

Wizard 2181

Chapter 2181: Enemy Appears, Exile Light!

"Extend life by a thousand years?"

Triss held the experiment log that Levi handed over, somewhat surprised.

Levi said:

"Yes, I got this from an ancient ruin. The owner of the relic researched for a long time but never succeeded."

Triss said:

"A longevity potion, if the materials cannot become relatively more accessible, is actually of no real use. For example, there's a nine-ring life-extending potion called the 'Turtle Life Potion', which can extend life by 1500 years. In fact, the impressive aspect of this potion is not the technical content of the potion itself, but because it uses the Turtle King Fruit, which, once ingested, can extend life by a thousand years. Such life-extending potions are hard to reproduce, as they are limited by materials."

Levi said:

"I looked at this person's research content, and he seems to want to study an eight-ring life-extending potion with relatively low costs, refined using the Undying Bird Bloodline plus other relatively easy-to-

find herbs. If successful, although it cannot be universal in the Wizard World, at least it could grant us another thousand years of life."

Triss said:

"Hmm, I understand, but this is an eight-ring potion, and with our current level of knowledge, I fear we are still not enough to research it."

Levi said:

"Could we bring in Ms. Lucy? I've heard she is also skilled in the field of potions."

Triss said:

"Ms. Lucy herself is not an issue, but she's currently busy commanding wars and may not have the time to attend to other matters."

Levi said:

"No worries, we'll take it slow. Throughout history, so many legendary wizards, grand wizards, none have researched an extended life potion that is relatively universally applicable. The difficulty is imaginable."

Triss sighed:

"Indeed."

The two exchanged pleasantries for a while longer, and then Levi left.

He copied the relevant knowledge of the 'Thousand-Year Potion' and gave a reference copy to Triss, including the experiment log.

The academic level of the relic's owner in pharmacy was very high, and his notes were of great use for Triss's research on other potions.

...

Nightmare World.

Crossing the Blood Rain Realm and continuously stretching across the boundless Pale Domain, one would arrive at a scarlet wilderness, which is the land of the Blood Sea Domain.

The so-called large domain refers to the territory governed by a Nightmare Monarch, under which there are many small realms. The Blood Rain Realm is under the jurisdiction of the Pale Domain, the owner of which is the Pale Monarch whom the Blood Rain Overlord serves, the same owner of the white bone giant claw that Levi saw in the Ash Dragon Egg.

And the Blood Sea Domain is another monarch's territory, named the Blood Sea Mosquito Lord, whose true form is a mosquito beast, claiming the title of "Master of Billions of Mosquitoes."

Within this large domain, many Nightmare Overlords reside. The Dark Web Path is one of them, located underground, eternally dark and damp, like a city's sewer, crisscrossed.

The overlord of the Dark Web Path, whose true form is a nightmare rat that has been alive for countless years. It was currently lying on a soft bed in the Underground Kingdom, smoking a pipe, its physique hunched.

"Cough, cough, who would have thought that such an unambitious descendant would be so frightened by an unknown minor lord that their soul scattered."

"However, that Black Dragon Lord can mobilize foreigners to the Nightmare World on a large scale, to wage war on its behalf, and possess an almost immortal body, such ability is rare."

"Looking at it now, this suddenly emerged Black Dragon Lord's origin is not simple. Horror Torture, you are also a Nightmare Lord, what do you think of this?"

From the shadow, crawled out a dragon radiating a violent aura, thick-bodied, its form resembling a small dog, it was the former overlord of the Tyrant Realm, with its true form being a pure-blood dragon, the Brutal Dragon.

It was severely wounded by the Blood Rain Overlord, almost to the point of death, although it managed to survive, its strength fell to a level 8 realm.

It fled the Tyrant Realm, became a Wandering Tyrant, but was captured by the Dark Dominator who planned to take advantage, and is now a prisoner, enduring humiliation and striving to survive.

Horror Torture said:

"I had heard before that a new Black Dragon Lord arrived on the border of the Blood Rain Realm, but I didn't pay much attention then, never thought it had such methods, likely a pure-blood dragon like me. There's a chance it's an advance force sent from the Wizard World, since many under its command are wizards."

The Dark Dominator said:

"Haha, wizards? Such a weak civilization, daring to actively invade our Nightmare World, perhaps they have forgotten the previous lessons."

Previously, a group of wizards captured the offspring of the Lost Monarch, Pan, and were eternally imprisoned in the body maze of the Lost Monarch, forever unending.

Horror Torture's eyes moved.

"How about I go meet this Black Dragon Lord?"

The Dark Dominator coldly laughed.

"Don't play tricks, I know you want to escape from grandma's grasp, you better behave and stay here, I have my own plans."

...

Black Dragon Territory.

Levi listened to the report from his subordinates, a look of contemplation on his face.

Just a few years ago, the growth and reproduction speed of the Mother Flesh Tree in Black Dragon Territory suddenly surged, with the production of nightmare creatures increasing annually, but the cause is still unclear.

"Generally speaking, this kind of situation, either something has changed in the Nightmare World, like a locust plague, or the Nightmare Lord itself advanced in strength, or the negative influence on the Prime Material plane increased."

"Now, it's been a long time since the millennium locust plague passed, and the benefits from that wave have long been digested, so it should not be due to external reasons, it should be because of me... No, I

treat people gently and kindly, the people of the Ancient Dragon Continent are also grateful to me, although I occasionally kill some people, very few know, it shouldn't lead to a significant negative impact."

Chapter 2182: Enemy Appears, Exile Light!

"Could it be that I've killed too many demons, causing many to live in fear, to have nightmares daily, fearing me, dreading me?"

"That shouldn't be it. While I have some influence among the demons, it's not significant. Besides, demons are inherently chaotic creatures, fearless of heaven or earth. Fear is insignificant among their emotions."

After some reasoning, Levi was utterly perplexed.

Regardless, this is a good thing.

On one hand, it can aid the development of the Black Dragon Territory.

On the other hand, once Levi's Nightmare Dragon advances, the proficiency experience gained idly in the Nightmare World can also increase.

...

The Nightmare World, vast and boundless.

Crossing the Blood Sea Domain and several other domains.

In a place extremely far from the Black Dragon Territory, there is a domain known as the "Lost Domain," the domain of the renowned Lost Monarch.

After the millennial locust plague, many unclaimed lands and Mother Flesh Trees emerged. Among the major lords, constant warfare ensued to seize these new territories.

Inside one of the Mother Trees, a twisted shadow is being nurtured. The Fear Power from the Multidimensional Plane transforms into an endless stream of strength, pouring into the shadow.

"Twilight Demon King!"

"Twilight Demon King!"

"Twilight Demon King!"

It seemed as though countless beings, in the day, at night, in dreams, were fearfully calling out a single name:

Twilight Demon King!

They hadn't even seen the real Twilight Demon King or knew who it was.

But due to word of mouth, it became an "urban legend." Mentioning the name "Twilight Demon King" itself instilled fear, dread, and trembling.

