

Wizard 2101

Chapter 2101: Sweeping Through the Shadow Realm!

Triss's face changed slightly.

"Then we must hurry. I'll find a way to contact the Black Abyss Walker and see if we can take this opportunity to capture the Soaking City Lord."

Levi said:

"I'll do it."

In the fully enclosed Shadow Realm, ordinary communication devices find it very difficult to connect with the outside world.

He has the Twilight Round Table, not to mention within the Shadow Realm—in other worlds, he can also contact Nora.

Tower of Summer Flowers.

Hundred Flowers, in the midst of her cultivation, sensed Levi's summons.

"Didn't he go to the Shadow Realm with Triss?"

Levi rarely disturbed her cultivation through the Round Table.

In this case, it must be an emergency.

"Hundred Flowers, contact the Black Abyss Walker, the Soaking City Lord is in the Dragon Ruins Mysterious Realm."

Upon hearing this, Hundred Flowers quickly asked:

"Levi, how are you and Triss doing over there? Going smoothly? You didn't encounter any danger, did you?"

Levi said:

"We are very safe. You don't need to worry."

Hundred Flowers immediately conveyed this matter to the Black Abyss Walker.

Central Realm.

The Black Abyss Walker heard about this.

"The Dragon Ruins Mysterious Realm... The Soaking City Lord went to great lengths to seize the Demon Dragon Whip. He's targeting the Dragon Soul inside. He's given up hope of advancing to Grand Wizard himself and wants to take a crooked path?"

If he had the time, he might have gone there.

Unfortunately, he is currently refining the second Seven Sins Blade, [Arrogance], at a critical moment and can't leave.

"Matia, go to the Realm Management Office and let them locate the coordinates of the Dragon Ruins Mysterious Realm and bring back the Soaking City Lord. It's best to capture him alive, but if not, kill him on the spot."

...

In the blink of an eye.

Seven days have passed.

Levi and Triss ventured deeper and deeper.

But for safety, Levi had previously left the Death Ember Divine Palace in one of the Catacombs.

Continuing exploration, luck was good, and he managed to hunt several demon lords.

On this day, he arrived at a large Catacombs.

The demonic aura was dense and impenetrable.

Triss said:

"This place should be occupied by a demon lord, and possibly a Level 7 one. We are almost at the bottom layer; once we finish here, we should stop. Going further might encounter the Soaking City Lord."

Levi said:

"Miss, please guard the exit while I go ahead."

Monocle manifested, and he gazed at a strand of refined Level 7 demonic aura leading to the center of the Catacombs.

Besides, there were various low-level demonic auras, intricate and chaotic.

Before long, he reached the source of the demonic aura.

In the distance, a giant tree reaching three thousand meters tall, like a towering mountain, stood majestically.

The trunk of the giant tree was covered with pitch-black dragon scales, and sparse fruits grew on it.

"This is... Dragon Vestige Giant Tree!"

Levi's heart stirred.

"Unexpectedly, there is more than one Dragon Vestige Giant Tree in the Dragon Ruins Mysterious Realm!"

Previously, he had found a thousand-meter Dragon Vestige Giant Tree and transplanted it to the Dragon Ruins Mysterious Realm.

But due to its young age, the Dragon Scale Fruits it produced were few.

That's why Levi established the World's First Dragon Tournament every ten years.

And this Dragon Vestige Giant Tree, far surpasses the previous one, whether in quantity or quality.

"This is a great harvest. With this tree, the growth rate of the Dragon Palace members can further improve."

Levi was joyful; this trip was not in vain!

On the Dragon Vestige Tree, there was a nest, and the Level 7 demon aura emanated from there.

A creature resembling a four-legged snake, slender in form, coiled within, savoring the Dragon Scale Fruit with its crimson tongue.

The four-legged snake was covered with dense black scales, which intermittently released black water streams.

"No wonder the fruits are so scarce, they've all been eaten by this demonic creature."

Even Dragonologist Levi could not identify its species.

But regardless, using it for Golden Brilliance Dragon Secret Medicine is certainly feasible.

The earth element secret medicine for Golden Brilliance Dragon had been resolved with the Level 7 Earth-splitting Dragon.

And for the water element secret medicine, this one would suffice.

This saves Levi from spending additional time hunting in the Land of Darkness.

Confirming there were no other dangers in this Catacombs, Levi took action.

Silver Thunder Mountain descended with rumbling echoes, and the Wind Illusion Realm encircled the giant tree.

The four-legged snake sensed the danger and let out a hissing roar, crashing into the barrier wall, only to be ruthlessly bounced back.

Danis descended from the sky, and his spiked club collided violently with the black water spat out by the four-legged snake.

The black water recoiled, the spiked club striking it into the ground.

The giant foot, like a mountain, stomped the four-legged snake to the ground, a giant hand squeezing its vital spot with force.

The black scales, able to withstand seven-circle spells, exploded after a resounding impact.

"Be careful, don't kill it."

Levi's form appeared.

Danis said:

"Rest assured, Master, I know what I'm doing."

The four-legged snake struggled continuously. Its crimson eyes shot out red beams.

The giant easily blocked these attacks with its palm, then forcefully smacked the four-legged snake's head.

"You little thing, daring to attack, think you're tough?"

It's a joke; with Danis by his side, such a creature required no effort from Levi.

After some thrashing, the four-legged snake finally stopped struggling, taking on a dead fish appearance.

Levi used Crimson Enslavement to temporarily capture it, awaiting purification to grant its freedom.

He released Long.

"Loosen the soil around this giant tree."

Long burrowed into the ground and began working.

With a whole specialized team, efficiency was high.

Soon, Danis embraced the "bonsai" as tall as himself and transplanted the giant tree into the Ancient Banyan Fairyland.

Chapter 2102: Sweeping Through the Shadow Realm!

The members of the Dragon Palace saw the new Dragon Shirt Tree and their faces lit up with excitement, rubbing their hands eagerly.

"Dragon Turtle" Ratti asked:

"Lord Dragon King, is this a new reward?"

Levi replied:

"That's right, everyone work hard, cultivate diligently, and perform well. In the future, the rewards of Dragon Scale Fruit will be doubled."

As soon as he said this, the members of the Dragon Clan let out joyful roars.

Over the years, the Nightmare Domain has mainly relied on the members of the Dragon Palace for guardianship.

These guys have a very good work attitude and are worthy of praise.

Triss said:

"Let's go back."

Although she didn't achieve major successes on this trip, she collected a variety of herbs, which was quite satisfying.

Levi thought it over and decided to return.

Even though he wanted to find more Demon Dragon Grass, the sense of crisis deepened as they went further down.

It seems, as the Deep Sea Swordsman mentioned, the Immersed Ancient Castle really is below.

He had no power to stop all this, and now he could only wait for the Sea Covering Wizard to come and rescue them.

Before that, it was enough to protect himself and Triss.

With seven days left until the secret realm closed, Levi returned to the surface.

At this time, many wizards had already come out, one by one with poker faces, guarded against others.

Alexandra and Elsie came out too, and seeing Levi and Triss suddenly added a sense of safety.

...

In the deepest part of the Dragon Ruins Mysterious Realm.

