

## **Wizard 2311**

Chapter 2311: Above the Dome, the Star Gate Project, and the Thirteen Legendary Cities!

Of course, this longevity secret technique becomes invalid if Levi or the corresponding astral soul perishes.

So Levi also explained this situation to Hundred Flowers to prevent her from becoming complacent.

Hundred Flowers asked:

"This technique doesn't consume your lifespan, does it? If so, let's cancel it."

Levi replied:

"No, it doesn't. Rest assured."

After confirming multiple times that there was no problem, Hundred Flowers lay in Levi's arms.

"Hehehe, don't worry, even if I were a pig, I could still rise to the ninth circle."

Her heart felt warm and blazing, like a radiant sun.

"Thank you so much."

After spending several days together,

Hundred Flowers left the Emperor's Palace and continued to strive forward.

This unexpected longevity didn't make her complacent.

It just allowed her more vacation time to spend with family and friends.

After all, she had big ambitions; she wanted to reach level nine through the Knight and Energy Sect paths.

Moreover, she aimed to elevate the Knight Breathing Technique to Mythical level.

All of this required a lot of time and effort.

Recently, she spent over a hundred million battle achievements to acquire the Bright Moon Artifact called "Water God's Delight."

It was a sapphire earring.

After refining it, her spiritual force limit increased by 160 points.

Her Water God Body was further completed, making the Water God Projection more formidable, and she gained the companion spiritual creature "Sky Water Stingray."

This was a giant manta with fish- and bird-like features, a guardian-type companion spiritual creature with a wingspan of two thousand meters.

Perfectly complementing the offensive Amber Dragon.

Additionally, she gained a similar ability to Levi's "Heart of Thunder Net," named "Call of the Sea."

It allowed her to sense the water vapor within a ten-thousand-mile radius, forming her own sensory domain. .

Once activated, every movement around couldn't escape her perception.

She could summon giant waves, water pillars, or even sea beasts over long distances to attack enemies.

This was indeed god-like.

Her combat power increased significantly, and she could no longer be seen as merely a senior seven-circle wizard.

She advanced her position on the Demon Slaying List to 12th place.

Ahead of her were the renowned prodigies of the Wizard World or ancient beings at the limit of the seventh circle.

At the recent Blood Battle Auction, she also acquired a Morning Star-level "Water God's Sorrow."

A sapphire bracelet, it boosted her spiritual force by 50 points, which was quite impressive.

Currently, among the main artifacts of the Water God Series, she had only one Radiant Sun-level "Tear of the Water God" left to strive for.

It wasn't available on any exchange for oddities.

She could only hope to get lucky with random oddities once she accumulated 500 million battle achievements.

But the chance was slim, and Elena had mentally prepared for it.

So, once she advanced to the eighth circle, she planned to strive for non-sequence ocean Radiant Sun-level oddities to change her fate against the odds.

There were many things to do.

Ten thousand years is too long; seize the day and night!

...

Six years later.

Nora Year 670.

The 456th year of the Blood Battle.

The Sleeping Dragon Realm returned, bordering the former East Pole Empire, once the Church of the Dragon God's territory.

Thus, all sub-dimensional portal regions returned.

The Central Realm's sky continent was renamed "Sorren Continent."

The geographical pattern was fully established with "Nora Continent," "Sorren Continent," "Four Seas and New Continent," and "God-forsaken Continent" as principal areas.

...

Blood Battle Battlefield.

On the sea surface, a fierce battle was underway.

A purple dragon stretching two thousand meters, a thousand-armed giant elephant deity, and a platinum star traversing the heavens and earth.

These three incredible wizard forms surrounded a giant demon fish exuding an early level-eight aura.

The demon fish waved its tentacles, spewing endless black water, corroding everything.

"Ming King Dragon Elephant Fist!"

With the Dragon God Domain activated, Gandaph's protective Divine Light shone. Holding the Domsday Fist, he carried the aura of an Ancient Dragon Elephant, dominating the world!

Twenty-four giant dragons and elephants surged like the Yellow River, unstoppable!

"Dragon Spits Purple Sun!"

Beside the Holy Infant, the Purgatory Nine Dragon Umbrella and Cold Frost Seven Feather Fan emitted red and blue lights.

The fire dragon and ice phoenix merged into the Purple Extreme Holy Dragon's body, forming a purple energy ball in its mouth.

The energy ball shot out, expanding into a ten-kilometer-wide purple sun.

Rumble!

Rumble!

The Bottom-dwelling Fish Demon exploded, sending flesh and scales flying.

The violent demonic aura surged like a tidal wave.

The duo used their ultimate weapons and rare treasures to resist.

"Heavenly Star Sword Formation God Slaying!"

Buzz! Buzz! Buzz!

High in the heavens, stars lit up one by one.

Sword Qi stars made of dazzling sword light appeared.

Thirteen rays transformed into a cage of annihilation, covering dozens of miles.

Everything was sliced apart, and Sword Qi ravaged like locusts.

Victor emerged from the platinum star, waving a finger!

Billion Sword Qi converged into a greatsword, plummeting down.

Slice!

The indestructible body of the Bottom-dwelling Fish Demon cracked like leather.

Level 8 Demon, perish!

The Demon Soul tried to escape but was shredded by Sword Qi.

"Phew, we killed a level eight, hahaha."

Gandaph breathed a sigh of relief, laughing heartily.

The Holy Infant remarked:

"Indeed, it was quite thrilling, a completely different experience from fighting level sevens. It's mostly thanks to Victor's formidable sword formation."

Victor responded:

"We're all essential, can't do without any of us. Let's clean up the battlefield and exchange for more oddities."

The Snow King, Golden Emperor, White Elephant, Blue Dragon, and other companion spiritual creatures were still exterminating low-level demons around.

Soon, counting in the minions, each of them accounted for a gain of seven million battle achievements.

Chapter 2312: Above the Dome, the Star Gate Project, and the Thirteen Legendary Cities!

"This feeling, it's exhilarating."

"Indeed, hunting Level 8 demons is the best way to earn."

"And this is only the weakest Fish Demon; killing one of those more troublesome Level 8 demons can net us tens of millions in war merit."

After completing the Level 8 demon slaying achievement,

The rankings on the Demon Slaying List for all three nearly reached the top twenty.

Lord Victor ranked the highest, at 21st, with a total of 170 million points, followed closely by Gandaph and Holy Infant.

The trio had already set their sights on the Bright Moon Artifacts they needed and headed toward the Sauron Continent.

Now, with the sub-dimensional portal returned, Nora has expanded substantially.

To save travel time for wizards and legions,

The congress has established long-distance space teleportation arrays between major continents.

Not only that, the millennial plan for the [Continent Bridge] has officially launched.

In the next millennium, they plan to set up thousands upon thousands of teleportation portals in places like [Nora Continent], [Sauron Continent], [God-forsaken Continent], and [New World], forming a massive space transmission network.

The [Continent Bridge] plan is merely a part of the congress's grand plan for a millennium.

The true major project is the [Star Gate Project], spanning adjacent planes and the entire Sauron Pan-Plane.

However, the Star Gate Project requires extremely high demands in technology, funding, and personnel, and is currently just a preliminary idea.

Although the consumption of arrays is high, for primordial soul wizards, it's insignificant.

The trio has almost gathered their King-level series, thus this trip's target is higher series Bright Moon Artifacts.