The Nightmare World is mysterious, vast, and bizarre. In this unknown corner, a new "Nightmare Creature" is quietly being nurtured.

...

Ancient Banyan Fairyland.

Apart from his cultivation studies, Levi's few indulgences include watching Memory Discs.

On one hand, it's for gathering useful information, spells, and knowledge. On the other, it's for entertainment, much like watching a movie, and quite amusing. Most of the time, he only watches discs of level six or above, too lazy to look at the low-level ones.

"Master, take a look at this disc."

Leon handed a Level 5 Flame Demon's disc to Levi.

Levi took it, and after examining it, his expression shifted.

In the scene, an endless red wilderness.

A Level 5 Flame Demon mingled within a large army, seemingly fleeing for its life. Through its perspective, Levi saw a Level 7 Middle-Stage Flame Demon being killed by a wizard in red robes using a spell.

The face of the red-robed wizard was unclear, but from the iconic Red Flame Wizard Tower, Levi knew its identity.

"Flame Servant·Gorwin!"

"This person is actually in the Flame Mountain World!"

From the Memory Disc, it was known that at the onset of the Blood Battle, this Level 5 Flame Demon had followed the army to invade the Flame Mountain World. Over there, it encountered the Flame Servant, survived the battle by luck, but was conscripted into the Burning Expedition Army and came to the God-forsaken Continent.

Levi didn't know when he had killed this demon, but inadvertently he learned the whereabouts of the Flame Servant.

To be honest, Levi had given up hope. He had secretly searched for a long time without finding the person.

The Wizard World was vast, and once the Flame Servant decided to hide, coupled with his powerful family's concealment, Levi indeed couldn't find him.

So he had resigned to leaving it as a regret, considering him the second Wild Boar Knight.

Unexpectedly, fate opened a path.

It was as if the karmic connection between him and the Flame Servant hadn't yet severed!

"Hahaha, Flame Mountain World, so you've been hiding here, not even daring to enlist on the Demon Slaying List, just afraid I would find out."

Levi calculated; it had been over three hundred years since he last saw the Flame Servant. Over time, with his talent, he should have long advanced to a Seven-Circle Senior Wizard. But he should still be quite a distance from Seven Rings Perfection.

No matter what, this kind of person could now be easily eliminated with a flip of his hand. With his Traveling the Void speed, it wouldn't take a year to reach the Flame Mountain World.

To leave no regrets, after a preliminary divination and specifically searching for extensive Flame Mountain World data to ensure no danger, Levi left the Wizard World.

...

A year later.

Flame Mountain World.

Levi descended there, frowning.

Surveying the area, this world was heavily laden with demonic aura, exceptionally dense.

An inkling of danger lurked, suggesting the presence of a powerful Level 8 Demon.

"It seems the Wizard Council has abandoned it."

As the Blood Battle progressed, one-fourth of the Plane Confederation had already fallen, an unavoidable outcome given the vast scale of the Blood Battle, far exceeding the previous havoc the four evil gods wreaked upon the Five Realms Federation.

To concentrate its forces on defending the Wizard World, the Wizard Council couldn't station too many troops in other Plane Confederations.

Up to now, the resources and alien races from these planes had mostly been transported back to the Wizard World, now all turned into demon nests and garrison points.

"It's been hundreds of years since that demon and Flame Servant last met. Who knows if they're still around the area."

Levi's Hermit Rune flickered, planning a carpet search for the Flame Servant. If no leads turned up, he'd withdraw without alarming the demons there. Drawing the attention of a Level 9 Demon would be unwise—vengeance isn't worth risking one's life.

Chapter 2183: Enemy Appears, Exile Light!

Time slipped by.

A month passed.

Levi scanned the Flame Mountain World roughly. Finally, he was basically certain that the Fiery Flame Servant had already left this place.

"Forget it, forget it, let's go back... In life, it's impossible for everything to go your way."

Levi quietly departed.

...

In the boundless Land of Darkness.

Burning Flame World.

This place was already very far from Nora.

In the Land of Darkness, a Red Flame Wizard Tower floats silently. The Fiery Flame Servant gazed at the crimson world in the deep void, his face lit with joy.

After breaking through the Seven Rings Senior Realm previously, the Fiery Flame Servant, realizing Levi's growth potential, abandoned his plans for revenge.

He sensed that the Flame Mountain World would inevitably fall to the Demon Army, so he left there early.

Relying on the wizard tower, he wandered the Land of Darkness, heading to more distant places to find a paradise suitable for himself.

This brief moment turned into a century. During this time, although he encountered many dangers, he passed them without incident.

"Heaven always leaves a path; amid the vast darkness, there's such a treasure land, albeit not large, but suitable for my cultivation and very safe. Except for some black beasts, there's no sign of demon invasion. It seems to have traces of indigenous civilization, and if enslaved, it can still find resources for me."

...

Ancient Dragon Continent.

Levi returned safely, despite his fruitless journey.

To him, this was just a minor episode, completely unnoticed.

In the blink of an eye, four years have rushed by.

Nora 454.

Year 240 of the Blood Battle.

Levi's spiritual force had already reached 10,520, less than five hundred away from Seven Rings Perfection.

Over the years, his "Wildness Sound" and "Shadow Wind" cultivation reached level 15, the "Destiny Coin" spell also cultivated to the seven-circle standard of level 16, already able to cast Luck Changing Magic on himself.

According to the spell's descriptive effect, after casting, it can transform misfortune into fortune. But Levi tried it and didn't notice any difference.

Fate-related magic is deeply involved, and sometimes, being in the midst of it, is hard to see the full picture.

He believes that since the Black Abyss Walker encouraged him to focus on learning, this spell surely has unexpected effects.

Just like the Lovers Rune, in the unseen, there is destiny. This itself is a kind of rule, but unlike Earth, Fire, Wind, and Water, it's not obvious.

In recent years, Levi also learned one top-grade seven-circle spell from the Bright Faction, though it involves space knowledge, named "Exile Light."

Upon casting, it has the chance to banish dark creatures, including demons, to a cage-like space-time dimension, exiling them for a period until the spell's effect dissipates, then they can return to the real world. During this time, the wizard can take the chance to escape.

This spell is mainly intended to be cast on powerful demons that are unbeatable for the wizard; if practiced to the maximum, it has a 90% chance of successfully banishing demons of the same realm upon hitting.

For demons beyond one major realm, it has a 30% chance of success, two major realms have a 10% chance, ineffective for level 10 demons.

In other words, if Levi masters it, there is a one in ten chance of a level 9 demon being exiled for some time, allowing him to escape smoothly.

Of course, the length of exile also shortens with the increase in demon power.

This is similar to the Frost Blood Sect's "Absolute Ice Point," the same type of spell. "Absolute Ice Point" involves the Path of Time, "Exile Light" is the Path of Space, both extremely hard to cultivate.