"Awaken, slumbering Dragon Abomination, Sedromelon!"

A black-robed wizard wielding the Demon Dragon Whip, tried hard to lash at the front.

There, stood a massive black Demon Mountain stretching for thousands of meters.

The Demon Mountain vaguely resembled the shape of a giant dragon, with various arrays and rune patterns carved atop.

"So many years have passed, the seal has weakened to this extent, and yet you are still unable to break the seal?"

The Soaking City Lord's heart was shocked; this was the power of a Legendary Wizard.

But no matter what, he must obtain the Dragon Soul!

Suddenly, the Demon Mountain began to tremble loudly.

Rocks fell, black lights shot out one after another, straight to the sky.

Boom!

The Demon Mountain exploded, and an extremely illusory black Demon Soul emerged.

Its dragon wings spread out, reaching twenty thousand meters, with a slender body covered in black scales, revealing a powerful presence.

A black flame filled with sulfuric scent exhaled from its nostrils, accompanied by a sinister laugh.

"Heh heh heh, human, did you grant me freedom? Very well, what kind of reward do you desire?"

The Soaking City Lord grasped the Demon Dragon Whip, his lips curled up in a cold smile and said:

"Lord Black Flame Disaster Sedromelon, the reward I want... is you!"

He suddenly threw out a jet-black Shifting Scroll and retreated rapidly.

"Ninth-circle Spell: Whale Fall!"

Within a radius of thousands of miles, all water elemental power began to roll, forming mighty rivers and flowing east to the sea!

A Giant Whale like a Leviathan descended from the sky!

An ocean of immense suppression power surged forth!

The Demon Soul was nothing but a soul, plus being sealed for tens of thousands of years, weakened immensely, no match for a ninth-circle spell.

With no suspense, it was sealed by the Giant Whale!

The Soaking City Lord tossed out the Ancient City Treasure, which radiated a strong allure, emitting a powerful suction.

The Demon Soul roared indignantly:

"How dare you offend the great Black Flame Disaster Lord, you..."

The Soaking City Lord sneered.

"You what, you old thing, become my stepping stone for advancing to ninth-circle!"

Suddenly.

An unforeseen change occurred.

A middle-aged wizard in a blue robe appeared suddenly.

He transformed a gigantic blue hand covering the sky, reaching for the Ancient City Treasure.

The Soaking City Lord felt a terrifying ninth-circle might descending and his face changed dramatically.

"Sea Covering Wizard Matia... how do you know I'm here?"

The extremely precious ninth-circle spell scroll he possessed was only one, and it was prepared for the Dragon Soul.

Facing a Grand Wizard, he had almost no power to resist.

A sixth, seventh, eighth-circle wizard is called a primordial soul wizard; beyond the ninth circle, entering a new stage.

Matia, without saying a word, pointed a finger and a droplet appearing only the size of a grain of rice emerged.

Talent Spell: Water Drop!

Swoosh!

The droplet appeared instantly before the Soaking City Lord.

Plop.

His protective force field and various methods crumbled.

In the next moment, the droplet pierced through his brow.

The Soaking City Lord muffled a grunt, severely wounded already, and his spiritual force began to wither, with his aura weakened.

Matia then swept a stream forming translucent chains, impaled the Soaking City Lord's limbs, locking him down.

Even the primordial soul couldn't escape.

In the sky, the opposing Ancient City was gradually losing power, trembling with a buzz.

With a gesture, Matia summoned the Demon Dragon Whip to his palm and sealed it.

He controlled the Soaking City Lord and cast another spell to take away the Ancient City Treasure.

Suddenly, a streak of black ghostly light broke through the sky.

Matia's expression changed slightly, enhancing the protective field.

The ghostly light dispersed instantly upon hitting the field.

In the next moment, Matia inwardly sensed something wrong, looking towards the Soaking City Lord.

His form melted like snow, his aura dissipated, his soul started disintegrating.

The Soaking City Lord, dead!

"Black Sun, it's you again, this time you won't get away!"

Matia shouted angrily.

At this, the black-robed figure chuckled lightly:

"Matia, don't boast, you won't be able to keep me here; not even your teacher could do that."

He threw out a chain, capturing the Demon Soul, followed by a black sun with a diameter of a thousand miles emerging vividly.

Endless Black Flame covered the heavens and the earth.

This was a confrontation of Grand Wizards; under terrifying spells, all was annihilating.

Bang!

The Soaking City Lord's storage ring shattered in the aftermath of battle.

Countless precious Aether Stones, Wizard Tools, rare treasures, medicines, and more streamed into the chaotic void disappeared.

Among these were three ancient-looking weapons seemingly made of Luminant gold—a spear, a large shield, and a chain hammer.

But in the heat of battle between the two Grand Wizards, naturally, they paid no attention to these items.

The Black Sun noticed those three ancient weapons and mused to himself.

"The Immersed Ancient Castle actually has the Sea Clan's [Monarch's Treasure] key, but this item requires twelve tokens to open, quite time-consuming and labor-intensive to gather, plus the treasures within are likely useless to me."

His main purpose for this trip was the Demon Soul; everything else was unimportant.

As for the Soaking City Lord, and the Hundred Beast Mad Witch Arthur, they were merely pitiful creatures used for scouting the path.

Chapter 2103: Absolute Luck!

Dragon Ruins Mysterious Realm.

On the ground.

A group of wizards sensed the intense tremors from below, their expressions changing.

They didn't know what exactly was happening beneath the Demon Land.

They could only feel two unimaginable forces clashing.

Every clash seemed to make the entire mysterious realm tremble.

On the ground, occasionally strata would crack open, releasing waves of destructive energy.

An unfortunate Fifth-Circle Wizard was struck and instantly reduced to ashes.

Levi transmitted to Triss:

"It seems that not only the Sea Covering Wizard has come."

Triss said:

"Unfortunately, the teacher is too busy. Otherwise, no matter who the enemy is, as long as it's not a Legendary Wizard, the teacher could handle it easily. I'm a bit worried now."

After all, the Sea Covering Wizard is just a newly promoted Grand Wizard, likely among the lower tier of Grand Wizards.

Not everyone is a freak like Levi, invincible in the same realm immediately after advancing.

Levi said:

"Let's watch and see. The worst outcome is that the Dragon Ruins Mysterious Realm, this secondary plane, explodes... and we're exiled to the Land of Darkness."

The secondary plane is also a part of Nora.

However, their location is somewhat special.

But if the secondary plane dissipates, the things inside will definitely return to the Land of Darkness.

With the primordial soul strength of Levi and the others, they just need to waste some time flying back to Nora.

It's not like they'll perish with the plane.

"Look quickly, what is that?"

"My God, a Giant Dragon!"

Suddenly, a wizard exclaimed.

But they saw the skyline of the Dragon Ruins Mysterious Realm crack open, a crimson fissure stretching for a thousand miles.

Two enormous dragon claws tore open the sky, unfurling wings thirty thousand meters wide, descending with a shock!

It was covered in crimson scales, with countless lava flowing over its body, and on its back lay a series of continuous active volcanoes.

"Father?"

On the other side, Alexandra couldn't help but murmur.

Elsie was also stunned.