Holy Infant opted for the relatively easier and unpopular [Red Dragon's Heart].

Although they were quickly improving,

Not long ago, the Flame God series was already out of stock, swapped by the scholars of the Burning School of Thought,

They could only settle for second best.

However, Sequence Artifacts are the easiest to find among the same tier of artifacts, unlike some non-sequence artifacts.

With the congress's official resource allocation level, there will be opportunities in the future, so there's no need to worry too much.

Artifacts really require luck.

Gandaph chose the [Fire Refining Star], a non-sequence burning oddity, non-body refining artifact.

Previously obtaining the [Great Sun Burning Dragon], a Morning Star-level body refining artifact, which, coupled with this, can greatly improve fire element aptitude.

With his [Dragon Elephant Holy Body] and current Fengshui Elements aptitude, cultivating the "Ancient Dragon God Body Refining Technique" would be easily manageable.

Refining fire element oddities is preparation for the future "Nine-Headed Hell Snake Body Tempering Technique."

By then, cultivation will become even more efficient.

Lord Victor exchanged for a Morning Star-level [Golden Emperor's Armor] and a Bright Moon-level [Golden God's Chariot].

He is a lucky type of player, despite starting to collect oddities late, he quickly gathered the major parts of the Golden Emperor series.

The remaining small items are not urgent, can rely on luck in the future.

This Golden Emperor's Armor is to complete the set.

While the Golden God's Chariot is a crucial component of the Golden God series.

Different from Earth, Fire, Wind, and Water Sects, the competition within the Metal Sect is not as fierce.

With Vector's senior realm of Seven-ring proficiency, paired with the Heavenly Star Sword Formation, among the Metal Sect's seven-circle wizards, he's already a big shot.

So he doesn't face much competition, which made Gandaph and Holy Infant envious.

After obtaining the artifacts, the trio returned to Gondor City on the Nora Continent, and began their retreat and practice.

Earning war merit is important but not urgent.

...

In the blink of an eye, four years passed.

Year 674 in Nora, the 460th year of the Blood Battle.

Hell.

Some underground cave in Dragon Fall Valley.

Yellow spring water flowing.

A vivid golden fish-like monster, long with dragon whiskers, leapt out of the water, swimming outward.

Duang!

Its form collided with an invisible ripple slash, forcibly bounced back by a powerful defensive field.

A pitch-black Skeleton Warrior stood up, it was the Black Knight.

It now exuded the aura of late stage Level 6, like an unsheathed blade.

"The oddity has matured; it's time to notify the master."

It wasn't long before.

Levi appeared with a smile.

"Well done, it's alright here."

Little Black quickly left to find Little Pink.

Levi used the Wizard's Hand to grasp the odd fish, placing it in a pre-prepared container.

"Another unknown oddity in hand."

Along with the Flame Emperor's Sword, the dark faction's pitch-black eyeball, he had accumulated three oddities, needing eighth-circle refinement.

...

Ancient Banyan Fairyland.

Levi opened the proficiency panel.

Levi-----

Unreachable: Level 17 (Maximum).

...

"The last spell is complete."

In a single thought, he revealed the Nine-headed Emperor Dragon Wizard Form.

six-ring Witch Marks, 27 seven-ring Witch Marks.

colorful, mysteriously glowing Witch Marks shimmered like a sky full of stars.

He arrived in the Nightmare World.

Lopez was in the Chaotic Wilderness, sparring with the Level 8 Blood Slaughter Bat Dragon.

Blood Slaughter Bat Dragon's realm was higher, but Lopez was legendary level; for a while, it was hard to tell who was superior.

Though, ultimately, Blood Slaughter Bat Dragon proved more skilled, winning the victory.

It was indeed the strongest sub-dragon of the Blood Sect.

Levi said:

"You two, come attack me."

He cast the "Unreachable" spell on himself.

A chaotic force field spread from him as the center.

Lopez and Blood Slaughter Bat Dragon exchanged glances and attacked with their strongest techniques.

Rod wind swept, bloody breath shot.

The breath stopped about thirty meters from Levi, seemingly advancing but never able to reach him.

Lopez's rod wind flew back, fiercely striking him away.

Levi laughed heartily, feeling quite satisfied.

"Another powerful technique, during this spell's duration, I am invincible beneath ninth-circle."

He even thought, relying on such a force field, even ninth-circle attacks might be avoided.

Of course, avoid today, but not indefinitely.

With ninth-circle battle, dodging once is of no use.

The gap between eighth and ninth circle, in the Five-ring period, he had already deeply experienced it.

At the tower's window, Triss looked at Levi.

"He's incredibly strong... yet he's still far from his limit?"

Earlier at the Blood Battle Auction, she obtained two Morning Star Artifacts of the Ocean Faction.

Refining them brought some progress as well. .

To this day, she far exceeded her peers from before.

For example, her good friend Cat Witch, still only in Seven Rings Senior Realm.

But before Levi, this progress seemed insignificant.

She sighed inwardly:

"Once this guy advances to eighth-circle, won't he be invincible under ninth-circle? So many prodigies, yet none can match him. With such supreme prowess dominating the era, thinking about it is quite thrilling indeed."

Levi's voice came through.

"Lady, I'm preparing to retreat and break through to eighth-circle, if anything arises, please leave me a message."

Triss nodded, smiling slightly.

"I know you'll surely succeed, so I wish you an early breakthrough."

Chapter 2313: Advancement! Eighth-Circle Wizard!

Ancient Dragon Continent.

The place of seclusion.

The Virtualization Array began to activate, the Void God Crystal buzzed with vibrations.

Levi drank the last cup of Heart-Cleansing Tea, stepped into the array, and sat cross-legged.

"If only there were tree roots."

A refreshing sensation shot straight to the Heavenly Spirit Cover, and he cleared all selfish thoughts.

In his mind, the seven-layered Divine Ring Tower slowly rotated.

The Soul of Reality and Illusion flickered and transformed, countless points of spell and knowledge, lit up like circuits.

Jin, Fleur, Si Lei, and other associated spiritual creatures all watched quietly, waiting expectantly.

Not sure if these fellows would recall Ayak wandering alone in Dark Deep Space.

The power of the Void God Crystal surged into his mind through the array, intertwining with his primordial soul.

"Eighth-circle, here I come!"

...

Ten years later.

Nora Calendar 684.

Blood Battle 470 years.

Ancient Dragon Continent, Dusk Holy Temple.

The Golden Lion Knight quietly guarded his wife's place of seclusion, acting as her protector.

Three years ago, the Divine Light Knight prepared her Level 7 Advancement Potion and then went into seclusion.

Now, she should almost be coming out, but it's unclear how things are going.

Because she took the path of advancement, it was relatively faster.

Those like Ash, Fire Dragon, and Black Knight, who chose the evolution path, were still gathering evolution materials.

Although advancement is relatively simple and requires no calamity crossing.

But it also doesn't guarantee a hundred percent success.

"Father, how is it, has Mother not come out yet?"

"We took some time off to come see Mother."

Three figures descended from the sky, they were the three siblings, Lena, Raya, and Raid.

With time passing, they had all become over two hundred years old and became capable Level 4 powerhouses.

Lena practiced the Golden Lion Breathing Technique, Raya practiced the Peacock Breathing Technique, while Raid was a wizard.

The Golden Lion Knight still wanted a boy to inherit the bloodline, but there was no rush anymore.

Looking at it now, he might evolve in the future anyway.