Once mastering these two spells, Levi's ability to preserve life greatly increases. Of course, it's not completely invincible, as spellcasting time and successfully hitting are still needed. Level 9 beings aren't foolish enough to wait for a spell to hit, but it's certainly a method.

Meanwhile.

Levi's Scarlet Dragon Breathing Technique also advanced to Level 7 Mid Stage. The power of various spell-like abilities has been enhanced. The diameter of the domain range of "Scarlet Blood Prison" increased to 12 kilometers.

The "Strength Rune" advanced to level 16, power boost reached 200%, "Moon Rune" advanced to level 9, lifespan boost reached 80%, "Fool Rune" advanced to level 7, fool and Power of foreknowledge boost reached 60%, "Magic Rune" advanced to level 5, casting speed boost reached 40%.

The current Rune Language has long diverged from the original intention when the author initially created it, and under the proficiency panel's influence, has veered onto paths the original author had not envisioned.

Even if the original author were alive, the achievements would be challenging to compare with Levi's. After all, he merely compiled and translated the Starforger Civilization's "Language of Stars," his cultivation was not necessarily better than Levi's.

"Now that the Fool Rune has advanced, let me see who intends to harm me."

Levi's consciousness entered his mind, only to see a pig face with death energy swirling around it, a scene of Montenegro Mountain filled.

"It should be Hell, but I'm unsure where exactly."

He etched the image down, then summoned the skeletons Little Pink and Little Black.

"You two take the slate to the Sorceress of the Sensual Realm and ask her to see where this is."

Little Pink nodded obediently, pulled Little Black, and returned to Hell.

At the same time, they also brought news of the second brother this time.

After Levi read it, his face filled with joy.

"Second brother has actually branded 21 Witch Marks already, not far from the 22nd. It seems within a century, he can advance to seven rings, and become a rare dual cultivation of body refinement and spell in history."

Chapter 2184: Enemy Appears, Exile Light!

After calculating, the Purgatory Demon Sword has indeed been stuck at sixth-circle perfection for several hundred years for the sake of those 22 witch marks. Any other genius wizard would certainly lack the courage, patience, and resources for this.

"My second brother, he possesses the demeanor of a legend!"

Soon after, news arrived from the Hell's Three Sisters.

They said the place Levi saw seemed to be in Hell's Eighth Layer, but precisely where, they couldn't say yet and have sent people to investigate.

...

Two years later.

Nora Year 456, Blood Battle Year 242.

In the realm of cultivation, time flows unheeded. Levi was now 880 years old.

With a luxurious lineup of secret medicines like the Black Lotus Beast, Crack Qilin Dragon, and Fire Breathing Dragon, the Crimson Emperor Dragon Breathing Technique cultivation became increasingly smooth, not far from the late stage of level 7.

The same went for the Golden Brilliance Dragon. The combination of Four-legged Snake and Earth-splitting Dragon was far superior to the previous level 6 secret medicines.

Although the Inferno Dragon Breathing Technique broke through to level 7 later, with the combination of Black Phoenix, Ash Dragon, and Fire Breathing Dragon, it also began to accelerate, nearing the middle stage of level 7.

Though the Ash Dragon was young and of low level, being a pure-blood Dragon Clan member meant its secret medicine's effects were quite good. Levi only worried it wouldn't grow, so he paired it with other fire dragon clans.

The Wind-shaped Dragon secret medicine of the Sky King Dragon is already used up. That Heavenly Leisure Dragon General, Wind Dust Dragon, was still sleeping. Levi dared not wake it forcefully, for fear of hindering its evolution.

He previously checked on its condition and faintly felt a very pure Dragon's Might. When it awakens, it might undergo an earth-shattering change, possibly becoming the first Dragon General of the Dragon Palace!

The Scarlet Dragon still uses the Bloodsucking Demon Dragon secret medicine, although not at level 7 it can cultivate slowly. Levi wasn't in a hurry.

What made him somewhat anxious was the Nightmare Dragon's breakthrough. There had been no news of the nightmare dragon clan for a long time, and with other breathing techniques nearing mid-level 7, the Nightmare Dragon hadn't advanced.

He began deploying more subordinates to search for information on the nightmare dragon clan, while also assigning specific personnel to review and organize Leon's memory discs, regardless of their quality.

Previously, an accidental acquisition of information about a Fiery Flame Servant alerted Levi that even low-level beings might possess memories beneficial to him.

Every being is a point, seemingly inconspicuous but part of the great multitude.

More or less, they intersect with other points, forming a complex web of interpersonal and causal relationships.

From among them, gathering useful information, organizing and summarizing it for his review and reporting, is the job of this group.

Over the years, the Three Avatars and Hundred Flowers have been thriving on the God-forsaken Continent, each bearing huge bounties, becoming thorns in the demon's eye, playing out cycles of siege and counter-siege.

Ms. Lucy also took an interest in the Thousand-Year Potion but was too busy with warfare to personally participate in the research, so she compiled her past insights and experiences on life-prolonging potions into knowledge notes, as a return gift to Levi and Triss.

In his spare time from cultivation, Levi would explore potion research with Triss through the Nightmare World, sharing knowledge. Hundred Flowers would join such discussions during her leisure breaks.

Although progress was slow, everyone became somewhat familiar with the foundational theoretical knowledge of life-prolonging potions.

On this day.

Within the steeple of the Nightmare World.

Levi and Triss had just finished a delightful potion discussion.

Shortly after, a subordinate came to report.

"Lord, clues about the nightmare dragon clan have been discovered. In the easternmost section of the Pale Domain, bordering the Blood Sea Domain, there is a Glo City ruled by Flayer Ben, who keeps an evil dragon in the city named Golden Spear · Angang. That should be the nightmare dragon clan you seek, Lord."

Upon hearing this, Levi couldn't help but smile.

"Good, there's finally news."

The Blood Rain Realm alone is vast, not to mention the entire Pale Domain. The size of the Nightmare World is unimaginable. Most Nightmare Lords spend their entire lives in their small territories, rarely traveling far.

His Black Dragon Territory lies on the edge of the Pale Domain, requiring a full traversal of a domain to reach Glo City. But to advance, he had no choice.

Without delay, he instructed everyone to take good care of the territory and asked Triss to assist in overseeing things temporarily. Then, with Lopez, he embarked on his first Nightmare World Expedition.

...

Glo City.

Also known as the Golden City, the City of Wealth.

Lopez transformed into an ugly little water monkey, perched on Levi's shoulder, gazing at the city ahead.

According to Levi's gathered intelligence, Glo City Lord is a level 8 powerhouse, its true form a creature called Flayer.

Flayer's real name is Ben, known for being dictatorial, brutal, miserly, enjoying exploitation, and draining resources.

From afar, Glo City, unlike most Nightmare Cities Levi had seen, featured many steampunk-style buildings, factories, and chimneys standing, belching black smoke high into the sky.

Along the way, he saw numb-faced humanoid nightmare creatures moving mechanically like zombies. These beings, dressed in tattered clothing, emaciated, had featureless faces resembling a fate coin.

