

Wizard 2411

Chapter 2411: Gegewu's Sealing God Technique! Golden Legend Giant Dragon Card +1

Levi stood still, his Danger Perception slightly warning him that there were risks inside, but not many.

"I've been so busy lately, I almost forgot there's a relic here that hasn't been explored. Even a small fry is still meat, let's take a look."

His figure flickered, using the method of the Invisible Secret Word, passing through the layers of traps in the relic, as well as those dilapidated arrays.

...

Inside the relic.

Levi's figure appeared, fully armed, with the Vajra Secret Word protecting his body, a protective force field buzzing around him, his surface enveloped in golden light.

In front of him was an ordinary castle, within which stood a Wizard Tower, silent and unmoving.

Suddenly, Levi looked back, and a plump black cat appeared behind him.

"Meow..."

Levi found it inexplicable.

"How can there be a cat in this place?"

The black cat in front appeared quite ordinary, without any transcendent aura, yet the relic was isolated from the world. Levi had sensed around, and apart from the black cat, there was no other sign of life.

There was something strange about this black cat!

He asked:

"Who might you be?"

Black cat: "Meow."

Levi: "I have no ill intentions, I just happened to pass by here accidentally."

Black cat: "Meow."

The black cat, upon seeing a stranger, neither showed fear nor overreacted. Elegantly, it sat on the ground, extending its furry paw to lick it.

Levi ignored the black cat and ventured into the castle alone. He had set up a Death Ember Divine Palace outside the relic, and if needed, he could explode it to return to the city.

The inside of the castle was fairly intact, save for some dust, with no signs of damage.

From the memories of the golden prince, this relic should have been sucked inside by the Dark Ancient Tower. Before that, it was hidden in a small plane.

In the castle's hallway, there were numerous oil paintings displayed. Suddenly, Levi halted, looking at a serene landscape painting. In one corner of the painting, a part was missing.

From its shape, it seemed a cat was once painted there... Levi's expression changed subtly as he looked at the black cat that followed behind.

"This creature comes from the painting."

He then looked at other paintings, confirming they were all dead objects, not illusions. With his current Nightmare Dragon realm, even a Level 9 Nightmare Lord couldn't easily bewilder him.

Besides that, there was nothing else in the castle, and ignoring the black cat following him, Levi proceeded to the Wizard Tower.

He moved like a spectre through every corner of the Wizard Tower, searching for clues.

Finally, he arrived at the top floor, which seemed to be the relic owner's residence. On the dust-covered desk, there lay a book and an old dried-up coffee cup. RĀŃO·BEŠ

The black cat jumped on the book, and after some thought, Levi held it, picked up the book.

"Meow."

Levi stroked the cat's head, his eyes focusing on the book cover, narrowing his gaze.

"Gargamel's Book."

He looked at the black cat, his expression calm.

"Are you Gargamel?"

Black cat: "Meow."

After wandering around the relic again, aside from the Gargamel's Book and the black cat, Levi found nothing else.

He found a place, opened the book and started reading.

Unknowingly, he reached the end.

The black cat lay beside Levi, licking its belly while side-lying.

Gargamel's Book was a diary.

It recorded neither profound knowledge nor significant secrets, just Gargamel's daily experiences and thoughts.

According to the diary, in the last years of his life, Gargamel had distanced himself from Nora.

He was researching a forbidden sealing spell called Gargamel's Sealing God Technique.

Throughout his life, Gargamel had sealed many powerful creatures: demons, devils, evil dragons, alien races...

But there was one thing he hadn't sealed yet, and that was Gods!

At his peak, Gargamel had already reached the threshold of a Legendary Wizard. He was the supernova of that era, a leader in style.

The Legendary Artifact he wanted to create was named the Sealing God's Book.

To finish this oddity, it required sealing nine demigods or one True God.

As a Grand Wizard, he naturally was not a match for a True God.

Thus, he wandered across Multidimensional Planes, plotting behind the scenes in various divine-favored lands.

Gargamel, through trickery, lured an angel from the astral world to descend.

Then, with his Divine Soul Artifact, Gargamel's Fairytale World, he sealed it.

Levi had once acquired a fifth-circle replica of Gargamel's Book of Seals.

And so, after a millennium of plotting, Gargamel successfully sealed eight demigods.

He was only one step away from success.

However, his activities eventually caught the attention of a certain God in the astral world.

That God was known by the Divine Name The Prankster God, true name Arevin Illahir.

The Prankster God disguised as an angel, specifically descending an incarnation for Gargamel.

He was a powerful and cunning deity.

He did not kill Gargamel directly but invited him to play a game.

If Gargamel won, He would swear a Star Realm Oath, extremely binding even for a God, not to meddle further.

But if Gargamel lost, he would have to accept His punishment.

If Gargamel refused the game, He would erase him outright.

Gargamel had no choice; from the moment he was discovered by this God, his fate was sealed.

So he accepted the invitation. The consequences were predictable, and Gargamel likely lost.

Otherwise, the birth of a new Legendary Wizard would surely be recorded in the history of the wizard civilization.

He chose this incredibly difficult path, undoubtedly prepared for failure.

Chapter 2412: Gegewu's Sealing God Technique! Golden Legend Giant Dragon Card +1

Wizard: Starting With the Knights Breathing Method

But once successful, he could also become more powerful than ordinary Legendary Wizards.

Because according to his plan, he could seal the Gods within himself to seize the Divine Power and use it to strengthen himself.

One God's power might not be much, but if he could simultaneously seal two Gods, three Gods...

Theoretically, as long as he was strong enough, someday he could even seal the entire astral world and the Heavenly Father within himself.

This is the Supreme Realm of Sealing Arts!

The heavens and the earth, even the lofty Gods, I will seal them for my use!

Thus, [Gargamel's Sealing God Technique] is a forbidden magic, and the oddity he forged is certainly something that the Gods could not tolerate.

In Levi's view, Gargamel's failure was because his ambition was too great.

Unlike demons, who willfully expose their ferocity, the Gods are most difficult to provoke.

The diary records ended when Gargamel decided to meet the Prankster God, with no follow-up.

Most likely, he was killed by the Prankster God, or perhaps turned into this cat.

The latter is more likely because the Prankster God wouldn't easily kill every prey.

He loves to play like the Lost Monarch... of course, if he knew the Lost Monarch messed up, he might not do the same.

In the diary, Gargamel also mentioned his design of the [Eternal Star Abyss] wizard tower model.

It was prepared for his grand plan and is part of [Gargamel's Sealing God Technique].

In fact, until his disappearance, he never truly brought it into existence.

Thinking this way, if Levi could refine this wizard tower, he would be the first wizard to own an [Eternal Star Abyss].

And the full name of [Eternal Star Abyss] is [Forever Suppressing the Astral World and Tower of Abyss].

"Goodness, this Gargamel really was ambitious. No wonder he failed. Even the Black Abyss Sovereign only dared to hunt seven level 9 demons back then, and that was near the Nora World with the shelter

of Legendary Wizards. He fought against so many demigods all by himself. Too bold, that's a wild gamble. I, being a prudent person, can't even imagine."

Gargamel had eventually distanced himself from Nora. .

Maybe he didn't want his conflicts with the Gods to impact the Wizard World.