If successful, the bloodline itself would change, making concerns meaningless.

Might as well wait until after becoming mythical to have another one.

"It's okay, believe in your mother."

After the family waited for several days, the place of seclusion emitted the Five-colored Divine Light, illuminating the sky.

A figure broke through the seclusion, exuding the aura of a Level 7, it was the Divine Light Knight.

"Sorry to worry you, I have successfully advanced."

The Divine Light Knight could hardly suppress her smile.

The Golden Lion Knight looked overjoyed, his anxious heart finally at ease.

The two embraced tightly, and the three siblings held their parents, crying tears of joy.

"Did you see, the three of you, your mother is your role model. Given such good conditions, you should all strive to pursue higher realms with all your effort."

The Golden Lion Knight admonished.

The three siblings nodded in agreement, they worked hard themselves and were not like those high-spirited scions.

Nor did they dare to act recklessly inside or outside the organization, relying on their parents' status as part of the 18 Twilight Cavalry.

If they were to be reported anonymously and verified through investigation, the Golden Lion Knight would be the first to punish them.

They often used cases from the wizard family as lessons to teach the three siblings.

The path of knights is the path of the bloodline, which easily forms class solidification based on the bloodline.

After class solidification, it inevitably gives rise to arrogant offspring.

To this end, the Dusk Palace Master established a series of knight virtues oaths to be included in organizational standards.

The knight families on the Ancient Dragon Continent must jointly follow them.

To mitigate these negative impacts, but wanting to avoid them is clearly impossible.

Human nature is such that nothing can change it.

Realizing a utopia is very, very difficult...

Whether in a transcendent world or a mortal society.

Thus, being able to forge a relatively virtuous, disciplined, and compassionate knight ruling class is already a victory.

After the Divine Light Knight reached Level 7, other members came to congratulate her despite being very busy.

Of the 18 Twilight Cavalry, there was already one Level 8 and two Level 7 knights.

However, both the Blood Knight and the Divine Light Knight knew that after Level 7, aiming for Level 8 was another long marathon.

They were still far from reaching the commander's realm.

The Steel Dragon Knight said:

"Speaking of which, the commander has been in seclusion for ten years too, should be about to break through."

The Blood Knight said:

"Hmm, I estimate it to be in this recent period."

Everyone was excited.

"Our organization is about to have an eighth-circle wizard, who is also a Level 8 knight, unique indeed."

...

Nightmare World.

As Lopez slammed down with a stick, Emperor Mu dispersed like smoke.

"Well done, lasted an extra breath this time, monkey brother will come find you again!"

Nora Continent, Land Domain.

From within the Central Earth Branch, Emperor Mu's monkey-like roar echoed.

"I've realized, I've achieved enlightenment! Intense Alcohol Explosive Ape Fist!"

Emperor Mu swung his stick with a golden light accompanied by red flames, spiraling to the sky, shattering the void.

"Hahaha, the path of the Energy Sect, entering the Level 6 realm, thanks to monkey brother's recent hit that awakened me... Could this be what the commander referred to as the 'Head Strike'? I see, each word from the commander is full of profound meaning."

Emperor Mu's mood was exhilarated, he retracted his divine weapon and let out a deep breath of turbid air.

The recent technique fused his abilities from the Saint Ape Breathing Technique and Spirits Qi of the Energy Sect.

Its power was significantly greater than his usual attacks.

"From now on, I, Emperor Mu, will be the founder of the 'Drunk Ape Martial Arts'. This 'Intense Alcohol Explosive Ape Fist' can be the first Profound Meaning of martial arts, to be pursued further in the future."

He had heard that Gandaph from the Gondor Three Heroes had created the 'Radiant King Martial Way', and he refused to fall behind.

This 'Drunk Ape Martial Arts' would surely make its name known on the battlefield of the Blood Battle in future.

Chapter 2314: Advancement! Eighth-Circle Wizard!

"Brother Monkey is truly a great benefactor of mine, Emperor Mu. Not only did he help me achieve an enlightenment breakthrough to the sixth-level Qi Sect, but if it weren't for his bloodline secret medicine, I wouldn't have advanced to the late stage of the sixth level so quickly. I'll refine some spirit wine later to show my gratitude."

The Spirits Sect is adept at refining spirit wine, which is an excellent spiritual substance beneficial for cultivation.

Therefore, Emperor Mu is also considered a remarkable winemaker.

...

At the place of seclusion.

Feeling the strengthening of his spiritual force, the Steel Dragon Knight showed a satisfied expression.

"A Sixth Ring Senior now..."

In less than a millennium, he had become a Sixth Ring Senior Wizard, and also a Level 6 Middle Stage Knight.

He also began to prepare his knight evolution potion materials.

His current breathing method is only at the legendary level.

Having witnessed the power of the Blood Knight Mythical Breathing Method, he was determined to evolve.

Moreover, he had an advantage that the Blood Knight couldn't match, as he was a Dual Cultivation Wizard.

So, his plan was very clear.

Relying on his wizarding talent, he prioritized breaking through his wizard cultivation to Sixth Circle Perfection and even reaching the Seven-Ring Realm.

During this time, he did not delay in preparing knight materials.

All he needed was to accumulate three types of defensive Seventh-level bloodline crystals.

The current Blood Battle Store and the Wizard World auction were still hopeful places to find them.

Once the materials were nearly ready, he planned to advance his knight cultivation to the seventh level.

All he needed to overcome was the Blood Tribulation.

The remaining Dark Tribulation, with wizard techniques and rare treasures, was practically a certain success.

Other Middle Generation Knights were also gradually entering the late stage of the sixth level realm.

The Thousand Illusion Knight, Silver Mountain Knight, and Dark Moon Knight each had their growth.

Especially the Thousand Illusion Knight, for whom the Nightmare World was a treasure trove.

She suspected that she had discovered traces of a Seventh-level creature containing the bloodline of a phantom beast, and was actively planning.

In the future, hiring Lopez to subdue it should not be difficult.

Disregarding the anomaly that is the Fire Dragon Knight among the New Generation Knights.

The Jade Elephant Knight, Snow Dragon Knight, and Pheasant Knight had long stepped into Level 6 Mid Stage Cultivation.

Feather Knight and Snapping Turtle Knight were also not far behind.

As for the Fire Dragon Knight, as a supernova, his war merits were outstanding.

He was almost ready with the potion materials to evolve the Mythical Breathing Method.

Currently, he had self-created the legendary level [Extreme Fire Dragon] bloodline.

In the future, he planned to continue with the fire dragon path.

Hence, the bloodline crystals he chose were all from the Seventh-level Fire Dragon Clan.

Fire dragons were among the most widespread dragon clans, relatively easier to find.

He did not seek to be as powerful as the commander's Crimson Emperor Dragon, reaching the standard of the Red Lotus Dragon would be enough.

Outside the Eighteen Riders.

Over a millennium, the Dusk Holy Temple had also produced some other Level 6 Knights, each remarkable in their own way.

They were strong contenders for becoming one of the Eighteen Riders.

At the Tower of Dawn, the elementals brought by Levi were all growing robustly.

Many of them had already become Fifth-Circle Wizards, some even achieving Fifth-Circle Perfection, becoming pillars of the organization.

Of course, some were unfortunate and perished midway due to various reasons, which was inevitable.

But in the upcoming millennium, the Tower of Dawn was expected to usher in a surge of Sixth Circle breakthroughs.