In the center of the coin bore an image of a human, wearing a top hat, portly, donned in a tailcoat, smiling to reveal a mouthful of large golden teeth.

Chapter 2185: Enemy Appears, Exile Light!

[Welcome to the City of Wealth, the Dream Chasing City!]

Above the city, such a tempting phrase was drifting, and Levi seemed to see endless Fate Coins waving at him.

In the Nightmare World, there is nothing too bizarre.

Levi had already grown accustomed to these things.

He roughly understood how the Glo City Lord was born.

"Skin Stripping Ben is a Level 8 Early Stage powerhouse, similar in strength to the Black Death King. Although I'm not afraid of him, there's no need for a direct confrontation. If I were to die, I'd have to be resurrected from the Black Dragon Territory and make the long journey back, which is truly too much trouble..."

He was staking out nearby, observing the situation in the city, and killed another Fate Coin person, allowing Leon to read their memory.

After watching the video disc, he muttered to himself.

"Skin Stripping Ben loves Fate Coins. Every seven days, he leaves the city to collect Fate Coins from his territories. This day is known as the Mercy Festival... I should act on this day."

The Golden Spear was a giant dragon captured by Skin Stripping Ben in the Chaotic Wilderness. Rumor has it that it was covered in golden armor, inlaid with Golden Teeth, and clad with Golden Dragon Wings, personally crafted by Skin Stripping Ben.

It was imprisoned in a giant factory beneath Glo City, where many foreigners brought into the Nightmare World by Skin Stripping Ben were held.

Like the Man-Faced Spider, many Nightmare Lords invade the Multidimensional Plane, dragging some foreigners into the Nightmare World, keeping them captive to provide "emotional value."

But unlike those brought in by Levi, these poor foreigners, if they die in the Nightmare World, are truly dead.

Levi's Nightmare Lord ability was synthesized through the proficiency panel, and it is unique.

Several days later.

Above Glo City.

A figure was laughing heartily, dragging a sack, leaving the city, talking to itself:

"Today was such a fulfilling and complete day."

In the shadows, Levi watched the powerful figure leave.

"Skin Stripping Ben is taking the sack to collect money."

...

"Hurry up with your work!"

"I haven't rested, and yet you damned servants dare to rest."

In a massive factory whose purpose was unknown, a group of foreigners of various appearances gazed with fear at the floating Golden Dragon in the sky.

Its form was close to the archetype of an evil dragon, akin to a Fire Breathing Dragon, but decked in gold and silver, appearing even more lavish.

"I'm so tired, Dragon Lord, I request a break,"

a foreigner seemingly human said.

The dragon squinted its eyes, exuding a dangerous aura.

"Fine, rest now, and then make up for the time double during your next shift."

The human hesitated:

"But Dragon Lord, a day only has 24 hours... how can I make up the time double?"

The dragon snorted coldly.

"I don't care; this is an order. If you all don't work hard, how can my golden armor be maintained?"

The human dared not rest and continued doing meaningless work in the factory. Oh, dear, in this damned place, nobody even knew what was being produced.

"When will this nightmare end?"

"I want to go home!"

"So tired!"

Countless negative emotions—fear, despair, helplessness, resentment—formed invisible threads, rushing out from the factories, pouring into the territory's Mother Flesh Tree, nourishing the Nightmare Lord, while also spawning more Nightmare Creatures.

"Level 7 Late Stage, stronger than I imagined, not sure if it's a sub-dragon of the Tyrant of Horror."

After hesitating for a moment, Levi took action.

His form took a step forward, appearing out of thin air.

The whole person shot like light to the front of the Golden Spear. Feeling danger approaching, the Golden Spear's golden armor shone brilliantly, forming a golden barrier. The armor on the giant dragon, though called gold, was actually some special precious metal from the Nightmare World, unlike what mortals of the material plane called gold.

Crack.

Levi's fist became the Blood-Red Drill, spinning fiercely.

The barrier, capable of withstanding a full force attack from a Level 7 Late Stage, shattered in an instant. Levi grabbed the Golden Spear's tail and with a powerful burst, their two figures crashed through the factory roof, soaring into the sky.

"Who are you? I'm Skin Stripping Ben's pet!"

Golden Spear still couldn't grasp the situation.

Levi paid no heed, his fist the size of a sandbag smashing into the Golden Spear's head, breaking the golden armor, knocking out several of its huge golden teeth.

"Ouch, it hurts!"

Golden Spear cried out in pain.

It tried to escape but was sucked into the Bag of Gluttony.

The Bag of Gluttony, now a Seven-Ring Witch Artifact, had no problem containing this giant dragon temporarily. It was not a place to linger, so Levi carried the golden dragon in the bag over his shoulder and left Glo City aboard the Silver War Chariot.

After some Void Travel, he was thousands of miles away in no time.

The Golden Spear broke through the Bag of Gluttony's seal, opening its mouth to unleash endless golden scorching flames. The red flames left golden molten iron in their wake, coating the surface with a layer of gold.

Levi's Golden Gravity dispersed the scorching flames, and Lopez transformed into a three-kilometer giant ape, launching a surprise attack from the back of the Golden Spear!

Boom!

With a solid whack, the Golden Spear's golden helm shattered entirely, its head buzzing, crashing to the ground.

Levi snapped his fingers, and a terrifying lightning pillar fell from the sky, engulfing the Golden Spear. The sea of lightning raged, destroying everything.

In just a few exchanges, this Level 7 Late Stage Dragon Clan was effortlessly taken down by Levi and Lopez, left in a half-dead state.

Chapter 2186: Enemy Appears, Exile Light!

"Who exactly are you?"

The Golden Spear only wanted to figure out this question.

Levi landed on the ground, with red flames burning in his palm. Behind him, a formidable, awe-inspiring image of Six Dragon Illusions appeared, with Dragon's Might intertwining, forming waves that crashed into the mind of the Golden Spear.

"I am your master. Acknowledge me as your lord, and you shall survive."

The Golden Spear lamented:

"I acknowledge it, so why did you have to attack right away?"

Just after acknowledging its master, Levi sensed an overwhelming sense of danger descending.

"Skin Stripping Ben is here!"

The heavens collapsed, and beams of golden light descended from the sky, encircling Levi and sealing the Void.

A Fate Coin broke through the air, transforming into a gentlemanly figure in a suit and top hat.

It smiled with a hidden menace and said:

"Do you know who I am? How dare you kidnap my pet."

Without a word, Levi snapped his fingers again.

Bang, bang!

Two consecutive bolts of lightning struck!

Skin Stripping Ben, stepping with graceful dance steps, nimbly dodged Levi's attack. With a flick of its finger, a Fate Coin shot towards Levi's face.

Levi's figure flickered, and the Fate Coin exploded violently!

A golden shockwave swept across a hundred miles, instantly tearing through several layers of his protective force field, sending him flying. The Indestructible Armor trembled and buzzed, clearly reaching some limit, but still held up.