After reading the diary, Levi looked at the black cat again, pondering in his heart.

"Should I take it back? Gargamel was from ten thousand years ago. Even if he turned into a cat, he should be dead by now. I don't even know what this thing in front of me is."

Moreover, Levi suspected this black cat might be part of the Prankster God's trick.

Nevertheless, Levi had unknowingly received many benefits from Gargamel over his cultivation journey.

From the fifth-circle Wizard Tool to the wizard tower design model, they were all related to Gargamel.

Thinking it over, Levi decided to temporarily leave the black cat inside the Dark Ancient Tower, maintaining the status quo.

First, the black cat has a quite long lifespan due to the Prankster God's curse. Gargamel went to meet the Prankster God twenty thousand years ago. Turning into a cat should have happened then, so leaving the black cat inside the ancient tower won't kill it in the short term.

Second, the Dark Ancient Tower was a treasure left behind by Sauron. If the Prankster God had any schemes, with the ancient tower as a barrier, it wouldn't affect the Wizard World.

Judging by his growth speed, he has high hopes of becoming a Legendary Wizard before the black cat dies and maybe finding a solution by then.

If a solution couldn't be found, then he'd deal with the Prankster God!

"Meow."

Levi petted the black cat.

"I don't know if you understand what I'm saying. If you are Senior Gargamel, I apologize, but I can't take you away for now. But trust me, I'll come to accompany you from time to time and won't let you be too lonely here."

Levi couldn't imagine how the black cat had endured lonely years; for a social species like humans, it was undoubtedly the most painful punishment.

Even a cultivation fanatic like Levi would go crazy if isolated from the world far from home for twenty thousand years.

The black cat seemed to understand Levi's words.

"Meow."

It stood up, went back to the Wizard Tower, fetched the "Gargamel's Book" that Levi returned and laid it before him.

This behavior convinced Levi that the black cat might indeed be Gargamel.

Levi smiled:

"I've memorized it already. Let's leave the book here."

He worried the book might be problematic too, so he couldn't take anything away from there.

"Meow."

The black cat squatted there, watching Levi disappear, then gracefully turned and went back to the landscape painting, becoming part of the artwork.

...

The Eighth Level of the Ancient Tower.

From this level onward, the number of wizards treading here drastically decreases. Without eighth-circle power, it's challenging to reach this place.

And many eighth-circle wizards in wizard organizations are leaders of high-level or top-level organizations, unwilling to leave their organizations at will.

As far as Levi knows, those who ventured here in the past were mainly congress-organized professional exploration teams, mostly from the Central Realm.

Those Truth Oddities in the council treasury, surely some are sourced from the Dark Ancient Tower.

The place where Levi appeared was a vast sea on the eighth level.

Rumbling.

The waves surged turbulently, and the seawater within a radius of hundreds of miles formed a whirlpool.

In the center of the sea vortex, a semi-transparent humanoid figure like a mermaid emerged.

"Oh, are you the enforcer?"

The mermaid asked.

"Yes, are you the Order Guardian of the eighth level?" Levi smiled slightly

Chapter 2413: Gegewu's Sealing God Technique! Golden Legend Giant Dragon Card +1

Wizard: Starting With the Knights Breathing Method

This mermaid is a mid-level 8 water elemental spirit, different from the Thunder Crocodile, it is the appointed enforcer of the ancient tower.

The mermaid showed a happy smile.

"I am Astrid, the guardian of this sea region."

"Levi, enforcer from outside."

"So you came from the outside, huh? Are you from the Wizard World?"

"Yes."

Astrid, with a strong curiosity about the outside world, found a topic and chatted with Levi for quite a long time.

Levi also gained a clearer understanding of the situation on the eighth layer from her.

The eighth layer, unlike the fifth and seventh layers, doesn't have large human factions, rather like the sixth layer, humans are scattered and few in number.

The dominant species in the eighth layer are the black beasts, widely distributed. The level 8 black beasts occupy mountains as kings, and their numbers far exceed that of the seventh layer.

In the eighth layer, there are five extremely dangerous places, known as the "Five Great Sky Pools."

Legend has it that the God of Creation of this world sealed five terrifying entities there.

Based on previous patterns, Levi suspected those sealed might be level 8 peak, or level 9 entities.

Similarly, the eighth layer and even the subsequent ninth layer, the upper limit for the power of strong figures is level 8.

Within the entire Dark Ancient Tower, breaking through to level 9 is not possible. Sauron worries they are too powerful and would disrupt the balance here.

Even if there are level 9 entities, they are the "NPCs" arranged by the ancient tower.

The Five Great Sky Pools are:

[Shadow Abyss], [Abyss of Ten Thousand Poisons], [Blood Sea Abyss], [Death Abyss], [Abyss of Darkness].

It clearly represents the main negative energy sects of the Wizard World, Levi smiled.

Along the way, he had already grasped Solon's design thoughts and patterns for each layer's "scenario."
As a fellow local, no one understands Sauron better than him.

Seventh layer: Elementalist Schools.

Eighth layer: Five Great Positive Energy Schools.

Ninth layer, presumably would involve light, possibly even time and space, higher difficulty concepts.

As for the tenth layer... it might involve chaos.

Don't forget, the Dark Ancient Tower was created from the body of the [Chaos Ancient Serpent].

Levi even suspected Sauron might have intentionally left the Chaos Ancient Serpent alive as the final test.

"Sir Levi, are you planning to go to the Sky Pools? It's very dangerous there."

Astrid looked worried.

Her character is innocent like a mountain spring, and after not chatting for long, she grew fond of Levi.

If it weren't for her being an order keeper, Levi wouldn't need to enslave, he could just lure her away.

"Relax, my friend, it's a pleasure meeting you, until we meet again."

Levi waved his hand and his figure faded away.

According to prior experiences, the places with the most goodies on the eighth layer are certainly the Five Great Sky Pools.

This place is so vast, Levi didn't plan to waste time and headed directly to the final scenario. If he can fight, he fights, if he can't, he runs, focusing on speed completion!

...

Shadow Abyss.

Levi hurriedly arrived.

All the way, the danger warnings continued alerting, in Levi's mind, a vague humanoid shadow appeared intermittently.

"With this level of danger, it's highly probable there is a level 9 entity sealed within the Shadow Abyss."

Levi halted, his eagerness for speed-clearing somewhat cooled. Based on the current situation, he could confirm the level 9 entity's activity range is limited to the Shadow Abyss area.

Otherwise, the eighth layer would have been flattened long ago.

As for what's in the Shadow Abyss, it's unknown, though there should be quite a few Truth Oddities. Not many can take treasures from places dominated by level 9 entities, it takes a big risk.

The entrance to the Shadow Abyss is a rift, bottomless, with many black beasts lurking around.

Levi first set up the Death Ember Divine Palace, and then, with a thought, his consciousness entered the Shadow Emblem, choosing a level 4 shadow, it was a shadow demon.

"I haven't upgraded the shadow quality for a long time, upon returning to Nora, I need to demon-hunt for a period to replace all level 4 shadows in one go."

The shadow Levi summoned has a certain range limitation, with his current strength, the radius is about ten thousand miles centered on him.

"Parasitic Eye."

With a thought, Levi split a thread of his spiritual force, attaching it to the shadow demon.

