

Wizard 2421

Chapter 2421: Mythical Star Butterfly Dragon! Dragon of Salvation!

Nightmare World.

The Blood Slaughter Bat Dragon looked hopelessly at the approaching Red Flame Giant Sword.

It roared, exerting all its strength to resist.

Boom!

Accompanied by an earth-shattering collision.

The Blood Slaughter Bat Dragon's form shattered, turning into nothingness, and returned to the city.

On the training ground, Levi was testing the power of his newly promoted spells.

After advancing to an Eight-Ring Senior, the power of his innate spells significantly enhanced.

Especially the Fire Dragon Tribulation, after ten rounds of battle with the Blood Slaughter Bat Dragon, it was instantly killed ten times.

It almost broke the young guy's mindset.

After resurrecting, the Blood Slaughter Bat Dragon landed on the ground, quickly fawning.

"Congratulations, Lord Dragon King, on your further advancement in strength!"

The other Dragons showed expressions of admiration.

"Even the Heavenly Slaughter Dragon General is no match for the Dragon King."

"Lord Dragon King, you're becoming more and more unfathomable."

"Terrifying indeed!"

Levi was in a good mood.

Another innate spell that had changed significantly was [Ten Thousand Dragons Birth].

Levi could summon four Level 8 Early Stage spiritual weapons for combat with a single thought.

This promotion made the distance to the Ninth-Circle Wizard realm seem much closer.

Over the years in seclusion, there has also been a breakthrough on the path of knights.

With the help of the Great Flame Sparrow Dragon's bloodline essence, the cultivation of Levi's Crimson Emperor Dragon was like having divine assistance.

Last year, he successfully advanced to the Level 8 Middle Stage.

The diameter of the Red Emperor Domain reached an astounding 150 kilometers.

With a wave of his hand, billions of Dragon Flames burned the heavens and boiled the sea — spectacularly.

In comparison, the cultivation speed of the Golden Brilliance Dragon Breath Technique was somewhat slower.

But with hard work, a breakthrough will be achieved soon.

[Hanging Rune] advanced to level 5, with elemental damage resistance reaching 40%.

Closing the proficiency panel, Levi patrolled around the Black Dragon Territory.

With the Dreamland Steeple settling in, the expansion speed of the Black Dragon Territory significantly increased.

This group of wizards has a deep understanding of the Nightmare World, making cooperation very smooth.

An endless supply of resources was being sent to the Yellow Earth Continent.

And as a landowner, Levi could take a third of it.

With Black Abyss Sovereign and Daydreamer, two legendary wizards,

as long as not being too flamboyant, the safety of the Black Dragon Territory was ensured.

Tyrant of Horror, the former overlord, was also slowly recovering strength.

The previous battle with the Blood Rain Overlord had damaged its foundation.

However, with Dragon Scale Fruit and Immortal Flowing Liquid, plus the medicine Levi specifically prepared for those Dragons to replenish losses,

it was hoped to return to Legendary level within a millennium.

From the distant sky came a long howl, it was Lopez carrying a bizarre giant beast corpse striding over.

On his shoulder sat the Thousand Illusion Knight with a smile, presenting a beauty and the beast scene.

Boom! The giant beast corpse fell to the ground, revealing a thousand-meter-long black giant porpoise.

Levi had heard the Thousand Illusion Knight and Lopez went out hunting, preparing for the evolution of the Breathing Technique.

The giant porpoise before him shimmered with a dreamy sheen on its surface.

Though dead, various strange illusions emerged all around.

It reminded him of a legendary creature.

[Dream-eating Rhinoceros].

Of course, this was probably just a creature containing the bloodline of a Dream-eating Rhinoceros.

Levi smiled and said, "Looks like the Thousand Illusion Knight had a good harvest."

The great ape's palm landed on the ground, the Thousand Illusion Knight gracefully walked over, looking charming.

Lopez, this big guy, was quite gentle and gentlemanly to the opposite sex.

The Saint Ape Knight, who sparred with him the most, never enjoyed such preferential treatment.

The Thousand Illusion Knight said with a smile:

"Thanks to Lopez, otherwise I really couldn't take down this big guy."

Levi asked, "Have you gathered all the bloodline crystals now?"

Thousand Illusion Knight: "I was short one kind, but not long ago the [Phantom Wind Walker] gave me a crystal containing the [Ghost Nightmare Weasel] bloodline, and it's finally complete."

Levi's brows moved slightly, he asked: "Phantom Wind Walker? What was the price?"

Thousand Illusion Knight: "The Dreamland Steeple was exploring a relic in the Chaotic Wilderness and needed to use my ability, that was the fee."

Levi said, "I understand."

Thousand Illusion Knight said, "Commander, I'm now planning to use [phantom beast] as the foundation to fuse [Ghost Nightmare Weasel], [Dream-eating Rhinoceros], and [Nine-eyed Fox] to create a mythical creature. Is there any problem with this combination?"

Levi said, "There's no problem, it mainly depends on the style you want to pursue in the future, [phantom beast] and [Nine-eyed Fox] are both fox types, I estimate the new mythical creature will be more like a fox, which is also good, otherwise, it might become nondescript."

The corners of the Thousand Illusion Knight's mouth lifted, "Then I can rest assured."

Levi asked, "If your evolution succeeds this time, you could also consider starting a family and settling down."

Dragon King Li began the matchmaking mode, married folks are like this.

The Thousand Illusion Knight was silent, seemingly having some concerns.

"Commander, if I fail in advancement, can you turn me into a Heroic Spirit?"

Levi said, "Yes... but you must believe in yourself, the Blood Knight is your role model."

The Thousand Illusion Knight had also achieved the so-called "legendary knight" status during the Doomsday Era.

Levi believed in her potential, she had reached the last step, regardless, must maintain confidence in herself.

The Thousand Illusion Knight smiled sweetly, "Thank you, commander, I understand. I'm still some distance from Level 6 Peak, no rush."

Levi encouraged, "Reforge the divine weapon, properly hone the combat technique, try to elevate your strength in every possible way to the extreme, then just do your best and leave the rest to fate!"

"I'll log off now, Commander."

The Thousand Illusion Knight was greatly encouraged, she didn't expect the commander to have such faith in her.

Chapter 2422: Mythical Star Butterfly Dragon! Dragon of Salvation!

Wizard: Starting With the Knights Breathing Method

Looking at the disappearance of the Thousand Illusions Knight, Levi felt a bit helpless.

As of now, among the 18 Twilight Cavalry, those who have successfully ascended to the Mythical level are all male knights.

Among the older generation of knights, Goddess Knight Elsa has limited potential, and Divine Light Knight Denise, seeking stability, has also abandoned the mythical path.

Out of the eighteen riders, there are only four female knights, and aside from the Flower Knight, the Thousand Illusions Knight is the village's last hope.

...

Four years later.

Nora 830 years.

Blood Battle 619 years.

Ancient Dragon Continent.

Dusk Holy Temple.

Rumble! High above the heavens, an ominous purple lightning fell, engulfing the figure of a knight clad in gray armor.

The knight's veins bulged, and the broad Ash Greatsword slashed out, with Sword Qi shooting toward the heavens.

The Dharma Idol of a giant dragon, exuding a decaying aura, experienced Resurrection, spread its wings, and sheltered the Ash Knight below. .

After taking a brief rest, the Ash Knight's body healed.