"This Skin Stripping Ben is formidable."

Levi raised his hand, and the Nine-colored Emperor emerged from the heavens, standing firmly behind him. Lopez also appeared from the Void, wielding a bone club towards Skin Stripping Ben!

Countless Fate Coins flew out from Skin Stripping Ben, swirling around it.

Duang!

Lopez's bone club almost got knocked away, but she steadied herself, staring cautiously at Skin Stripping Ben.

On the other side, the Maiya Spirit and Wind Spirit Weapons roared in, their innate spells thundered, and the Emperor's Sword slashed down from the sky!

Facing an eighth-level enemy, Levi dared not be careless.

Terrifying attacks approached, and Skin Stripping Ben's expression slightly changed, evidently not expecting this mid-level 7 enemy to have such strength.

Boom, boom!

One after another, Fate Coins flew out, clashing with Levi's mesmerizing innate spells and primordial soul spells, like dazzling fireworks exploding, unveiling an apocalyptic scene across hundreds of miles.

The Black Soul Demon Tower soared out, with Levi sitting atop it. The Death Storm, covering hundreds of miles, pulled Skin Stripping Ben into its midst, two elusive Dark Evil Souls coalesced, with death scythes slashing towards Skin Stripping Ben.

This Skin Stripping Ben was truly fierce; no matter what means Levi used, it could dissipate with a single Fate Coin.

"Wizard tower...it seems you're a foreigner."

A Fate Coin appeared in Skin Stripping Ben's hand, its form shifted, bursting through its tailcoat, transforming into a towering three-meter hideous creature with sharp claws and a scarlet tongue flicking out.

Its body was covered in scales formed by numerous Fate Coins, each bearing twisted faces of its victims skinned alive.

In a flash, countless distorted evil spirits surged towards Levi. Levi raised his hand, unleashing the Shadow Dragon Group. In quantity and quality, they surpassed the ragtag creatures.

With the wizard tower and numerous other techniques, Levi was evenly matched with this Skin Stripping Ben, Lopez occasionally harassing the opponent.

Yet, as Skin Stripping Ben, it could not tolerate having its possessions taken, worse than being killed.

As time passed, with the Sky King Dragon's powerful endurance and sustained combat, and the Death Ember Dragon's undying body, Levi gradually gained the upper hand.

Skin Stripping Ben's versatile Fate Coins were not endless; each used needed time to gather. The coin scales across its body now reduced by a third.

As an eighth-level powerhouse, unable to subdue an enemy for so long, Skin Stripping Ben was quite shocked; reigning over this region for years, it was the first time encountering such a situation.

In contrast, Levi fought more fiercely with time.

Seven Suns Falling Domain!

Thunder Beast Technique!

The seven-circle spells he had practiced to the maximum were no less powerful than conventional eighth-circle ordinary magic. Under such relentless bombardments, Skin Stripping Ben showed signs of withdrawal.

With a resolute heart, it released another wave of Fate Coins, which exploded consecutively. Levi did not dare to withstand it directly, using the Roc and Snake Path's evasive technique to dodge the core impact, transforming his arm into a spear!

Gun Skill Path + Roc and Snake Path!

At this moment, he became the god of spear techniques, navigating through a hail of gunfire!

A point of cold light arrived first, followed by the spear striking like a dragon!

Slicing through, Levi pierced Skin Stripping Ben's head, causing its figure to explode into countless Fate Coins, its voice echoed:

"I won't forgive you!"

Boom!

The barrier seal woven by Levi shattered explosively.

He looked at the badly hurt Lopez and the quivering Golden Spear in the corner, quickly taking them away from the place. That Skin Stripping Ben was not dead, its methods were strange, not a typical early-stage level 8.

Miles away from the battlefield.

Someone in the wilderness dropped a Fate Coin.

Moments later, the coin morphed into a golden dimensional ring from which a severely wounded figure emerged, none other than Skin Stripping Ben.

"I've been pushed to this extent by a level 7..."

Skin Stripping Ben pocketed the coin and quickly left; gravely injured, it dared not linger in the wild.

Time passed swiftly; after much hustle, Levi successfully abducted the Golden Spear and returned to the Black Dragon Territory, far from Glo City, so he wasn't too concerned that Skin Stripping Ben would come to trouble him.

If Skin Stripping Ben hadn't fled, opting for a fatal duel, Skin Stripping Ben would have undoubtedly perished. Through this battle, Levi gained more confidence in his strength.

He settled the Golden Spear at the Black Dragon Territory, having Lopez keep watch over it.

Then, after obtaining the bloodline essence, he returned to the real world.

Now, everything was ready, only the promotion was left.

...

Two years later.

Nora Year 458.

Blood Battle Year 244.

Good news came from the God-forsaken Continent: the Burning Expedition Army suffered a major defeat in their full-scale war against the Deep Blue Army, losing nearly ten level 8 powerhouses, while the wizard side had only one death and four injuries.

The most important aspect was that Nova, the leader of the Burning Expedition Army, had his hiding place found by Lucy, leading to a world-shattering battle between them.

Unexpectedly for many, Nova turned out to be a hidden-level 9 demon. Lucy found herself in deep peril but managed to engage for a long time with powerful means. With Lucy's distraction, Nova perished under the "Dragon Flames" strike by the Dragon Flame God.

After achieving significant accomplishments, Lucy ascended to the top of the Ninth-level Demon Slaying List. Subsequently, leading her legion, she seized victory, uprooting numerous demon nests on the God-forsaken Continent one after the other.

Laying these great merits, Lucy reached the summit of the Nine-colored Emperor rank on the Demon Slaying List. However, this battle was only the tip of the iceberg in the Blood Battle, with frequent demonic pandemics in other parts of the Wizard World, and the intensity of demonic aura in Nora steadily increasing over two hundred years, turning the God-forsaken Continent into the Abyss Demon Soil.

The Blood Battle was far from finished; the Wizard World still had much to strive for.

Chapter 2187: Seven Rings Perfection!

Aus Continent.

Amidst the plains, stood a verdant wizard tower.

On the tower walls, branches twisted and twined, lush leaves vibrant, flowers in bloom, and wild fruits dotted around, as if this weren't a wizard tower, but a towering giant tree.

Surrounding it were numerous small wizard towers, laboratories, and various other buildings.

From time to time, well-trained wizards returned with captured creatures, accompanied by a group of pale-skinned, strange-faced Bug Luminists with creatures clinging to their backs.

This was the research base on the Aus Continent, where Lady Rowling led a team in studying the mysteries of Bug Luminists and creatures. Additionally, the Law Destruction Warrior project was also underway here.

Luo Lin Half-plane, Inverted Tree Realm.

A sky-reaching giant tree stood like a pillar, dividing the earth and sky, while many wizards busied themselves in the experimental fields on the golden land.

"Madam, Oasis One now has the ability to absorb demonic aura. Upon absorption, it can convert it into ordinary elemental power, with a conversion rate of about one-tenth."