The shadow demon's forehead cracked open a vertical pupil, emitting a faint golden sheen.

This is a third-circle spell, most often not used, but now it comes in handy.

Next, he intended to see what lies within the Shadow Abyss from the shadow demon's perspective.

He has a plan, to use shadows for exploration and treasure hunting, if they die, it doesn't matter, he has plenty.

Although he himself can also resurrect using the Death Ember Divine Palace, the risk is still high.

"Go."

The shadow demon transformed into a streak of shadow streamer and vanished into the Shadow Dimension, its concealment capability is strong, eluding the black beasts around.

Soon, Levi saw the scene at the Sky Pool entrance, descending into complete darkness.

The shadow energy in the Shadow Abyss is very dense, Levi felt it is somewhat similar to the miniature Shadow World within his Shadow Emblem.

Fortunately, with the shadow creatures+shadow demon double buff, Levi's sent-out minions were like fish in water.

"Feels like this is an extracted fragment of the Shadow World by the Dark Ancient Tower."

Levi murmured.

Suddenly, on the abyss wall, Levi discovered a black plant.

It clung to the rock face like ivy, with blackberry-like fruits scattered sparsely.

"Seven-Circle Medicinal HerbShadow Berry, suitable for meditation in the Shadow School of Thought. It can enhance cultivation speed, but unfortunately, it's not very useful for someone like me, an eighth-circle wizard."

Chapter 2414: Gegewu's Sealing God Technique! Golden Legend Giant Dragon Card +1

Like the Fire Date, this type of heavenly materials and earthly treasures can be consumed by other sects. It's just that their efficiency is low.

Levi first let the shadow demon cautiously pick all the fruits, totaling 34, and placed them outside. Each one starts at a value of ten million Aether Stones.

He didn't let the shadow demon continue deeper but rather had it return to avoid any accidents that might blow up these fruits, which would be more loss than gain.

"These fruits should be placed in the Tower of Dawn for the students and teachers of the Shadow School of Thought to exchange. With these fruits, Aya's promotion to the seventh-circle will be much smoother. Next, transplant this Shadow Berry Tree into the Shadow Emblem."

This delicate task, Levi dared not let the shadow demon do it, as it would be a loss if the rare plant were ruined.

His Hermit Rune flashed along the path explored by the shadow demon, transplanted the Shadow Berry Tree away, and quickly relied on the Invisible Secret Word to return.

Next, he followed the same method, starting the treasure hunt.

Time flew by.

Three months passed.

Levi continuously delved deeper into the Sky Pool and obtained 13 rare shadow plants similar to the Shadow Berry Fruit.

They ranged from six-circle to eight-circle.

During this, Jin also helped a lot.

In addition, he obtained a rare level 8 ore called Shadow Flow Gold. When he returns to Nora, it can be refined and integrated into the Scarlet Shadow cloak, further enhancing its quality.

The main focus was on four Truth Oddities, three Earth and Sky, and one Morning Star-level.

As Levi had anticipated, the Sky Pool was rich in oddity resources. In these three months, he only wandered the outskirts and didn't dare go deeper. The depths should have Bright Moon, or even Glorious Sun-Grade oddities.

Of course, in these three months, he also lost 135 shadow creatures, most of them being rank four and five, which were to be eliminated anyway, so he wasn't distressed.

Inside the Shadow Abyss, the main danger was black beasts and shadow monsters. Many were above level 6, and he also encountered several at level 8.

As for that level 9 existence, it hasn't appeared yet, but the feeling of danger is getting stronger.

One day, through the powerful perception brought by the Unhidden Secret, Levi suddenly discovered a black figure watching him.

It had twelve wings on its back, looking like... an angel.

"Time to slip away."

Levi knew when to stop and didn't continue mixing in the Shadow Abyss.

He had already refined the Shadow Emblem and didn't have a high demand for shadow oddities.

During this period, the main attempt was to explore the possibility of using the Shadow Army to search for treasures in the Sky Pool.

Resources are rich on the eighth level, with the Five Great Sky Pools being the most famous among them.

Compared to negative energy oddities, at this stage, he needs more Bright Moon or Glorious Sun-Grade oddities from the Elementalist School.

Soon, at the entrance of the Shadow Abyss, a figure silently appeared.

It wore broken armor, black blood dripped from the wound on its back, and invisible chains pierced into it.

Twelve wings spread open, emitting an eerie yet holy aura, casting a shadow across the sky and earth.

"Cautious indeed, you left. Seems you have discovered my existence... Even though it's not time for the ancient tower to open, yet you appear here, must be Sauron's heir left in the world. If I were to kill you, would Sauron be sad?"

...

Nora Year 818.

Year 607 of the Blood Battle.

Six months swiftly passed.

Levi also went to the Abyss of Ten Thousand Poisons.

Based on the danger perception from there, there's also a level 9 presence dwelling, similar to the Shadow Abyss.

It can be confirmed that on the eighth level, five level 9 presences are suppressed. They are most likely demigods sealed in the Sky Pool by Sauron using secret techniques!

"Sauron really knows how to play, just like Gargamel, always likes to imprison Gods and play the big games daily."

Levi temporarily shelved the plan to explore the Sky Pool, riding the White Tiger and bringing Jin, traveling between mountains and rivers.

Later, he defeated a level 8 early stage Frost Giant Eagle atop a snow peak thirty thousand feet high.

It was the ruler of that area but ultimately surrendered to Levi.

Although this giant eagle belongs to the avian species, it possesses immense strength, capable of battling Lopez.

Levi examined its bloodline, discovering it possessed the legendary Dragonhawk bloodline.

And Dragonhawk is the source of the Feather Knight bloodline. Although its name has 'dragon', it's not dragon-type.

After defeating the giant eagle, Levi also found three eagle eggs in its nest, unfortunately, they were unfertilized.

This was a lone female eagle, having no kin on the eighth level.

Hopefully in the future Levi would find a mate for it, if truly unsuccessful, let it pair with the sub-dragons of the Dragon Palace, that would do too.

Besides, the giant eagle's nest contained many treasures.

Three Ten-thousand-year-old Snow Lotuses, one Ice Crystal Snow Lotus Tree, these were treasures Levi already possessed.

Considering few could come to the eighth level, Levi transplanted them all away, else they would be wasted.

In the giant eagle's territory, he also found a Morning Star-level oddity, the Winter Emperor's Beard, which was of minor use.

A multitude of other materials and resources were innumerable.

The journey to the ancient tower approached its end.

Jin stood atop Levi's head, "pointing the way" like an immortal.

Levi arrived at the final place suspected to have treasures.

Ahead, flames soared skyward, sending waves of heat;

Splashing wave sounds came forth.

Passing through a group of volcanoes, what came into view was an endless Sea of Molten Lava, where the hot wind swept, lifting thousand-foot waves of fire.

"Mountains and seas can shift, yet I remain unmoved!"

Levi suddenly recited the Vajra Secret Word.

Ding!

A crimson light struck the Golden Light Barrier and bounced back.

The Sea of Fire splits!

A beast with a well-proportioned body, covered in crimson feathers, possessing a refined dragon head and sharp eagle claws appeared, its extravagant tail feathers, like those of a golden pheasant, stretched over thousands of meters, flickering in the hot wind. This beast seemed both dragon and bird, majestic and unusual, displaying the aura of level 8 mid-stage.

