

Wizard 215

Chapter 215: The Wizard 's Insect Taming Book! (3)

The Patriarch of the Scorpion Family was panicking. In the end, he was forced by Levi's tyrannical power and ordered his subordinates to retreat. He brought Levi into the secret room where the Saint Scorpions were raised.

Levi looked at the poisonous scorpions in the pond.

"It's this thing. It can devour souls," Levi looked at the Saint Scorpions and muttered.

However, Levi frowned when he saw the people being devoured by the scorpions.

"You feed the scorpions with living humans?" Levi asked.

"These people won't live long even if they aren't fed to the Saint Scorpions," Knight Lyle said.

"They're just people who are about to die. You'll do the same if you want to nurture powerful Saint Scorpions."

Levi said nothing.

Under the threat of death, Knight Lyle handed a sheepskin notebook to Levi.

Levi took the sheepskin notebook and glanced through it.

It should be the method to control the poisonous insects.

"Saint Insect Defending Technique. Saint Scorpions and many other poisonous insects can be raised and tamed. This is a good thing. It should be the masterpiece of a wizard."

Although Levi did not look closely, he could tell that it was not something that an ordinary person could create. It must be a work written by a wizard who studied the school of poisonous insects and monsters.

Wizards had a wide range of research. It was customary for a school that specialized in poisonous insects to exist.

"That's right; you didn't lie to me."

"Unfortunately, I'm an assassin of Bird of Death's Voice. I don't keep my word and am despicable and shameless."

Levi sneered and shattered Knight Lyle's heart meridian and Life Seeds with a palm strike, killing him instantly.

An ordinary grand knight like him was no match for Levi.

No matter what, since he had already offended the Scorpion Family, he could offend them to the end.

The Scorpion Family was a family that held grudges. If he let Knight Lyle go now, although he did it as Bird of Death's Voice, he might be found in the future.

It was better for him to die.

After Levi killed Knight Lyle, he searched the secret room.

According to the Saint Insect Defending Technique, there were usually unique breeding bags for poisonous insects.

He searched for a while and finally found a strange bag hanging on the wall. It seemed to be sewn from some animal's fur, and there seemed to be some runes flashing on it.

"This should be it."

Levi picked up the bag and opened it with the magic of the secret technique. He jumped into the scorpion pond and used his black scales to protect his body while grabbing the poisonous scorpions with his bare hands.

He could feel that the Saint Scorpions were nibbling at his black scales.

"What a powerful poisonous insect. My Black Scales are invulnerable but can't withstand its bite. As expected of a mutated insect bred by a wizard," Levi praised in his heart and became even happier.

His strength could rise to another level when he mastered this method of controlling poisonous scorpions.

This way, after he entered the wizard world, he would have more means to deal with his enemies.

He was delighted!

Suddenly, Levi remembered that the Saint Scorpions could devour souls, so he took out the corpse of Knight Lyle.

Immediately, a bunch of Saint Scorpions lay on Knight Lyle's head.

They were crawling on the ground as if performing some evil ritual.

Then, they sucked in the air.

Tuten was released by Levi and said when he saw this scene, "What a powerful insect. It can devour souls. This poisonous scorpion is undoubtedly a creation of the wizard from the School of Insects."

"Is the School of Insects also a Wizard School?" Levi asked.

"That's right. However, it's a relatively unpopular school of thought. People

tend to classify it as the School of Mutation. After all, it's a weirdo who studies mutated poisonous insects."

Soon, before his Black Scales were bitten to pieces, Levi finally put all 100 Saint Scorpions into the bag.

Knight Lyle's soul was also devoured.

After devouring Knight Lyle's soul, Levi noticed that a few scorpions seemed to have eaten until they were round.

They lay motionless on the ground as if they had overeaten.

"I hope they won't die from being stuffed," Levi thought.

"As long as this method of controlling poisonous insects can be displayed on the proficiency panel, it will be convenient."

He picked up Knight Lyle's body and wrapped it up.

Although he was an ordinary grand knight, he could still be considered the fifth member of his living-dead family.

It was not a problem for him to be cannon fodder.

This was the rational use of corpses.

When the five generals of the living-dead family were all crippled in the future, their flesh could be fed to the Saint Scorpions and recycled.

"An evil secret technique, but... I like it."

The more evil it was, the more powerful it was.

For the sake of strength, Levi did not mind becoming one of those weirdos.

He searched the Scorpion Family's mansion and found a few more Saint Scorpions that had escaped.

Levi also found the Scorpion Family's breathing technique inheritance map. Unfortunately, it was the strength-type breathing technique that he disliked the most. It could only be cultivated to the peak of level 8 and was considered a second-rate breathing technique of excellent quality.

In the end, Levi threw down the mask of the Bird of Death's Voice and sneakily returned to Black Snake Castle in Flower City with Knight Lyle's corpse. After returning, Levi turned Knight Lyle into a walking dead. Levi named it "Demon Scorpion."

It was used to commemorate the poor Scorpion Family.

At this point, Levi already had Magic Shark, Demon Mountain, Demon Hai, Specter, and Demon Scorpion under his command.

What a luxurious lineup!

"There are still two empty seats left. I wonder which two lucky fellows will benefit from it. This fixed establishment is a blessing that these people took 500 years to cultivate," Levi laughed in his heart.

Conversely, the Scorpion Family received terrible news a few days later. "An assassin of the Bird of Death's Voice attacked the Scorpion Family."

This major event became the gossip topic of the Southern nobles after dinner.

The kingdom strongly condemned the despicable behavior of Bird of Death's Voice.

During this period, Levi had been studying the Saint Insect Defending Technique without sleep or food, preparing to record the method of controlling poisonous insects in this secret technique on his proficiency panel..