Rowling listened to the report, beaming with joy.

"Finally, it has been successfully developed. Next, accelerate the work on nursery and breeding, aiming to spread it throughout the land as soon as possible. As the number of demon deaths increases, the concentration of Nora's elemental power will continuously rise, and the cultivation speed of the wizards will significantly improve. After the blood battle, the new world in the future will be even more habitable."

Oasis One is the second generation of the Green Tribe, born from the combination of fungi and the advantages of the Green Tribe.

Compared to the traditional Green Tribe, Oasis One can absorb demonic aura, while retaining the Green Tribe's strong adaptability and evolution abilities, capable of differentiating into various industrial plants with powerful destructive capabilities.

These plants have been specially genetically edited to only exhibit intense aggression towards creatures containing demonic aura, and will not attack ordinary people or wizards.

This allows them to be widely planted throughout Nora, without worrying about the plants harming people.

...

Emperor's Palace.

Levi looked inside his body. Within one of his cells, the sixth divine palace had already formed. The six divine palaces perfectly arranged themselves into a hexagonal shape within the cell.

"Nightmare Dragon Breathing Technique, successfully reached level 7."

He opened the proficiency panel.

Levi

Nightmare Dragon Breathing Technique: Nineteenth Rank (1/10 million), Special Effect: Nightmare Dragon Body-Legendary (Level 7 Early Stage), Bloodline Dharma Idol: Nightmare Fog; Blood Source Armor: Nightmare Dragon Armor; Exclusive Weapon: The Nightmare Helmet (Level 7); Bloodline Divine Patterns: 0/45.

...

Compared to level 6, the abilities of the level 7 Nightmare Dragon are merely an enhancement of the original, such as the expanded range of [Nightmare Domain] and the increased authority of [Nightmare Lord].

With Levi's current authority, he could pull a maximum of thirty thousand people into it. With the increasing number of transcendent individuals from various organizations on the Ancient Dragon Continent, there's an opportunity to include more people for pioneering.

However, the forces are presently concentrated on the Blood Battle, so Levi temporarily doesn't need so many slots.

Having solved the Nightmare Dragon Breathing Technique issue, Levi felt immensely pleased. The next step was to advance towards level 8.

...

On this day.

Dusk Holy Temple.

Levi rarely attended meetings, and he took the opportunity to inspect the proceedings.

Once all Eighteen Riders were in place, the Blood Knight began reporting the work.

Despite the annihilation of the Burning Expedition Army, the demon offensive did not slow down but became even fiercer.

These years, casualty numbers at the Dusk Holy Temple have been rising annually. Fortunately, the green tribe planted along the coastline has grown significantly, greatly reducing the losses among knights.

The Green Tribe's performance in actual combat has been outstanding, especially effective against low-level demons.

Current casualties are within the organization's tolerable range. Additionally, with fresh blood from mortal gathering places, the impact has been minimal so far.

Among the old generation of knights, except for Golden Lion, Saint Ape, and Goddess, all others have already reached the Level 6 Late Stage realm. Blood Knight has even begun preparations to advance to level 7, hopeful to break through in a century or two.

The Golden Lion Knight recently achieved six talents at Perfection and entered the fifth-circle wizard realm. Were it not for him being a level 6 knight, now nearing nine hundred years old, he would have faced his limit year. Fortunately, with the knights as a safety net, coupled with ample wizard cultivation resources, he proceeded unhurriedly to ascend to five circles.

The same can be said for the Goddess Knight.

Her wizarding talent is also outstanding, with a double affinity. Consistently advancing smoothly, she is now in the fifth-circle senior realm, having also ascended with six talents at Perfection.

Not long ago, she and Emperor Mu had a son, named Eddy, who possesses her [Aurora Bird] bloodline and also inherits the [Ice Element Son] talent.

This made Emperor Mu delighted for quite some time, never missing a chance to mention the Children of the Elements in three sentences when among other knights, reminiscent of parents from a past life.

In the meeting, Levi also rejoiced for this. It marked the first time in recorded history that the knights of the Dusk Holy Temple had naturally born descendants with Children of the Elements, especially the rare Ice Element.

Considering this a meritorious event, he immediately bestowed upon the Goddess Knight an Earth-level Frost Artifact he previously obtained, as a full-year anniversary gift for young Eddy.

Once little Eddy grows a few more years older, he can start learning the Meditation Art, at which point his mother can teach him spell knowledge.

With the combination of Ice Element Son + Truth Oddity + personal guidance by a five-circle wizard + sufficient cultivation resources, little Eddy is starting with a veritable royal flush.

Chapter 2188: Seven Rings Perfection!

Reflecting on Levi's earlier days, even stepping onto the wizard path was fraught with obstacles, starting as a Child of Chaos with nothing but the panel.

Therefore, Little Eddie's early cultivation will undoubtedly be swift, with no hurdles at least until five circles.

This phase's cultivation speed may surpass what Levi achieved back then, but post five circles, it will be up to him.

Taking Simon's precedent into account, he advised Emperor Mu and Elsa not to overly pamper Little Eddie, lest he too easily thrive without necessary trials. Leaving Ancient Dragon Continent, he won't stand in the Wizard World if he becomes arrogant due to his talent.

Emperor Mu, having scabbled through his human realm days, naturally understands this, while Levi worries Elsa might coddle him—she once had a child, though just a church saint, who later returned to the Star Realm Divine Kingdom, which remains her regret.

Other knights generously gifted Little Eddie small tokens, blessings from the elders, moving both Emperor Mu and Elsa deeply.

Certainly, although Little Eddie is a Child of the Elements, should he wish to follow the path of a knight, his parents wouldn't interfere.

Levi once again encouraged single knights to find suitable partners and start their own families.

Despite having many comrades in the Dusk Holy Temple, loneliness still visits at night. Even transcendent beings need a touch of familial, friendly, and romantic affection to brighten life.

The middle generation of knights has successively reached the sixth-level mid-stage realm, needless to say.

Among the new generation of knights.

The Snapping Turtle Knight recently reached the sixth level through accumulated effort. The Pheasant Knight also quietly achieved level six.

The eighteen riders of dusk, finally reaching all level six, now truly possess the stature befitting the "eighteen riders."

As for the Fire Dragon Knight, who has advanced to the sixth-level late stage, and now as a supernova, along with the Shadow Queen, both rank in the top 20 of the seventh-level Demon Slaying List, becoming stars of Ancient Dragon Continent and the Wizard World.

Of course, in terms of direct combat power, the Fire Dragon Knight is stronger. The Shadow Queen is still just a sixth-ring senior, ranking prominently mainly for her strong [Shadow Crown] talent, granting her an exceptional number of summoned creatures, surpassing common Shadow Faction wizards, echoing a lower-tiered Levi.

Besides the eighteen riders, the Dusk Holy Temple boasts several candidates at peak level five, hopeful for future advancement to sixth-level.

