

Wizard 223

Chapter 223: Level 10 Black Snake! (2)

With Anderson's legendary knight realm, he could tell that Levi was already a top-notch grand knight at his age. This meant that Levi's talent was top-notch, not inferior to Anderson's back then.

Another essential reason he wanted to befriend Levi was that there were too few existences like him and Levi in this world.

Especially when it came to legendary knights, there was almost no communication with their peers.

After all, most legendary knights were not born in the same era. Even if they did, they were unwilling to show their faces because of the Church.

Therefore, in Anderson's opinion, every person with the potential to be a

Legendary knight was worth befriending.

"Thank you for your warning, Sir Anderson. I will continue on the knight's path," Levi thanked him sincerely.

This old man was an extraordinary person.

With Levi's current knowledge of breathing techniques, only a legendary knight could compare to him. Therefore, Anderson and Levi had an enjoyable conversation and regretted not meeting each other earlier.

Levi also learned Knight Anderson was the once famous legendary knight, Blood Knight Brad! This knight was well-known, and everyone acknowledged this fact.

Levi was more at ease with Blood Knight Brad's character.

Levi knew that he could not be a romantic hero in this era.

This kind of mentality and perseverance was too strong.

In addition to the fact that he was a member of the Blood Clan, it was even rare for him to be able to do this.

In terms of cultivation, they were partners on the same path.

In the long cultivation process, there had to be someone to talk to and discuss cultivation with him so he would not feel lonely.

Unfortunately, Knight Anderson did not have the talent of a wizard.

However, because of the Blood Clan member's identity, many wizards might have died, but he would not.

It was the Month of Harvest of the year 1016 of the Holy Brilliance Calendar.

Levi's Meditation Art was slowly cultivated.

During this period, Knight Anderson often came to Levi to discuss the mysteries of breathing techniques. He did not expect Levi to have such a deep understanding of breathing techniques at a young age.

Levi knew that this was all thanks to his hard work and experience.

Every time he gained proficiency, it was a little bit of comprehension and understanding. Over time, his grasp of breathing techniques was far beyond that of ordinary people.

Most importantly, Levi had cultivated a bunch of breathing techniques simultaneously. This was probably unprecedented.

Therefore, no matter what type of breathing technique it was, Levi could master it with ease and thoroughly.

Levi also learned about advancing to a legendary knight from Knight Anderson.

Such knowledge was highly precious, even more so than Meditation Art.

This was because Meditation Art was relatively easy to obtain in the world of the wizards. Still, the legendary knights' understanding and breakthrough methods were scarce.

After all, looking at the history of the seven countries, even grand knights were like carp crossing the river.

However, legendary knights were as rare as phoenix feathers.

Blood Knight Brad was one of the seven legendary knights the Shining Tavern had specially brought out to commemorate. He had an extraordinary status.

Through Knight Anderson's explanation, Levi learned that the legendary knight needed a second transformation of their Life Seeds.

After this transformation, the Life Seed would transform the body of the legendary knight. According to the different characteristics of the breathing technique, a "supernatural organ" would be born in the body.

If one said that grand knight relied on black gas to become extraordinary...

The most significant difference between a legendary knight and a grand knight was that they could directly use the Life Seed to evolve their bodies.

It allowed a specific part of his body to become extraordinary, to achieve the

Goal of becoming extraordinary and reborn!

This was the power of a legendary knight.

However, Levi was still a distance away from the legendary knight realm.

His current supernatural organ was not even at level 10.

Levi estimated that the extraordinary organs born from the Black Snake Breathing Technique should be related to defense.

‘Will my skin turn into scales, and will I be turned into a Naga?’ Levi smiled bitterly in his heart.

There was still a distance between him and a legendary knight, and he could only think about it now.

Moreover, according to Anderson, breaking through to the legendary knight level usually required robust mental strength.

According to the standard of a wizard, to break through to a legendary knight, one would need to have the mental strength of an intermediate wizard apprentice.

This was another reason why legendary knights were rare. Most ordinary people could not reach the intermediate wizard level without practicing Meditation Art.

If someone were born with such spiritual power, that person would be a hot shot and a legendary genius.

However, most knights had no talent to cultivate as wizards, so there was no way to improve their spiritual power. Ultimately, they could not break through to the legendary knight even if they were as talented as the White Horse Knight.

Knight Anderson had also become a Blood Clan member by chance, which solved the problem of mental power and made him legendary.

"As expected, a knight must be one with his body and soul in the end," Levi understood.

He now had a basic understanding of the path of a legendary knight, which most grand knights did not have.

Because there were too few legendary knights, there was no system to summarize the experience of becoming a legendary knight..