He used his self-created "Immortal Scripture of Withering and Flourishing," clashed with the lightning calamity once again with his flesh and blood.

This lightning calamity is his Dark Tribulation, emerging from the void, continuous and relentless.

Even though he possesses a physique-type Breathing Technique, he has been on the brink of life and death several times.

Fortunately, he also has a Level 7 Treasure for protection, allowing him to turn danger into safety.

From afar, Levi watched silently.

"The Fire Dragon Knight's 'Fire Dragon Brilliance Extreme Book,' the Blood Knight's 'Qilin Strategy,' the Ash Knight's 'Immortal Scripture of Withering and Flourishing'... they've all developed unique combat skill systems of their own, truly impressive."

As members of the 18 Twilight Cavalry, none of them would be satisfied with following others' paths.

In the Art of War, these knights have formed their own distinct paths.

This is also what Levi advocates; he provided his "Extreme Dao Strategy" for the knights to study, after all.

Three years ago, the Ash Knight completed all the preparations for ascension at the holy temple branch on Nora Continent, and Levi had him come to the Ancient Dragon Continent for seclusion.

Today, facing tribulation, the Ash Knight successfully overcame the Blood Tribulation, surprisingly without danger.

However, this final Dark Tribulation turned out to be unexpectedly difficult.

Even Levi hadn't experienced this void lightning tribulation before, and he didn't know how long it would last.

Boom!

"The thirteenth lightning... is it not over yet?"

Elena's face showed some reluctance.

The Ash Knight was in a miserable state now; there was no intact flesh left on his entire body.

Ash, flames, blood, and thick smoke intertwined.

"It's alright, he can do it."

Levi recalled the first time he met the Ash Knight.

Back then, he was just a grand knight, yet he caused great trouble for a noble Primary Blood Clan member.

The songs of humanity are the songs of courage.

The Ash Knight chose the path of Evolution, having prepared for the possibility of death.

The eighteenth thunderbolt fell with a rumble, leaving only a mass of writhing, charred flesh at the original location.

Even the Level 7 Treasure used for tribulation showed numerous cracks.

Many knights dared not continue watching, while the Thousand Illusions Knight watched silently.

The atmosphere was immensely heavy, oppressing everyone.

"The lightning has stopped... it's stopped. Commander, has the Ash Knight's calamity ended?"

The Black Knight looked at the Ash Knight, wanting to go up and help.

Levi said, "Whether it's over, only the Ash Knight knows. Don't act rashly; he's not easy to kill."

The Ash Knight's ascension.

Is based on the Ash Dragon.

Enhanced with bloodline factors from three Legendary Creatures: Ancient God Worm, Star Ring-tailed Snake, and Holy Heart Butterfly.

The Ancient God Worm is a legendary giant worm with an Undying Body.

It possesses a super strong adaptability and physique, surviving in any extreme environment, also known as the "Undying Worm."

The Star Ring-tailed Snake is a giant serpent that devours planes; no matter how severe the injuries, it can heal by devouring the plane.

The last, the Holy Heart Butterfly, is a giant butterfly that roams the astral world.

Its scale powder can heal all things, and its light can warm the soul.

Such a magnificent lineup, a new Breathing Technique, is undoubtedly extraordinary.

As long as the Ash Knight successfully overcomes this, a bright road lies ahead.

Actually, the Ash Knight had another option, which was to fuse with the Undying Bird like Levi.

In doing so, Levi, as the pioneer, has already overcome the Dark Tribulation, so he doesn't need to go through it again.

Perhaps, it's because he doesn't want to be like the commander, preferring to create something of his own.

The stubborn Ash Knight still chose the tougher path.

This spirit is something Levi quite approves of.

As a member of the eighteen riders, one indeed needs to have their own style.

Unknown when the mass of flesh had solidified, transforming into a scarlet cocoon.

The life force began to disappear, causing everyone to worry.

Levi said, "Don't panic; the Ash Knight has succeeded. The Ash Dragon is inherently a creature that is born from death."

Everyone finally breathed a sigh of relief.

The commander said it's fine, so it must be stable.

Sure enough, shortly thereafter.

"Thump, thump!"

The sound of a heartbeat resounded.

The scarlet cocoon began to revive with life force.

Crack, the cocoon split open.

Resplendent light surged out, shooting straight into the sky.

Countless iridescent particles burst forth, like the eruption of stardust.

These particles clustered together, vaguely revealing the shape of an indescribable giant beast.

It possessed a noticeably Ash Dragon-like head, with a serpentine and elongated body.

At its tail, a serpent's tail coiled around, resembling a star clock.

A layer of colorful ash floated around its body, slowly rotating, much like the rings surrounding Jupiter.

Its body was covered with a shell similar to that of an insect, with two pairs of wings resembling butterfly wings on both sides.

Chapter 2423: Mythical Star Butterfly Dragon! Dragon of Salvation!

The butterfly tail fluttered in the wind, scattering colorful scales endlessly.

Levi took a breath of the scales and immediately felt his body and mind refreshed, with a powerful life force surging within him.

It's a pity he wasn't injured; otherwise, this force would have healed him instantly.

The giant beast before him, resembling both dragon and butterfly, was the most awe-inspiring Levi had ever seen in appearance.

Looking at it, Levi seemed to gaze upon an entire starry sky.

"It has a strangely beautiful allure, as if the sacred unity of light and darkness." Elena commented.

Emperor Mu: "Incredible!"

This was Emperor Mu's most sincere feeling.

They witnessed the Ash Knight almost fall, only to be reborn in such a breathtaking manner!

The Blood Knight beamed with joy, while the Black Knight felt even more excited than the Ash Knight.
"Commander, that was so awesome!" The Ashen Apostle Group members cheered wildly, shouting.

The Starlight Giant Beast transformed into the Ash Knight.

He snapped his fingers, and the Divine Weapon Ash Greatsword that had shattered in the calamity assembled together.

With the infusion of new breathing technique power, the Ash Greatsword became the Starlight Greatsword.

Levi genuinely praised: "Remarkable, you've created an unimaginable mythical path."

The Ash Knight replied: "Thank you, Commander, and everyone. You were worried, I almost didn't make it."

Thinking about it, he also felt fear.

Elena asked: "What's the name of this new breathing technique?"

The Ash Knight replied: "Star Butterfly Dragon."

The Blood Knight said: "Nice, I think it fits well."

Emperor Mu: "I think so too."

The Ash Knight introduced the abilities of the Star Butterfly Dragon Breathing Technique to everyone.

Levi compared it with his Death Ember Dragon.

Death Ember Dragon has the [Undying Body], while Star Butterfly Dragon has the [Star Divine Body].

Their abilities are similar, and Undying Body is slightly superior.

Star Butterfly Dragon doesn't possess [Nirvana], but has [Feather Transformation], with similar effects.

After the Ash Knight's death, he can undergo feathered reincarnation, breaking the cocoon to be reborn.

But at the current stage, there's only one chance.

Levi speculated, as the Ash Knight's realm improves, the number of opportunities should increase, but likely won't surpass Death Ember Dragon.

The biggest difference in abilities between the two should be healing.

Star Butterfly Dragon possesses a wide-ranging healing ability, while Levi mainly has strong self-healing power.

According to the Ash Knight.

If one could cultivate to the legendary, mythical realm.

With a single thought, they could heal the life of an entire plane.