More native primordial soul wizards would emerge, becoming leaders of the new generation.

Sorrett, a veteran member, continued to progress steadily after reaching Sixth Circle Perfection, advancing towards the seventh circle.

Given his talent, without special fortunes, the seventh circle might be his limit.

During his centuries at the Tower of Dawn, he had mentored innumerable Lightning Faction excellent students, which was a commendable achievement.

After reaching the seventh circle, he could continue to contribute to the organization for over a thousand years.

The Tower Master's wife also ventured far within the Mechanical School, continuing to support him as a wise assistant.

Currently, the Shadow Queen Aya, over eight hundred years old, was progressing towards Sixth Circle Perfection.

In the Shadow School of Thought, with little competition, she had achieved numerous war merits and acquired many shadow artifacts.

The first three kings of the Ancient Dragon Empire were now all either at Level 6 Late Stage or peak cultivation.

Whether they could advance further depended on their fortunes.

In the Senior State Assembly, the number of Level 6 experts, though not matching the Dusk Holy Temple, was still envied by many wizard organizations.

However, both the Dusk Holy Temple and the Ancient Dragon Empire had also entered a slow growth period.

The early talent had advanced when due, and those who were destined to fall had fallen.

The new generation would find it challenging to cross the sixth-level barrier in a short time without exceptional talent.

Currently, they were trying to minimize losses while maintaining the current number of level sixes,

despite the support from mechanical creations and Guardians.

In four hundred years of blood battles, more Level 6 experts had fallen than one could count on a hand.

Both the Holy Temple and the Ancient Dragon Empire suffered various losses.

This despite the Ancient Dragon Empire being close to the Aus Continent and being watched by legendary figures, with relatively less intense battles.

It was hard to imagine how severe the casualties were in more remote areas.

A short while ago, the [Song of the Sirens] battle group witnessed the emergence of its first Level 6 Knight, ending an era without any level sixes.

Meanwhile, the [Iron Crocodile's Teeth] was also rapidly growing.

The Death Soldier Battle Group saw the most severe casualties as it carried out the most dangerous missions.

The [Giant Soldier Roar] battle group's commander, Beisita, was now also a Level 6 Late Stage expert, with hopes of reaching level seven.

There were also two Level 6 vice commanders.

This ace battle group was invincible on the Blood Battle Battlefield, akin to a meat grinder.

The [Barbarian Ancestor] battle group, led by the White Wolf Girl now in the Level 6 Late Stage Realm, also produced a Level 6 vice commander.

Chapter 2315: Advancement! Eighth-Circle Wizard!

It belongs to the Pig Tooth Clan and is the most successful product of the early bloodline modification experiments, nicknamed the "Red Pig Knight".

Its Blood Tribulation Master is a legendary giant pig, known as the "Sky River Giant Pig", quite remarkable.

The "Doomsday Valkyrie" also now has a sixth-level deputy besides Captain Tita, relieving a lot of its pressure.

Swordsman Gerri, the leader of the "Undying Oath", is already a sixth-level peak strongman.

Deputy Commander Snowflake Warrior is at the sixth-level mid-stage.

They are both rare geniuses among the Undead Knights.

The "Giant Beast Paradise" across the sea has developed the fastest over the years.

After joining the official Pan-Plane Biological Resources Protection Program.

Both in breeding technology and in member strength, they have made rapid progress.

The official and the Spirit Summoning Academy have also gathered a batch of sub-dragons, mixed-blood dragon clans, and rare creatures.

Various major organizations can exchange biological resources with each other.

Similar to breeding in the farming industry of past lives, forming an efficient breeding model.

As a result, the scale and performance of the Giant Beast Paradise have continuously climbed.

Attracting more and more excellent talents, forming a perfect virtuous cycle.

All major organizations are about to usher in the finale of their first millennium after their birth.

In the new millennium, they will need to undergo new trials.

With the current development momentum.

This millennium, the Ancient Dragon Continent will surely become a shining new star in the Pan-Plane convergence process!

...

The Blood Battle is never-ending.

The demon flame in the Nora World is escalating.

The endless oceans of Nora serve as the perfect hiding spots for demons.

Fighting over islands and the New World, the Council Alliance and the Demon Army have erupted into fierce battles.

After spellcasting by Legendary Wizards, Oasis One's seeds spread across Nora with ocean currents and monsoons.

These are one of the secret weapons of the Wizard Council against demons.

These demon-targeting plants will sprout and propagate across the land, sea, and even the sky.

The concentration of elemental power in the Wizard World will steadily rise.

The cultivation speed of all wizards will be boosted to a certain extent.

More official wizards and primordial soul wizards will be born, ensuring the consumption of the Blood Battle.

Of course, this is a long process.

...

Soon after.

Gondor City also faced an attack from the Demon Army.

Led by several powerful level 8 late-stage demons, it besieged Gondor City.

In response to the City Lord's call, the wizards inside formed an alliance to resist the demons.

The Gondor Three Heroes, after refining their respective Bright Moon Artifacts, have made considerable progress in strength.

They did not go to the God-forsaken Continent but participated in the defense of Gondor City nearby.

Lord Victor's spiritual force broke through the ten thousand mark, not far from Seven Rings Perfection.

The "Golden God's Chariot" further advanced his metal element affinity talent, leading to the birth of the incomplete "Golden God Body".

Besides, his companion spirit creature, the Golden Emperor, seems to have undergone some transformation.

It has become more powerful, and Victor's secret sword can strike up to three thousand miles away in an instant.

Easily taking demon heads, causing the Demon Army to only dare to encamp ten thousand miles outside Gondor City.

Gandaph refined the "Fire Refining Star", gaining a special talent named "Fire-refined True Gold".

His spiritual force has also improved considerably.

Relying on Soul Stones, oddities, and more, he slowly closes the gap with the Holy Infant and Victor.

Moreover, he has mastered a unique flame known as "Star Fire", which is immensely powerful.

The flame attached to his fist enhances the enchantment spell attack, burning a swath with one punch.

The Holy Infant refined the "Red Dragon's Heart", further advancing his "Ice and Fire Holy Body".

His goal is clear, to gradually fuse the "Ice and Fire Holy Body" into the "Ice and Fire Divine Body".

During seclusion, he also has an important task.

To refine the Ice and Fire Tower.

Since he already has a complete wizard tower, only some modifications are needed, making it relatively less time-consuming.

In terms of materials, relying on resources brought back from the Dark Ancient Tower by his true self, preparations have been nearly sufficient over the years. .

It is estimated that after achieving Seven Rings Perfection, he will have his own wizard tower.

By then, the Gondor Three Heroes will effortlessly kill level 8 early-stage demons.

...

Ancient Dragon Continent.

Tower of Dawn.

Teachers are preparing lessons, and students are honing spells on the training ground.

With the deepening Blood Battle, fighting demons has become a national duty.

Teachers and students discuss their rankings on the Demon Slaying List over tea and meals.

Anyone who ranks high is a prominent figure on campus.

In recent years, thanks to the Heart Moon Spirit Witch's promotion to primordial soul, the School of Dreams has been developing quite well.

Though it may be a niche school in other places, it is a second-rate school at the Tower of Dawn.

Second only to Earth, Fire, Wind, and Water, and Thunder.

Recently, the Heart Moon Spirit Witch has even launched a course named "Nightmare Summoning".

It can summon creatures from the Nightmare World to fight, several students tried it and found it very effective.