With Levi's rare treasure safeguarding the Dusk Holy Temple, these individuals have some chance of surviving Blood Tribulation despite failing promotion, preventing the loss of key temple forces, similar to elite wizard organizations.

After the meeting, Levi proceeded to the Empire Senior State Assembly.

Leveraging the strong foundation laid by early Ancient Saints, the empire birthed 15 sixth-level experts. However, due to wars over the years, 2 were lost, leaving only 13. The three kings, such elders, all possess mid or late-stage sixth-level cultivation.

Furthermore, the development of the Lizardman's Psionic Academy has been promising, though no six-circle spellcasters emerged, plenty of fifth-circle experts can assist the Tower of Dawn.

In the fur clan's domain, the progress of the White Wolf Girl has been smooth, achieving evolution and steadily improving to mid-stage level six.

Sadly, Taiga and Simba, two early elders, did not successfully advance to level six; one retained life, while the other fell, leaving Levi lamenting.

Currently, only the special White Wolf Girl, Algerta, in the fur clan has successfully advanced.

Levi speculated that current Artificial Knight bloodlines might still have some shortcomings.

Additionally, Levi, in collaboration with the authorities, established a Non-bloodline Breathing Technique cultivation base on the Mortal Continent, named [Twilight Academy].

The initial aim of Twilight Academy wasn't to cultivate top-tier powerhouses but to offer non-knight family mortals a chance to walk the knight's path.

Provide them martial training to enhance physique, hone combat techniques, at least gaining basic combat prowess, withstanding the cannon fodder of some transcendent races.

Twilight Academy collects, refines, and optimizes existing shallow Non-bloodline Breathing Techniques, charging only small fees for enrollment.

Graduation criteria are also set; if unable to achieve necessary degrees within time limits, the academy will cease resource expenditure, and students can seek work within civilian security organizations.

If one's talent in breathing techniques or combat skills shines, they'll be discovered, possibly advancing to Dusk Holy Temple for further training on Ancient Dragon Continent.

All based on the absence of wizard or other transcendent skills, if other talents exist, they're prioritized, making non-bloodline breathing technique a last resort.

In the long term, the average strength of humans will undergo qualitative enhancement, providing mortals some self-defense capabilities during civil wars.

The development of the Giant Soldier Roar Group, including the ice and fire giants, has been impressive; apart from the commander Beisita, two sixth-level experts emerged over centuries.

The Doomsday Valkyrie battle group birthed a second sixth-level Amazon Warrior; the potential of the Amazon Tribe is notably greater.

Chapter 2189: Seven Rings Perfection!

The story of "Valkyrie La" has been passed down through their clan for generations, a being said to have the power to contend with the Gods.

Later, the Valkyrie was vanquished by the Heavenly Father, and her bloodline was cursed, making it difficult to produce powerful beings.

As for the Tower of Dawn and the Arcane Academy, they have both flourished by relying on war.

Mechanics have prospered much more compared to hundreds of years ago; apart from the Tower Master and his wife, many excellent mechanics like Anya have emerged.

The Nine Heavens and Ten Earths Demon-Slaying Divine Shuttle, such a great weapon, is updated with a new version every few decades, continually increasing in power, from initially unable to contend with level 6 to now being able to pose a threat even to level 7.

Mechanical reconnaissance organisms spread across the Ancient Dragon Continent monitor the demons attempting to invade here around the clock.

With cooperation from the congress, mechanics have been widely applied in this Blood Battle and have played a significant role, with the Tower Master's research funding entirely coming from congress grants.

Just a few years ago, the Mechanical Dao and the School of Alchemy officially merged to become the officially recognized School of Wizardology: the Mechanical School.

And the Tower of Dawn is the headquarters of the Mechanical School, while the former School of Alchemy's headquarters of the Burning School of Thought has become a branch.

The batch of wizard geniuses Levi brought out from the Dark Ancient Tower have also grown sturdy and become the backbone of the Tower of Dawn.

Not long ago.

To meet the growing expansion needs of the Ancient Dragon Continent, the Tower of Dawn repurchased a small continent from the congress, which is less than ten thousand miles away from the Ancient Dragon Continent.

This continent is mainly used to settle the increasing number of mortals, establish gathering places, and dispatch special battle groups to construct fortresses of the Mechanical School to maintain order and ensure the safety of mortals.

On this day.

Levi, in his cultivation, suddenly received a message.

After seeing it, he left the Ancient Dragon Continent a bit excitedly and headed for the Aus Continent.

...

Inverted Tree Realm.

For the first time, Levi entered the Legendary Wizard Demiplane, looking around with curiosity.

"Please sit down."

Lady Rowling sat at the tea table without any concern.

Levi sat properly, upright and solemn.

"What matter do you have with me, Madam?"

Rowling said:

"Did you not previously submit samples of the fungi and Green Tribe? I have currently researched and developed the plant life forms you envisioned."

Levi was shocked in his heart. As expected of the number one figure in the history of the Life School of Thought. Such efficiency is terrifying.

Rowling said:

"I am currently accelerating the cultivation of seedlings and seeds here. By then, you can be the first to come to me to collect them and plant them on your Ancient Dragon Continent."

Levi hurriedly said:

"Thank you, Madam!"

Rowling said:

"You're welcome. Mainly, the two plant forms you provided are themselves unique enough, especially those fungi... I once dealt with the Fungus Lady, intending to obtain her fungal spores, but unfortunately, I was unsuccessful."

Levi said:

"I was just lucky and obtained them as a fluke among the war trophies."

As they spoke.

The ground of the Inverted Tree Realm trembled with a rumble.

Beneath the towering giant tree, an enormous beast emerged, a hundred li in length, with a spiral horn on its head, covered in a semi-transparent earthy-yellow scale armor, and its abdomen had a black hole-like thing that seemed to absorb everything including light.

Rowling smiled and said:

"Apologies, this is my companion creature acquired in my early years making mischief, I call it [Earthwalker·Rocha], responsible for loosening and fertilizing the soil of my Demiplane. The reason I could so quickly develop Green Clan No.1 owes much to it, though it might have startled you."

Levi's heart stirred. The hundred-li-long giant beast reminded him of his own Long.

It seems that Rowling also once acquired the same type of Truth Oddity and was equally fortunate to get a companion creature, which she nurtured to legendary status.

From the looks of that horn, there's a high probability it has undergone Evolution as well.

Though just a functional companion creature, it gave Levi a feeling of facing a Grand Wizard, no, an ordinary Grand Wizard would probably not be its match.

A companion creature reflects the owner's realm of strength, so it wasn't that the creature was powerful, but that Rowling, the newly risen legend, was too strong!

The Earthwalker placed its enormous head in front of Levi, its heavy breathing puffing out, curiously observing Levi.

Rowling said:

"Rocha, don't be naughty."

Upon reprimand, the giant beast burrowed underground, glanced at Levi, and disappeared. Levi guessed that it might have sensed the presence of a kindred spirit from him.