And that's not the most astonishing part, the most remarkable aspect is, he could even heal... the world!

For instance, when Levi previously fought the Amethyst Race, causing a small world to verge on destruction.

If the Ash Knight were present, he might have been able to restore it. .

"It's amazing, the [Star Ring-tailed Snake], meant to devour planes as a giant beast, has now become the savior of the plane after this fusion and evolution, unbelievable." The Thousand Illusion Knight praised.

Blood Knight: "This is the [Dragon of Salvation]."

Emperor Mu patted the Ash Knight's shoulder: "Good brother, the task of saving the world is yours."

Everyone chuckled in amusement.

At night, such a great matchmaking opportunity and excuse, Levi wouldn't miss.

He immediately assembled the girls from the Witch's Family, Tower of Dawn, and Valkyrie Temple.

Eager to "marry off" this damn Ash Knight.

Such an awesome [Star Butterfly Dragon] bloodline, who knows whose advantage it will be in the future.

Returning from a mission, the Fire Dragon Knight and Louise came together, patting the Ash Knight's shoulder, laughing:

"Star Butterfly Dragon, sounds strong, Ash Knight, let's spar in the Nightmare World someday."

Born to fight, he even dared challenge Levi... though never won!

The Ash Knight agreed, Star Butterfly Dragon vs. Sun Chasing Dragon, he looked forward to it as well.

Soon, the Blood Knight with [Jade Qilin] bloodline also rushed from his busy schedule to attend.

Until now, the Blood Knight still hadn't resolved his life's major issue.

But according to the gossip from Triss and Elena, Blood Knight seemed to be getting close with the Wind Witch.

One is the Vice Hall Master of Dusk Holy Temple, the other is the Deputy Tower Master of Witch's Family.

Levi thought they matched well.

As for the cultivation gap, it didn't matter.

Blood Knight possesses mythical bloodline; in terms of future potential, surpasses the Eight-Ring Senior Wind Witch.

Of course, the Wind Witch is no slouch; in her younger days, she was also a top-level genius of that era.

Many leaders from Hurricane Steeple or Storm School of Thought pursued her.

At the banquet, the Snow Lotus Witch slightly raised her gaze, secretly peeking at the Ash Knight over there.

Levi, like an old matchmaker, under Elena's counsel, keenly observed the scene's dynamics.

"Do you think the Snow Lotus Witch is interested in the Ash Knight?"

"You noticed too? You've become sharp lately, my Hall Master."

"No jokes, I think you or Triss might matchmake them."

"Leave it to me, I love such things."

Levi plotted inwardly.

Among the 18 Twilight Cavalry, not counting Hundred Flowers.

Divine Light and Golden Lion, Emperor Mu and Goddess, Dark Moon and Witch Calona, Fire Dragon and Louise.

He had successfully settled affairs for seven people.

If Ash Knight and Snow Lotus Witch, Blood Knight and Wind Witch succeed.

That would be 9, more than half resolved.

These excellent bloodlines must be passed on!

Strong alliances greatly increase the chance of producing top-level talent.

Chapter 2424: Mythical Star Butterfly Dragon! Dragon of Salvation!

This is the foundation that wizard families and organizations maintain their dominance over nomadic wizards.

"And there's the Thousand Illusion Knight, the Heart Moon Spirit Witch, the future Windwalker... With so many excellent ladies, these guys are still single, it's really inappropriate." Levi shook his head inwardly.

Elena raised a glass and went to celebrate with everyone, beginning to play the role of a matchmaker.

Levi looked at everyone, feeling an indescribable sense of satisfaction.

He once thought that true strength meant growing stronger in solitude, that it was lonely at the top.

Now he realized he was wrong.

In the high heavens, with stars shining brilliantly, Levi's eyes gazed intently.

"If Sauron were still alive, would he be watching this lively world in solitude?"

The banquet ended, and everyone dispersed.

The 18 Twilight Cavalry produced four seventh-level knights, three of mythical level.

Among the older generation of knights, all had reached the level 6 peak realm.

Among them, the Black Knight was the oldest, and he was ready with bloodline crystals and advancement materials; his cultivation was also at Maximum.

Seeing the success of the Ash Knight, he was determined.

After his self-created combat technique "Black Sky Secret Scripture" reaches its peak, he will go into seclusion.

Whether it succeeds or not, it all depends on this effort.

The Golden Lion Knight is waiting for the right opportunity.

He has collected most of his advancement materials and also wants to walk the path of evolution.

In his path of the wizard, after more than twelve hundred years of cultivation, he has achieved nine talents and Fifth-Circle Perfection.

Although he only has dual-elemental powers, his knightly cultivation and status are high.

So along the way, he spent lavishly on Earth, sky, and even Morning Star artifacts.

Before the sixth-circle wizard cultivation, there were no obstacles.

He practiced leisurely, and now is about to advance to the primordial soul.

So he plans to evolve into a Mythical level after achieving the primordial soul.

Having one more sixth-level method increases the success rate; why not?

Emperor Mu now has both Energy Sect and knight at level 6, with the knight also at level 6 peak.

As for being a wizard, due to poor talent and low cost-effectiveness in investment, he gave up.

Children of Chaos, only Levi, this overpowered guy, or some reincarnated legendary wizards could manage it.

Overall, he follows the dual extraordinary path, like the Steel Dragon Knight, reducing the difficulty and risk of evolution significantly.

The Goddess Knight is currently at level 6 Mid Stage in cultivation, striving to move to the Late Stage.

Though she fell behind, she's not too upset, as she's come to terms with it.

Especially now with Eddy, an excellent descendant.

Watching the youngster about to advance to a primordial soul, she's overjoyed.

Moreover, Elsa's wizard cultivation isn't bad either, achieving nine talents and Fifth-Circle Perfection, with hopes of a primordial soul in the future.

The Middle Generation Knights and the new generation knights are currently mainstream at level 6 Late Stage, or Mid Stage cultivation, still far from level 7.

It is now the 1223rd year since the Knights were founded.

The new millennium will be a crucial era of metamorphosis for the Eighteen Riders in blood and fire.

Grasping opportunities is very important.

...

A year later.

Nora Calendar Year 831.

The once-in-a-century Blood Battle Auction is almost here again.

Ancient Banyan Fairyland.

The ghostly mansion where the dead wander.

Swordsman Gerri and the Snowflake Knight are training those new recruits from the Undead.

Mana is sitting on the head of an Immortal Banyan Dragon, watching the parade.

With three pounds of Rest Soil down, the range of the ancient banyan tree Mansion has expanded to a thousand-mile radius.

Various medicinal herbs from the School of Death planted have taken root and sprouted.

The ghostly Soul Date Tree and the Netherworld Soul Date Tree bear abundant fruit.

It's truly a small but fully equipped human underworld.

In the Fairyland Sea Area, Ah Kun has transformed into a vast illusory Giant Whale ten thousand meters long.

It tirelessly remodels the Ocean, making it more suitable for sea beasts to live.

Leviathan and Gustav, those elders, already have many descendants, with small whales and alligators everywhere.

In the sky, various mixed-blood Winged Dragon species streaked through the sky.

Wind, Thunder, Shadow, Flame, Frost... all are present.

On the plains, various mixed-blood Dragon Clan and other giant beasts gallop.

All this made Levi dream back to the era of dinosaurs in his previous life.