Different wizard factions vary in superiority and inferiority, with different answers from different versions.

But in this Blood Battle version, there is no doubt, Summoning Style is predominant.

After all, it has given birth to the version t0 hero "Supreme Knight", which is the Shadow Summoning Stream.

So, after four hundred years of Blood Battle, many have followed suit.

The Shadow and School of Death have always been the only two choices for Summoning Style.

Now, there is an additional option of the School of Dreams.

Many wizards are joining the path of Summoning Style.

No matter if this style is strong in PvP, it is undeniably formidable in farming demons for war merits in PvE.

Chapter 2316: Advancement! Eighth-Circle Wizard!

If luck is on one's side, one might, like the Shadow Queen, refine some suitable Truth Oddities.

This could enhance the number and strength of summoned creatures, making one an unrivaled existence on the battlefield.

In fact, the Wizard Council is also looking for ways to strengthen summoning wizards.

If only a few more figures like the Dusk Palace Master could emerge.

It would be equivalent to creating a few elite battle groups out of thin air.

In terms of cost, it's much smaller than cultivating a battle group.

The Shadow School of Thought and the School of Death are also using this opportunity to rapidly develop and grow.

This blood battle has allowed many declining elementary schools to regain vitality.

As the saying goes, each generation has its own gods.

On this day.

A delegation from the congress descended upon the Ancient Dragon Continent.

Their cultivation was generally at the primordial soul realm, with the leader being a Grand Wizard.

He wore a black starry robe, with gray hair and a youthful face, his gaze piercing.

Herman's virtual projection appeared, and he asked:

"May I ask who this is?"

The Grand Wizard smiled and said:

"Hello, I am Shadow WalkerNoet, here to visit the Dusk Palace Master, please synchronize with him."

Herman replied:

"I see; however, you all have come at an inopportune moment, as the Palace Master is currently in seclusion."

The Shadow Walker smiled and said:

"I see, then we shall return another day."

No sooner had he spoken.

In the direction of the Tower of Dawn, within a range of two hundred miles, elements surged and roiled towards them.

The Shadow Walker's expression changed slightly.

"This is an element tide signifying a promotion to eighth-circle wizard... A radius of two hundred miles is usually only seen when an eighth-circle senior wizard is promoted; has the Dusk Palace Master already quietly advanced to eighth-circle senior, or is such a commotion normal for an eighth-circle promotion?"

According to the congress's knowledge, the Dusk Palace Master had not yet advanced to eighth-circle.

This seclusion should be for the eighth-circle.

"Such a powerful element tide."

"Indeed, it should be that the Dusk Palace Master is about to advance."

The primordial soul realm powerhouses of the delegation discussed animatedly.

The teachers and students of the Tower of Dawn were even more excited.

"It looks like the Palace Master has succeeded in becoming an eighth-circle! Wonderful!"

"Yes, we are now a top transcendent organization, aren't we?"

"It's just an empty title; it doesn't matter."

**Boom!**

With a powerful spiritual force fluctuation spreading out, an invisible momentum dispersed the clouds in the high sky.

A highly condensed primordial soul figure spanned the heavens and earth, embracing the universe.

This primordial soul was a thousand meters tall, shining brightly like a lighthouse.

The dazzling Witch Marks were like a myriad of stars, captivating.

Under the primordial soul was a figure in Black Armor, sitting cross-legged in the void.

He opened his eyes, and with a thought, drew his primordial soul into his mind.

"The primordial soul's size can change at will, the spiritual force becomes more solid, and the body seems about to ascend to spiritual force, merging with the heavens and earth, this is the eighth-circle, incredibly powerful." RANŌbÈŠ

With just a thought, he could mobilize the elemental power within a radius of two hundred miles.

This range can only be mastered by an eighth-circle senior wizard.

Moreover, his control over the elemental power was on a completely different level compared to before the seventh-circle.

His innate spell power had also significantly advanced, and the primordial soul spell power surpassed the late seventh-circle by far.

For Levi now, casting the sixth-circle primordial soul spell.

With the addition of the Magic Rune, he could almost cast it with a single thought, like an instinctive innate spell.

Seven-circle spells were not much different, gaining a significant first-move advantage in fierce battles.

After advancing to the eighth-circle.

Through his own experience, coupled with the research during this time of seclusion, he also understood the path ahead.

"The next step is to integrate elemental power into the primordial soul, coalesce an Elemental Holy Soul, while remodeling the body with elementalization, forming an Elemental Holy Body, and advancing to Grand Wizard!"

"A Grand Wizard can easily disintegrate enemies below level 9 into the most basic elemental particles, as for them, everything in the world is merely a structure of elements and energy."

"Moreover, the Grand Wizard's elemental body possesses no physical weaknesses; it has a constant elementalization ability. Unless attacked by an opponent of the same realm or someone possessing special means, even decapitating them or dismantling their body will be futile, which evidently is why they can rival demigods, in a way this is an Undying Body."

In short. .

The chasm between the fifth-circle and sixth-circle is the difference between manpower and the ability to mobilize the elemental power of heaven and earth.

The chasm between the eighth-circle and ninth-circle is the difference in understanding and control of the elements.

"To fight a ninth-circle with an eighth-circle body, the road is still long."

On the Klein Crystal Ball, it showed Levi's current spiritual force had reached 15,200 points.

After advancing to the eighth-circle, the spiritual force directly increased by 2,000 points.

The standard spiritual force range for the eighth-circle is 14,000 - 24,000.

One point of spiritual force represents 2,000 points of spell power.

His current spell power reached 30,400,000.

This is truly a vast ocean of spell power.

After the eighth-circle, for the eighth-circle wizard, if they only use innate spells to fight.

He can battle against an evenly matched enemy for a day and night without exhausting spell power.

The consumption for primordial soul spells will be a bit higher.

Greater consumption comes with eighth-circle magic, but it is no longer like before the sixth-circle, when casting a few would leave one drained.

After the eighth-circle, the wizard's endurance in battle significantly improves.

And after becoming a Grand Wizard, possessing an elemental body and Elemental Holy Soul, continuously absorbing the elemental power of heaven and earth.

The ability to sustain battle becomes even more formidable.

So the magical duels between legendary wizards and enemies, are, many times, counted in years.

Levi exhaled turbid air, he concluded his seclusion, and his figure dissipated.

Chapter 2317: Advancement! Eighth-Circle Wizard!

"Congratulations to the Dusk Palace Master on stepping into the eighth circle, the Grand Wizard is within reach."

The Shadow Walker congratulated.

"Congratulations!"

"Congratulations!"

Levi welcomed the delegation to the council chamber.

"What is the matter the senior is seeking me for?"

The Shadow Walker got straight to the point:

"We have noticed that your side seems to be able to summon creatures from the Nightmare World, are you conducting research on the Nightmare World?"

Levi roughly guessed the congress's intention.

"Yes."

The School of Dreams summoning nightmare creatures, this cannot be hidden from the congress, and he did not intend to hide it.

The Shadow Walker pondered.

"Presumably, Sir Levi has heard of the events of the Dreamland Steeple, doing this carries significant risks."

Levi smiled slightly.

"I understand the congress's concerns, but I can assure you there will be no issues on my side, and certainly no unforeseen disasters brought to the Wizard World."

The Shadow Walker nodded.