"Why do you trespass upon my domain."

The beast glared warily, with feathers so mighty, ordinary level 8 early stage could be defenseless against one strike and easily injured, yet this human remained unharmed.

Levi felt the pure Dragon Might, a bit excited internally.

Is this the pure-blooded Dragon Clan?

Wonderful! Golden Legend Giant Dragon Card +1!

Moreover, it's an entirely new species he's never heard of, this journey was worthwhile!

"Hello, sir dragon, I have come especially to find you."

"To find me? I have never seen you!"

"Please allow me to introduce myself, I am the master of the Pan-Plane Dragon Palace, dedicated to gathering wandering dragons to establish a self-help organization controlled by the Dragon Clan, reviving the ancient giant dragon civilization's glory. I want to invite you to join, my friend."

"Dragon Palace? Never heard of it. You must be trying to fool me, prepare to face my wrath!"

Dragon Flames swept, crimson feathers overwhelmed!

The giant dragon was menacing, determined to tear the human in front of it apart.

Levi murmured inwardly.

"If you look upon me, you shall see destruction!"

Bang! An illusion of the Crimson Emperor Dragon dominated the sky, the incoming flame flow and feather sword were all repelled.

The giant dragon cried out, its body like a kite with broken strings, fell into the Sea of Fire with a plop.

Levi stood firm like a mountain, clouds rolling behind him, various elemental powers transformed into illusions of six giant dragons.

From the Sea of Fire, a sneaky dragon head emerged.

Its head buzzed, body covered with wounds.

Just now, with its pure-blood dragon clan body, it wasn't severely injured.

But seeing the human skillfully resisting, the true strength must be even greater.

Recovering clarity, staring at the six dragon illusions high up in the sky, it excitedly shouted:

"Lord, you have finally come! Ronan has waited for so long!"

Chapter 2415: Sun Refining Artifact: Fire God's Fury! Eighth-Ring Senior!

"When I was born, I was in this world, muddled through eight thousand years. After reaching level 8, I wanted to start traveling the planes to pass the boredom, but I found myself seemingly trapped in this world, unable to break through."

...

The giant dragon claimed to be the "Great Flame Sparrow Dragon Ronan", a rare pure-blood dragon, with no records found in the Wizard World.

It lay on the Lava Sea, telling its story, and its injuries had already been healed by Levi.

Having witnessed the prowess of the expert before it, the dragon firmly believed that Levi was the master of the Dragon Palace.

As a pure-blood dragon with a realm on par, it felt the scent of death under Levi's "Secret Word of Destruction".

Thus, it decisively stopped its attack; though it still had the strength to fight, it was meaningless, as it would lose regardless.

Levi's domineering strike caused much shock to its young spirit!

From Ronan's narrative perspective.

Its mother probably laid the egg in a small world dominated by flames and simply left, which was typical of the Dragon Clan.

Small worlds are relatively safe, rarely hosting level six experts. With the natural strength of dragon babies, it's invincible from the start.

However, unfortunately, this egg hadn't even fully hatched when it was taken along with the world into the eighth level of the Dark Ancient Tower.

If Levi hadn't encountered it, bound by the tower's rules, it might never have reached a Complete Body, remaining in an immature state despite facing limits on its lifespan, which is quite amusing to think about.

Subduing the Great Flame Sparrow Dragon was much smoother than Levi had imagined; the smarter the creature, the easier to manage, while those black beasts were stubbornly tenacious.

Ronan entered the Black Soul Demon Tower. The Frost Giant Eagle was resting inside, becoming wary upon seeing the suddenly appearing Great Flame Sparrow Dragon. .

"Don't worry, it's one of us."

Levi reassured.

Ronan proactively greeted.

"I am Ronan."

Frost Giant Eagle: "..."

Levi: "Don't use terms like 'I am', the Dragon Palace is a harmonious and loving organization, isn't 'I better?"

Ronan agreed.

"I... I understand."

Levi: "Where are your treasures?"

Ronan hesitated.

"Lord, I have no treasures... does this count?" As it spoke, it opened its mouth, spitting out piles of gold, gems, and splendid fire-element ores.

These ores are level six "Achilles Fire Ore", the highest tier level six materials.

Levi had taken many from Louise's ancient tomb before, perfect for Weapon Refinement and refining Wizard Towers. This pile alone starts at twenty billion Aether Stone in value.

Besides that, there wasn't much else of value; Ronan is a homebody dragon, collecting treasures casually around its nest.

Suddenly, Levi's eyes narrowed.

Parting the ores, he found something resembling a heart, radiating a scorching aura, adorned with glittering crimson runes and a whiff of sulfur.

After leaving the dragon's stomach, this heart seemingly came alive, emitting terrifying flames with silent fury erupting.

In the heavens and earth, anomalies emerged, a red-haired Fire God bearing the sky, performing a dance around the world with glaring wrath.

The "Illustrated Guide of Strange Items" notes this as the Sun Refining Artifact from the Fire God Series: "Fire God's Fury"!

Levi asked:

"Where did you find this?"

Ronan showed a look of reminiscence.

"Let me think... I seemed to have found it in my nest, if you need it, take it, Lord."

Levi smiled.

"Then I'll take it, this thing's beyond your use, in return, I'll reward you with some good items."

He gave Ronan plenty of "Dragon Scale Fruit" and "Immortal Platform Wine", using minimal cost to exchange for a Sun Refining Artifact desired even by a Grand Wizard, along with valuable Achilles Fire Ore.

Honestly, Levi felt like he was dreaming.

The final artifact from the Fire God Series, did he get it so easily?

Isn't this easier than hunting demons outside for War Merit?

The eighth level is truly a treasure trove!

What Levi needs, the "Elemental Proof" or the Thunder God Series Sun Refining Artifact, might all be found here.

For now, the Five Great Sky Pools are the top-level challenge on the eighth level.

Unless taken by previous adventurers or refined by natives, at least one Sun Refining Artifact from each sect must exist there.

And the ninth level above, maybe even legendary artifacts could be discovered?

At this thought, Levi's heart burned.

"Squeak squeak."

Jin lay on Levi's head, looking proud.

Levi petted Jin; this time the little mouse made a big contribution, deserving verbal praise.

He wandered again around Ronan's nest but didn't find other fire element oddities.

Based on his research, this might be due to the area's nurturing of the Sun Refining Artifact.

The Sun Refining Artifact is too powerful, monopolizing the fire elemental power of this region.

"Such a treasure trove, maybe it can nurture another Sun Refining Artifact after tens of thousands of years... Well, I'll leave it for someone fated then. I'm not the kind of person who grabs everything in sight!"

...

Black Swamp World.

Levi's figure appeared.

"Hey, you're back?"

Tifana couldn't hide her joy, feeling uneasy around the Blood Vortex Venerable's giant worm form. Many people get goosebumps just seeing ordinary leeches, let alone such wriggling giants.

Blood Vortex Venerable:

"Master, I've prepared everything here."

Chapter 2416: Sun Refining Artifact: Fire God's Fury! Eighth-Ring Senior!

As the Plane Sovereign, it has already lived for tens of thousands of years, but it still hasn't lived enough. It doesn't want to die from the great plane convergence.