"Why is your father here?"

Triss's expression changed.

"This is Lord Leodes, the Guardian of the Sleeping Dragon Realm, now one of the few remaining complete pure-blooded Dragon Clan in the Wizard World, also Alexandra's father."

Levi's eyes were filled with shock.

This was his first time encountering such a Legendary Creature up close!

A true complete pure-blooded Dragon Clan!

Too powerful! In the face of this momentum, he was like a fragile boat, on the verge of capsizing.

What on earth is happening with the Sleeping Dragon Realm to attract so many high-level figures?

The Molten Giant Dragon coldly spoke:

"Black Sun, release the Dragon Soul of Sedromelon!"

Hearing the familiar name, the wizards present all turned pale.

"Black Sun? That number one dark wizard of the Endless Sea?"

"The leader of the Black Sun Steeple, rumored to have advanced to Grand Wizard hundreds of years ago."

"Why has he come too?"

"This Black Sun is truly audacious, having joined the Council of Ten Thousand Clans yet daring to come to our Nora!"

Panic, unease, and despair spread like the coming of the apocalypse.

In the face of such ninth-circle level power, everything seemed pale and powerless.

On the horizon, a huge black sun continued to expand, as if it was going to squeeze the mysterious realm until it bursts.

The Molten Giant Dragon opened its mouth and inhaled, swallowing Alexandra and Elsie into its belly.

"If you don't want to die, follow me."

Its dragon wings stirred up a storm, sweeping all the wizards in the mysterious realm... including Levi and Triss.

The horrifying shockwave from the explosion, like a chain reaction, tore up the layers of the demon land of the mysterious realm.

Caverns began to collapse, and the demonic creatures and demons living inside turned to ashes.

Afterward, Levi and Triss didn't know what happened because they were inside Alexandra's father's belly.

Upon opening his eyes, Levi curiously surveyed the world before him.

As far as the eye could see, it was a series of continuous volcanoes, magma lakes, and rivers.

Scorching storms swept across the sky, bringing the smell of sulfur.

There were even many Fire Elemental Spirits or fire-type creatures living within.

Alexandra transmitted to Levi:

"This is my father's Inner Heaven and Earth. I used to play inside; then he fell asleep and trapped me inside, and it was the Golden Dragon President who awakened my father and saved me... But rest assured, here, we are very safe."

Levi laughed:

"Thanks a lot."

Just now, that move by Black Sun was truly vicious, intending to kill these juniors within the mysterious realm.

Inside the Inner Heaven and Earth, the wizards were all panicking, especially the dark wizards of the Immersed Ancient Castle.

They were gathered in a circle, shrinking together.

Volcanoes flew out, suppressing these dark wizards.

Inside this Inner Heaven and Earth, these primordial soul strongmen had no power to resist.

"These people need to be handed over to the Wizard Council for handling."

A rumbling voice came, it was that Molten Giant Dragon.

It seemed that this dragon was also a member of the Wizard Council, or perhaps a partner.

They didn't know how long they stayed inside the dragon's belly, but Levi and the others could sense that there seemed to be fierce battles outside.

Presumably, the Sea Covering Wizard and the Molten Giant Dragon were fighting fiercely with that Black Sun.

"Black Sun has only advanced to Grand Wizard a few hundred years ago, yet he already possesses such strength. What is the origin of this person?"

Levi wondered inwardly.

This was his first time witnessing the power of Black Sun.

"If this man becomes a Legendary Wizard, it won't be good for the Wizard Council. I hope the Council can eliminate him as soon as possible."

Chapter 2104: Absolute Luck!

But since the Black Sun dares to return, it must have something to rely on.

Now the blood battle is intensifying, and I've heard that on the Abyss side, demons above level 9 are gradually arriving at the battlefield.

The next thousand years will surely be the hardest times for the Wizard World.

The Council of Ten Thousand Clans will definitely seize this opportunity to launch more terrifying attacks.

"Only by becoming a Grand Wizard early can one have the qualification to contend in such a Civil War."

Levi whispered to himself.

...

After a few days.

A Molten Giant Dragon, waving its scorching wings, descended from the sky and landed in the Central Realm.

A fully armed wizard battle group was already waiting here.

Leading them was a Grand Wizard.

It was Lady Chains, Andrea, who had previously cooperated with Rowling to destroy Boiling Beast Blood.

Lady Chains smiled and said:

"Thank you for your hard work, Lord Leodes."

Leodes nodded slightly and said indifferently:

"A trivial matter, but unfortunately, the Dragon Soul was still taken away by Black Sun. It turns out he has a Level 10 Treasure, no wonder he's so confident. There must be a powerful level-10 backing him."

Not long after.

The Sea Covering Wizard also descended from the sky, looking somewhat weary as if he was injured.

He sighed and said:

"The Dragon Ruins Mysterious Realm is shattered. It should be completely sealed off from now on."

Lady Chains said:

"Is the Soaking City Lord already dead?"

The Sea Covering Wizard said:

"Yes, his storage ring shattered in the fight with Black Sun, and the spoils were swept into the Void currents, leaving only a Demon Dragon Whip, which my junior sister Triss once obtained from the mysterious realm."

Lady Chains said:

"It doesn't matter. The Demon Dragon Whip is no longer useful. Lord Matia, you should return to heal, and we will deliver the reward to your residence later."

From the mouth of the Lava Dragon, silhouettes flew out.

The wizards exploring the Dragon Ruins Mysterious Realm returned unharmed.

The dark wizards in the Immersed Ancient Castle, like mourners, were shackled with chains and shackles by Lady Chains and others, with Magic Prohibitions set on them.

Levi and Triss looked around and sensed three Grand Wizard-level presences, knowing they had arrived in the Central Realm.

Lady Chains said:

"The Dragon Ruins Mysterious Realm is abandoned, you all can disperse."

The wizards expressed their gratitude, still feeling lingering fear.

If the Wizard Council hadn't arrived in time, things would have been dire for them during this expedition.

The Sea Covering Wizard said:

"Triss and Levi, follow me."

He took the two of them to the Black Abyss Tower.

The Black Abyss Walker, seeing the two safely returned, smiled and said:

"It looks like you have reaped well in the mysterious realm."

Triss said:

"Thank you, teacher!"

The Black Abyss Walker said:

"We also have to thank Levi for relaying the message in time. Lately, we've been busy with the blood battle and indeed had no time to waste with those people. Didn't expect such a big twist."

Levi said:

"Just a small effort."

The Sea Covering Wizard handed the Demon Dragon Whip to Triss and joked:

"Hold on to your whip better next time, don't let others snatch it."

Triss was filled with gratitude and trepidation.

"Thank you, senior brother!"

Even though she had the Black Queen now, she still missed the Demon Dragon Whip.

The Black Abyss Walker said:

"I have important matters recently and cannot divide my attention. If you need anything, contact Matia."

"Also, congratulations to Levi on advancing to Senior Seventh Ring. The fungi and Green Tribe organisms you submitted to the congress seemed to have yielded preliminary research results. Once the experiment is successful, your Ancient Dragon Continent will have priority access to the results."