"Very well, I also trust in the Dusk Palace Master's ability, I mainly wanted to remind you that the Nightmare World is extremely dangerous, with the example of the Dreamland Steeple before us, it is imperative to be cautious in developing the Nightmare World, or else the loss outweighs the gain if one gets lost in it."

"I have nothing else here. If you encounter any problems in the Nightmare World, feel free to contact me anytime, for I also have some research on the Nightmare World."

With that, the Shadow Walker led the team away.

Levi understood the congress's concerns.

Therefore, he has always been cautious about exploring the Nightmare World, staying around the Black Dragon Territory always.

Risks are inevitable, but weighing the pros and cons, the benefits are still greater.

After being closed off for a long time, he inspected various major organizations.

Everything is normal, steadily progressing.

Elena and the Three Avatars are also doing well.

Madam Triss is tackling the most challenging Seven-Circle Breakthrough Potion.

If she succeeds, her war merits will not be less than those of the top ten on the level 8 Demon Slaughter List.

He also communicated with the Heart Moon Spirit Witch about the progress of the Summoning Style of Nightmare Summoning.

He learned that precise summoning has been preliminarily achieved, and corresponding spells and knowledge are being researched.

Levi told her to pay extra attention and report any situation to him at any time.

The root of the matter is that his strength is not strong enough in the Nightmare World.

If he had the strength of a Legendary Wizard, even with the risks in the Nightmare World.

With his status as a Nightmare Lord, he would have no fear.

Learning that Levi advanced to the eighth circle, Hundred Flowers also came back from the frontlines to congratulate him.

Levi upgraded and recharged her [Dragon's Protection] ring.

So that next time she summons a replacement fighter, it will be at level 8 standard.

It's more than enough for preserving life in front of a level 8 demon.

Levi's Demon Slaying List also automatically updated to level 9.

He opened the leaderboard.

The first place is Lucy, with the Eight-Circle Perfect Cultivation, having over twenty billion in points.

"For Ms. Lucy, points are really just numbers... doesn't seem much useful."

After the eighth circle, not counting the random Sun Refining Artifacts, at most, you can exchange for two non-random Sun Refining Artifacts.

With the lady's war merits, she must have exchanged them all long ago.

Moreover, she doesn't seem to lack resources much, after all, being a reincarnated Legendary Wizard, she definitely left many backup plans.

From second to twelfth place, they are basically all with Eight-Circle Perfect Cultivation.

Mostly they are leaders of top wizard organizations or commanders of ace legions.

These people have long been famous in the Wizard World, the top existence below the Grand Wizard.

Their points are all in the tens of billions, several tens of billions.

The thirteenth place is Levi.

At his peak, his points were able to rank in the top ten.

Later, to focus on cultivation, he fell out.

"Next, there's no hurry, after the eighth circle, exchanging for Sun Refining Artifacts becomes much simpler."

A single mid-level 8 demon, even the weakest Bottom-dwelling Fish Demon, has twenty to thirty million points.

Some troublesome ones, like the Formless Demon or Shadow Demon, have over a billion points.

Of course, after the eighth circle, the war merits needed for exchanging non-random Sun Refining Artifacts also increase somewhat.

This is the congress's high standard requirement for high-level wizards.

The price of the same artifacts might be twice that of the Seven-Circle period.

But for an eighth-circle wizard, earning war merits is much easier than for a seven-circle one.

So overall difficulty is still lower.

Of course, the premise of earning war merits easily is strong enough capability.

If the combat power is inflated, unable to defeat a level 8 demon of the same realm, then naturally it's futile.

But due to Nora's home ground advantage and plane suppression.

Except for the Cave Wizard, the average combat power of normal eighth-circle wizards surpasses that of demons.

After a step-by-step selection of the best among the best to reach this realm, there are no ordinary people.

Talent, perseverance, luck... one of these factors is always outstanding.

"For me, it's still to consolidate the realm first, and then refine those three oddities."

"Next, start collecting and learning Eight-Circle Magic, prepare the materials for Knight Promotion, and bring up other breathing techniques."

"The Three Arts of Wizardry also need to be slightly worked on, refine a batch of Eight-Circle Meditation Potions, and Divine Talisman Dao needs further research, start attempting knight's divine talismans."

After advancing to the eighth circle, matters did not decrease.

Cultivation is like this, there is never a time for slackness.

But with Levi's lifespan, he can afford to be leisurely without haste.

The average lifespan for eighth-circle wizards is four thousand years, he has the knight's blessing, plus the doubled Moon Rune.

His lifespan should be similar to that of a Legendary Wizard... and he is only eleven hundred years old.

In other words, only one-tenth has passed.

"The longer I live, the younger I become, among mortals, I'm still at the stage of an eight-year-old child."

Chapter 2318: Advancement! Eighth-Circle Wizard!

Levi quipped.

But thinking about the Ash Dragon, and Mana's extraordinary lifespan, Levi didn't have much to boast about.

"My goal should be to live as long as Mana, until I tire of life."

...

Ancient Banyan Fairyland.

"Look, our eighth-circle wizard is back."

Mana sat on top of ADie, her long, fair legs and sweet-smelling little feet dangling at the sides.

A group of Shell Demons, along with Levi's adopted little fairies, gathered underneath ADie to collect Immortal Dew.

The towering ancient banyan tree gently swayed.

This scene was so beautiful, like a true fairyland.

"Today, I have broken through, so we should celebrate. Mana... you invite everyone, let the Flying Immortal Platform be abundant!"

The Flying Immortal Platform is wine brewed from Immortal Flowing Liquid, with an alcohol content of 0.53.

After all, it's a drink for feasting, so the alcohol content has to be low, otherwise it wouldn't be enough.

"Oh oh oh, there's a feast!"

"Not drunk, not returning home!"

The good news spread across all departments within the fairyland.

Dragon Palace, Ancient Shell Palace, ancient banyan tree Mansion, North Sea Secret Realm, Burning Rock Clan, and the guardians of those Cave Heaven Blessed Lands all gathered together.

At night, the stars twinkled.

Under the ancient banyan tree, a group of giant dragons like mountains sat in a circle.

A circle of wine cups floated mid-air, landing before everyone, with the wine flying into their throats.

The Thunder Crocodile took a sip, though made of thunder element, it couldn't help but savor it:

"Not bad, not bad."

There were also some Undead, for whom the wine slipped through their skeletons after entering the throat.

Long emerged from the earth, not wasting a drop of wine.

Levi sat beside Mana, observing this circle of subordinates, differing greatly in race and form.

He felt somewhat content.

The gloom of the Blood Battle loomed over the Wizard World.

But in the Ancient Banyan Fairyland, not a trace could be felt.

Inside and outside the fairyland were two completely different worlds.

He didn't want these fellows to get involved in the Blood Battle either.

As the feast ended.

People weren't drunk, yet intoxicated by the atmosphere.

The Fire Breathing Dragon, hiccuping, left happily with its wife.

The Red Princess and Black Lotus Beast were engaged in some conversation.

Three brothers lay on the ground, snoring away, dragged by their mother's Earthquake Dragon's tail back to the valley.

The Black Phoenix and the Green Fire Crow, distant cousins, chatted about the Undying Bird.

The Thunder Crocodile proudly showcased its Thunder Afterimage.

Mana, face flushed, lay on a swing woven from branches, gazing at the starry river.

She suddenly said:

"What a wonderful day it is, though the stock of Immortal Flowing Liquid is running out..."