Suddenly, a sea vortex hundreds of miles in diameter appeared in the Ocean.

As torrents of water soared sky-high, Lopez leaped into the Cloud Summit, exuding a level 8 momentum.

A giant ape five thousand meters tall, like a mountain floating in the air. .

"Lopez has grown again, with the Dragon Palace gaining another level 8 General."

After reaching level 8, Lopez quickly went online in the Nightmare World to spar with the Red King.

Previously, it was no match for the Red King, but this time it wanted to reclaim its dignity.

Unexpectedly, their fight lasted for more than half a day, and the Red King narrowly won.

A month later.

The Holy Infant opened its eyes, fire flickering, with a stern Fire God's phantom emerging behind.

Its beard, like flames, wild and unruly.

Wearing a beast skin skirt at the waist, and holding a world-destroying flame sword in hand, with intense heat spreading.

"Fire God projection..."

The Holy Infant murmured to itself.

It placed its hand on a Klein Crystal Ball.

[Spiritual Force: 11300/12300]

...

In the past decade or so, it has successively refined 5 artifacts.

[Fire God's Fury], [Fire God's Beard], [Fire God's Eye], [Red Dragon Scale], [Winter Emperor's Beard].

Among them, the first two directly increased spiritual force by 1180 points.

The latter three collectively increased the spiritual force limit by 270 points.

This enabled him to achieve Seven Rings Perfect Realm, with only 1000 points left to Maximum.

Increasing too much spiritual force at once made his spiritual force noticeably unstable.

Next, he needs to stabilize well, solidify his foundation, and diligently cultivate to the Eight Environments realm.

The three major Fire God Sequence Artifacts allowed him to produce [Fire God Body].

Chapter 2425: Mythical Star Butterfly Dragon! Dragon of Salvation!

The current [Ice and Fire Holy Body] is no longer enough to describe his talent.

He felt that renaming it to [Ice and Fire Divine Body (Incomplete)] would be more appropriate.

Because the oddity from the [Frost God Series], the Holy Infant, has not yet been refined.

"Could this be the legendary [Half-step Divine Body]?"

The Holy Infant couldn't help but jest.

With his self-created "Ace Balance Law", now that fire is stronger than ice, the balance between ice and fire is not disrupted.

Additionally, the Holy Infant's talent in the Fire Dragon Tribulation has also changed.

With a single point, two Flame Divine Dragons emerged, pulling a divine chariot across the sky.

On the chariot was a Fire God incredibly similar to the projection of a Fire God.

It commanded the fire dragons and traversed the skies in red flames.

Where it passed, flames raged, and for miles around, it turned into a sea of fire.

"It's very much like the Zhu Rong Fire God of my past life."

After refining the Fire God's Fury, the Holy Infant's Fire Dragon Tribulation took a different path of enhancement from his original form.

The original form's [Flame Emperor's Sword] version of the Fire Dragon Tribulation relied on single-target power, extremely lethal, suited for duels.

While his [Fire God's Fury] version covered a vast area, making it suitable for group battles.

Now, with just a Seven Rings Perfect Cultivation, he can impact miles around.

Once he ascends to Eight Ring Perfection, he might transform a thousand miles into a sea of fire.

The same fire element oddity, yet vastly different in style.

Perceiving the Holy Infant's breakthrough, Levi's figure appeared.

"Try out your fire elemental holy body's ability."

In a thought, the Holy Infant's form transformed into countless fire element particles, merging into the void.

At that moment, he seemed indistinguishable from the fire elemental power of the world.

"As expected, the divine-level sequence's daytime oddity can indeed give rise to abilities similar to an elemental holy body."

The fire elements gathered, and the Holy Infant reformed.

The Hundred Flowers named their form [Water Element Undying Body].

The Holy Infant could name his [Fire Element Burning Sky Body].

Both are low-end versions of the elemental holy body, but before the ninth-circle, they are more than sufficient for survival.

"If I refine the Thunder God Series daytime oddity, I can gain similar abilities. However, with my Immortal Body and grasp of [Immortal Secret Word], such abilities are merely icing on the cake. For true survival, the breathing technique is more formidable."

Of course, the capabilities of these two holy bodies aren't limited to survival; they have other wonderful applications that require the Holy Infant to gradually discover and research.

The Holy Infant also showcased his special spiritual creature.

In his mind, an illusory volcano emerged, towering ten thousand meters, emitting thick smoke.

Buzz buzz buzz!

Countless magma and flames spewed out, always on the verge of eruption.

This is the Fire God Spiritual Item, quite rare, unexpectedly taking the form of a mountain.

The Holy Infant's [Divine's Projection] sat cross-legged atop the volcano, exuding a sense of the integration of Heaven and man.

Levi said, "This spirit item shall be called Zhu Rong Divine Mountain."

This life's Fire God Series oddity has a certain artistry akin to the Zhu Rong Fire God of a past life.

Additionally, the Holy Infant has developed Divine Perception, able to sense stray fire elements within a thousand miles.

Thus controlling everything within that range, Levi referred to it as [Fire Heart Eye].

Presently, Levi has summarized the four main principles of divine-level sequence oddities.

Firstly, an oddity will inevitably be born with one and only one special spiritual creature.

Secondly, an oddity will inevitably develop a Divine's Projection.

Moreover, the Divine's Projection often has intricate connections with its special spiritual creature.

Thirdly, a daytime oddity will give birth to a quasi-elemental holy body.

Fourthly, after refining some components, Divine Perception will also emerge.

The above four abilities distinguish divine-level sequence oddities from other oddities.

Judging by their expressiveness, they indeed resemble divine methods.

As for the final [Red Dragon Scale], this Morning Star Artifact is quite standard.

It mainly promotes the evolution of the Ice and Fire Divine Body and has not developed a special spiritual creature.

Levi said, "Next, return to Gondor City and stabilize your realm. With your current qualifications, dispersing and rebuilding your technique, branding 22 Sixth Ring Witch Marks is no problem. Ascend to eighth-circle quickly, expand the Fire Dragon Sky Work, and strive to become the Wizard World's number one Weapon Refinement organization!"

The Holy Infant replied, "I understand." .

He no longer needs to worry about the Fire God Series.

Next, he will focus entirely on accumulating war merits.

Acquiring another Frost God Daytime Oddity would complete the [Ice and Fire Divine Body]!

Such a talent could crush the Children of the Elements, leaving top talents far behind.

Before becoming legendary, he should face no significant obstacles.

Of course, he'll still aim to collect all components of the [Winter Emperor], [Red Dragon], and [Fire God] series oddities for the satisfaction of a collector's urge.

Watching the Holy Infant depart, Levi felt fulfilled.

"The duplications of ice and fire and weapon refinement are nearing completion. Next are the duplications of metal and array, body refinement, and pharmacy."

The day the three duplications achieve legend is the day Levi's grand vision is realized.

...

At seventy years old, Heim emerged from seclusion, emanating the aura of the fourth-circle.

In just sixty years of cultivation, he has broken through the Four Realms consecutively, a miraculous speed.

Levi urged Heim to proceed cautiously, fearing his foundation might be unstable.

Truth Oddities and such, he hasn't allowed Heim to refine yet either.

With Heim's current potential, he doesn't need oddities to smoothly reach the primordial soul stage.

For such a peerless talent, advancing cultivation quickly isn't difficult.