Having heard Mana's plan, it found it feasible, especially with Martha's successful precedent.

With the prospects of the Dusk Palace Master, getting a Secondary Plane Sovereign position in advance isn't it better than just working for the Council of Ten Thousand Clans?

Levi said:

"I understand, but I need to return to the Wizard World first. Wait for me here for a few years."

Blood Vortex Venerable: "Alright."

Tifana looked expectant and rubbed her hands in excitement.

"Can I go too?"

She was cheerful and lively, somewhat naturally familiar with others.

Levi nodded, his large hand grabbing Tifana's slender waist, making Tifana blush, and the next instant they transformed into a streak of lightning, appearing in the Star Realm Ruins Sea.

The dreamlike scenery before them left Tifana astonished: stars rotated, Divine Kingdoms stood tall, and the tides of the Sea of Ruins were like nebulae, surging out streams of colorful light, with strange and beautiful creatures wandering within.

Indeed, the residence of the Gods is truly the most beautiful of the Multidimensional Plane.

"Is this the astral world?"

"You've been here before?"

"Yes, my mother sometimes travels here, and she has brought me to see it. She seems to pick some things, but I don't understand. You're amazing; you can travel to the astral world."

"How old is your mother?"

"Why are you asking this? Although my father has passed away, my mother still loves him and can't allow anyone else in her heart."

"Don't think too much. I was just curious since your mother is indeed an extraordinary woman."

"Indeed, she celebrated her 5,000th birthday last year."

"Reaching the age of 5,000 and paving the way to become the singular Ten-leaf Law God, your mother is truly amazing... By the way, how many Nine-leaf Mages does the Gray Eagle World have?"

"I don't know."

In the uninteresting Star Realm Ruins Sea, Levi and Tifana chatted casually.

He took the opportunity to probe information about the Gray Eagle World.

Eventually discovering that there, whether in terms of the cultivation system or political culture, it is quite similar to the wizard civilization.

Nora Calendar 819.

Blood Battle 608.

Levi returned to Nora, with Tifana looking at the increasingly approaching gigantic world, feeling speechless shock inside.

"It's so big... I came to Nora with my mother when I was little. At that time, it didn't seem this big. Is this the great plane convergence? I wonder if our Gray Eagle Plane will merge too."

Levi looked towards Nora, familiar yet strange.

Indeed, Nora seems to be growing faster, deepening the process of plane convergence.

"Where are you taking me?"

"The Deep Blue Sage has fallen, you should know the Black Abyss Sovereign, right?"

"The Black Abyss Sovereign? I've only heard of Black Abyss Walker Aaron. Has he become legendary as well?"

"Yes."

Tifana asked:

"How many legendaries does Nora have now?"

"14."

Upon hearing the number from Levi, Tifana's expression was complex, and she murmured:

"The speed at which the wizard civilization is strengthening is astounding. Is this the legacy left behind by Sauron?"

In reality.

In the Gray Eagle World, the reputation of the wizard civilization isn't very good.

Many ancient mages believe that the wizarding system was initially derived from Sauron's constant imitation and reference to various spellcaster civilizations.

In comparison, the Grayhawk Civilization, which emerged earlier than the wizard civilization, is considered the orthodox spellcaster.

Unfortunately, this latecomer is becoming stronger.

And has become the object of imitation by various spellcaster civilizations.

On the other hand, the Grayhawk Civilization is gradually fading into the Pan-Plane.

Two thousand years ago, Aurora met the legendary Wizard Deep Blue Sage during a plane travel, and they became friends.

At that time, Aurora, who was just 3,000 years old, was already the president of the Grey Eagle Council.

The strongest Nine-leaf Ancient Mage in history.

However, her alliance with Deep Blue was not understood by other Nine-leaves and even the common people in the council.

Thinking it compromised the dignity of the Grayhawk.

On the surface, people wouldn't say much because of Aurora's strength.

Behind the scenes, there were quite a few voices of blame.

Five hundred years ago, due to some historical grievances, the Grayhawk Civilization was targeted by a God of Star Realm.

He sent down angels to execute divine punishment, but was repelled by the Grayhawk Civilization.

The God personally descended with God's Incarnation onto the mortal world.

At a critical moment, Aurora displayed terrifying strength.

With her self-created "Ten-leaf Spell: Aurora's Star Extinguisher Storm," she repelled the God's Incarnation.

People then realized she had unknowingly advanced to level-10!

From then on, from the Nine-leaf Mages to the common masses, Aurora was finally acknowledged.

Thus, Tifana deeply understood the significance of level-10 to a civilization.

And now, the Wizard World already has 14, which is a world of difference.

...

Sauron Continent, Black Abyss City.

Black Abyss Sovereign looked at Tifana, then at Levi, deep in thought, and laughed:

"How did you two end up together?"

Levi briefly recounted the events, although he always felt that the Black Abyss Sovereign seemed to have known beforehand.

Tifana said:

"Long time no see, congratulations Aaron on advancing to legendary!"

Aaron laughed and said:

"No need for formality, you and Levi met in the Boundless Deep Space, which is fate. I will find a way to contact your mother before then; you can cultivate on the Ancient Dragon Continent."

Levi was taken aback.

"Aaron, Tifana is the daughter of the Archmage, of noble status. I fear I won't protect her well, impacting our relationship with the Gray Eagle World."

Chapter 2417: Sun Refining Artifact: Fire God's Fury! Eighth-Ring Senior!

Tifana said:

"No problem, senior. I haven't been to the Wizard World in a long time, and I want to take a walk around the new Nora. I won't bother... Sir Levi."

She felt a small sense of satisfaction.

At least she finally knew what that man's name was, he was being mysterious before and wouldn't tell her.

Black Abyss Sovereign said:

"Alright, but during the Blood Battle now, the order in Nora is not like before. It's best you don't leave Sorren Continent, with your seven-leaf cultivation, in the current stage of Nora, you might not be able to protect yourself."

Tifana whispered:

"Senior, the Abyss Sage, he..."

Black Abyss Sovereign said:

"Yes, he has fallen. Sauron said: Every person has their time, some are heavier than Mount Tai, some lighter than a feather. He is the former, you don't need to be overly sorrowful."

Tifana remembered the kind old white-haired man and felt his voice and smile still lingered.

Tifana said:

"I understand, thank you, senior. Thank you, Sir Levi, I won't forget your kindness... Senior, when you contact my mother, please tell her her daughter wants to request a pair of Concord Herons to gift to her benefactor."

Black Abyss Sovereign nodded slightly.

"I will."

He had Levi take Tifana to officially register her identity. Tifana said:

"Sir Levi, I'll go for a walk first. You go ahead, I won't disturb you."

Levi waved goodbye: "Stay safe, and contact me regarding anything."

Having a good relationship with the daughter of an Archmage is still very necessary, Levi understood the importance of backing.

He then arrived at the Black Abyss Mansion.

"Senior, during my travels outside, I ran into that group of Sea Clan that was previously brought out of Nora. They were being chased by the Council of Ten Thousand Clans. I took the liberty to bring them back. How should they be handled?"

