li radius, transforming into a human-faced giant snake a thousand meters long!

Si Lei raised the Thunder Spear, summoning millions of black, ink-like Black Annihilation Divine Thunder.

Above the heights, a lightning pillar spanning a thousand meters wide, towering over several thousand meters, formed!

Boom!

The lightning pillar fell from the sky!

A Level 7 Intermediate Flame Demon, battling with Laplace, was directly struck!

Crack, crack!

The Flame Demon, reaching a thousand meters in height, struggled painfully beneath the lightning pillar, the rock layers on its body surface starting to dissolve.

Before long, this Level 7 Intermediate Flame Demon was enveloped by the Black Annihilation Divine Thunder, unable to take care of itself, nearing death.

The lightning pillar crashed into the ground, creating a Thunder Ocean covering a 50-li radius.

Where the Thunder Sea swept across, those low-level demons melted like snow.

Levi was focused on saving people and couldn't be bothered to leave the corpses of these low-level demons intact.

Otherwise, he wouldn't have used such a wide-range ability for a bombing spree.

All this occurred in the blink of an eye.

The Dragon Descendant Giant's face changed greatly, seeing the newcomer as a black-armored swordsman, it wasn't surprised but delighted!

"Hahaha! Dusk Palace Master, searched high and low only to find it easily, since you're here, let me test if you live up to your name today!"

Clearly, it also recognized Levi, who ranks in the top ten of the Demon Slaying List, and had done its homework beforehand.

Levi gestured with his hand.

Two thousand-meter peaks grew limbs, shaking the earth and mountains!

Ever-flowing streams formed green giant eagles, with the mighty wind roaring!

Two Earth Spirit Soldiers, one Maya Spirit, all charged towards the Dragon Descendant Giant!

"Si Lei, eliminate all demons present, leave none alive!"

He left the command, wielding his longsword, and charged at the Flame Demon below.

Si Lei sat under the boundless sky, surrounded by rolling black thunder.

Groups of demons, led by the demon lords, charged at Si Lei, not daring to pass through its black thunder domain.

Only daring to attack from long range.

Some demons who disbelieved, just stepping in, turned to ashes.

Si Lei, after releasing its ultimate move, continued to throw the Thunder Spear.

Each strike comparable to a seven-circle thunder element spell.

If it lands among the demon crowd, it directly blasts a section to death.

The demon lords all retreated.

Because of Si Lei's disturbance, the battlefield instantly became chaotic.

This is the strength of the Bright Moon-level companion spirit!

"Roar!"

A White Tiger appeared behind Si Lei.

ABiao "borrows the tiger's might," unleashing tornadoes and Wind Blades, attacking the isolated demons.

Though it was only a Sky-level companion spirit, as Levi advanced to the seven-circle, its strength was also impressive.

Ordinary demon lords were truly no match for it.

Even the long unseen Flame-faced Nick hovered over Si Lei like the Sun God, shooting out hot air!

It opened the abyssal mouth, spewing terrifying flame breath, sweeping across the demon army.

Nick had been working at the Tower of Dawn for years, managing alchemical creatures, guarding its home.

However, because Levi brought out a new thunder elemental spirit from the ancient tower, replacing Nick.

It then returned to Levi's side.

Similarly, as a Sky-level companion spirit, Nick's battle strength was somewhat stronger than ABiao's.

After all, fire element slaying attack power is one of the best.

Wind, fire, and thunder, the three major companion spirits form an unbreakable joint offensive.

With Nick and ABiao's protection, Si Lei could unrestrainedly conduct "full map" thunder attacks.

Thunder Spears like the God of Death's scythe, reaped the lives of demons.

Under Levi's cover, Laplace successfully broke out of the encirclement.

His eyes trembled as he looked at the human-faced snake-bodied thunder giant in the sky.

"This... this is Sir Levi's trump card? Too powerful!"

"What kind of Truth Oddity could deserve such a powerful companion spirit?"

Crack!

With flames and thunderlight entwining, a shocking Sword Qi slashed down.

A Level 7 Intermediate Flame Demon, tormented by the Black Annihilation Divine Thunder, instantly split in half!

A two-thousand-meter-high Thunder Emperor's Essence descended dramatically!

Before it, even the Flame Demon seemed insignificant.

Levi put away the Flame Demon corpse and spoke to Laplace:

"You're exhausted, retreat first, leave this place to me."

Laplace said:

"Is it appropriate? To abandon you and run away?"

Levi nodded.

"You can leave assured, staying here might indeed burden me."

His words weren't pleasant, but they were sincere... he didn't want his war merits to be shared by others.