Levi said:

"Madam, if there's nothing else, I'll take my leave now."

Rowling paused, then said:

"Okay, I'll be residing mainly on the Aus Continent, you're welcome to visit anytime."

...

Returned to the Ancient Dragon Continent with a trembling heart. Faced with Rowling, Levi always felt the illusion that everything would be seen through.

Of course, it might not be an illusion... being seen through is quite normal facing a Legendary Wizard.

As the pinnacle of human combat power and a great existence rivaling the Heavenly Father, their realms are beyond Levi's comprehension.

Ordinary wizards may never see a legendary one in their lifetime. Yet Levi had already met two up close, Rowling and Gullwig.

And these two, he had acquaintance with long before when he was still a mortal. For a moment, he felt quite emotional.

"The issue of the demonic aura has been initially resolved, as long as the seeds of Oasis One are scattered, the Abyss's plan of sacrificing cannon fodder to pollute Nora can be delayed."

To the ever-changing wizard civilization, the longer the blood battle line stretches, the more advantageous it becomes. A millennium has no effect on the Abyssal Civilization, but it is enough for the wizard world's theoretical innovation and technological explosion to reach new heights, especially in this golden age of plane convergence.

Chapter 2190: Seven Rings Perfection!

Currently, within the wizard historians, the establishment of the congress three hundred thousand years ago is considered the first knowledge explosion of wizard civilization. The current grand assembly of planes might be the second.

...

Two years later.

Nora 460.

The seven-circle alchemy creatures from the Fire Dragon Sky Work were finally completed and delivered. The Emperor's Palace's "Ten Directions Absolute Prison Heavenly Dragon Formation" was completely finished, greatly enhancing the sense of security. He secluded himself daily, observing the changes in the war while silently cultivating.

As the Abyss Godforsaken Continent faced defeat, the remaining demons were gradually encircled and annihilated by the legion and various demon hunters.

Meanwhile, the demon army divided into two paths.

One continued to strike at the Godforsaken Continent, using the demon land already created in the human realm to establish a bridgehead.

The Flame Demon Tyrant and the Angry Lord formed the "Angry Flame Alliance," consisting mainly of Flame Demons and Sky Anger Demons, supplemented by various other demons with diverse functions.

The strength of the "Angry Flame Alliance" far surpassed that of the "Burning Expedition Army." The individual strength of the Sky Anger Demon exceeded that of the Flame Demon. They not only have strong bodies but can also incite human anger, causing them to lose reason and behave irrationally.

Relying solely on the "Deep Blue Expeditionary Army" was no longer sufficient to counter the "Angry Flame Alliance." Thus, the Wizard Council mobilized elite forces from the Frost School and the Earth School of Thought to support the Deep Blue Expeditionary Army.

Individuals such as the Gondor Three Heroes and Elena, who possess formidable individual strength as independent demon hunters, continued to hold firm on the Godforsaken Continent, alleviating the pressure on the official battle groups without retreating.

The second path of demons formed the "Endless Alliance" led by the "Master of Deep Diving" and the "Faceless King."

This legion focused its attention on the subspace territories which occupy the largest area in Nora, the Endless Sea.

The Endless Sea is vast and boundless, with loosely distributed wizard organizations, and due to some reasons, the legal order is not as stringent as on the Midland Continent.

Moreover, as the Ocean School of Thought now has only one Legendary Wizard, it seems easy to pick on, thus the demons chose this as their second breakthrough point.

The Endless Alliance mainly consists of the "Formless Demons" and "Bottom-dwelling Fish Demons," one specializing in disguise and stealth, the other in sea combat.

The Wizard Council took this issue very seriously, as the Endless Sea, unlike the Godforsaken Continent, is home to numerous mortals and low-level wizards on its various islands. These are the fresh blood of the Wizard World. The Endless Sea is also an important cradle of modern wizard civilization.

Under the organization of the Wizard Council, led by the Star Tower, a large wizard legion named "Stars Sword" emerged.

The legion was led by the Grand Wizard "Wanderer of the Vast Sea," bringing together elite wizard battle groups from the Witch's Family, Lilith's Cabin, Letney Family, and other Six Star Towers.

The leaders of the battle groups are all geniuses or even top-tier geniuses of their respective top-level organizations.

Individuals like the Snow Lotus Witch and Son of Hurricane also took this opportunity to be active on the military's battlefield, making a name for themselves.

Apart from the Godforsaken Continent and the Endless Sea, there are many other battlefields, but they are small in scale and need not be elaborated upon.

Levi, on the Ancient Dragon Continent, upon learning about the opening of the Endless Sea battlefield, also showed a change in expression.

"Madam Triss is still in the Witch's Family."

He immediately sent a message to inquire and learned that Triss, being responsible for medicine research, did not join the "Stars Sword."

"In the past, those geniuses from the Dark Ancient Tower who survived have all grown to become the mainstay of the Wizard World, already figures of renown. Most have reached Sixth Circle Perfection, and the Sky Dragon Wizard has even recently advanced to Seven Rings... This child is not simple, having learned to be low-key and steady after escaping from the Three-Headed Dragon Abomination, achieving Seven Rings unharmed."

In the following years, war reports continuously poured into various regions of the Wizard World. Levi often read the reports to keep abreast of the situations. Once he reaches Seven Rings Perfection, he intends to engage in demon hunting for a significant period before advancing to Eight Rings, exchanging for the two sun refining artifacts limited to Seven Rings.

And thus, sixteen years flew by.

Nora 476.

The 262nd year of the Blood Battle.

Messages from the Wizard World arrived, indicating that numerous outer circle regions, including the 9th District of the Outer Circle Area, had fallen under the control of the "Endless Alliance."

The elusive combination of Bottom-dwelling Fish Demons and Formless Demons was indeed difficult to deal with.

The "Stars Sword" erected a defense line at the junction of the inner sea region and outer sea region, blocking most low-level demons in the outer sea region, while arranging rescue teams to use airships or secondary space rings to evacuate mortals.

The Yellow Earth Continent had already begun a full strategic withdrawal, with the Dusk Holy Temple's branch over there being forced to retreat and assist the authorities in transporting personnel.

In the outer sea of the Ancient Dragon Continent, large appearances of Bottom-dwelling Fish Demon armies started to emerge. The holy temple dispatched the "Song of the Sirens" battle group, skilled in naval warfare and assassination, aided by the Swinging Water Algae of the Green Tribe planted earlier, achieving numerous victories, slaughtering countless demons.

Based on war merits, the knights of the Dusk Holy Temple's various battle groups could exchange for bloodline essence not available within their organization at the Merit Shop, or even bloodline crystals, supporting war with war, and continually growing stronger.

This year.

Levi also turned 900. Since returning from traveling in the Land of Darkness, he had been in seclusion for nearly six decades.

Now, his spiritual force had finally broken through the barrier of 11,000 points, reaching the standard of Nine Rings Perfect.

His aura, compared to before, had improved significantly, naturally exuding an elusive majesty.