What's most challenging is keeping the heart and battle skills advancing in sync for comprehensive improvement.

Thus, Levi hasn't coddled Heim like a canary in the Emperor's Palace.

Chapter 2426: Mythical Star Butterfly Dragon! Dragon of Salvation!

Instead, let him cultivate normally in the Tower of Dawn and participate in the regular blood battles.

He only needed to occasionally come here for supplementary lessons.

His temperament hadn't changed since he was a child; he remained just as tranquil.

Many wizards who have lived for hundreds of years cannot match it.

Levi would also occasionally, unintentionally test Heim, to see if he could reveal any clues of being a Legendary Wizard.

The outcome was still all normal.

"Heim, in the upcoming period, you don't need to come to the Emperor's Palace. Spend more time at home with your parents," Levi advised.

Heim had the demeanor of a mature youth.

"I understand, teacher. Thank you for your guidance over the years. I won't forget it," he said.

After thinking it over, Levi earnestly said:

"Heim, no matter what achievements you accomplish in the future, never forget your parents. Think of Lillian, who carried you for three years. Do you remember?"

Heim replied: "I understand, teacher."

...

Before departing, Levi made a round of the various major organizations.

The Witch's Family, where Windwalker Lisa is now a senior fourth-circle wizard.

To this day, it's been over a hundred years since the Witch's Family merged into the Ancient Dragon Continent.

A few years ago, another {Lake Witch} was newly born, bringing the total number of Primordial Soul Witches to 10.

Although still in decline, things have finally begun to improve.

Besides the 10 witches, there are also 2 primordial soul wizards.

They came in these years, all of them nomadic wizards. .

The blood battles turned many wizard organizations and families to dust, increasing the homeless, and the number of nomadic wizards surged.

Additionally, with the development of the Council Treasury being exchanged by the whole society, the originally solidified wizard class has begun to loosen a bit.

This is also good news for the vast number of nomadic wizards.

Dusk Holy Temple and the Ancient Dragon Empire are these two grand knight organizations.

They can almost ensure the birth of 3 to 5 level-six experts every hundred years, and the pace is still increasing.

Offsetting with the level-sixes who fell due to the blood battles and other natural and man-made disasters, it's enough to ensure a stable level-six growth on the Ancient Dragon Continent.

Even if there is a net increase of one level-six every hundred years, it is already very fast.

The lifespan of a level-six is two thousand years, with knights generally having even longer lifespans.

Accumulating in this way, including the existing level-sixes,

The level-six experts on the Ancient Dragon Continent are expected to exceed three figures by the end of its second millennium.

Aliens introduced by Levi from ancient towers or Multidimensional Planes are also taking root and beginning to multiply.

Levi's goal is that by the end of the third millennium on the Ancient Dragon Continent,

The total number of level-sixes from all organizations and races combined should reach at least three hundred.

This sounds incredible, but in the current context, it is not impossible.

The premise of ensuring efficient growth is sufficient resources.

The key to resources is expanding revenue sources and reducing expenditure.

There are many channels for expanding sources, such as blood battles, the Abyss, black beasts, and new worlds like the Heavenly World.

Furthermore, as the Star Castle plan takes shape, expeditions will inevitably have to be sent to explore the Multidimensional Plane to proactively acquire resources.

Reducing expenditure is also crucial.

For instance, improving weapon refinement, Mechanical School technology, etc., to enhance the utilization of various resources and avoid waste.

Of course, in the distant future,

once the number and quality of the transcendent grow sufficiently, it may again fall into a resource predicament and begin to stabilize and stagnate.

This is an unavoidable objective law.

In short, in this era, there's a lot that can be done.

Many wizard organizations have grasped the opportunity to soar, just like the Ancient Dragon Continent.

Many wizard schools, and emerging high-level wizard organizations, have already essentially replaced the positions of the original top wizard organizations.

As Great Nora's geographic landscape opens up, the early structure will inevitably undergo tremendous changes.

The Ancient Dragon Continent is just the most typical and prominent among them.

...

End of the year.

The Blood Battle Auction arrived as scheduled.

This time, Levi prepared a full 20 billion in cash.

Elena and Triss were also full of confidence.

Levi's target remained two types of hard currency: materials and oddities.

The auction process was still a dull contest of monetary power.

The first lot that surprised Levi was a Frozen Giant Pillar that exuded a chilling frost.

The pillar stood ten thousand meters high, with snowflake-patterned lines encircling its surface.

The host introduced it as ten-thousand-year-old Ice Flower Wood!

Discovered in a new continent dominated by an ice world, this was an extraordinary treasure.

It was the perfect item for School of Ice wizards to refine a wizard tower.

The starting price was as high as 3 billion Aether Stones, much more expensive than Bright Moon Artifact.

As soon as this item appeared, School of Ice wizards present exchanged glances.

Their cultivation wasn't bad, with several eighth-circles among them.

But the problem was, a single piece of Strange Wood wasn't enough to refine a wizard tower.

Buying it meant investing more money.

Some people, hoping to score a bargain, raised the bid.

Regardless, 3 billion for ten-thousand-year-old Strange Wood was always a profit.

But their financial power couldn't compare to Levi.

As for this item, he was determined to win it.

Without any competitors, he easily acquired the treasure for 3.5 billion Aether Stones.

After all, the Frost School had less demand; if it were the Burning Faction, this Strange Wood would cost at least 8 billion Aether Stones.

Afterward, Levi went on to acquire numerous rare Heavenly Materials and Earthly Treasures.

Just the level 8 metals alone totaled five types.

He also obtained two pieces of Void God Crystal, necessary for a promotion to eighth circle, totaling 3 billion.

Along with the reserves from the Witch's Family, Three Avatars, Elena, and Triss's ascensions to the eighth circle, there was no need to worry about Void God Crystal issues.

Additionally, he acquired one Level 8 Void Treasure Pearl, valued at 1.2 billion, for refining the Eight Ring Breakthrough Potion.

The remaining potion materials, with their strength, they could easily hunt level 8 demons to acquire.

Out of trust in his luck, Levi spent 2 billion Aether Stones to purchase five sets of Dark Treasure Maps at the auction and market stalls.

This thing was similar to opening a blind box, with few big profits and a considerable waste of time.

But he previously gained research knowledge on Black Phoenix and Thousand-Year Life Extension Potion, and had a taste of gain.

Coincidentally, he also wanted to travel across planes for a bit, so he seized this opportunity to try his luck, turning a single bike into a motorcycle.

Just like that, Levi's 20 billion was unknowingly spent.

He consoled himself, saying it was for boosting the internal demand of the Wizard World, contributing to GDP, and supporting the blood battles!

Others also had a fruitful harvest.

Elena also acquired some materials for refining wizard towers, and secured a Sky-level {Water King's Pearl} from the Water King Series.

She and Triss jointly purchased a book of potion knowledge titled "Old Man and Medicine," spending a total of 4 billion Aether Stones.

This was an incomplete version of the inheritance from an ancient Grand Wizard, the {Eternal Youthful Witch Luo Fu}.

It is said this Grand Wizard lived up to nine thousand years without transforming into a lich.

He made significant contributions to the field of life extension, and the inheritance book records hundreds of original primordial soul potions.

The two planned to study it carefully in the future.

Chapter 2427: Ayak's Bizarre Adventure! Forty Years of Cultivation in a Foreign Land, Worlds Fused!