"The intensity of the upcoming war will increase, and large-scale battlefields will no longer be limited to the God-forsaken Continent. Be careful when organizing your forces."

"Nothing else, focus on your cultivation, strive to reach your highest realm, and leave no regrets."

This Grand Wizard, for some reason, had many words of advice.

Upon leaving the Central Realm, Triss handed her black Dragon Scale Token to Levi.

"This thing isn't much use now, but the dragon scale itself is top-grade material for weapon refinement, take it."

Levi paused, then accepted the token.

"Thank you, my lady."

According to the Deep Sea Swordsman, the dragon scale was indeed a genuine level 9 scale.

Though there was only one, it was extremely valuable.

After parting, Levi returned to the Ancient Dragon Continent.

"What a shame, the Dragon Ruins Mysterious Realm is gone just like that, and it still had many resources."

"Damn that Immersed Ancient Castle, cutting off my financial path."

He merely complained, knowing revenge was impossible.

The Soaking City Lord had already been killed by the Sea Covering Wizard.

Yet now, he had come to terms with it, not holding any lifelong regrets.

He was a man aiming to become a Legendary Wizard, and these minor villains were not worth his effort.

...

Black Abyss Tower.

Matia said:

"Teacher, during the fight with Black Sun, I accidentally broke the Soaking City Lord's storage ring. I saw three Tokens of the Monarch's Treasure, but they got swept into the Void currents, and are most likely destroyed now."

The Black Abyss Walker said indifferently:

"The Monarch's Treasure, a place of inheritance that the Sea Clan has been longing for, actually doesn't have much of value, just some chances to achieve level 9 at most. Let them be lost. The Sea Clan is no longer, and finding the remaining nine tokens is like finding a needle in a haystack. As tokens of the treasure, they shouldn't be destroyed and might become a fortune for some lucky individual in the distant future. Who can say for sure?"

Chapter 2105: Absolute Luck!

Matia te nodded slightly.

"And that Black Sun, this person actually carries a rare Level 10 Treasure. What exactly is his identity, and why is he so troublesome? I see that Lava Dragon Lord Leodes, being a Level 9 Late Stage giant dragon, seems to be somewhat apprehensive of him."

Black Abyss Walker thought for a moment and said:

"Black Sun is extremely mysterious, and we know very little about him. However, based on the current intelligence I have, I suspect this person might be a duplication of some existence. Of course, not from our Wizard Council, but from the Council of Ten Thousand Clans."

Matia te frowned and said:

"The Council of Ten Thousand Clans? It seems they have long been plotting the invasion of Nora. Perhaps the previous war of dark and righteous wizards also had their machinations behind it. That Soaking City Lord is completely just a pawn in Black Sun's hands, being used without even knowing."

Black Abyss Walker said:

"When it comes to Level 10 existences, you shouldn't dwell on it. Just focus on healing. Although you've been promoted to Grand Wizard, you still need to train diligently."

...

Ancient Dragon Continent.

Hundred Flowers saw Levi was unharmed and continued to close themselves off in cultivation.

Levi buried the Deep Sea Swordsman forever in the sea of the Ancient Banyan Fairyland and marked it.

If luck is good, in the future, perhaps a Morning Star-level oddity might be born.

He also exchanged for the corresponding bounty reward from the Central Realm.

It was another three choices: one flame, one earth, one lightning.

Levi chose lightning without hesitation.

Because that oddity was precisely a sequence artifact of the Thunder God Series.

Morning Star-level oddity·Thunder God's Eye.

He quickly refined it, and his spiritual force increased by 50 points.

On the proficiency panel, [Thunder God Body] was still incomplete.

However, he could feel that it was much stronger than before.

With a thought, he summoned the Thunder God Projection.

The three parts of his right hand, heart, and eyes were already solidified.

Like a puzzle, Levi felt that the puzzle was now one-third complete.

It shouldn't be necessary to gather all the organs to complete the Thunder God Body.

Just combining a few crucial ones and some other organs could form the whole.

[Thunder God's Eye] did not give birth to a special spiritual creature.

On the contrary, Levi could feel that [Si Lei] in his mind had become even stronger after refining this oddity.

He speculated that sequence artifacts might also be able to evolve into special spiritual creatures.

In any case, he would pay more attention to oddities of the Thunderbolt System in the future, striving to collect the complete Thunder God Series.

As for other sects, he didn't fantasize about them as the difficulty was too great; he would go with the flow.

Collecting the main sequence artifacts of every sect is a hundred times harder than the Infinite Primordial Soul.

...

Two years later, Nora 365 year.

Ancient Dragon Continent training ground.

Levi repeatedly cast the Heaven's Net Lightning spell.

Then he sat cross-legged, meditating to restore his spiritual force.

"As expected, after the Magic Rune reached level 3, casting speed significantly improved, reducing casting time by 20%, which is indeed useful. The same spell can be cast simultaneously, paired with the Ancient Tower Scepter, I can basically guarantee a 100% first strike, and my spell's power far exceeds other wizards."

This made Levi look forward to the Magic Rune even more.

After practicing the Lovers Rune for a while and with the improvement on the proficiency panel.

Levi brightened up.

In his mind, as the rune model of Aries constellation shone brilliantly.

A ray of starlight shot straight into the sky!

A moment later.

A giant beast covered in white curly fur, with a fat body and slender limbs, somewhat peculiar, landed in front of Levi.

"Meeeh~ Meeeh~ Meeeh!"

The soft bleating sound echoed in Levi's ears.

His eyes narrowed slightly, then he wondered:

"So, the essence of the Lovers Rune is a sheep?"

This Aries was as grand as a mountain, yet it did not bring Levi any sense of oppression.

This was entirely different from the Horned Bull and Heavenly Horse before.

"Every astral soul has a completely different personality. The stubbornness of the Horned Bull, the arrogance of the Heavenly Horse, this Aries seems gentle, without the slightest aggression."

He opened the proficiency panel.

Levi

Lovers Rune: Level 11, Special Effect: power of Aries constellation (Level 10), Star Soul·Aries

[power of Aries constellation (Level 11): the Rune Language communicates with the Aries constellation, amplifying your luck with the power of stars, currently boosting luck by 100%. Besides this, your personal charm and fertility have also improved.]

...

[Star Soul·Aries]

[Star Name: Gothic White·Pet]

[Justice: Cheerful, Optimistic]

[Star Language: Luck]

[Level: 7]

[Ability: Luck's Joy]

[Luck's Joy: Aries performs a joyful tune for you. After the tune ends, you'll have an hour of lucky period, during which your luck index is doubled from the current level.

Please note: "Those who smile often, their luck won't be too bad."]

...

After Lovers Rune reached Level 11, Levi's luck boost officially came to 100%.

The introduction of Aries also surprised Levi somewhat.

"Gothic White-Pet, cheerful, optimistic, indeed so, this Level 7 star soul has no desire to attack at all."

Overall.

The Aries star soul is a completely supportive star soul.

Its only useful ability is [Luck's Joy].

Listening to Aries' tune doubles the luck value.

The doubling here is on top of the 100% base increase from the Lovers Rune.

If Levi has 10 points of luck, after the boost, it's 20 points.

And after listening to Aries' tune, it becomes 40 points.