Black Abyss Sovereign: "Take them to register with the Alien Affairs Management Department. The previous rebellious Sea Clan leaders have all died. These Sea Clans themselves are quite pitiful, without significant crimes. The Wanderer of the Vast Sea handling this matter knows what to do."

"Alright, I'll go."

"And regarding the Ancient Tomb race, you've handled things well. When necessary, be tough. The Grand Wizards are treasured assets, but not having one or two isn't the end of the world... Just go ahead boldly."

"I understand."

"And there's one more thing. This is the eighth-circle magic 'Calamity Coin', an advanced spell of 'Luck Changing Coin'. Take it back to study."

"Thank you, senior. Anything else?"

"Let me think... nope."

Leaving the Black Abyss Mansion.

Levi internally muttered.

"Legendary Wizards seem indifferent to such mundane matters, but in truth, they are all keenly aware. Many people with little self-awareness make small moves as they please, but how could these god-like powerful beings not sense them? Senior Black Abyss supports me in this age-old rivalry behind the Ancient Tomb race."

...

Alien Affairs Administration.

The Wanderer of the Vast Sea finished listening to Levi's narration.

He sighed slightly:

"If this group of Sea Clans hadn't fled, they might have used this chance to grow stronger. Even letting them produce a Level 9 Expert, it still wouldn't overturn things. Unfortunately, the Eight-Armed Demon Emperor considers himself the Sea Clan's savior, yet personally plunged the clan into an irredeemable situation. It's easy to imagine that the Council of Ten Thousand Clans wouldn't treat them kindly. Such an alliance of numerous races, each with its own ulterior motives, can never truly unite."

He was responsible for capturing the Sea Clan back then.

Unexpectedly, that matter stirred up a strategic game between both sides' Level 10 Strongmen.

Levi said:

"Senior, you are right... But now the Blood Battle is a time to unite all usable forces; personally, I think we should temporarily abandon racial prejudices and forge a common Big Nora community. All are beings of Nora, let all races feel a sense of belonging, only then can they genuinely fight for the Blood Battle."

The Wanderer of the Vast Sea said:

"You speak wisely, take these Sea Clans back, Hall Master, you handle it as you see fit."

Levi: "Thank you, senior."

Upon leaving, Levi met the Golden Walker, who smiled kindly with a friendly expression.

"Sir Levi, here for business?"

Levi smiled:

"Yes."

They feigned warmth for a brief interaction and left.

With Levi's current Nightmare Perception, he could detect the hostility the Golden Walker was deliberately hiding.

He couldn't do anything about him now, but if he continues with his antics, Levi won't bear responsibility for any repercussions.

Considering the big picture, the wizard civilization losing the Golden Walker might lead to fewer demons getting killed.

Nevertheless, it doesn't matter; Levi will find ways to make up for it himself.

...

God-forsaken Continent.

In the barracks, Lucy looked at the communication from Black Abyss Sovereign and smiled at the corner of her mouth.

She said:

"Deep Blue, connect me to Deep Blue No.5 of Greyhawk Civilization."

A blue sphere of light emerged.

[Connecting...]

Unknown how long it took.

Lucy opened her eyes, Deep Blue projected a graceful figure in front of her.

She wore a grey robe, with a Greyhawk emblem on her chest; the loose starry robe couldn't conceal her enchanting figure.

Judging by the background, it seemed she was watering flowers in a botanical garden.

High above, a flock of colorful Concord Herons soared, flying in pairs.

"Long time no see, my friend."

On the other side, the grey-robed woman raised her head, her gaze seemingly encompassing all stars and beings.

Lucy smiled: .

"Aurora, you're still here watering flowers. Didn't you notice Tifana isn't here?"

Aurora's expression slightly shifted.

"Oh, she really isn't here. That girl, where has she run off to?"

Lucy said: "Stop pretending."

Aurora laughed:

"Is Tifana in Nora?"

Lucy: "Do you want to keep her in Nora, or send someone to fetch her?"

Chapter 2418: Sun Refining Artifact Fire God's Fury! Eight-Ring Senior!

Aurora said:

"Let her stay there for now. In some time, I will personally go to Nora. Lord Edmund wants to discuss some matters with me face-to-face."

Lucy said:

"Alright, by the way, congratulations on stepping into the realm of the Archmage. Gray Eagle is splendid because of you."

Aurora:

"I also want to thank you for your help, my best friend, Sir Luther, thank you Sauron... Oh right, extend my thanks to Sir Levi; I'll bring a pair of Concord Heron when I visit.

I heard he is someone who loves collecting magical creatures, such a lover of life; he must be a kind-hearted person."

Lucy coughed softly.

"I guess so..."

...

Bounty Department.

Levi handed over all the evidence and witnesses related to the destruction of the Council of Ten Thousand Clans stronghold to the authorities.

These items are not worth much themselves; they are merely tokens.

The real treasures and resources have already been pocketed by Levi.

According to regulations, wizards traveling through planes can receive corresponding rewards for destroying strongholds of the Council of Ten Thousand Clans, if verified.

Levi demolished a stronghold of a Level 8 Venerable, dealing a significant blow to the Council of Ten Thousand Clans; this time's reward should be promising.

After the evaluation, Sanders smiled and said:

"According to the rules, destroying a Venerable-level stronghold allows for the reward of 2 Bright Moon Artifacts and 100 billion Aether Stone resources. Additionally, we will award you the [Nora Medal], which offers you a 10% discount when shopping at the congress's official store."

Levi thought, this reward is quite good, exceeding his expectations.

Leaving aside the artifact, a subsidy of a hundred billion resources is indeed a timely help for him.

Many resources can't be bought outside.

He asked, "Can I choose the artifact myself?"

Sanders hesitated for a moment and said:

"Generally, it's randomly selected from several artifacts... Hold on, let me check for you."

If it were someone else, Sanders would have refused, but since it's the Dusk Palace Master, he thought a little flexibility wasn't a problem.

"No problem, Sir Levi, you may choose for yourself; I'll take you to the treasury."

Levi was overjoyed. This is an excellent opportunity to gather the series artifacts.

He quickly skimmed through the list of artifacts and found that the Thunder God Series artifacts were ones he had already refined.

No Glorious Sun-Grade Thunder God artifacts were found; it seems the congress indeed doesn't have stock.

The first Bright Moon Artifact.

He directly chose [Fire God's Beard].

Sure enough, the Fire God Series artifact, unobtainable from the outside, still has stock in the treasury.

The authority doesn't release all the good stuff at once; it's a gradual release.

Understandably so, as the blood battle is long, and future talents need to be considered as well.

The second one.

He chose [Fire God's Eye].

It's equally an important component of the Fire God Series.

Choosing artifacts from the Burning Faction is the correct decision anyway.

This school is extremely competitive, ranking first among the Earth, Fire, Wind, and Water factions.

If the Holy Infant wants to exchange, they can't necessarily beat those who have long been renowned.

Levi himself plans to walk the road of [Elemental Proof] and additionally gather a [Thunder God Body].

Having refined [Flame Emperor's Sword] already, refining more Fire God artifacts would be the icing on the cake.

Taking this opportunity, allow the Holy Infant to advance to the eighth-circle as soon as possible.

As the leader of Fire Dragon Sky Work, Seven-Ring Cultivation isn't sufficient.

