

Wizard 224

Chapter 224: Level 10 Black Snake! (3)

It was only because Levi had befriended Anderson that he learned to break through to the legendary realm.

Time flew by. Levi asked about the Golden Knight's treasure while silently cultivating in the castle.

Of course, he would also pay attention to the Snow Demon calamity in the North.

What surprised him was that he did not know if it was the so-called oracle of the Church that had taken effect.

In short, after the blue frost spread to Montenegro Mountain City, it did not continue to descend North.

Up until now, Icewind City was alright. Other than some Snow Demons from Montenegro Mountain City, there was no blue frost tragedy.

Nothing happened in his Black Water Valley.

Levi did not know whether to laugh or cry.

However, he did not regret his decision.

He realized the South was still better after getting used to living in the South.

Whether it was the climate or Production development, the South was superior to the North.

Levi's path to becoming a lord was slowly getting on the right track. With professionals managing the territory, at least the finances of Flower City and Storm City did not fall much compared to before.

Levi had not found a suitable successor yet.

He would also need someone to manage his territory when he left the human world.

He could only take it one step at a time.

Time passed in the blink of an eye, and it was the Month of the Northern Wind.

After a long cultivation period, Levi's Giant Breathing Technique finally reached its limit.

[Giant Breathing Technique: Level 9 (Maximum, breakthrough available), Special Effect: Frost Arm (Gas)]

After the Giant Breathing Technique reached the peak of level 9, his Transcendent Power evolved into Frost Arm.

Levi could feel that his strength was much more muscular than before.

Now that he was facing the Duke of Montenegro, he would not be much weaker than him.

This was Levi's first strength-based breathing technique that had reached the peak of level 9.

He also had Ostrich Mountain, Giant Rhinoceros, and Red Lotus Breathing Techniques at level 8.

Undoubtedly, the final primary cultivation of the strength-type breathing technique was the perfect-grade Red Lotus.

A miserable piece of news was that after Levi's Giant Breathing Technique reached level 9, his height reached 2.2 meters, and his weight had reached 600 to 700 pounds...

Although it was not as exaggerated as the Fist of the Empire, Levi still had a headache with its size.

If not for the Siren Breathing Technique's Bone Shrinking Transformation effect, such a large body would have affected his life. However, this was something that could not be helped. Strength was not something that came out of thin air. It was something that came from the continuous strengthening of the body.

The giant inside Levi's body was saturated with black gas, which then wrapped around Levi's arms.

A bone-chilling sensation spread from his arms, and Levi could feel that the surrounding temperature had dropped slightly.

His arms were emitting cold air. Water vapor condensed around him into frost as if he was wearing ice armor.

"The Giant Breathing Technique has such a weak frost effect after reaching level 9?" Levi was slightly stunned.

His arms were like the giant arms of a frost giant. His muscles were full, exaggerated, and full of strength.

Levi slammed his palm on the wall.

A layer of frost immediately covered the wall.

Levi placed his arm in the water.

After a while, the bucket of water was also covered in ice.

"Amazing, this should be a spell-like ability. Although it's fragile, this effect is better than nothing," Levi murmured in his heart.

This Frost Arm effect was even more potent than he had imagined.

Levi experimented with the new Frost Arm effect again and again. In the end, the entire room was covered in a thin layer of frost.

Of course, such an effect would not cause any effective damage to the enemy in actual combat.

But for Levi, this seemed to be an inspiration.

"If this Special Effect continues to be promoted, will I be able to gain a real spell-like ability? I don't need to use ice spells to freeze everything with a single palm strike. Just like the legendary Frost Giants?"

"Isn't this the birth of an innate divine ability with the body?" Levi pondered.

Of course, this would only be known after Levi continuously upgraded the Special Effects.

However, as a strength-type breathing technique, there were many of them, so Levi did not have to worry about the Giant Breathing Technique breaking the limit.

His strength had steadily increased again.

Levi was also quite happy.

He went to Shining Tavern for a drink to celebrate.

Then, he went to chat with Knight Anderson for a while.

Knight Anderson told Levi that he had asked his wizard friend to help Levi ask some of the Ocean School of Thought wizards to see if anyone needed to recruit apprentices.

Unfortunately, they had yet to reply.

Levi was curious about how Knight Anderson communicated with the wizards, but since Anderson did not take the initiative to say it, Levi was too embarrassed to ask. This might involve other people's secrets.

Anderson told Levi before he left.

He could feel that some Blood Clan members seemed to have awakened from their slumber.

He told Levi to be careful during this period.

Knight Anderson was not the only one in Venina's social network.

The other Blood Clan members might not be as easy to talk to as Anderson.

He was worried that Levi would have a conflict with them.

This way, no matter which side was injured, it was not the outcome he wanted to see.

Regarding this, Levi expressed that as long as they did not provoke him, he would not cause trouble.

Anderson was also helpless. He could only tell Levi that if any Blood Clan members were to cause trouble for him, he could look for Anderson. This way, Anderson might be able to mediate between them, and everyone would be able to resolve significant issues..