The Holy Infant did not participate in this auction; he is secluded in Fire Dragon Sky Work, stabilizing his spiritual force.

Victor and Gandaph purchased numerous materials for weapon refinement on his behalf.

Victor himself spent 3.3 billion Aether Stones to successfully acquire the last oddity of the Golden Emperor Series.

Bright Moon Artifact: Golden Emperor's Chain.

After hundreds of years, the Golden Emperor Series is finally completed.

Upon refining it, Victor's companion creature [Golden Emperor] reached perfection, and his metal elemental talent gained a significant boost. .

His spiritual force increased by 190 points, reaching 11,233 points, not far from the Seven Rings Limit.

Next, Victor only needs to collect the [Silver King Series] and [Golden God Series].

The foundation of talent before ascending to legendary is set.

The cultivation after this is smooth sailing.

Gandaph's gains from this trip mainly involve various potion materials and potion formulas.

Next is the transformation period for Gandaph Pharmacy.

As a leader, he must ensure his foundation is solid, and his level of pharmacy must be proficient.

Levi also instructed him to be fully involved in the life-prolonging potion research and learn extensively from Lucy and Triss.

As for body refining artifacts, they are too rare; none were seen at the auction.

For common Truth Oddities, Gandaph did not spend money at the auction; exchanging them with War Merit is enough.

Gandaph is not in a hurry; the [Dragon Elephant Holy Body] is quite powerful.

It has been refined using 3 Bright Moons and 5 Morning Star-level body refining artifacts.

...

On this day.

Buzz buzz buzz!

A spherical fortress with a diameter of ten thousand meters flew out from underground on the Ancient Dragon Continent.

The first prototype of the Star Castle Project officially began trial operations.

Researchers from the Mechanical School, along with Levi and Herman, were present to observe.

The surface of the fortress is coated with Deep Dream Alloy, which is hundreds of meters thick.

Eight level six knights or wizards were attacking the fortress without holding back using their respective methods.

All assault landed on it, much like stones thrown into a lake, creating a layer of ripples and being skillfully deflected.

That is the surface defense barrier at work.

Half a day later, the barrier was finally broken by the group.

But relying on its own strong alloy, it could still steadily withstand attacks from eight level six powerhouses.

Later, even level 7 experts were deployed to attack it, unable to break through its defense system in a short period.

Remember, this is in a state of passive assault.

Under normal circumstances, the Star Castle can flee or counterattack.

Levi said, "From the current observation, as long as it's not a level 8 powerhouse, the Star Castle can comfortably handle it—impressive."

Don't be fooled by the current abundance of level 8 powerhouses in the Blood Battle Battlefield; it's because two powerful civilizations are at war.

In reality, placed in the vast Multidimensional Plane, how many level 8 powerhouses are there?

According to the Council of Ten Thousand Clans' standards, they are already Venerables in a realm.

Herman said, "Yes, ensure energy supply, and there's no issue with endurance; the Star Castle can undertake a millennium-long plane journey."

Currently, the Star Castle's energy is mainly divided into three systems.

First is biological energy, using extraordinary oil refined from parts of demons, Nightmare Creatures, and black beast flesh and blood to generate energy through burning.

Second is elemental energy, relying on solidified arrays to continuously absorb elemental power from the heavens and earth and store it.

Third is Aether Stone energy, which is the universal fuel for various mechanisms, arrays, Wizard Tools, and other transcendent objects.

Among these, the second energy source is the core and foundation for long-duration travels.

Other energy sources, once depleted, cannot be replenished at any time in the Land of Darkness.

Herman said, "Next, we need to train specialized Star Castle Mechanics; the Hall Master will surely be looking forward to it."

Levi laughed and said, "Thank you for your hard work; strive to develop more Star Castles and allow the entire Ancient Dragon Continent to move into them as soon as possible."

In doing so, the Ancient Dragon Continent will become the Wizard World's mobile War Fortress.

The future situation in the Blood Battle Battlefield is becoming increasingly complex, and high mobility is essential.

With the protection of the Star Castle, the safety for mortals residing within it is greatly enhanced.

The damage caused by the Blood Battle to the Ancient Dragon Continent will be minimized.

Moreover, if necessary, Levi can quickly gather all Star Castles to send everyone into the Ancient Banyan Fairyland.

Then he will take everyone and preserve the flame of various civilizations and races, including Wizards and Knights!

Wandering deep in space in search of a new home.

Of course, that is the worst-case scenario.

Given the geographical position of the Ancient Dragon Continent, if that day arrives, the Wizard World will be on the brink.

At the last moment, he won't abandon Nora.

...

"Come back soon."

Inside the Emperor's Palace, Elena lay in Levi's arms and gently said.

Levi said, "I understand; practice well on the Ancient Dragon Continent, and don't go hunting demons before reaching the eighth circle."

Elena nodded.

She currently lacks nothing; steadily cultivating her realm is the most important.

Levi said, "Octopus Brother, Black Feathered Pheasant, Ancient Giant Turtle, Thunder Crocodile, Frost Giant Eagle, these guardians are at your disposal, face danger and let them handle it first."

The high ranks of the Ancient Dragon Continent are too responsible, many leading by example.

In other organizations, these Guardians wouldn't be as leisurely as they are now.

Levi said, "By the way, if you face danger, contact me through the Twilight Round Table. I have ways to save you."

Levi's [Unhidden Secret Word] allows him to disregard spatial distances and send anyone perceiving him into the Nightmare World.

Not just enemies, allies too can be transported.

Chapter 2428: Ayak's Bizarre Adventure! Forty Years of Cultivation in a Foreign Land, Worlds Fused!

As long as Elena's true form is instantly sent into the Black Dragon Territory of the Nightmare World, she can escape attacks from the material world.

When it's safe, Elena can be sent back.

This is a secret usage method Levi thought of over the years, tested and proven effective.

Elena "sees" Levi through the round table; this is a kind of perception.

The Nightmare Traveler technique is an amazing cultivation method; if used well, it can achieve many clever maneuvers.

Elena felt warm in her heart.

She whispered, "You should also say goodbye to Triss."

Levi said, "I will. Before leaving, I need to explain some things to the leaders of various organizations."

One month later.

Levi arranged everything and said goodbye to Triss, then left the Ancient Dragon Continent, traveling above the Void.

He began his longest journey to the Land of Darkness.

...

Nora Calendar, 833.

Blood Battle, 622.

During the fierce clash between wizard civilization and Abyssal Civilization.

Across the boundless Multidimensional Plane, small-scale wars and frictions were also unfolding.

Pangong Domain, Pangong Plane.

Two alien races emitting level eight aura suddenly arrived.

They gaze upon the scarred earth, the cracked crust, the erupting magma, and the rampant demonic aura and demons.

On the ground, a powerful dwarven figure transformed by magic wandered aimlessly.

"The Pangong Empire is finished..."

"No presence of the Dagon Venerable sensed."

"It fled."

"Chase it. It doesn't seem far."

These two are enforcers of the Council of Ten Thousand Clans.

Recently, the large world where the Blue Realm is located encountered an Abyss invasion.

The stationed level 9 Hidden One was killed, and the branch's treasury was looted.

Many precious Heavenly Materials and Earthly Treasures, and exotic treasure items were lost. .

Even included treasures like the nine-level Turtle King Fruit and Quasi-Ninth Level Exotic TreasureNetherworld King's Armor.