This way, it also allows the Holy Infant to initiate the refinement of eighth-circle wizard tools sooner, making more money.

billion Aether Stone resources.

Levi chose all minerals.

From level 6 to level 8, covering 24 varieties, incorporating major element factions, very comprehensive, piled up like a mountain.

These minerals were just mined back from the Heavenly World by the congress, all freshly raw ores, not yet refined.

"Goodbye, Levi."

Seeing Levi leave, Sanders internally sighed with relief.

If it weren't for the resources from the New World and Heavenly World during the six hundred years of blood battle.

The council treasury would indeed be in trouble.

...

Ancient Dragon Continent.

Elena embraced the returning Levi.

"Are things done?"

Levi hugged Elena's waist.

"Not yet, I'm temporarily back to handle some matters, then I have to set off again; I might be gone for decades. The Ancient Dragon Continent depends on you."

Elena could understand, she smiled and said:

"My wizard tower is almost ready for refinement, would you like to see how it looks?"

With a thought, a nearly perfect wizard tower grew against the wind, reaching the sky.

The tower walls are like coral reefs, colorful and bright in hue.

The surface is covered in vines, flowers, carrying a beauty that embraces nature.

The current wizard tower has a total of seven levels, of which the first six levels have been completed.

"Thanks to that Coral Tower, it saved me a lot of effort. Otherwise, finishing it would have required promotion to the eighth-circle; is it beautiful?"

"Indeed, it's lovely. If you release your Sky Water Stingray and Amber Dragon, your wizard tower will turn into an underwater world."

"Hahaha."

Levi asked, "By the way, how is your progress on the disperse and rebuild technique?"

Elena displayed her wizard form, which shone with 3 sixth-circle witch marks.

Levi laughed:

"Not bad, only after a decade or so, you've rebuilt 3 marks. I was too conservative; it seems you can restore all 12 marks in one cycle, keep it up."

Elena giggled, "Thanks for the praise, Hall Master; I'll strive hard."

Elena once felt that as the Water Element Child she was already quite powerful, as she raced ahead, becoming a stellar talent like the rising star.

Chapter 2419: Sun Refining Artifact: Fire God's Fury! Eighth-Ring Senior!

After acquiring the Water God Body, she realized that having wealth truly makes a difference.

It's an indescribable elevation and enhancement of her entire being.

Whether in meditation, cultivation techniques, or research, her efficiency was far superior to before.

The Sun Refining Artifact might be the essence or Truth Trace left by a level 9 existence comparable to demigods tens of thousands of years ago; it's anything but ordinary.

This is cultivating on the shoulders of giants.

After intimacy with Levi, Elena said:

"I'll continue with my tasks, as I've gained some insights into the path of the Energy Sect lately."

...

Outer Sea of the Ancient Dragon Continent.

In Levi's hand appears a model of a White Bone Castle, a level 7 civilization treasure:

Pure White City.

This was one of the treasures he seized at Luo Shan Venerable's stronghold, most suitable as a settlement for the Sea Clan.

He throws the castle out, and it grows with the wind, finally transforming into a giant city with a diameter of ten thousand meters, gently sinking to the seabed, landing with a boom.

Meanwhile, Levi murmurs to himself, setting up a Seven Ring Protection Array around.

With a wave of his hand, Bagh and his subjects from the Black Soul Demon Tower appear, promptly kneeling in gratitude:

"Thank you, master."

Levi looks at the Sea Clan:

"You shall thrive and multiply here; with the protection of the Ancient Dragon Continent, no one dares to disturb. You can join the coastal patrol, slay demons, and exchange for Ancient Dragon Points on the continent to acquire resource treasures.

As long as you find mutual affection, forming families with humans is also permissible. Remember, you are not my slaves; you are Nora citizens."

Upon hearing these words, Bagh is moved beyond measure.

"My master's great kindness is beyond repayment; only this head shall forever belong to the master."

The other Sea Clan also know that Levi saved them; though they don't favor wizards, they are aware of who to thank at this moment.

The most important thing is that Levi's words just hit home for them.

As ordinary Sea Clan people, they just want a stable life in the land of their ancestors.

"Bagh, go settle the clansmen, and come find me once you're done." .

At night.

Bagh arrives at the Emperor's Palace.

Levi asks, "How much do you know about the Monarch's Treasure?"

Bagh falls silent for a moment, then with a wave, no less than eight items of flowing light appear around.

Swords, spears, halberds, axes, battleaxes, hooks, and forks—everything is here.

"The Monarch's Treasure requires 12 tokens, I have 8 here, and 4 are scattered outside, likely in the Immersed Ancient Castle."

Levi waves his hand, and the Poseidon Trident he obtained during his apprentice wizard days and the Sea King Spear Elena had picked up earlier float in the void.

"These two as well, right?"

Seeing the trident, Bagh rejoices.

"Indeed, this trident is the token of my ancestor, the Sturgeon Emperor, which I lost."

He further says:

"Master, take all my tokens; if you can assemble them, you might find something in the Monarch's Treasure."

Bagh knows it's difficult to collect all the tokens relying on his own strength.

And even if acquired, opening the treasure is not guaranteed, not to mention the Sea God is distant.

Even becoming a true Sea God wouldn't allow standing in Wizard World.

The Sea Clan seeks stability not through this elusive treasure.

But through Levi, right in front of them!

Only he possesses the capability for the Sea Clan to live with dignity!

This pursuit is exactly what Bagh is after.

Levi gathers all the treasure tokens.

"You may go now, Bagh."

"Thank you, master."

Filled with anticipation and hope for a new future, Bagh returns to Pure White City, looking at his eagerly awaiting clansmen.

"Fellow clansmen, let's start anew... Also, erect a statue of Dusk Palace Master in the city for everyone to admire; he is our Sea Clan savior."

...

"Monarch's Treasure tokens indeed reach 10; where are the remaining two?"

Initially, Levi wasn't interested in this, but now close to completion, his thoughts stirred anew.

"Oh well, we'll let fate decide."

With his current status and position, anything within this treasure would be no more than a cherry on top.

He assembles all gains from this journey and counts them one by one.

Twenty Level 6 Treasures, four Level 7 Treasures, including the already used Pure White City.

Most treasures are standard from the Council of Ten Thousand Clans, with quality being average.

Not much use for Levi or those close to him, placed in the organization treasury.

Setting aside the two Bright Moon Artifacts from the council treasury, this trip yields 36 oddities.

Twenty from the Land of Darkness journey, with the remaining twelve from the ancient tower.

A portion collected by the Saint Council, others found by Levi.

However, although numerous oddities, most are below Morning Star-level.

Levi sorts out not much usable.

Winter Emperor's Beard, Red Dragon Scale, belonging to Winter Emperor and Red Dragon Series, both Morning Star-level.

Holy Infant refining can perfect the Elemental Holy Body.

Silver King Badge, Golden God's Silk.

The former is a Morning Star Artifact from Silver King Series; Link had refined it, being lower from Golden Emperor's sequence.

The latter is a Morning Star Artifact from Golden God Series, can be used by Lord Victor for practice.

Also a Morning Star Refining Body Artifact Yellow Dragon Dwelling in the Mountain, belonging to Earth Faction.

Can optimize Gandaph's Dragon Elephant Holy Body.

Other oddities are negligible.