Chapter 2106: Absolute Luck!

This hour can be said to be Levi's moment of "Absolute Luck."

So, if used well, it could not only help in treasure hunting but might also have unexpected effects in battle.

After all, it's only an hour, so if used for treasure hunting, it might not be enough.

"Interesting, Aries, give me a little tune."

Levi plans to test if this luck value works.

Aries glanced at Levi and then lazily began to sing.

"Baa baa baa~ baa baa~ baa..."

Levi: "..."

Listening to the sheep's song is like hearing celestial music, ears suddenly clear...

After Aries finished singing, its form slowly dissipated as the duration had ended.

Levi also felt that his spiritual force seemed somewhat fatigued.

"Although it's just an auxiliary astral soul, the consumption of spiritual force is even greater than the Heavenly Horse and the Horned Bull."

"Let me see if anything interesting happens in the next hour."

Levi plans to take advantage of his "Absolute Luck" period to stroll outside, perhaps picking up something good.

He didn't wander around the Ancient Dragon Continent; he had already explored every corner, and there was nothing good left.

He simply headed to the Land of Darkness, hoping to test his luck.

Time passed by second by second.

Half an hour later, nothing happened.

An hour later, nothing happened.

Levi couldn't help but sigh:

"What was I thinking? Luck is such an elusive thing, even with Absolute Luck, miracles can't happen in just an hour. This skill should be activated just before exploring relics or opening blind boxes from the Netherworld Market. Its effect is similar to the card-drawing anthem 'Good Luck' from my previous life."

Levi didn't feel disappointed upon returning home; he had plenty of opportunities in the future.

...

Tower of Summer Flowers.

Hundred Flowers had just come out of seclusion.

She lazily stretched and suddenly sensed something like a shooting star across the sky.

"Hmm? Could it be Meteorite Iron from the Land of Darkness, falling on the Ancient Dragon Continent?"

Quite a few rare metals have been obtained by wizards through this method.

For example, Luminant gold, or even more precious elemental metal.

Hundred Flowers arrived at the spot where the shooting star fell, discovering a small pit on the ground.

In the pit, a Radiant Gold Spear was embedded, still buzzing and trembling.

"Huh? A Luminant gold weapon... Could it be that someone was fighting here?"

Hundred Flowers looked around but didn't perceive anyone, it seemed to be an unclaimed thing that fell from the Land of Darkness.

Although Luminant gold wasn't valuable to her, with a strong sense of frugality and good housekeeping virtues, she decided to take it.

Passing by the Emperor's Palace, she saw Levi with his hands behind his back, looking like he'd just returned from a stroll, still deep in thought.

Hundred Flowers asked:

"Levi, where have you been?"

Levi replied:

"Just took a stroll around the Land of Darkness. Have you broken through? How's the cultivation going?"

Hundred Flowers replied:

"Quite well. I just saw a shooting star land on our Ancient Dragon Continent and picked up this thing. Although it's not valuable, today's luck is pretty good."

She took out the Radiant Gold Spear to show off a bit.

Seeing this, Levi's expression tightened.

"This thing..."

Saying that, he took a trident out from a long-sealed storage ring.

This trident was also made of Luminant gold and appeared to be a simple weapon.

It was something Levi obtained from a First-Circle Wizard on Whale Song Island during his apprentice wizard days.

In his weaker days, he had used it as a weapon.

However, as he became an official wizard, it slowly got phased out.

Several times during this period, Levi thought of melting it down to create a Luminant gold alchemical creature, but he kept it for sentimentality.

After all, it was a relic and had commemorative value.

Hundred Flowers saw the trident.

"Huh, you have one too? Where did you get it? Did you just pick it up?"

Clearly, although the trident and spear differed in appearance, their craftsmanship style was from the same series.

Moreover, they both exuded an ancient aura, indicating they were ancient artifacts.

Levi laughed and said:

"I got it long ago. You just picked yours up?"

Hundred Flowers nodded.

Levi looked at the Aries talisman model leisurely "grazing" in his mind, pondering.

"Did it work? Or was it something that would have happened anyway?"

"Never mind, let's assume it worked. My first time using it; there should be some sort of newbie bonus, even though this thing seems useless."

Levi said:

"Give it to me, I'll collect it."

Hundred Flowers gladly agreed, and Levi took the Radiant Gold Spear back to the Ancient Banyan Fairyland.

Days later, Leon made a disc of the Deep Sea Swordsman's memories.

Levi reviewed the information on it.

"Not bad, gained three Seven-Ring Spells."

As Leon advanced to Level 7, and with Hell's centennial blind box event,

he was spending less and less on primordial soul spells.

Of course, if he came across a good spell, he would still buy it to collect in the spell library, old habits die hard.

"Wait, Monarch's Treasure, Sea Clan token, Ancient Twelve Monarchs?"

Suddenly, some memories related to the Sea Clan surged into Levi's mind.

After digesting them, he took out the Radiant Gold Spear again.

"Sea King Spear?"

Soon after, the Luminant gold trident surfaced.

"Poseidon Trident?"

"The trident I unwittingly obtained in the past is actually the key to opening the Monarch's Treasure."

Chapter 2107: Absolute Luck!

"This matter, Baghdad might also know, but I've never used this thing in front of it; it doesn't know I have the Poseidon Trident, so I've never mentioned it."

As for the Monarch's Treasure, which is the Sea Clan's dream, Levi isn't very concerned.

The Sea Clan, to put it bluntly, is a civilization with an upper limit of level 9.

The only level 9 expert is most likely their ancient Sea God from the Antiquity Age.

However, the Sea God has long been dead, tens of thousands of years have passed, so what could still be in there?

This thing is just the "lifeline" or "faith" in the hearts of these oppressed Sea Clan people.

Aware that they can't resist the wizard civilization, they can only pin their hopes on this "Monarch's Treasure," which may not even exist.

tokens are needed to unlock the Monarch's Treasure.

And Levi has only 2 of them.

As for the remaining 10, he can't possibly waste time looking for them.

"So, it's still just a collection of antiques."

Levi put away these two weapons, sealing this matter in his memory.

If in the future there's truly an opportunity to obtain those 12 tokens, he might explore it.

Treasure hunting and such— isn't it the romance of men?

...

A year later.

Nora 366, Blood Battle 152.

The 790-year-old Levi, after many years, embarked once more toward the God-forsaken Continent.

According to his divination and Danger Perception, the previous commotion should have passed.

For cautious consideration, he didn't intend to use Corpse Demon Danis refined from Dragon Descendant Giant during this demon hunt.

Now Levi has 6800 points and 63 million war merits.

With his Shadow Dragon Talent, as long as there's an appropriate opportunity, he's confident in racking up to 100 million war merits in a short time.

God-forsaken Continent.

Looking down from high above, the once black land is sporadically scarred with blood.

These stains are from demon blood and wizard blood.

Levi's monocle revealed millions of chaotic demonic aura floating in his vision.

He pursued the areas with denser demon aura and started his hunting journey.

...

Time flies, ten years passed.

Nora 376.

Midland Continent, Gondor City.

Fire Dragon Shop.

"Unknowingly, fifty years have passed."