Levi looked at this warm scene and laughed:

"Enjoy the wine while it's here, no worries."

He quietly returned to the Small Stone Pond, soaked in the Spring of Immortality, and fell into a deep sleep.

This sleep lasted a year.

When he naturally woke up, Levi's realm was more or less stabilized.

He took out the Flame Emperor's Sword, taking a deep breath.

"Let's begin."

Upon its appearance, the Flame Emperor's Sword buzzed and shivered, radiating a scorching heat.

Levi's hands enveloped it in golden light, tightly containing it to prevent damage to the surrounding environment.

Then, using secret technique, he began to refine it.

Swish.

A red stream of light merged into his body.

It was the phantom of a sword, melting at a visible speed in Levi's hand.

His eyes opened wide, his expression slightly changed.

"Why is this oddity refining so quickly?"

It's known that the Shadow Emblem took him ten years to refine.

Although now as an eighth-circle, it wouldn't take that long, he had prepared for three to five years of seclusion.

Unexpectedly, like Zhu Bajie's ruthless consuming of Ginsengfruit.

He hadn't had a chance to ponder, when the Flame Emperor's Sword vanished in his hand.

As if impatient to enter.

A scorching red warmth coursed through his limbs, finally converging in his mind.

Levi's spiritual force was rising at a speed visible to the naked eye.

Half a day later.

Levi's head was slightly dizzy, feeling like it was about to burst.

He quickly began meditation, slowly consuming this spiritual force to prevent going awry, avoiding excess.

Thus, six years passed.

Nora 690, Blood Battle 476th year.

To Levi, with a ten-thousand-year lifespan, six years was like half a month to a mortal.

True cultivation transcends time, devoid of a concept of years.

He fully subdued the surging spiritual force, feeling much more comfortable overall.

This Sun Refining Artifact refined too fast, leaving no time for adaptation.

If it were like the Shadow Emblem, refining and enhancing simultaneously, it would be much better.

That is the wonder of the oddities, even the same oddity can yield different effects for different wizards.

At 1106 years old, Levi opened his eyes.

He placed his hand on the Klein Crystal Ball.

[Spiritual Force: 16200/25200]

...

"Spiritual force increased by 1,000 at once... this is the power of a Sun Refining Artifact?"

The previous Shadow Emblem, since it pushed Levi's spiritual force to the Maximum, didn't establish a standard for improvement.

Seeing now, a Sun Refining Artifact should provide about a thousand.

However, the Flame Emperor's Sword is one of the best among them, while ordinary Sun Refining Artifacts might be slightly lower.

But still around eight to nine hundred, give or take.

For an ordinary primordial soul wizard, that could mean hundreds of years of hard cultivation.

Even for Levi, he would need about a sixty-year seclusion.

"Good thing I used it in the Eight Environments, if I refined it at the seven-circle, it would have been a huge waste."

"An eighth-circle senior wizard's spiritual force standard is 18,000 points, I'm not far from reaching eighth-circle senior."

After the eighth-circle, spiritual force spans reach ten thousand points.

So each small realm advancement is challenging.

This is the endpoint for the vast majority of geniuses, even top-tier ones...

Spiritual force enhancement is just one aspect.

Levi came to his mindscape, where the Divine Ring Tower spun gently.

A crimson flame dragon writhed above.

In its mouth, it held a Red Flame Dragon Ball, resembling the black bead in the Shadow Dragon Group Model.

This signified that the Fire Dragon Tribulation talent had evolved.

Levi could feel the intricacy of the spell model, even surpassing his current comprehension.

The Sun Refining Artifact originated from the fall of a level 9 existence, its Truth Runes, profound and unfathomable.

"I wonder about the power of the fire dragon tribulation spell."

With a thought, Levi appeared above the Outer Sea.

He pointed with one finger.

Within a two-hundred-mile radius, the fire elemental power became agitated and restless.

A vast red cloud transformed into a flame dragon tens of miles long, exuding an aura of terror.

The fire dragon roared forth, quickly shifting into a crimson greatsword, faintly visible with an awe-inspiring shadow of the Flame Emperor, standing as tall as the sky!

Slash!

This one strike carved out a thousand-mile-long Red Flame Rift.

White mist, heat waves, magma, seawater, meteors... countless doomsday scenes played out, leaving one in awe.

"Hiss~ such might... in the future, I'll rely on this single move to dominate, there's nothing a Fire Dragon Tribulation can't solve, and if there is, just use more."

Chapter 2319: Legendary Artifact: Elemental Proof!

You need to understand.

The Fire Dragon Tribulation is merely an inconspicuous innate spell, and it's Levi's First Talent.

It's just Levi's ordinary attack.

Now its power surpasses even the grand moves of a conventional primordial soul wizard!

This showcases the might of the Sun Refining Artifact!

"But at this stage, many excellent eighth-circle wizards have refined Sun Refining Artifacts. Their innate spells can't be judged by common sense. Future battles demand caution; there's no harm in being careful."

Besides.

The power of Levi's other Burning Faction spells has also significantly increased.

He opened the proficiency panel.

The Flame Emperor's Sword brought some unexpected changes regarding the [Aether Dominance] talent.

...

[Aether Dominance: Rock Emperor's Shield (missing), Flame Emperor's Sword (complete), Wind Emperor's Robe (missing), Blue Emperor's Boots (missing), Thunder Emperor's Crown (missing), Ice Emperor's Throne (missing), Golden Emperor's Palace (missing)]

Thanks to the proficiency panel, and the Children of Chaos' initial talent to learn everything but excel in nothing.

Levi embarked on a path of learning all things.

The [Aether Dominance] talent originated from the Aether Meditation Art that Levi fused back then.

"These things at the back seem to be part of the Sun Refining Artifacts. Some are recorded in the Illustrated Guide of Strange Items, and some aren't. It seems the Flame Emperor's Sword and the other six artifacts are a set... Could it be that combined, they're a [Legendary Artifact]?"

Levi's gaze swept over these artifacts, and a wave of information surged into his mind.

"Elemental Proof?"

This name was very familiar, and he hurriedly opened the Illustrated Guide of Strange Items.

At the end of the guide, a legendary artifact was recorded.

[Elemental Proof: A legendary artifact, upon refinement grants a level-10 Legendary Profession.]

The description is brief, with no other content.

The higher the level of the artifact in the Illustrated Guide, the less information there is.

Some legendary artifacts even have only a name, leaving the rest to speculation.

"So it is."

"These seven Sun Refining Artifacts, although non-sequence artifacts, can be fused into a single legendary artifact."

"It's a pity that the War Merit Store only has a Flame Emperor's Sword."

Levi checked the Ninth-level Demon Slaying List, but there were no other artifacts from this list.

He couldn't say whether the Council Treasury had them or not.

It seems he has to find a way to acquire these artifacts on his own.

Since the proficiency panel has hinted, his goal and direction are quite clear now.

Before ascending to legendary status, collect these seven artifacts to fuse the [Elemental Proof].

This way, he should be able to acquire a legendary profession.

This legendary profession, spanning across seven major sects, will certainly be powerful.

His path to becoming legendary is becoming clearer.

"I wonder if the deeper layers of the Dark Ancient Tower have any? I'm about to undertake the level 8 trial and become a level 8 law enforcer; I can look for them next."

Levi looked forward with anticipation.

Looking at it now, the [Elemental Proof] is the most suitable legendary artifact for him.

Aside from these.