Some Venerables, walkers blinded by profit, took advantage of the situation and stole treasures, fleeing.

Among them was the Dagon Venerable attending a meeting in the Blue Realm.

They are on a mission to track these traitors.

The Council of Ten Thousand Clans developed too rapidly in the late stage.

Adding to the fact that members are scattered across the Pan-Plane, with the sky high and emperor far away, the quality of personnel varied widely.

Over the years, the organization's ancients have been united, pouring in countless efforts to develop a powerful supreme treasure, the Covenant Sword.

This is to alleviate the current stage of the Council of Ten Thousand Clans, where high-level members harbor ulterior motives.

Ordinary oath methods are just about dealing with regular walkers.

For emissaries and venerables, which include various disorderly characters, the constraints are weak.

Over the years, the Council of Ten Thousand Clans barely caused any significant losses to the Wizard Council.

Lack of united efforts among members is an important reason.

Once the Covenant Sword forms, it will stand alongside the Dark Temple as a supreme treasure.

It's the foundation upon which the Council of Ten Thousand Clans can stabilize.

...

Pangong Domain.

"Caw caw caw!"

A frosty blue crow dragging frosty particles streaks across the night sky like a comet.

After over 630 years of travel, Ayak was tired.

It witnessed 124 instances of Civil War, one-third of which involved Abyss Demons.

It saw 13 worlds destroyed before its eyes.

It saw countless lives vanish in an instant.

Death was as common as roadside wildflowers.

It saw a gigantic serpent of stellar light, its head and tail connected, devour a world edging towards doom.

To it, Ayak was possibly no more than a small seed.

So it took one of the serpent's fallen scales.

It saw a massive web that obscured the sky hidden within a world.

An angel from the Lower Realm fell into its trap, instantly transforming into a dried mummy, its divine power exhausted.

The angel's struggle damaged part of the web, drifting aimlessly.

Ayak took some of it to make a plush bed for its nest.

As a traveler and observer.

In corners unseen by wizards, it witnessed the individual stories and joys and sorrows of countless lives.

Now, the materials for nest-building are almost complete.

Time to go home and build a little nest.

After so many years apart, surely the master missed it?

Tired from flying.

Ayak randomly found a small world to rest for a while.

In the desert, the wide Ron River flowed quietly.

Ayak descended, drawn by a dark golden glimmer.

From experience, glowing objects are treasures.

On the riverbed, a dark golden dagger lay quietly.

Collected! To decorate the nest.

Ayak opened its mouth, sending it into the dimensional stomach.

Rumble!

A thunderous explosion almost made the entire small world tremble.

The river was instantly blasted upward, the crust folded layer by layer, magma erupted.

Shocked, Ayak hurriedly flew into the sky.

It turned out that two groups were fighting.

One side was a burly dwarf.

Its upper body clad in a dark, ink-like treasure armor emanating sinister gray aura.

Countless twisted undead spirits surrounded it, making it hard to look directly at.

The dwarf wielded a massive warhammer, and each strike sent tremors through the void.

Beneath him was a giant dragon clad in red flame steel armor, radiating intense Dragon's Might.

Its bloodshot golden eyes exuded a brutal aura.

This is the pure-blooded Dragon Clan!

The other side consisted of two level 8 alien races, their faces shocked.

"Dagon, you actually have a giant dragon?"

"Kekeke, surprised, aren't you? You dare to capture this Emperor? You're seeking death!"

Chapter 2429: Ayak's Bizarre Adventure! Forty Years of Cultivation in a Foreign Land, Worlds Fused!

"Damn it, without the giant dragon assisting you, how could you, with mere Level 8 Middle Stage cultivation, be a match for us?"

"Hmph! Having a giant dragon is my own strategy!"

"Leave the Netherworld King's Armor and come back with us obediently; the organization is in need of manpower, and you can be spared the death penalty."

"It's you who should stay. I've already abandoned the Pangong World. No one can make me, the Emperor, submit!"

On one side are two individuals at Level 8 Late Stage, and on the other is a pure-blood dragon at Level 8 Peak.

This battle can only be described as terrifying.

Ayak dared not spectate, fearing it might get involved.

It quickly sneaked away, deeply understanding its master's essence of stealth. .

Sigh, yet another innocent world, doomed for destruction.

Must these powerful figures always wage war among themselves?

Why not pick up trash like me, isn't it delightful?

One month later.

Aya rested on a meteorite.

Suddenly, the void cracked open, and a silhouette plummeted to the ground with a thud.

Ayak was startled; this seemed to be one of the alien races from the previous conflict.

However, now it was left with only half a body, its energy weakened to the extreme, as if only a breath away from death.

"Damned... damned Dagon!"

The Ice Barbarian muttered, feeling the life slipping away.

Endless scorching from the unique flame "Destructive Heart Flame" from the Flame King Dragon was consuming its life force and even its soul.

It saw an ice-blue crow pierce through the sky.

This reminded it of the Ice Crow from its homeland, an ice world known as the Snow Wood World.

At the center of the world stood an enormous Snowflake Divine Tree, said to have been planted by ancestors ten thousand years ago.

Unfortunately, its homeland had already vanished, and the Ice Barbarian chose to wander.

Because it heard that wizards were utterly evil, selfish, knowing that going to Nora would certainly lead to a bad end.

After joining the Council of Ten Thousand Clans, it vowed to fight against Nora to the end.

Yet, after a busy life, it seemed to have gained nothing.

It wished to reminisce some more in its final moments.

Boom!

An iceberg descended from the sky, utterly ending its life, dispersing its last trace of vitality.

Ayak peeked from the void cautiously.

Why didn't this person fight back?

I, Ayak, today achieved the incredible feat of slaying a Level 8 Late Stage expert with the body of a Level 6 Companion Spirit!

This is an achievement that my master, after cultivating for a thousand years, failed to achieve even with cheats!

"Caw, caw, caw!"

It truly made Ayak feel mighty.

Soon after, the remnants of terrifying Dragon Flames reduced the alien expert to ashes before dissipating.

In the same spot, only a blue ring emitting a chilling aura remained.

Aya nonchalantly picked it up and continued heading home.

...

Emperor Dagon severed the head of the alien enemy before him with one swift sword stroke, grabbing it and placing it before the Flame King Dragon.

The alien sneered, "Kill me. My life was given by the organization; I will never beg for mercy."

Dagon looked at his severed arm, from which blood flowed freely.

"Was it worth it for you to vie for this broken armor?"

Without waiting for a reply, Dagon said:

"Ogre! Dragon Flame!"

Boom! The terrifying Destructive Heart Flame erupted, obliterating everything.

Dagon picked up the fallen spoils of his enemy.

"The Level 8 Peak Flame King Dragon paired with Steel Wings already has such a terrifying effect. If it advances to Level 9, this vast Pan-Plane, where could I not go? I might even leave the Pan-Plane, far from these conflicts, to find a paradise and establish my new world!"

"Unfortunately, the Netherworld King's Armor is missing a vambrace, already incomplete, and now even less complete."

During the great battle, it didn't pay attention and lost an arm.

Though the arm could grow back, a rare treasure piece was missing, taken by one of the enforcers, an Ice Barbarian.

[Netherworld King's Armor] was an organization bounty set on Gandaph's rare treasure.

It was once a powerful Level 9 Treasure, a composite armor formed of several pieces.