Holy Infant opened the window of the wizard tower, gazing upon the blue sky and basking in sunshine, lazily stretching.

"After advancing to the sixth-circle for over four centuries, finally reaching Maximum today, even branding 15 Witch Marks... It's been a long time since I've worked on weapon-making, and I'm inexplicably itching to do so. Once I advance to seventh-circle, I'm definitely refining until the sky turns dark."

With the Fire Dragon Shop on the right track, talents are coming in increasingly, letting Holy Infant live a somewhat idle manager's life.

"To achieve Maximum so quickly, those Truth Oddities and various Soul Stones, Netherworld Soul Dates, Fire Dates bestowed by my true self, are indeed invaluable."

He glanced in the direction of Gandalf Pharmacy, knowing that the old man hasn't reached Maximum yet.

Body tempering technique doesn't require branding Witch Marks, only condensing body-refining runes and spiritual force, which seems simple.

In reality, the difficulty of cultivating body tempering technique is not easy at all.

Gandalf intends to reach six-circle Maximum, needing to condense nearly 10 million body-refining runes.

Moreover, he's cultivating the most challenging "Thousand-Handed Ancient God Body Refining Technique" and "Ten-winged Sky Dragon Body Tempering Technique."

Coupled with unavoidable engagements or socializing.

Being left behind by me is normal.

"Master, you've come out!"

Alexandra exclaimed joyfully.

After being rescued by her father, she and Elsie didn't stay long in the dragon descendant priory and soon returned to Fire Dragon Shop.

Holy Infant smiled:

"The spiritual force of you two ladies has also greatly improved."

Elsie replied:

"We also refined a Morning Star Artifact."

After returning from the Dragon Ruins Mysterious Realm, they also exchanged for their own Random Oddities.

Elsie obtained the Burning Oddity "Red Flame Blood Rose," Alexandra acquired the Frost Artifact "Ice Spirit Dance."

Isn't this also a kind of Absolute Luck?

After refinement, both women improved considerably in strength.

Each of their talents has been enhanced.

In fact, before this, they also refined some Earth and Sky-level Oddities.

But Morning Star-level was the first time.

Thus, they still have much room for improvement.

Unfortunately, they didn't give birth to any Long.

For a master with several Longs, naturally, they were very envious.

Overall, it's still too few Oddities being refined; with more, there will always be one or two Longs appearing.

Alchemy Room.

Silverbeard and his team were still researching alchemical creatures; seeing Holy Infant come out, their faces lit up, expressing warm greetings.

Soon after.

A dark-skinned, boldly dressed, somewhat foreign-style blonde beauty, walked into the shop wearing boots.

"Hello, my name is Zion, and I'm applying for the position of weapon craftsman."

After understanding the purpose, a young witch smilingly led Zion to Holy Infant's office.

She is Mia's successor, Mina.

Her talent is good, with double affinity, now she's also a Second-Circle Wizard.

Mina was an abandoned infant that Mia took in while working on the Mortal Continent.

Back then, Mina was nearly killed by dark wizards, but Mia intervened to save her.

Seeing Mina's decent talent, Mia took her back to the Tower of Dawn for cultivation and later to work at Fire Dragon Shop.

As for Mia, now with white hair, she has retired and returned to her homeland.

She's gone back to the Ancient Dragon Continent to live a reclusive life, waiting for Death.

When Mia initially broke through the fifth-circle, she was already old; now much time has passed and she's nearing her end.

With Holy Infant's help, Mia received the medicine to break through to the sixth-circle and attempted advancement.

Chapter 2108: Absolute Luck!

Unfortunately, it failed...

Fortunately, the Holy Infant granted her a treasure ahead of time, sparing her life.

However, she has no hope of reaching the sixth-circle level in this life, but Mia still feels grateful when leaving.

For her, if it weren't for the help of the Holy Infant, she might not have even advanced to the fifth-circle.

Now, falling before the universally recognized Sky Chasm of the sixth-circle, although defeated, she takes pride in it, feeling satisfied.

And for Mia, the Holy Infant has been exceedingly benevolent, as the Infinite Primordial Soul Method of the true form comes from her.

Moreover, Mia's uncomplaining efforts over these centuries were seen by him.

At one time, Mia had some feelings for him, but they gradually faded away with the passage of time.

In the shop, the wheat-skinned beauty Zion looked at the Holy Infant, visibly a bit nervous.

Although she is also a primordial soul wizard, compared to the renowned Holy Infant, she is at most a little-transparent.

The Holy Infant smiled:

"I see your resume says you specialize in refining artifacts, may I ask who your mentor is? Of course, if it's inconvenient, you may choose not to answer this question."

Zion hesitated for a moment, then asked doubtfully:

"Master, if I don't answer, will I lose this job?"

The Holy Infant chuckled, indicating that was indeed the case.

Zion said:

"My mentorship was gained years ago from ancient ruins, from Mr. Doster Keren, who was a somewhat famous ancient artifact maker in the Endless Sea."

Upon hearing this, the Holy Infant felt moved.

"Were you in the Yellow Earth Continent when you discovered it?"

Zion replied:

"Yes, it seems the Master is also knowledgeable about the history of the Korun Family?"

Zion, now five hundred years old, derives her knowledge of the Korun Family from some relics or documented records.

The Holy Infant thought to himself, when young, he had dealings with the Korun Family and witnessed its downfall firsthand.

The Holy Infant said:

"This is our contract, please take a look at the details, it might be quite strict, so once you make a choice, there's no turning back. Of course, as compensation, you will become part of our Fire Dragon Shop family."

He had already investigated Zion's background; this person is indeed a rare treasure maker.

This profession is very ancient and long replaced by weapon craftsmen, now scarce in number.

The few remaining treasure makers have all been recruited by official and top wizard organizations to repair their ancient rare treasures.

Compared to Wizard Tools which can continually advance, the high-cost and non-advancing rare treasures indeed can't keep up with the times.

The biggest advantage is that they are unrestricted by level and can serve as protection passed down from elders to juniors.

But low-level wizards also find it hard to fully unleash their power; often, they're not even as good as a top-grade Wizard Tool of the same level.

Zion said:

"Alright, Master, give me some time to think it over."

The Holy Infant replied:

"Alright, but I'm going to retreat soon, so hurry up."

A few days later.

Zion still found the Holy Infant, expressing her willingness to join the Fire Dragon Shop.

The elders like Silverbeard, Iron Teeth, Copper Ear, and Golden Eye all came to congratulate her.

Silverbeard laughed heartily:

"Congratulations, Madam, on joining our family, you will come to love it here."

At Fire Dragon Shop, he ended his life of wandering without support.

Here, he could do what he loves without worrying about expensive primordial soul cultivation resources.

Moreover, due to the widespread fame of Master Fire Dragon, others also treated them elders with a special respect.

Six months later, shortly after joining the Fire Dragon Shop, Zion made an important decision.

She copied the artifact inheritance she acquired and gave a copy to the Holy Infant, in return for asking him to take her as a disciple to teach weapon-making.

She wanted to have a more rounded skill set, finding it difficult to rely solely on artifact making.

The Holy Infant was naturally pleased, eager to study artifact-making knowledge in case it became useful.