Levi chooses some special ones to refine.

The rest are placed in the treasury for members to exchange and enhance.

He summons all Three Avatars.

During Levi's travels, Lord Victor had already achieved Seven Rings Perfect Realm, now moving towards the eighth circle.

Chapter 2420: Sun Refining Artifact: Fire God's Fury! Eighth-Ring Senior!

The Holy Infant and Gandaph still have a long way to go.

However, the Holy Infant will soon be able to refine the Sun Refining Artifact, and should, like Elena, achieve Perfection directly.

He instructed his Three Avatars to refine the artifact directly in the Ancient Banyan Fairyland to avoid unnecessary delays.

He arrived at the Small Stone Pond and opened the ten thousand blind boxes he collected from his journey to Hell.

This time, there were three Golden Legends: two types of Level 6 Battle Techniques and one Eight-Circle Magic.

The combat techniques were ordinary, but the Eight-Circle Magic brought Levi great joy.

"Summoning Hell Monarch, a helping hand in a time of need, saving me a massive amount of money."

The Witch's Family knowledge base did not contain such high-level spells from the School of Death.

Eight-Circle Magic is very expensive, and although Levi is not lacking money, he prefers not to buy them.

He just waited patiently to get it for free, and indeed, he waited for this moment.

Along the way, from Hell Lord, Hell King, to Hell Monarch, Levi has already learned this sequence of spells.

Undead Summoning spells reach their Maximum at the eighth-circle.

Beyond that is the Seventy-Two Pillars Level.

For such beings, ordinary summoning spells are ineffective; you need specific summoning techniques.

For instance, Summoning Lady White Bone.

The effectiveness of this spell requires an agreement with the Seventy-Two Pillars, similar to summoning Thunder God and Electric Mother, Four Sea Dragon Kings in the previous life.

If an agreement can't be reached, mastering it perfectly is of no use.

In fact, if you are strong enough, like a legendary wizard such as the Hand of Netherworld Prison,

there's no need for such specific summoning spells to command Lady White Bone.

The ten thousand blind boxes brought another substantial profit.

Levi was in a good mood.

"The Calamity Coin given by Senior Black Abyss can also be learned."

This sequence of spells is also very interesting.

Six-ring Destiny Coin allows simple foreknowledge of fortune and misfortune;

Seven-ring Luck Changing Coin, can reverse danger into safety if used well.

And the Calamity Coin has two primary uses.

One, in facing peril, detects the possibility of overcoming it;

Two, transfers one's misfortune to others.

Therefore, it can also be considered a type of curse spell.

This series of spells can be used even at higher realms, and won't be eliminated.

The Calamity Coin is effective on those above the spell caster's realm but the effect will be weakened.

Levi recalled the words of Senior Black Abyss.

The intention of giving him this spell must have deep meaning.

"If I master this spell and also add the Fool Rune, perhaps I can quietly transfer any possible misfortune to that old Golden Walker.

Even if the curse doesn't kill him, it will make sure he doesn't have a smooth path... But then again, am I really someone with bad luck?"

Levi began to doubt himself.

It seems he has had exceptionally good fortune along his path.

As for misfortune... he really hasn't encountered any.

"Fortune and misfortune coexist, this spell definitely holds more complexity than it appears, training it is the correct choice, at worst it leaves a Witch Mark." RANQBÈŠ

He rose and came to the ancient banyan tree Mansion, burying a new pound of Dead Soil beneath the tombstone.

A full three pounds of Dead Soil caused visibly noticeable changes throughout the Ghostly Mansion area.

Within a hundred miles, the aura of Death rolled continuously, and skeletons and spectres emerged like bamboo shoots after a rain, then wandered around in confusion.

"The rate of Undead birth has accelerated."

Levi finally understood why Hell sends the Undead Army to the Wizard World.

These creatures were indeed numerous.

The early-born Undead in the ancient banyan tree Mansion were numerous and already held the power equivalent to Low-level wizards, proving useful.

Levi gathered them within the Black Soul Demon Tower to maintain the operation of the steeple.

"There's no need to go to Hell anymore, harvesting in the ancient banyan tree Mansion is sufficient. If luck allows, birthing a Golden Legend card like the Snowflake Warrior or swordsman Gerri would be delightful."

Within the Ancient Banyan Fairyland.

Levi planted the precious herbs and plants he collected during this time as an old farmer would.

He enjoyed the process, seizing the opportunity to rest and relax.

Finally, he arrived at the Dragon Palace.

"Let's welcome a new member, Skyfire Dragon General Ronan, a pure-blooded Dragon Clan!"

As the words dropped,

Ronan made his dazzling entrance.

Red flames filled the sky, anomalies appeared one after another, the mighty Dragon's Might dispersed the Dense Qi, demonstrating its might.

"The true form... oh no, I am Ronan, the Great Flame Sparrow Dragon!"

Mana was shocked.

"Another pure-blooded Dragon Clan?"

During Levi's journey, it was as if he disturbed a Dragon nest, with new members arriving continuously.

Elena smiled:

"Apart from Alexandra's father, all pure-blooded Dragons I've seen in my life are within the Dragon Palace."

Triss was already numb.

"Good, good, the commotion is pleasant."

What else can be said?

Dragon Palace, awesome!

Dragon Palace people were delighted.

"Wonderful, another pure-blooded Dragon Clan has arrived, our Dragon Palace is becoming increasingly powerful."

"Indeed, we are taking off right here!"

Within the fairyland, the Dragons rejoiced.

Ronan was soon dragged to the Nightmare World.

Having been confined within the ancient tower for eight thousand years, he was eager to start his adventure.

Of course, the necessary blood extraction was unavoidable beforehand.

Black Dragon Territory.

The Dreamland Steeple members looked at the Great Flame Sparrow Dragon soaring to the sky like a bird freed from its cage, in amazement.

"The world thinks the Ancient Dragon Continent is the foundation of the Dusk Palace Master, but they don't know his true foundation is in this Nightmare World!"

...

As years passed.

Levi did not rush to the Black Swamp World but instead chose to first absorb the gains from this time.

With the help of Soul Stone, his spiritual force has steadily and rapidly increased.

During this time, the Three Avatars successively refined their respective oddities.

Gandaph's Dragon Elephant Holy Body made progress, giving birth to a new special spiritual creature, Yellow Dragon.

This brought the total to three spiritual creatures: Blue Dragon, Yellow Dragon, White Elephant.

Lord Victor's Golden God Body took another step forward and also possessed the Golden God Projection.

Levi basically confirmed that Divine-level Sequential Artifacts will surely birth projections, but it is not certain in which component they appear.

The current examples, he, Elena, and Lord Victor, are all like this.

However, Lord Victor has yet to give birth to a special spiritual creature.

The Three Avatars, only the Holy Infant is still in seclusion, after all, it has to refine the Sun Refining Artifact.

Seven years later.

In the year 826 of the Nora Calendar, the 615th year of Blood Battle.

Only five years remained until the centennial Blood Battle Auction.

Lord Victor and Gandaph both went to their respective organizations to busy themselves, striving to earn more money.

This day, Levi opened his eyes, his momentum even stronger than before.

His spiritual force broke through the 18,000-point barrier naturally.

Formally stepping into the Eighth Ring Senior Realm.