Due to a mishap, only the upper body pieces remained, making it quasi-ninth level.

Sadly, after hundreds of years, Gandaph is still intact, and the treasure merely gathered dust in the organization's vault.

Until the Abyss invasion, the Pangong Plane also fell.

It gave the broken Emperor Dagon an opportunity.

In the chaos of battle.

Another Level 8 Late Stage Green Scale Clan expert from the organization, Green DemonRox, obtained the [Nether King Helmet] and [Turtle King Fruit].

Dagon seized the Nether King Chest Armor and two vambraces.

This greatly increased its strength; moreover, the reared Flame King Dragon was near maturity, so it brazenly defected from the Council of Ten Thousand Clans.

Leaving early was also wise; once the [Covenant Sword] emerges, leaving would be much harder.

Now it stood alone, with no attachments, no weaknesses.

Next, it would capture some strongest weapon craftsman and weapon craftsmen among the Pan-Plane civilizations.

Once Ogre matured, upgrading its [Wings of Destruction].

Emperor Dagon would be unmatched below Level 10, above ten thousand others!

Too bad, Master Fire Dragon grew too fast, being a protected focus of the congress.

Otherwise, he alone could achieve Dagon's goal.

...

Black Swamp World.

"Master, you're back."

The Blood Vortex Venerable expressed his delight, as the master hadn't returned in over a decade, leaving it anxious.

It feared the master would forget it, the sign of many great people with forgetfulness.

It could wait, but the Black Swamp World was nearing collapse.

Without absorbing Mana soon and becoming the Secondary Plane Sovereign.

In a few hundred years, Nora might see a new Black Swamp Continent emerge.

Chapter 2430: Ayak's Bizarre Adventure! Forty Years of Cultivation in a Foreign Land, Worlds Fused!
(part 4)

At that time, I can only wait to be 'archaeologically discovered' by the wizard battle group.

Levi said: "Mana, let's begin."

In the Ancient Banyan Fairyland, the ancient banyan tree shook and rustled.

Mana appeared, her face solemn.

"Blood Vortex Venerable, follow my instructions precisely, do not make any mistakes, or you might lose your life!"

Blood Vortex said: "Thank you, Sister Mana."

In the Ancient Banyan Fairyland, Mana is the undisputed leader, regardless of cultivation.

Levi took out the Holy Grail of Immortality and delved underground until he reached the Earth Core World.

Under high pressure and heat, an invisible will surged.

This was the plane consciousness, faintly visible a shadow of a leech in its midst, blending seamlessly. As the Plane Sovereign, Blood Vortex Venerable and the plane consciousness were indistinguishable.

If Blood Vortex Venerable died, the plane might be fine; but if the plane disappeared, Blood Vortex Venerable would surely die!

Levi placed the Holy Grail of Immortality at this location.

This is a nine-level treasure, naturally unaffected by the Earth's core.

He said to the Sea Dragon Huang's artifact spirit: "Are you ready too."

Sea Dragon Huang nodded.

Soon after, Levi arrived in the fairyland and said:

"Lopez, Red King, Heavenly Slaughter, Ronan, Black Phoenix, all five of you have Level 8 Cultivation and are among the best. This fusion will take a longer time, I might close the long-term retreat, you must protect the fairyland... Also, Lady Idrasala, please look after Mana and keep an eye on those Dragon Palace members for me."

"No problem!"

"Don't worry, boss, with me, Ronan here, the Ancient Banyan Fairyland will be safe!"

The girl transformed from the Immortal Banyan Dragon asked: "Do I get to drink if I complete the task?"

"Of course you do."

Levi pinched the baby-fat face of the Immortal Banyan Dragon, smiling.

The Immortal Banyan Dragon quickly dodged in a panic and returned to the banyan tree.

"Stop pinching, you'll make it bigger."

Quickly, all departments returned to their positions, and the intensive plane fusion plan began.

According to calculations, Nora absorbs 10 worlds on average each year.

Moreover, as Nora expands, this number is increasing.

Refining the Black Swamp World has no impact on Nora's great plane convergence.

...

Time passed.

Three years later.

Nora Calendar 836 year, Blood Battle 625 year.

Levi is 1260 years old.

He spread his perception and gazed at the sky of the Black Swamp World.

Faintly visible is a giant tree shadow that spans heaven and earth.

The root system of the giant tree extends in all directions.

Countless green leaf shadows, scattered with the air currents and ocean currents.

As if the whole world turned green.

Where the world consciousness is, the leech shadow, ancient banyan shadow, and world consciousness are in a subtle balance.

"Blood Vortex, gradually guide the world consciousness to accept me, I will start assimilation."

"Understood."

As Mana gradually took the lead, the long process of assimilation and absorption began.

The Black Swamp World is a complete medium world, far beyond the worlds Mana previously fused, more than ten times larger than the Ancient Banyan Fairyland.

Levi estimated that after refining it, even if Mana's growth is extremely slow, she could achieve level 8.

By then, the Ancient Banyan Fairyland would be more stable.

Levi's early strategy of closing the gate to trap the dog might be rebooted.

Open proficiency panel.

"Calamity Coin" and "Summon Hell Monarch," these two spells, are already at the eighteenth tier.

These sequential spells, with early foundations, are easy to cultivate to the eighth-circle level.

"Thousand Thunder" and "Eight-direction Fierce Sun," also became Levi's first batch of peak-level spells, advancing to the nineteenth rank maximum.

After testing, the full-powered "Eight-direction Fierce Sun" is already more powerful than the Fire Dragon Tribulation.

In terms of power, innate spells are still inferior to the perfection of eighth-circle sequential spells.

Certainly, Eight-direction Fierce Sun's consumption is also greater, and casting speed is not as fast as the Fire Dragon Tribulation.

Overall, each has its advantages and disadvantages, and flexibility is required based on the combat situation.

Other spells haven't changed much, nothing more to say.

The official fusion has just begun, Levi continued his retreat.

...

Cultivation knows no time, forty years, in the blink of an eye.

Levi still spent his first long retreat outside the Ancient Dragon Continent in a place.

His spiritual force increased every year, and the momentum of his being changed year by year.

On this day, he opened the Twilight Round Table; Elena contacted him, not knowing what it was about.

"Guess what day it is today?"

Elena suddenly asked mysteriously.

Levi felt a stir in his heart, calculated, and then smiled:

"Unknowingly, I'm already 1300 years old, sorry, retreated too long, forgot your birthday yesterday."

Elena: "It's okay, it's not like it's the once-in-a-century birthday... Happy birthday to you, when are you coming back?"

Levi: "Not sure, it might still take some time."

Elena sighed: "In the blink of an eye, my 15th century of life is almost over, we've known each other for more than eleven hundred years."

Levi: "I've known you for almost thirteen hundred years, I knew you since I was young, you just didn't hear about me."

Elena: "I've got good news, my dispersed 12 Witch Marks have all returned now, and I've cultivated 13 sixth-ring Witch Marks. Triss has also retrained; oh, and my wizard tower is completely finished, I'll show you when you get back."

Levi: "Keep up the good work, sixth-ring Witch Marks are just the beginning, there's still the seventh-circle, how are your knight and energy sect?"

Elena: "Knight is already at level 6 peak, energy sect level 6 late stage, I've gained a lot of insights on the energy sect over the years, might break through first, knight still needs to prepare materials for evolution."