And later, he also learned that Zion indeed possessed rare treasures similar to the Wind Disaster Pearl.

What she acquired were the Earth Disaster Pearl and Thunder Disaster Pearl.

The Holy Infant then exchanged these two pearls from the young girl with a sixth-ring top-grade Wizard Tool.

Thus, the true form has now collected four Disaster Pearls: Earth Disaster, Fire Disaster, Wind Disaster, and Thunder Disaster.

Unexpectedly, there's still Water Disaster, Cold Disaster, and Gold Disaster scattered outside.

Now the Fire Dragon Shop has gathered every type of weapon-making talent, achieving consummate success.

The Holy Infant happily took out the Flame Demon Potion refined by the true form, planning to make a concentrated effort to advance to the Seven-Ring Realm.

Meanwhile, Gandaph has been silent for a long time with no more deeds reported.

Only Lord Victor intermittently heads to the God-forsaken Continent to hunt demons, earn war merit, and practice the Path of the Secret Sword Array.

Refining the seventh-level Heavenly Star Sword Formation is a systematic big project; he needs to wait for the Holy Infant to reach seven rings for both to refine together.

Years passed swiftly, and four years went by.

On the Level 8 Demon Slaughter List, Lord Victor played his sword and sang highly, advancing in a comeback.

He pressed forward triumphantly into the top hundred, soon surpassing ten million points.

Clearly, this Secret Sword Sect Hierarch, after reaching the seven rings, showed no inferiority when facing those long-famous predecessors.

On the Seventh-Level Demon Slaying List, Gandaph and Ace had long dropped out of the top hundred.

One by one, emerging stars began to show their prowess on the battlefield.

And among these stars, the most dazzling few were known to all like "supernovae".

For example, the Demon Tears Divine Sword-Link.

In the blood and fire of slaughter, he advanced to the sixth-ring within less than a hundred years and then advanced to the senior realm of the sixth-circle.

Becoming one of the few senior sixth-circles on the Demon Slaying List's top hundred.

Now recognized as "Little Victor".

During an interview with Blood Battle Daily, Link helplessly stated:

"Though I deeply respect Senior Victor, I still dislike this title; it makes me feel like I'm living under the senior's shadow..."

Among the supernovae of the Seventh-Level Demon Slaying List, there are several who are the strongest talents of various top wizard organizations.

Some also come from unknown backgrounds, suspected to be nomadic wizards or prominent figures' offspring.

Among the supernovae, there are also two knights.

One of them is the "Fire Dragon Knight" of the Seventh-Level Demon Slaying List.

He is the only knight in the top hundred list.

He once killed a sixth-level later-stage demon with his sixth-level mid-stage cultivation... more than once.

In the combat projections circulating in the Wizard World.

After revealing his true form, he appeared even larger than a demon.

He smashed a powerful demon lord with his mountain-like greatsword, just like crushing garlic.

The other is the "Supreme Knight" of the Level 8 Demon Slaughter List.

After more than a decade of reappearance, he surged with terrifying speed from the twentieth rank to the top ten of the list.

This time... he is first!

Chapter 2109: Hand of the Winter Emperor!

Fourteen years.

From being ranked in the teens, fought back to number one.

This difficulty is greater than fighting from rank two hundred into the top ten.

After the top hundred, the strength gap between seven-circle wizards is not significant, and the points difference isn't large either.

Basically, increasing some points can advance one rank.

However, the top hundred are monsters and demons.

The further ahead the wizards are, the more monstrous they become.

The top ten are primarily composed of the seven-circle perfection wizards, all of whom are geniuses and outstanding individuals among them.

These people, more or less, have records of contending with eighth-circle wizards.

Whether they have surpassed their level in battle or not, they are by no means ordinary people.

The top three, needless to say.

Destruction Realm Thunder, Light Divine Sword, and Hand of Fire God, these three bosses dominated here for many years.

They pulled away from the gap after the third rank!

And this time, witnessed by everyone, the Dusk Palace Master, with an unbelievable speed, rushed to rank one.

[First place, Dusk Palace Master, points: 120 million.]

[Second place, Destruction Realm Thunder, points: 118 million.]

[Third place, Light Divine Sword, points: 100 million.]

Thus, in the 166th year since the start of the Blood Battle, the first position on the level 8 Demon Slaughter List has finally changed hands.

God-forsaken Continent.

Having accumulated 100 million war merits, Levi embarked on his journey home.

In the past decade or so, it hasn't been smooth sailing for him.

The Burning Expedition Army's eighth-circle demons pursued and intercepted him many times.

However, he successfully escaped each time, with his current ability to save himself, even a level 8 powerhouse couldn't do anything to him.

Not long ago, they even dispatched two level 8s to ambush him.

He knew he needed to leave for a while.

After over a decade of slaughter, Levi no longer remembers how many demon lords he has hunted down.

Even level 7 demons, he has killed quite a few.

The accumulated high-level demon materials alone are enough to make him incredibly wealthy.

Among the ten thousand Shadow Dragon Group, there are dozens of sixth-level shadows.

About a third are level 5 shadows.

The rest are mostly level 4 shadows.

The shadows alone show how frenzied Levi's slaughters have been over the years.

Because his emergence is always accompanied by the Shadow Dragon Group.

Gradually, among the demons, the title of [Shadow Demon Hunter] started to spread.

Shadow Demon Hunter Levi, master of incredibly powerful shadow magic, commanding thousands of powerful shadows.

When you find this person, it means you are already surrounded by shadows covering the mountains and plains.

He alone is a legion.

Gradually, many wizards also learned the secret of Levi's invincibility.

Seeing Levi controlling so many shadows.

The genius wizards from the Shadow School of Thought even began to doubt the authenticity of their shadow magic cultivation.

Some were unhappy, thinking this method was cheating.

However, since the Demon Slaying Bracelet judged there was no problem, these voices were ignored.

No matter how many shadows Levi summons, he is using his own spells, which is not an issue.

Aside from the shadows, Levi's own strength also leaves them speechless.

After climbing to number one, more and more congratulations and flattery arrived.

Major newspapers also made it the headline.

Although Levi didn't want to be famous, with the ranking there, he couldn't stay low-key.

After exchanging for [Hand of the Winter Emperor] in the Central Realm as he wished, Levi returned to the Ancient Dragon Continent.

In the container is a skinny arm, exuding a chilling cold breath.

The arm's surface is covered in fine frost, with countless Frost Truth Runes shining within.

Levi let out a long sigh of relief.

"The upper-level oddity of the Ice King Series is in hand, milestone complete..."

"When the Holy Infant reaches seven circles and refines this, the Ice and Fire Holy Body should be completely balanced and can be further improved. With the Holy Infant's aptitude, the seven-circle cultivation should be smooth, surpassing those ordinary top-level geniuses, and I won't have to worry."

He put away the [Hand of the Winter Emperor], and the Holy Infant has already gone into seclusion to advance to seven circles, unable to emerge anytime soon.

Only Gandaph has yet to reach his Maximum.

It's not that Levi is biased and unwilling to prepare oddities for Gandaph.

It's just that the War Merit Store doesn't have any Bright Moon Artifacts suitable for Gandaph.

