

Wizard 244

Chapter 244: Blood Beast Limit Breaker, Deep Sea Level 2!

(2)

Some apprentice called Witch Marlene Granny Marlene.

This was because these young people would ask Granny Marlene for help when they were in trouble. Granny Marlene would guide them when she had the time.

"This Gray Tower is pretty good."

Levi muttered to himself.

The prescription that the Witch Marlene gave him was called the Bread Potion.

This was the most common potion formula for apprentice wizards, so it was not considered precious.

The reason why it was called Bread Potion was because the effect of this potion was to fill one's stomach and replenish one's strength.

It was similar to biscuits.

Ordinary wizards would drink a small bottle of Bread Potion every morning and not need to eat for the whole day. This way, they could save a lot of time for cultivation and research.

Since coming here for two days, Levi had not seen any wizard cook. He was the only one who cooked in the kitchen every day.

"Life without good food is too boring."

Levi went to White Sail Alley and spent 1 point to buy a full set of potion refining equipment. This equipment was of much better quality than the ones he had in the human world. They were more professional and could be used for a long time.

Looking at the 4 points on his bracelet, Levi could not help but speed up his pace.

He divided the ingredients for the Bread Potion into ten portions, and then he first studied the formula. With his current Pharmacy standards, he could basically understand it even though it was a potion formula. This was because after he read the potion formula, he realized that the sacred medicines formulas recorded in the Book of Kungu were actually potion formulas.

The principles of the two were similar, and Levi learned quickly.

In just one afternoon, after wasting seven sets of materials, Levi successfully concocted a Bread Potion.

[Pharmacy Proficiency +20]

The level 4 Pharmacy skill that had not been used for a long time also began to increase in Proficiency.

Levi was overjoyed. As expected, this simplest potion was not a problem for his level 4 Pharmacy skill.

After seven attempts, he succeeded.

After that, Levi refined three portions of Bread Potion.

Bread Potion was the cheapest potion. One point could buy a large bottle from the potion shop, and a large bottle was enough for an apprentice wizard to drink for half a year.

As such, this formula was not worth much, and Levi would not refine this potion to earn points.

He drank two small bottles himself and was not full.

However, his stamina had recovered a little.

Other apprentice wizards might be able to fill their stomachs with a small bottle.

However, Levi had to drink at least ten bottles to be full.

After all, he was a top-tier grand knight, and if he wanted to fill up his whale sac, Levi would have to drink at least a large bottle.

However, this potion, to be honest, tasted bad. It was very bitter.

Levi felt that it was better to eat.

This was one of his few pleasures.

Drinking potions every day to survive made him feel like a complete robot.

After refining the potion, Levi performed a breathing technique and lay on the bed to rest.

"I wonder how the territory is doing?" Levi murmured softly.

The flow of time in the Realm of the Unbelievers was exactly the same as in the human world.

In essence, this was a world, but it was a different parallel plane.

This was a sub-dimensional portal, so Levi did not have to worry about a day in the sky being equivalent to a year on the ground.

Wizards did not have the habit of keeping track of time. They had a long lifespan, so they did not have a concept of time.

Levi did not think about the territory and went to sleep comfortably. Refining potions also consumed spiritual force.

The next morning, Levi had no classes.

He took the Bread Potion that he had refined yesterday and found Ms. Marlene, who was preparing to go to class.

Ms. Marlene glanced at the Bread Potion, sniffed it, and drank it in one go.

"Gulp."

Ms. Marlene's stomach growled.

"Not bad, Levi. Your Pharmacy skills are much better than I thought. Many high-level apprentice wizards are not as good as you. From now on, you are my pharmaceutical apprentice." Witch Marlene smiled.

She felt that she had found an apprentice with good Pharmacy talent.

"Thank you, Ms. Marlene. You should go to class. I won't disturb you anymore.

If you need anything, just call me at any time." Levi smiled happily.

Marlene patted Levi's head, which made him feel a little strange.

He felt that this teacher really treated him like a child.

But thinking about it, it made sense. Witch Marlene was said to have lived for 150 years. According to the maximum lifespan of a First-Circle Wizard, she was already in her later years.

She seemed to have the same talent as Levi, a Children of Chaos. It was already not easy for her to become an official wizard. Without a cheat like Levi had, and without other fortuitous encounters, it would definitely be very difficult for her to break through to a Second -Circle Wizard.

It was said that a Second-Circle Wizard had a lifespan of 300 years.

Once they reached the third circle and became an Intermediate Wizard, they would have a lifespan of 500 years.

Witch Marlene went to class. Before class, she gave Levi some tasks and two new potion formulas. One of them was called Smurf's Leap, and the other was Blood Elf's Wail.

She told Levi to use these two potions as practice until he could master them and increase the refinement success rate to at least half.

Levi would then be able to provide her with assistance in refining a precious potion.

If Levi could help her complete the production of that potion, she would give Levi an additional reward of points.

"Smurfs and Blood Elves...."