The Flame Emperor's Sword also bestowed Levi with a talent called [Emperor of Flames].

The talent is simple yet brutal: it enhances his fire element affinity.

He already has the Crimson Emperor Dragon bloodline bonus, making his fire element affinity strong.

The combination makes it all the stronger.

Simon, with his Dual Fire Talent, is no match for him.

Next, the speed of meditation and proficiency in Burning Faction spells will certainly improve.

Levi's consciousness entered his mind, where the Eight Layers of the Divine Ring Tower slowly rotated.

Within the first layer of the Divine Tower, seven ancient-styled stone platforms had appeared, though he hadn't noticed when.

A crimson flame sword floated on one of the stone platforms—it was the Flame Emperor's Sword.

The other six stone platforms were empty.

"Interesting, this is the first time I've seen something like this."

"It seems that after refining each Elemental Proof sub-artifact, it will appear on the stone platform, like proof of collection."

The previous Shadow Emblem didn't have this situation.

"It's a shame that such mighty artifacts don't have accompanying spiritual creatures, and neither does the Shadow Emblem. Is the drop rate of spiritual creatures for Sun Refining Artifacts so low... No matter, I'll continue to refine the remaining two Bright Moon Artifacts."

Levi first took out that Death Sect's Dragon Fish artifact.

The Dragon Fish looked cunning, wriggling like an eel in his hand.

"Hope you prove useful."

Bright Moon Artifacts present no difficulty for him to refine.

Half a year later, Levi gazed at the [25400] spirit force upper limit on the Klein Crystal Ball.

"Not bad at all, an increment of 200 points in one go, comparable to the White Emperor Holy Sword back then."

Two hundred points seem to be the upper limit for Bright Moon Artifacts.

Levi hasn't seen a number higher than this.

This indicates this artifact is quite excellent, the strongest Bright Moon Artifact under the Sun Refining Artifacts.

As for the increase in spiritual force upper limit or enhancing spiritual force, Levi does not mind.

In his mind, Jin squeaked cheerfully.

Levi's consciousness entered the Divine Tower.

Jin, Fleur, ABiao, Si Lei, Nick... All these artifacts have become much stronger than before.

Especially Si Lei, whose divine demeanor made the surrounding spiritual creatures avert their gaze.

Now, all these spiritual creatures curiously observed a corner.

There, a miniature Yellow River meandered.

The murky waters exuded dense negative energy Death Energy.

Chapter 2320: Legendary Artifact: Elemental Proof!

It somewhat resembles the yellow spring Levi saw in Dragon Fall Valley.

This is a river-like companion entity, quite rare.

Sensing Levi's consciousness, the river floated lightly, appearing in his palm.

Death energy lingered, causing the surrounding flora to wither rapidly.

Suddenly, this companion entity seemed to sense something.

It rushed into the sky, heading towards the ancient banyan tree Mansion.

Levi's figure followed.

...

Ancient banyan tree Mansion.

The Tombstone of the Dead stood silently, with Rest Soil now expanding to about one square mile, progressing well.

Some bewildered skeletons, ghosts wandered the wilderness.

Sensing Levi's presence, their Soul Fire conveyed fluctuations of excitement and submission in spirit.

As the master of the ancient banyan tree Mansion, Levi had absolute control over them.

The yellow river had already burrowed under the Tombstone of the Dead.

"Gurgle."

Accompanied by the sound of bubbling Clear Spring, a yellow spring emerged beneath the tombstone.

The yellow river bubbled like a yellow eel hidden in the silt.

"It seems you like staying here."

Levi speculated that the dense death energy here attracted the spirit.

"In that case, I'll call you Yellow Spring."

Levi murmured.

Yellow Spring continued to bubble, with more and more spring water gushing out of it.

Like the Tombstone of the Dead, it could transform elemental power into death energy.

The spring water flowed over Rest Soil, seemingly accelerating its multiplying speed.

This brought joy to Levi's heart.

It seems it won't be long before the ancient banyan tree Mansion completely transforms into the Human Underworld.

At that time, more undead creatures will be nurtured below.

Perhaps, in the distant future.

He wouldn't need to do anything to have an undead army sweeping across the Multidimensional Plane.

And have a formidable Heroic Spirit Army.

"Then let this oddity be named Dragon of Netherworld."

Levi added this oddity to the Illustrated Guide of Strange Items.

Unknowingly, he had documented many unique oddities in this book.

When passing it on to others in the future, he'd also be one of its compilers.

It was like he and Sauron wielded a knife each, together compiling an Illustrated Guide of Strange Items.

Finally, Levi took out the black eyeball.

"Though it's a bit peculiar, it's merely a Bright Moon Artifact, not a big deal. At its core, any cultivation sect is just a tool; the error isn't in them, but in people. As long as one has strong willpower and sufficient temperament, not everyone in the Burning Faction is as irritable as Simon, nor is everyone in the Death Sect devious; the majority are normal people."

...

Six months later.

Nora Year 691.

Blood Battle Year 477.

Levi had also refined the jet-black eyeball.

He opened his eyes, with a glimmer of dark light slicing through the void.

In his mind, a dark, negative emotion lingered uncertainly.

In broad terms, negative energy is quite varied; basically, everything besides the Seven Elements and light constitutes negative energy.

For instance, Nightmare, fear, or the seven deadly sins of mankind.

But within the School of Insects, the mainstream only includes four:

Darkness, Death, Shadow, blood.

Among these, Darkness is the most typical, negative energy, and also the most powerful...

This is why wizards refer to their universe as the Land of Darkness.

But this energy is also the most difficult to master.

One wrong step, and one might get lost in darkness.

After refining this oddity, Levi felt it keenly.

But for him, a Bright Moon Artifact indeed had little impact.

For no other reason than that darkness was merely a part of his cultivation sect.

His mainstay remained the Seven Elements, these positive energies.

With them, it's easy to suppress this little bit of dark power.

However, this thing is really formidable; if it were a Sun Refining Artifact of the Dark Faction, it wouldn't be so simple.

"Everyone has a negative part, that's quite normal."

"As long as you ensure the positive overshadows the negative, there're no issues."

"Completely lacking negativity, that would be abnormal."

Levi murmured to himself.

This jet-black eyeball also increased the upper limit of his spiritual force by 150 points. .

Its quality clearly couldn't compare to the Dragon of Netherworld.

Levi's spiritual force upper limit reached 25,550 points.

In addition, it gave birth to a special physique.

It's called the Great Black Celestial Body.

The Great Black Celestial Body has three functions:

1. Slightly enhancing his Dark Faction talent.

2. During nighttime or in the Land of Darkness, his Perception Ability significantly increases.

3. Boosts damage to light-attribute entities, whether they be wizards of the Light School, transcendent creatures, or even... Gods.

It's well known that Gods love to arm themselves with Light.

Among the celestial entities, many have associations with light.

In the Wizard World, the Light School is not among the leading factions.

Yet in the astral world, many gods possess the Authority of Light.

Among these, the most famous, with whom Levi had interacted many times.

Is precisely... Heavenly Father!

Levi knows little about godly knowledge.

But he's aware of some hidden knowledge.

It seems gods like to refer to their domains as Authority.

Moreover, to gods, Authority is like a gigantic cake.

Its quantity is fixed.

Some gods possess many, thus are very strong.

While others can only grasp some scraps, thus are weak.

Consequently, even gods can vary greatly in power levels.