Like the pure refining body artifact [Elephant God's Proof], they are too scarce.

It's better to let Gandaph accumulate war merits himself and slowly exchange for those random oddities worth 50 million war merits for luck.

If it's not suitable, he could just take them for cultivation.

Apart from [Hand of the Winter Emperor], there are some decent-looking Bright Moon Artifacts from the non-random oddities.

But Levi doesn't plan to exchange them.

These oddities cost more than double that of the random oddities, lacking cost-effectiveness.

Once he finishes using his chances for the random Bright Moon Artifacts worth 50 million, he'll start saving points.

He wants to go all the way and exchange for a Glorious Sun-Grade Oddity.

So far, disregarding the random Glorious Sun-Grade oddities valued at 500 million.

There are only 9 selectable Glorious Sun-Grade oddities available for exchange by the seven-circle wizards in the War Merit Store.

Each of the Seven Elementalist Schools has 1, the remaining 2 belong to Shadow and Death.

The value of these oddities is generally above 1 billion war merits.

Some popular factions exceed 2 billion.

For example, the Burning Faction's [Flame Emperor's Sword], valued at 2.3 billion war merits.

The Earth Faction's [Gaia's Heart], valued at 2.2 billion war merits.

The Ocean Faction's [Water God Palace], valued at 1.9 billion war merits.

The Storm Faction's [Undying Wind], valued at 1.7 billion war merits.

Chapter 2110: Hand of the Winter Emperor!

Aside from that, the Shadow Faction's [Shadow Emblem] and the Lightning School of Thought's [Thunder of Destruction] are all quite valuable.

These Sun Refining Artifacts were dazzling in Levi's eyes.

Honestly, he wanted all of them.

However, according to the exchange rules,

each person can only exchange for one random Sun-Grade Artifact, plus two more that are non-random.

So, Levi could choose up to two types from them.

It is foreseeable that the traditional four major elemental factions of Earth, Fire, Wind, and Water will have fierce competition.

There are only a few, yet a large number of geniuses want them. The top of the Demon Slaying List is filled with wizards from these factions.

The factions of Death, Lightning, and Storm are not faring much better.

Overall, the competition within the Bronze and Shadow Factions is relatively smaller.

These two factions currently only have some Grand Wizards, not even a single Legendary Wizard.

They have a few top talents, but compared to other schools, both in quantity and quality, they are lacking.

From the officially stated value, the Shadow Emblem worth 1.6 billion points is likely inferior to the first-ranked Flame Emperor's Sword.

According to the Illustrated Guide of Strange Items, Flame Emperor's Sword indeed stands out among the Sun-Grade.

But Levi still regarded the Shadow Emblem as one of his must-pick artifacts.

Sun-Grade Artifacts have one important function.

That is to enhance one of a wizard's innate spells, raising it to a new level.

Generally speaking, innate spells are already set after advancing to the primordial soul.

Because they have already been solidified into a wizard's innate instinct.

They can only increase in power as the realm advances.

But the spell itself is difficult to evolve.

At most, some simple structural optimization can be done through Truth Oddities, but that's not a qualitative change.

Sun-Grade Artifacts are things that change fate against the heavens.

They are powerful enough to conduct significant secondary strengthening of a wizard's intrinsic talents!

This strengthening is a true qualitative transformation.

Thus, if Levi is to choose his first Sun Refining Artifact, it must be the one that provides him the greatest benefit.

Aside from Ten Thousand Dragons Birth, his most powerful innate spell is the Shadow Dragon Group.

If it can undergo a qualitative change through [Shadow Emblem], the power of this talent will be even more terrifying.

Spells like Fire Dragon Tribulation and Water Dragon's Song would benefit less from enhancement.

Levi believed that after strengthening the Shadow Dragon Group, his shadow summoning creatures would surely receive a different kind of boost.

Of course, if he had a choice, Levi would more like to strengthen his Ninth Talent, [Ten Thousand Dragons Birth].

However, this spell is somewhat special, as it is of Chaos attribute.

Currently, he can only access single-attribute Sun-Grade Artifacts, making it difficult to achieve enhancement for it.

According to the Illustrated Guide of Strange Items, Chaos attribute artifacts are all Legendary Artifacts, too distant from him.

Shadow Emblem is valued at 1.6 billion war merits.

Even with his Shadow Dragon Group, it's impossible for Levi to accumulate so much in a short time.

Fortunately, he looked through the Shadow School of Thought's Demon Slaying List rankings and felt reassured.

Currently, on the eighth-level Demon Slaying List, the strongest in the Shadow School of Thought is a Seven-Circle Perfect Wizard named [Ghost Shadow].

At present, ranked fifteenth with 40 million points.

As for those eighth-circle wizard bosses on the ninth-level Demon Slaying List, they will not participate in the exchange for these oddities.

They have their own prize pools and do not need to compete with the seven-circle wizards.

Otherwise, with the strength of eighth-circle wizards, there would unquestionably be nothing for the seven-circle wizards.

Thus, as long as he doesn't slack off too much.

Occasionally going to the God-forsaken Continent for demon hunting, this oddity should be secure.

Levi even felt if there was enough time, he could first go and exchange for the popular [Flame Emperor's Sword].

Then, in turn, exchange for the [Shadow Emblem].

After all, with the fierce competition in the Burning School of Thought, once he finishes exchanging for the [Shadow Emblem] and accumulates 2.3 billion again,

Liver Emperors like Hand of Fire God are probably already ahead.

As for the random oddity worth 500 million, exchange for it last, as everyone can guarantee one exchange opportunity.

With a new goal in mind, Levi immediately felt motivated again.

But after demon hunting for more than a decade continuously, he's also a bit tired and doesn't want to go to the God-forsaken Continent anytime soon.

He plans to change his mood and relax a bit.

Through Leon's Memory Disc,

he learned from the memories of those demon lords that he is now the number one wanted by the Burning Expeditionary Army.

The Army Commander of the Expeditionary Army has placed a bounty on him with a level nine Abyss Heart reward.

This is also why those level 8 demon lords keep giving him trouble.

If not for his mastery of the Death Ember Divine Palace and Danger Perception, these heaven-defying abilities.

He would likely have already perished, buried on the God-forsaken Continent.

As far as he knows, currently in the Wizard World, there are not many wizards with a bounty of a level nine Abyss Heart.

Lucy from the Deep Blue Expeditionary Army is one of them.

And a few others, all eighth-circle perfection battle group powerhouses.

And he, Levi, is the only seven-circle wizard to receive such "honor."

Even Destruction Realm Thunder and Bright Divine Sword do not enjoy such treatment.

After resting for a while.

He arrived at the Ancient Banyan Fairyland, gazing at the Black Soul Demon Tower and the Book of the Undead in his hand.

"It's been a while since I crafted artifacts personally."

He plans to upgrade the Book of the Undead to seven-circle and combine it with the seven-circle Black Soul Demon Tower.

Emulating Hundred Flowers' Star Ring and Tower of Summer Flowers to refine it into a combined Wizard Tool.

Then, he'll repair the Black Soul Demon Tower a bit, temporarily using it as a wizard tower.
